July 13th, 2023

Lindsi Swartz, MBA, MCM, Director
Accident and Health Rate and Policy Form Review
Pennsylvania Insurance Department
Email linswartz@pa.gov
Phone: 717-265-3123

Dear Ms. Swartz:
The following is in response to the Department's questions as of July 7th, 2023:

1. Company Name & NAIC Number: Geisinger Health Plan – NAIC# 95923
2. Market: Small Group
3. Off Exchange only
4. Effective date of coverage: January 1, 2024
5. Average rate change: -3.5%
6. Range of rate change requested: -7.2% to 5.1%
7. Total additional annual revenue generated from the proposed rate change: -$454,649
8. Products: HMO, POS
9. Rating areas: 2, 3, 5, 6, 7, and 9 (no changes from 2023)
10. Metal Levels & Catastrophic Plans: Bronze, Silver, Gold, and Platinum plans
11. As of February 1, 2023: 1,543 covered lives and 1,045 policyholders
12. Number of plans offered in 2024: 6 platinum plans, 15 gold plans, 5 silver plans, and 1 bronze plan (for a total of 27 plans). There are no changes from 2023.
13. Contract form #: M-152-123-F Rev. 1/24, M-152-167-F Rev. 1/24, M-152-365-F Rev. 1/24; SERFF #: GSHP-133664985; Binder ID #: GSHP-PA24-125116252
14. HIOS issuer ID: 22444
15. Summary of changes made in response to questions dated July 7, 2023:
    a. Revisions were made to the Actuarial Memorandum (changes highlighted in yellow)
        i. In response to #5, pages 3 and 6
        ii. As a result of this change, the Reliances on page 10 was also updated

For a detailed explanation of our rate development, please refer to the "actuarial memorandum and attestation" uploaded in SERFF under the "supporting documentation" tab.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

Mark A McCullough

Discrimination is against the law

Geisinger Health Plan, Geisinger Quality Options, Inc., and Geisinger Indemnity Insurance Company (the "Health Plan") comply with applicable federal civil rights laws and do not discriminate on the basis of race, color, national origin, age, disability, sex, gender identity, or sexual orientation. The Health Plan does not exclude people or treat them differently because of race, color, national origin, age, disability, sex, gender identity, or sexual orientation.

The Health Plan:

- Provides free aids and services to people with disabilities to communicate effectively with us, such as:
  - Qualified sign language interpreters
  - Written information in other formats (large print, audio, accessible electronic formats, other formats)
- Provides free language services to people whose primary language is not English, such as:
  - Qualified interpreters
  - Information written in other languages

If you need these services, call the Health Plan at 800-447-4000 or TTY: 711.

If you believe that the Health Plan has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, sex, gender identity, or sexual orientation, you can file a grievance with:

Civil Rights Grievance Coordinator
Geisinger Health Plan Appeals Department
100 North Academy Avenue
Danville, PA 17822-3220
Phone: 866-577-7733, TTY: 711
Fax: 570-271-7225
GHPCivilRights@thehealthplan.com

You can file a grievance in person or by mail, fax, or email. If you need help filing a grievance, the Civil Rights Grievance Coordinator is available to help you.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights electronically through the Office for Civil Rights Complaint Portal, available at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf, or by mail or phone at:

U.S. Department of Health and Human Services
200 Independence Avenue SW., Room 509F
HHH Building, Washington, DC 20201
Phone: 800-368-1019, 800-537-7697 (TDD)

Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html.

ATTENTION: If you speak a language other than English, language assistance services, free of charge, are available to you. Call 800-447-4000 or TTY: 711.

ATENCIÓN: si habla español, tiene a su disposición servicios gratuitos de asistencia lingüística. Llame al 800-447-4000 (TTY: 711).

注意：如果您使用繁體中文，您可以免費獲得語言援助服務。請致電 800-447-4000（TTY：711）。

CHÚ Ý: Nếu bạn nói Tiếng Việt, có các dịch vụ hỗ trợ ngôn ngữ miễn phí dành cho bạn. Gọi số 800-447-4000 (TTY: 711).

ВНИМАНИЕ: Если вы говорите на русском языке, то вам доступны бесплатные услуги перевода. Звоните 800-447-4000 (телетайп: 711).

ACHTUNG: Wenn Sie Deutsch sprechen, stehen Ihnen kostenlos sprachliche Hilfsdienstleistungen zur Verfügung. Rufnummer: 800-447-4000 (TTY: 711).

주의: 한국어를 사용하시는 경우, 언어 지원 서비스를 무료로 이용하실 수 있습니다. 800-447-4000 (TTY: 711) 번으로 전화해 주십시오.

ATTENZIONE: In caso la lingua parlata sia l'italiano, sono disponibili servizi di assistenza linguistica gratuiti. Chiamare il numero 800-447-4000 (TTY: 711).

ملحوظة: إذا كنت تتحدث اذكر اللغة، فإن خدمات المساعدة اللغوية تتوافر لك بالمجان. اتصل برقم 800-447-4000 (رقم هاتف الصم والبكم: 711.

ATTENTION : Si vous parlez français, des services d'aide linguistique vous sont proposés gratuitement. Appelez le 800-447-4000 (ATS : 711).

ACHTUNG: Wenn Sie Deutsch sprechen, stehen Ihnen kostenlos sprachliche Hilfsdienstleistungen zur Verfügung. Rufnummer: 800-447-4000 (TTY: 711).

સુચના: જો તમે ગુજરાતી બોલતા હો, તો નિ:શુલ્ક ભાષા સહાય સેવાઓ તમારા માટે ઉપલબ્ધ છે. ફોન કરો 800-447-4000 (TTY: 711).

UWAGA: Jeżeli mówisz po polsku, możesz skorzystać z bezpłatnej pomocy językowej. Zadzwoń pod numer 800-447-4000 (TTY: 711).

Actuarial Memorandum – Small Group GHP

1.Basic Information and Data

General Information

Company Identifying Information (as included in **Table 0**)

Company Legal Name: Geisinger Health Plan State: Pennsylvania

HIOS Issuer ID: 22444

NAIC Number: 95923 Market: Small Group

Effective Date: 1/1/2024

Company Contact Information

Primary Contact Name: Sarah MacDerment

Primary Contact Phone: 570-214-2348

Primary Contact email address: smmacderment@thehealthplan.com

Filing Information

HIOS Submission Tracking Number: NA

Contract Form Number: M-152-123-F Rev. 1/24, M-152-167-F Rev. 1/24, M-152-365-F Rev. 1/24

SERFF Number: GSHP-133664985

Binder ID Number: GSHP-PA24-125116252

Rate History and Proposed Variations in Rate Changes

Rate History

The recent historical rate increases based on Table 11 are summarized in the table below.

Year	SERFF ID	Average Increase	Minimum Increase	Maximum Increase
2020	GSHP-131915715	16.4%	10.8%	20.8%
2021	GSHP-132364598	15.9%	10.7%	21.0%
2022	GSHP-132824328	7.9%	-4.1%	29.7%
2023	GSHP-133251213	-2.1%	-6.2%	3.7%

For every year 2020-2023, the increases were not uniform but varied by plan.

Proposed Rate Increase

This filing applies to HMO and POS products, sold off exchange in rating areas 2, 3, 5, 6, 7 and 9. There will be 6 platinum plans, 15 gold plans, 5 silver plans, and 1 bronze plan for a total of 27 plans offered in 2024. As of February 2023, 1,543 covered lives and 1,045 policyholders will be impacted by this filing. The proposed overall rate decrease is 3.5% but is not uniform by plan. The increases range from -7.2% to 5.1%. Table 11 shows the increases at the plan level. These increases vary by plan due to benefit changes necessary to maintain the desired metal level as well as changes in pricing and induced demand factors.

Average Rate Change

The average rate change from Table 11, cell AN13 is -3.5% and is entered as the "percent rate change requested" in the SERFF Rate Review Detail Screen. It is the change in 21-year-old non-tobacco premium PMPM (as instructed by the Department).

Membership Count

Table 1 shows the average age and the member months in the experience period of calendar year 2022, as well as the average age and the current members as of February 1, 2023 by age range. The projected member months for the rating period are also included.

Benefit Changes

Several plan's cost sharing elements were adjusted to maintain the current metal tier. The 'Benefit Changes' tab in the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx" summarizes the significant changes made by HIOS ID.

Reason for Rate Increase

The primary components of this rate decrease are:

- URRT Morbidity: 4.5%, row 79 on Table 8
- Risk Adjustment: -3.0%, row 81 on Table 8
- Pricing AV: -4.1%, row 87 on Table 8
- Benefit Richness: -2.9%, row 88 on Table 8

These components are discussed later in this document and are displayed in Table 8 of the exhibits.

Experience Period Claims and Premium

Paid Through Date

The Experience Period data provided in the URRT Worksheet 1, Section I and in Table 2 is incurred in calendar year 2022 and paid through February 2023. The data in Table 2 of the exhibits is consistent with the data provided in the URRT in Worksheet 1, Section 1, except the Allowed Claims and Incurred Claims, explained below. This includes only experience for ACA compliant plans and does not include experience for transitional business.

Premiums (net of MLR Rebate) in Experience Period

Premiums include earned premiums for calendar year 2022 for the Single Risk Pool. Premiums are not reduced by taxes and/or assessments. MLR rebates are not expected to be paid for this block of business. Initial estimates of rebates have been completed utilizing the methodology required for the CY 2022 rebate filing. Estimates suggest that the small group market MLR will be above the minimum MLR target of 80%.

Allowed and Incurred Claims Incurred During the Experience Period

The Experience Period Claims are based on small group ACA compliant business incurred and paid claims with IBNR added for the tail of claims incurred but not reported. Allowed claims are calculated by combining paid claims and estimated member cost share. The Incurred and Allowed Claims in Section I of Worksheet 1 of the URRT are the Incurred or Allowed from Table 2, but also include the Rx Rebates and Capitation. The same IBNR factors were used for both paid and allowed claims. The IBNR factors were based on legal-entity and market segment level claim lag tables. This method is appropriate to assure proper credibility and because timing of claims payment to providers does not vary by market or product.

There were no non-EHB benefits in the experience period.

Geisinger outsources one benefit and therefore has capitation expenses. The capitated expenses cover nurse line. The capitation amount for the experience period is displayed on Table 2 and is included in

both the Incurred Claims and Allowed Claims on Worksheet 1 of the URRT. The capitation charges are uniform and do not vary by age. Row 80 of Table 9 shows the capitation PMPM's for 2023 and 2024.

Pharmacy rebates are listed on Table 2. These rebate dollars would be removed from the Ultimate Incurred Claim liability to the insurer and are removed from the Incurred Claims and the Allowed Claims on Worksheet 1 of the URRT.

The ~~estimated~~ risk adjustment for the experience period is the final CMS risk adjustment amount released on June 30th.

The calendar year 2022 loss ratio, as displayed on Table 2 is 79.42%. The Federal MLR calculation that determines if a rebate is necessary is more complex than the MLR displayed on Table 2. For example, the Federal MLR calculation requires issuers to combine 3 years of experience when determining if a rebate is necessary.

Benefit Categories

Benefit categories are determined by the classification of claims in the Milliman Health Cost Guidelines.

Credibility of Data

The Credibility Manual Rate is a combination of our small group GHP and GQO experience, giving us a more credible manual rate than if we determined them separately by product. Combining the GHP and GQO experience also aids in consistency between the products. Historically, we have seen enrollment move between our GHP and GQO products. It is very important that our premium rates are consistent between products.

To avoid double counting the Experience Period and avoid complicated adjustments to reflect the expected distribution of enrollment in each segment, the credibility of the Experience Period is set to 0.0%. This approach is consistent with the Actuarial Standard of Practice #25. The credibility manual data is shown in Table 2b. Since the credibility manual data is given a weight of 100%, the "blended" data would be the same as the data in Table 2b. The experience period data in Table 2 or 4 does not include data for any transitional business.

Adjustments Made to the Data

The Projected Allowed Experience Claims are adjusted for changes as described in the section below. The Single Risk Pool Adjustment Factors on Table 5 match those on Worksheet 1 of the URRT.

Changes in Benefits

We have no planned changes to the scope of benefits covered.

Changes in Demographics

We are applying a 0.4% adjustment factor to account for the unfavorable demographic shift between CY2022 and our projected 2024 enrollment. This adjustment factor is developed on the 'Manual_Age_Factor' tab of file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". The Change in Demographics factor on Table 5 is 1.004 and is 1.578/1.572.

Change in Other
The only item captured in the "Change in Other" adjustment is our private reinsurance coverage. The Reinsurance adjustment is developed on the 'Reinsurance' tab in the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx".

Trend Identification
Experience data was trended using an annual trend of 6.8%. Table 3b shows the breakdown between service category and cost vs. utilization. Table 3b uses the PMPM by service category as weight to develop the total composite trend.

Our trends are analyzed at a higher level than these individual segments and are the same for the experience data and the credibility manual data. We have combined our small group GHP and GQO experience to develop the trend to apply to both small group ACA pools. Looking at the COVID adjusted prior 3 years annual allowed trend, we weighted each year equally as shown on the 'Trend' sheet of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". Weighting trend equally across the last three years helps to remove trend volatility that may occur year to year when reviewing smaller books of business such as the ACA block. Additionally, we have seen more fluctuation in our trends over the past three years than we would traditionally expect. We believe this is largely due to impacts from the COVID pandemic. Although we do our best to adjust the historical experience for COVID, there is still a lot of uncertainty about the impacts of COVID on trends. Therefore, we believe it is best to use a longer-term average until the COVID experience period begins to roll-off of our historical experience.

The Allowed PMPMs shown on the "Trend" exhibit are normalized for cost-sharing since they are on an allowed basis and not on a paid basis. In an attempt to normalize the historical experience for morbidity, we analyzed the average PLRS for each year's membership and experience data. Each year the coefficients used in the risk adjustment model are updated by CMS. This means that we cannot directly compare the average PLRS from each year to any other year. Therefore, we do not adjust our historical trend data to normalize for morbidity, as in prior year's filings. The data used to develop trend has been adjusted to remove the effects of COVID on 2020 and 2021 claims experience. The COVID adjustment is explained further below.

The breakdown between cost and utilization is based on the average of the prior 3 years of component trends. The development of the component trends for each service category is shown on the 'Trend Components' sheet of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". The component trends are all adjusted equally so that the total equates to the 6.8% trend. Historical data accurately measures utilization trend. Historical data for cost trend would be the combination of unit cost, provider mix, services mix, advances in technology, induced demand and many additional components of trend that are not possible to breakdown. Since we are relying on historical data, there is no separate Induced Demand component of trend.

The Composite URR Trend in Table 5, Cell C12 is 1.14 and is used to project the experience period data to the rating period. The aggregate URR Trend reported in Worksheet I, Section 2 is 820.90 / 717.02 = 1.14 and matches the Composite Trend in Table 3 of the Department's rate exhibits.

Adjustment for COVID

Our 2020 and 2021 COVID adjustment factors are consistent with the prior year's filing. The 'COVID' tab of the "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx" file shows the adjustment factors applied to the manual data to remove the effects of COVID in 2020 and 2021. For 2020 we calculated and applied separate factors for inpatient, outpatient, and professional claims. For 2021, rather than applying separate monthly factors for different cost categories as was done in 2020, we assessed COVID related costs as a percentage of total costs to determine an adjustment factor for 2021 claims experience. We applied a COVID factor of .954 to claims in 2021 to account for the projected difference between COVID claims costs in 2021 and subsequent years. The COVID Adjustments for 2021 are shown on the 'COVID' tab of the "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx" file. Based on discussion with other actuaries, we do not anticipate COVID related costs to change drastically from year to year after 2021. Therefore, no COVID adjustment is applied to the 2022 claims experience used in trend development. The COVID adjustments to 2020 and 2021 experience are only used to develop trend accurately. Table 2 and Table 4 show our actual experience without any COVID adjustments.

Historical Experience

Table 4 includes the most recent 48 months of data with run out through February 2023. Allowed claims are calculated by combining paid claims and estimated member cost share. Table 4b displays the combined GHP and GQO small group ACA data and does not include any adjustments for COVID.

2. Rate Development & Change

Development of Projected Index Rate, Market-Adjusted Index Rate & Total Allowed Claims

Single Risk Pool

The Single Risk Pool has been established in accordance with the requirements in 45 CFR 156.80(d) as was discussed previously in the Experience Period Premium and Claims section.

Index Rate

The Experience Period Index Rate is based on the manual Allowed Claims PMPM and is the starting value on Table 5. The Credibility Manual Rate is a combination of our small group GHP and GQO experience, giving us a more credible manual rate. No benefits were covered in addition to Essential Health benefits in the policies being offered.

The Projected Index Rate for this Single Risk Pool is the Adjusted Projected Allowed EHB Claims PMPM and is the manual rate. The projected claims reflect the trend and benefits described earlier in this memorandum. As discussed above, the Manual Data is weighted 100% since it includes the Actual Experience Data as well as the experience data for our ACA compliant GQO business. If we gave any weight to the Actual Experience Data, it would be double counted since it is also in the Manual Data.

Market Adjusted Index Rate

The Market Adjusted Index Rate and Market Adjusted Total Allowed Claims are calculated in Table 5. The Projected Index Rate is converted to a paid basis by multiplying by the Projected Paid to Allowed ratio.

Paid to Allowed Ratio

The Projected Paid to Allowed Average Ratio is 0.868 and is displayed on Table 5. It is determined for the Projection Period based on the member weighted average Pricing AV for each plan times the projected member months in each plan. This is consistent with the calculation on Table 10 in cell K16. There are variations between the AV Pricing Values and the AV Calculator values because of different cost

structures and management approaches than what is reflected in the national average data used in the AV Calculator.

Projected Risk Adjustments PMPM

Our Small Group Exchange population has a less healthy risk profile than the state average in 2022 resulting in payment transfers from the Risk Adjustment program. Premium levels for 2024 need to incorporate the expected payment from the Risk Adjustment program. We have used the final CMS 2022 Risk Adjustment amount as the starting point for 2024. We combine our small group GHP and GQO experience together for this estimate, using the same estimate for both entities.

The risk adjustment model applied to the 2024 contract year will be an updated version of what was used for 2022. Specifically, the coefficients will be changing. We have used a 3rd party consultant's estimate of the impact on our population. The result is an expected decrease in transfer payment and is applied to the starting point for 2024 as described above. We also used the 3rd party consultant's estimate for the average charge for the High-Cost Risk Pool (HCRP). The development of the expected payment transfer for 2024 is shown on the 'Risk Adjustment' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". The expected payment transfer for 2024 is shown on Table 5 as $83.56.

All our small group plans are sold Off Exchange, so there are no Exchange user Fees to include. The allowable market-wide modifiers (Risk Adjustment of $83.56 and Exchange User Fees of $0) are combined with Projected Incurred EHB Claims PMPM on a paid basis. The Exchange User Fees PMPM is added while the Risk Adjustment PMPM is subtracted. This PMPM is then converted back to an allowed basis, again using the projected paid to allowed ratio. Any non-EHB claims would then be added to this value if we had some, but we don't so this PMPM is the Market-Adjusted Projected Total Allowed Claims PMPM, $690.03 as shown on Table 5 in cell C42.

Retention Items

Administration Expense

Administration expenses are based on activity-based allocation by product for calendar year 2024. This methodology applies for all variable costs and all fixed costs. We are combining the small group GHP and GQO estimates to create one overall PMPM estimate. This helps maintain appropriate relativities between the GHP and GQO plans. The historical administrative expenses are displayed on the 'Administrative_Expense' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". Table 6 provides a breakdown of the administrative expenses, as well as the taxes and fees. The administrative expenses are developed as a PMPM expense but applied as a consistent percentage of premium and do not vary by plan. The proposed percentage of premium for 2024 is 10.65% and is shown in both Tables 6 and 10.

Agent/Broker Fees and Commissions

Commissions for Small Group ACA business are paid based on the schedules in the file "Broker Commissions CY 2023.pdf". Broker commissions do not vary by geographic location, metal level, plan or enrollment type (open enrollment vs SEP enrollment). The development of the broker commission is displayed on the 'Commission' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx".

Quality Improvement Initiatives

The Quality Initiatives amount is based on the latest estimate for this product. They are reported on line 6.6 of the Supplement Health Care Exhibit of the Annual Statement. The estimated % of premium is

0.93% and is calculated on the 'Quality Improvement' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx".

Profit & Risk Margin
The risk margin is set at 2% of premium. This risk margin is applied consistently across all plans.

Taxes, Fees, and Subsidies
The Risk Adjustment User Fee for plan year 2024 was finalized as $0.21 PMPM.

The Patient-Centered Outcomes Research Institute Fee (PCORI fee) is estimated as $0.28 PMPM and is calculated on the 'Taxes' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". Geisinger Health Plan does not pay PA Premium tax.

Federal Income tax is paid for POS products by GHP. Only a small portion of GHP plans are POS products and have this tax applied to them. The estimated amount is 0.002% and is calculated on the "Taxes" tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". Note that the 0.002% is caused by the very small percentage of members – 5 out of 1,543 – that are projected to be enrolled through a POS product.

The federal government will no longer collect the Health Insurance Provider Fee.

Projected Loss Ratio
The anticipated loss ratio is 88.3**%** in aggregate as shown below using the federally prescribed MLR methodology:
MLR Numerator = Projected Claims - Reinsurance Recoveries + Quality Initiatives - Risk Adjustment = 682.38 – 0.00 + 6.40 – 83.56 = 605.22

MLR Denominator = Projected Premiums – Taxes and Fees = 686.11 – 0.51 = 685.60
Federal MLR = 605.22 / 685.60 = 88.3%

Normalized Market-Adjusted Projected Allowed Total Claims
The Market-Adjusted Projected Allowed Total Claims is normalized using the projected average factors for age, geography, tobacco, benefit richness (induced demand) and network. These average factors for 2023 and 2024 are displayed on Table 7.

Projected Membership
For the overall Small Group ACA market, membership is expected to remain approximately at the current level. February 2023 membership is expected to best represent calendar year 2024 in total for the Small Group ACA market. Projected membership is used to calculate the normalization factors discussed below.

Normalization Factors
Age Factor
The federal age curve, as shown in Table 12, is used to determine a normalization factor to account for the age mix of business used in generating the Index Rate. The average age factor includes a factor of 0 for non-billable members. The average factors for 2023 and 2024 are shown on Table 7 and are developed on the 'Age_Calibration' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx".

Geographic Factor
The geographic rating area factors used to determine premium rates are shown on Table 13. These factors are consistent with the current approved factors. The geographic normalization factor in Table 7 is determined using these factors weighted using projected membership by area and is shown on the 'Area_Calibration' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx".

Tobacco Factor
We are not applying a tobacco load for our small group ACA plans.

Benefit Richness (Induced Demand)
Induced Demand factors are applied to each plan to reflect the expected utilization, not the expected health status. The PID has instructed carriers to use the formula (Plan AV)^2 - (Plan AV) + 1.24. To ensure revenue neutrality, a normalization factor is applied, as instructed. This is developed on the 'Induced_Util_Exhibit' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx". The average benefit richness factor is shown on Table 7. The Benefit Richness factors in column L of Table 10 are calculated using the prescribed formula and divided by the normalization factor.

Network Factors
Geisinger has two networks, as reflected in Table 14. 18.47% of the projected membership is in the Geisinger Premier HMO network with an adjustment factor of 0.94. The other 81.53% of the membership is in the Geisinger All-Access HMO network with a factor of 1.00. Weighting these factors as 0.94 * 18.47% + 1.0 * 81.53% gives the normalization factor of 0.989 shown in cell K53 of table 7. The network factors shown on table 14 are the current network factors normalized.

Connectivity Factors
The products in this filing do not have any connectivity features that impact rates.

Components of Rate Change
Table 8 shows the components of the Rate Change developed in this filing. The key drivers of this decrease are changes in the URRT Morbidity, Risk Adjustment, Pricing AV, and Benefit Richness. Table 9 supports the calculations in Table 8. Row A approximately equals Row H.

The amounts shown in the 2023 column for B, C, D, and E match those entered in the 2023 column in the plan year 2023 rate filing. The amounts shown in the 2023 column for A, F and H do not match those entered in the 2023 rate filing due to the shift in enrollment between what was projected in the 2023 rate filing and the actual Feb 2023 enrollment.

3. Plan Rate Development

The projected market-adjusted index rate is used to develop the calibrated plan adjusted index rates in column AA of Table 10. Each plan's rate is developed as the product of the market-adjusted index rate, the allowable factors and calibration for age, geography and tobacco.

The cost model used to calculate the pricing AVs used in column K of table 10 was updated this year to be based on 2022 small group market experience instead of individual and small group combined experience as was used in prior years. This enhancement was discussed with the PID over an email exchange on March 21st, 2023 regarding the 2023 filing. The 'Pricing AV' tab of the "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx" file shows some sample pricing AV calculations using this updated cost model. The sample plans included are the HIOS plan IDs with the largest membership for each metallic level.

Each renewing plan is identified as existing or modified. We have no new or discontinued plans for 2024. Column G lists the metallic tier. Column H is the value we calculated using the HHS Actuarial Value Calculator. Screen shots of this calculation are provided in the file "AV_Screenshots_GHP_SmGrp_050923.pdf." The Actuarial Certification, at the end of this document, includes attestation that the Federal AV calculator was used to determine the metallic values. Please also refer to the document "AV_UniquePlanDesignJust_GHP_SmGrp.pdf" for further details. Columns L and N were normalized using projected (CY2024) membership.

For the GHP Small Group market there is 1 expanded bronze plan. An expanded bronze plan is defined as a bronze plan that "*either covers and pays for at least one major service, other than preventive services, before the deductible or meets the requirements to be a high deductible health plan within the meaning of 26 U.S.C. 223(c)(2)*" as stated at 45 CFR 156.140(c). The plan named "Geisinger Small Group ACA All-Access QHDHP POS 7050" meets the high deductible health plan definition at 26 U.S.C. 223(c)(2).

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

The projected calibrated plan-adjusted index rate is used to develop the 21-year-old non-tobacco premium in the small group market. These rates are displayed on Table 10, column AA. Table 11 uses the 21-year-old non-tobacco premiums from Table 10, adjusted by the proposed geographic factors (from Table 13), to develop the 21-year-old non-tobacco premiums by rating area.

5. Plan Factors

The Consumer Adjusted Premium Rates are developed by applying the following allowable rating factors to the calibrated Plan Adjusted Index Rates:

1. Age – reflecting the HHS defined age curve
2. Geographic – as discussed above

The final Premium rates for all filed benefit plans are displayed in the QHP Rating Template.

Network Factors

Geisinger has two networks in this market. As explained above, the network factors shown on table 14 are the current network factors normalized at the entity level.

Service Area Composition

Bedford county is being added to GHP's service area for 2024. All the counties of operation from 2023 will also still be included in 2024. To preserve flexibility and align with unique regional and network characteristics, counties are grouped with similarly situated geographies. All counties and service areas are defined in the QHP Service Area template. These service areas are defined on the 'Service Areas' tab of the file "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123.xlsx".

Composite Rating

Composite rating is not used.

Plan Type

All plan offerings meet the plan type definitions available in the URRT Worksheet 2, Section I.

Terminated Plans and Products

No products are being terminated in this market.

Changes to URRT
We acknowledge that each time the URRT is changed it will be updated on the URRT tab in SERFF.

Reliance
We relied on Milliman for their classification of benefit categories in the claim data. We have relied on a 3rd party's risk adjustment estimates for the changes to the model as well as the adjustment for the cost of the High Cost Risk Pool. We peer-reviewed our COVID-adjustments approach with multiple 3rd parties. ~~We have relied on the PID's risk adjustment estimates for 2022.~~ We have also relied on a 3rd party vendor's data mart. Checks for reasonableness were applied. When practical, steps were taken to improve the data when necessary.

Additional Exhibits
The following required exhibits have been uploaded in SERFF under the tabs noted next to the exhibit:
• Department Plan Design Summary – submitted under the "Rate/Rule Schedule" tab;
• Service Area Map – submitted under the "Supporting Documentation" tab.

Actuarial Certification

I certify that:

1. I am a member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform this work.
2. The projected Index Rate is:
    a. In compliance with all applicable state and Federal regulations including 45 CFR 156.80(d)(1)
    b. Developed in compliance with the applicable Actuarial Standards of Practice,
    c. Is reasonable in relation to the benefits provided and the population anticipated to be covered,
    d. Is neither excessive nor deficient based on available information.
3. The Index Rate is used to develop the plan level rates using only the allowable modifiers in accordance with 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2).
4. The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
5. The Federal AV Calculator was utilized, with an acceptable alternative methodology when appropriate, to determine the AV Metal Values shown on Table 10 and in Worksheet 2, Section I of the URRT, following ASOP 50. Please refer to the "AV_UniquePlanDesignJust_GHP_SmGrp.pdf" document for further details.
6. All factor, benefit and other changes from the prior (2023) approved filing have been disclosed in the actuarial memorandum.
7. New plans have not been considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2024 Rate Filing Justification.

I confirm that the rates submitted comply with the ACA rating requirements and with the Single Risk Pool per market requirement. The URRT does not demonstrate the process used to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

This actuarial certification applies to the rates calculated for the 2024 plan year.

4.16	Risk Adjustment Transfer Amount	#DIV/0!	$83.56
4.17	Premium	#DIV/0!	$510.53

Rating Area Data Collection

Specify the total number of Rating Areas in your State by selecting the Create Rating Areas button or Ctrl + Shift + R.
Select only the Rating Areas you are offering plans within and add a factor for each area.
To validate, select the Validate button or Ctrl + Shift + I.
To finalize, select the Finalize button or Ctrl + Shift + F.

Rating Area	Rating Factor
Rating Area 2	1.0000
Rating Area 3	0.9500
Rating Area 5	0.9500
Rating Area 6	1.0000
Rating Area 7	1.2500
Rating Area 9	1.2000

2024 Rates Table Template v13.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
	If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2024 Rates Table Template v13.0

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.

If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2024 Rates Table Template v13.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
	If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2024 Rates Table Template v13.0

*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*

If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.

If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.

If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.

To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

New county added in 2024 Off exchange

Geisinger Health Plan
Small Group Filing for 2024
Response to Questions
SERFF Tracking Number: GSHP-133664985

1. Please clarify specifically by line of business and legal entity what data is represented in the underlying cost model in which the above referenced small group rate filing was developed. Please clarify what the difference is between the experience in the underlying cost model and the experience used as the manual rate.
Both the underlying cost model and the manual rate use our 2022 Geisinger Health Plan and Geisinger Quality Options combined small group ACA experience.
2. Please confirm by line of business and legal entity what data is included in the manual rate data used in the small group filing as shown in the tables on the 'I.b. Manual Data' worksheet of the PA rate template. Please confirm that this data does not include any individual experience.
The 'I.b. Manual Data' sheet of the small group PAAM exhibits contains small group ACA experience for both Geisinger Health Plan and Geisinger Quality Options and does not include any individual experience.
3. As it pertains to the impact of COVID-19 in the rate development:
a. Please provide justification for not applying a COVID-19 adjustment in the development of the 2024 index rate. State whether any analysis has been performed to compare COVID-related claims in 2022 versus expected 2024.
COVID-related claims decreased significantly from 2021 to 2022. Working with our clinical colleagues, it is Geisinger's projection that the COVID pandemic has reached a steady state in 2022. Therefore, we see no reason to adjust 2022 data for the impact of COVID.
b. How are the costs of over-the-counter COVID-19 tests and COVID-19 treatments being considered with regard to coverage in the base period and coverage in the projection period due to the end of the Public Health Emergency?
With the end of the Public Health Emergency, cost sharing will apply for COVID-19 tests and treatments in policy year 2024 based on the applicable service and setting. As stated in 9c of the Standard Questions: "COVID vaccines will fall under the vaccine benefit, which is considered preventative and covered at 100% for participating providers. COVID testing will fall under the applicable setting in which the test took place, and the corresponding cost sharing will apply." COVID tests and treatments will continue to be covered in 2024, but will have cost sharing applied. The cost sharing by place of service is accounted for within our pricing AVs.
The following questions pertain to the 'PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123' file:
4. Regarding the 'Trend' tab:
a. Please provide an exhibit demonstrating how the overall trend of 6.8% is broken out into the unit cost and utilization trends by service category as shown in Table 3b.
Please see the 'Trend Components' tab of the "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123" file. The Average column matches what is shown on table 3b. This exhibit is referenced on page 4 of the memorandum. As noted in the memorandum, the breakdown between cost and utilization is based on the average of the prior 3 years of component trends. The component trends are all adjusted equally so that the total equates to the 6.8% trend.

b. Considering the annual change in allowed PMPM claims for the combined experience of GHP and GQO varies significantly over the four-year period from 2019 to 2022, please explain why it is appropriate to apply a uniform trend weight to each of 2020, 2021, and 2022.

The fluctuation in annual change from year to year is one of the reasons that we prefer to apply a uniform trend weight to each of the past 3 years. We have historically seen significant fluctuation in the annual change in allowed PMPMs from year to year in our ACA block. Given that our trends are projecting 2 years into the future (2022 to 2024) we believe using an equal weight on multiple years of experience provides the best projection of a longer-term trend. This equal weight avoids overreacting to year over year fluctuations in trend.

c. Is the experience used in reviewing the trend inclusive of Small Group ACA business only for GHP and GQP combined?

Yes. As noted on page 4 of the memorandum, we have combined our small group ACA GHP and GQO experience to develop the trend.

d. For 2020 and 2021, please provide a numerical development of the allowed PMPM values including the adjustments for COVID-19.

Please see the 'Trend Backup' tab of the "PID_Response_Exhibits_GHP_SmGrp_062023" file. The Members and Allowed Claims (Net of Prescription Drug Rebates) columns are pulled directly from Table 4b. The monthly COVID Adjustment Factors shown in column D reflect the COVID adjustments shown on the 'COVID' tab of the "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123" file. The 2020 factors are a weighted average of the inpatient, outpatient, and professional factors so that they can be applied to the total allowed claims from table 4b. The COVID Adjusted Annual Allowed PMPM values shown in column F are aligned with the allowed PMPM values used in our trend development.

e. How are contractual changes in the projection period relative to the experience period reflected in the trend assumption?

The impacts of contractual changes are included in the unit cost component of our trends. We rely on the historical impact of contractual changes to project the impact of these changes from the experience period to the projection period. We do not know of any significant contractual changes for 2024 at this time. Therefore, we rely on our historical unit cost changes to capture the projected contractual changes from the experience period to the projection period.

5. Please provide an exhibit that includes data consistent with the data (by legal entity and line of business) presented in 'Trend' tab by incurred month for the time period of January 2019 through December 2022, and paid through the latest month the company has available:

a. Actual net claim PMPMs, split by medical and pharmacy

b. Actual allowed claim PMPMs, split by medical and pharmacy

c. Member months

Please see the 'Med Rx PMPMs' tab of the "PID_Response_Exhibits_GHP_SmGrp_062023" file for this data. The claims are paid through April 2023 and split by medical and pharmacy as requested. We provided incurred claims PMPMs, assuming that was what was meant by net claims in part a. The pharmacy PMPMs are net of prescription drug rebates.

d. For each of calendar years 2019, 2020, 2021, and 2022 please provide the company's PLRS, ARF, and AV consistent with the factors utilized in the risk adjustment transfer calculation for each respective plan year. For 2022, please provide the company's best estimate of these items based on the available claims and membership and most recent risk adjustment reporting tools (e.g., May RATEE file).

Please see the 'Risk Adjustment Metrics' tab of the "PID_Response_Exhibits_GHP_SmGrp_062023" file. We will have final 2022 values once the TPIR reports are available in July.

6. Please provide quantitative and qualitative support for the $1,621,654 of combined GHP/GQO incurred expenses on health care quality improvement, which underlies the 0.93% retention assumption as broken out in the 'Quality Improvement' tab.

The $1,621,654 is the small group GHP and GQO combined "Total of Defined Expenses Incurred for Improving Health Care Quality" from line 6.6 of the "Supplemental Health Care Exhibit – Part 1". This exhibit was included as part of the Annual Financial Statement Filing submitted to the NAIC for calendar year 2022. Line items 6.1 – 6.6 from the GHP and GQO small group exhibits are shown below.

GHP Small Group		
6.	Improving Health Care Quality Expenses Incurred:	
6.1	Improve health outcomes	236,730
6.2	Activities to prevent hospital readmissions	12,107
6.3	Improve patient safety and reduce medical errors	51,627
6.4	Wellness and health promotion activities	24,008
6.5	Health Information Technology expenses related to health improvement	89,137
6.6	TOTAL of Defined Expenses Incurred for Improving Health Care Quality (Lines 6.1 + 6.2 + 6.3 + 6.4 + 6.5)	413,609

GQO Small Group		
6.	Improving Health Care Quality Expenses Incurred:	
6.1	Improve health outcomes	499,283
6.2	Activities to prevent hospital readmissions	25,157
6.3	Improve patient safety and reduce medical errors	175,071
6.4	Wellness and health promotion activities	96,691
6.5	Health Information Technology expenses related to health improvement	411,843
6.6	TOTAL of Defined Expenses Incurred for Improving Health Care Quality (Lines 6.1 + 6.2 + 6.3 + 6.4 + 6.5)	1,208,045

7. Please explain how projected enrollment was developed and provide support for anticipated differences between the population underlying the experience period and the projection period. Discuss how you anticipate GHP's market share to change as a result of Medicaid redeterminations.

Our small group membership is expected to remain approximately at the current level. February 2023 membership is expected to best represent calendar year 2024 in total for the small group ACA market. We do not expect Medicaid redetermination to have a significant impact on the small group ACA market.

8. Please provide an exhibit which compares the actual vs. pricing MLRs for GHP's recent historical experience in Pennsylvania. For any largescale differences between these two factors in a given year, please explain the cause of such relationship and whether it was considered in the development of this rate filing.

Please refer to the exhibit and responses from question 10 of the "Standard_Questions_2024_GHP_SmGrp_051123.pdf" file.

9. The Department is interested in the issuer's estimate of the drivers of the rate change. In particular, what portion of the indicated rate change from Table 11 is due to changes in various components such as reinsurance (individual market only), utilization trend, unit cost trend, expenses, morbidity, benefits, risk adjustment, or other relevant factors?

We believe that the components of rate change shown in Table 8 provide a reasonable estimate of the components driving the rate decrease from Table 11. As noted in the "Components of Rate Change"

section of the Actuarial Memorandum: "The key drivers of this decrease are changes in the URRT Morbidity, Risk Adjustment, Pricing AV, and Benefit Richness."

10. Extrapolating from 2022 and prior to 2024, what changes does Geisinger expect to see when it comes to unit cost, provider mix, services mix, advances in technology, provider contracting arrangements, etc. that would not be captured solely with a historical viewpoint? How are these changes reflected in the current trend development?

We do not anticipate future unit cost or utilization to be significantly different than our historical COVID-adjusted data. Therefore, no adjustments were made for these considerations in the current trend development.

11. Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Yes, we have tested to ensure that these rates are identical.

12. On page 6 of the actuarial memorandum, it is stated that "there are variations between the AV Pricing Values and the AV Calculator values because of different cost structures and management approaches than what is reflected in the national average data used in the AV Calculator." In particular, the Department noticed that the Pricing AV is higher than the Metallic AV for all plans. Please provide a narrative on what is meant by "management approaches" and a quantitative exhibit that shows:

a. the impact of management approaches for each impacted plan

b. the support for these management approaches.

Geisinger is a small regional health plan and therefore our data can be significantly different than the national average data used in the AV calculator. The management approaches are referring to our network management and care management structures. As an example, we utilize a wrap network for out of area coverage since we don't have a national network. We are unable to quantify the impact of these items because they are inherently built into our historical claims experience.

13. Based on Table 4b of the PAAM Exhibits, Prescription Drug Rebates PMPM have increased significantly from 2019 through 2022. How are the drug rebates incorporated in the trend, if at all? If drug rebates are not incorporated in the trend, please explain why Geisinger finds that reasonable, given how drug rebates have grown. Please provide a detailed qualitative narrative on how this growth affects the rating period, if at all. If this growth does not affect the rating period, please explain why Geisinger finds that reasonable, given how drug rebates have grown.

The 'Trend Backup' tab of the "PID_Response_Exhibits_GHP_SmGrp_062023" file shows that allowed claims net of prescription drug rebates are the basis for our trend calculation. Therefore, the historical change in prescription drug rebates in incorporated in the trend. As noted in our response to question 2c in the "Standard_Questions_2024_GHP_SmGrp_051123" file, our rebate vendor has confirmed that we expect no significant differences between the actual 2022 rebates and the projected rebates for 2024. Therefore, no additional rebate adjustment was applied for the rating period.

Geisinger Health Plan
Small Group Filing for 2024
Trend Backup

Month-Year	Members	Allowed Claims (Net of Prescription Drug Rebates)	COVID Adjustment Factor*	COVID Adjusted Allowed Claims (Net of Prescription Drug Rebates)	COVID Adjusted Annual Allowed PMPM

Response to Questions
SERFF Tracking Number: GSHP-133664985

1. Please provide the Pricing AV by cost sharing component for each HIOS code comparable to what was provided in the 'Pricing AV' tab of the 2024_SmGrp_GHP_PAAMExhibits_050923.xlm file submitted in the initial rate filing submission. Additionally bridge the gap between the pricing AV and the metal level AV for each HIOS code. This can be file can be submitted through email.
This file was submitted to the PID via email on 7/14/2023.
2. The following questions relate to the response to question 4 of the prior round of objection questions.
a. Please explain how the service category weights in Table 3b of the PAAM exhibits were developed using the combined Small Group ACA experience in Pennsylvania for GHP and GQO.
The service category weights in Table 3b of the PAAM exhibits reflect the actual distribution of costs by service category from our 2022 Small Group combined GHP and GQO ACA experience period data.
b. Please provide quantitative support for all service category weights.
Please refer to the "Service Category Weights" sheet of the "PID_Response_Exhibits_GHP_SmGrp_20230713" file.
c. Per Table 3b, a service category weight of 43.13% is being applied to the composite Outpatient Hospital trend. Additionally, please support the development of the 2022 Outpatient Hospital cost trend of 14.9% found in the 'Trend Components' tab of the exhibits file dated 5/11/2023.
The development of the 43.13% service category weight is shown on the "Service Category Weights" sheet of the "PID_Response_Exhibits_GHP_SmGrp_20230713" file. As explained in the response to question 3a above, the outpatient hospital weight reflects outpatient hospital's percent of total claim costs from 2022. Support for the 14.9% Outpatient Hospital trend can be found on the "Outpatient Hospital Support" sheet of the "PID_Response_Exhibits_GHP_SmGrp_20230713" file. The 2022 Outpatient Hospital trend measures the increase in unit cost of an outpatient visit from 2021 to 2022. As noted on page 5 of the memorandum, the component trends are all adjusted equally so that the total equates to the 6.8% trend. The trend adjustment shown on the "Outpatient Hospital Support" sheet is the factor used to adjust the component trends to equal the total selected annual trend of 6.8%.
d. As it pertains to the 'Trend Backup' tab of the PID response exhibits dated 6/20/2023, please explain how the COVID Adjustment factors in column D were developed for each month in 2020 and 2021.
The "COVID Adjustment Support" sheet of the "PID_Response_Exhibits_GHP_SmGrp_20230713" file provides additional support for the COVID adjustment factors shown on the 'Trend Backup' tab. As explained on page 5 of the memorandum, we had different approaches for removing the effects of COVID in 2020 and 2021. For 2020 we calculated and applied separate factors for inpatient, outpatient, and professional claims. Columns A to E of the "COVID Adjustment Support" sheet show the 2020 monthly COVID Adjustment Factors by service category. Columns H to K of the exhibit show the weights applied to each category based on their percentage of total claims for that month. The total monthly COVID adjustment factors shown in column N are obtained by weighting together the adjustment factors by service category. For 2021, rather than applying separate monthly factors for different cost categories as was done in 2020, we assessed COVID related costs as a percentage of total costs to determine an adjustment factor for 2021 claims experience. Therefore, the 2021 COVID adjustment is applied consistently across all months and service categories.

e. Please describe how utilization shifts in 2023 and 2024 were considered in the 2024 trend development.

We do not anticipate future unit cost or utilization trends to be significantly different than our historical COVID-adjusted data. Therefore, no adjustments were made for these considerations in the current trend development.

3. Worksheet 1 of the URRT reflects a projected risk transfer charge of $96.29 on an allowed basis. Does the company expect to revise this assumption in light of the BY 2022 Risk Adjustment Report released by CMS?

No, we will not be revising this assumption in light of the BY 2022 Risk Adjustment Report released by CMS. The final 2022 risk adjustment value from CMS exactly matched the estimates received from the PID in May which were used in our initial filing.

4. On page 6, the actuarial memorandum states that a 3rd party consultant estimated values used in the risk adjustment calculation. Please provide as much support as possible for cell B6 [redacted]%) and cell B9 ($[redacted]) on the Risk Adjustment tab of the supporting exhibits.

Unfortunately, due to confidentiality agreements, we are unable to share calculation details to support the [redacted]% assumption from cell B6 or the $[redacted] from cell B9 of the Risk Adjustment exhibit. However, we can share a more high level explanation of how these values were calculated.

For calculation of the [redacted]% assumption, the 3rd party consultant provided a projected 2022 risk transfer payment based on the 2022 risk adjustment model and coefficients. They also provided a tool that projects the 2022 risk transfer payment based on the 2024 risk adjustment model and coefficients. Both projections are calculated based on the same input data and no other adjustments are made to the calculation. Therefore, the difference between the two risk transfer payment projections is solely attributable to changes between the 2022 and 2024 risk adjustment model and coefficients. The [redacted]% was calculated as the difference between the two projected transfer payments.

The projection of the $[redacted] high-cost risk pool charge was based on an assumption of the percent of nationwide small group market premiums that will be needed to cover the projected HCRP reimbursements to carriers in 2024. This percentage was then applied to our projected 2024 premiums in order to calculate the $[redacted] value shown in the Risk Adjustment exhibit.

5. Please update the 2022 experience period risk adjustment amount in Table 2 to reflect the final CMS risk adjustment amount released on June 30th.

The final 2022 risk adjustment value from CMS exactly matched the estimates received from the PID in May. Therefore, no change was made to the risk adjustment value on Table 2.

6. If the projected risk adjustment transfer amount in Table 5 will be modified due to the final CMS transfer amount published on June 30th, please provide narrative and detailed supporting data to justify the proposed changes.

We did not modify the Projected Incurred Risk Adjustment PMPM on Table 5.

7. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Yes, the rates across the exhibits and rate tables are identical.

8. Please ensure that the 7/14/23 versions of the following items are posted in SERFF with your July 14th response to this data call.

a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
b. PA Actuarial Memorandum
c. PA Actuarial Memorandum Exhibits (don't forget to update the "VI Rate Change Summary" tab, if necessary)
d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")
e. URRT
f. Federal Rate Template
g. Part III: Actuarial Memorandum
h. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).
Yes, the listed items have been posted in SERFF.

Geisinger Health Plan
Small Group Filing for 2024
Response to Questions
SERFF Tracking Number: GSHP-133664985

We would like to add a high-level comment that we are perplexed by some of the questions in this round and are unsure if we are responding in a manner that would address the underlying concerns of the PID. We feel we have already provided much of the support that is being requested in our original filings or in prior rounds of questions. For example, question 2 asks for additional descriptions or support of various factors from our rate filings. We believe we have already provided descriptions and/or support for all of these pricing assumptions/factors and are unsure what specific additional information the PID is looking for. We have done our best to respond to each question in a manner that we hope will be helpful in reviewing our filing. However, without knowing what specific underlying concerns the PID still has about our filing or assumptions, we are unsure if we are providing the necessary additional information. If these responses are not sufficient to resolve the outstanding concerns, we believe a call may be helpful to talk through the root cause of some of these questions. If you agree, please feel free to reach out via email to set up a call.

1. Thank you for providing support regarding the service category weights in response to question 4 of the prior round. As a follow up, please provide additional qualitative detail pertaining to the Outpatient Hospital benefit cost category weight of 43.13% in the trend development. When looking at the 'COVID Adjustment Support' tab of the latest response exhibits, it appears that 2022 Outpatient Hospital claims increased significantly as a proportion of total claims relative to 2020. What shifts are occurring in other benefit cost categories that are attributable to the change in the Outpatient Hospital benefit cost category?
Due to the COVID pandemic, we would not recommend comparing the 2022 weight of 43.13% to the monthly weights from the COVID Adjustment Support exhibit. The 2020 outpatient spend was significantly depressed in the first few months of the pandemic due to non-emergent procedures being cancelled or delayed because of COVID. Other service categories such as pharmacy were not impacted as significantly by COVID, causing the outpatient weights for some months in 2020 to be significantly lower than normal.

That said, we do still recognize that outpatient claims have been slowly growing as a percent of total claims for many years now. The table below shows the outpatient weights from Table 3b of our 2021 to 2024 rate filings:

Filing Year	Individual	Small Group
2021	39.4%	39.4%
2022	37.0%	38.7%
2023	39.2%	39.7%
2024	42.8%	43.1%

For both individual and small group there was roughly a 3-4 percentage point growth from our 2021 to our 2024 filing. At the same time that we are seeing slow gradual growth in the outpatient cost category, we have seen slow declines in the inpatient and professional categories as a percentage of

total costs. For inpatient, this is primarily due to the gradual shift of some inpatient services moving to outpatient settings. We have seen this shift occurring slowly for many years. For professional, the gradual reduction is coming from consistently low trends when compared with other service categories. These low trends are causing the total costs of professional services to grow more slowly than other service categories. Therefore, professional is gradually becoming a smaller percent of the total costs over time.

2. It is our understanding that the single risk pool used for developing the rates is for Geisinger Health Plan (GHP) and Geisinger Quality Options (GQO) Small Group ACA market. Please provide the corresponding pricing assumptions/factors (i.e., morbidity, risk adjustment, network, and so on) and a brief description of the development to the extent it has not already been provided during the objection process.

Below is a list of factors applied in our PAAM Exhibits along with a description of whether they are the same or different between our GHP and GQO filings. We have also added references to the appropriate memorandum sections that give further explanation of the factors.

- Two year trend projection Factor – Same for GHP and GQO
  - Trend Identification section on page 4 of the memorandum
- Change in Demographics – Same for GHP and GQO
  - Change in Demographics section on page 3 of the memorandum
- Change in Other – Same for GHP and GQO
  - Change in Other section on page 4 of the memorandum
- Projected Incurred Risk Adjustment PMPM – Same for GHP and GQO
  - Projected Risk Adjustments PMPM section on page 6 of the memorandum
- Administrative Expenses – Same PMPM for GHP and GQO
  - Administration Expense section on page 6 of the memorandum
- Taxes and Fees – Different for GHP and GQO
  - Taxes, Fees, and Subsidies section on page 7 of the memorandum
- Profit/Contingency – Same for GHP and GQO
  - Profit & Risk Margin section on page 7 of the memorandum

3. Please clarify how many member months are considered in the experience data, or the manual data, to be full credibility for the rate development.

We rely on an internal standard of 1,000 members or 12,000 member months to indicate full credibility. This standard was decided using our actuarial judgement, as considered appropriate according to ASOP 25.

4. In reference to Table 9 of the PAAM exhibits, please provide a quantitative exhibit that shows the development of the 0.868 paid-to-allowed ratio in 2024 and provide insight as to why the 2024 paid-to-allowed ratio is materially lower than the 2023 paid-to-allowed ratio, reported as 0.914. Detail the key drivers of this change.

The 0.868 Projected Paid to Allowed Ratio used on Table 5 is pulling directly from cell K16 of Table 10. This 0.868 factor on Table 10 is developed using the formula entered by the PID which weights together the Pricing AV (company-determined AV) from column K and the Non-Funding of CSR Adjustment from column P by the Total Projected Lives from column W. We are unable to edit this formula. We previously provided an exhibit to the PID via email on 7/14 which shows the cost components of our pricing AVs by plan. We are unsure what additional quantitative exhibit we could provide to show more detail of the development of this factor.

As explained in prior rounds of questions, the 0.868 factor is lower than the 0.914 factor used in our 2023 filing due to the removal of the normalization methodology prescribed by the PID in our 2023 filing. For our 2023 initial rate filing, we used a combined manual cost model to develop our pricing AVs based on individual and small group ACA combined data. We then applied a normalization factor to the resulting pricing AVs to normalize them to each market (individual vs. small group) separately. The PID felt this normalization factor was not appropriate and required us to either revise our manual cost model to have separate models for the individual and small group markets or to instead use the same normalization factor across both the individual and small group rate filings. Given the fact that it was too late in the filing process for us to develop new manual cost models, we chose to follow the PID's guidance of using the same normalization factor across both the individual and small group rate filings in 2023. This resulted in understated pricing AVs and rates for the individual market and overstated pricing AVs and rates for the small group market. We don't believe that either Geisinger or the PID thought this was the most accurate approach, however it was a compromise given the short time frame to get final approval of our rates.

In order to avoid this mispricing in 2024, we developed separate cost models for our individual and small group markets so that no normalization factor would be needed for either market in 2024. These updated cost models resulted in higher pricing AVs for the individual market and lower pricing AVs for the small group market when compared to our final 2023 filing. This was expected for the reasons outlined above. For all of the reasons outlined in this response, the 0.868 Projected Paid to Allowed Ratio in our 2024 rate filing is much more accurate than the 0.914 factor from our 2023 rate filing.

5. In reference to Table 9 of the PAAM exhibits, please provide a quantitative exhibit that shows the development of the 1.131 benefit richness factor in 2024. Please explain the change from the benefit richness factor in 2023 reported as 1.166 relative to 2024. Detail the key drivers of this change.

A quantitative exhibit showing the development of the 1.131 benefit richness factor was provided with our initial rate filing in the Induced_Util_Exhibit tab of the "PA_Act_Memo_Additional_Exhibits_GHP_SmGrp_051123" file. In column E of that exhibit, we use the PID's prescribed formula of (Pricing AV * Non-Funding CSR Adjustment)^2 – (Pricing AV * Non-Funding CSR Adjustment) + 1.24. Since the Pricing AVs are lower in our 2024 filing than in our 2023 filing for all of the reasons outlined in response to question 4 above, the resulting plan level Induced Demand factors are also smaller. This leads to a lower overall benefit richness factor of 1.131.

6. Discuss any analysis that was performed in determining for the geographic rating and the network factors have relatively little or no change year over year. What is driving the change in normalization factor year over year?

We do not update our geographic rating factors or network factors annually unless we observe significant changes to our experience across geographies or to our provider network. In order to avoid unnecessary, frequent disruption to our members we prefer to only revise these factors every few years or as needed for significant changes. The small year over year changes in the normalization factors are driven by membership mix changes, such as slight shifts in member distribution by rating area or by network.

7. The Federal MLR in the latest version of the Actuarial Memorandum is calculated to be 88.3%. Within this section on Page 8, projected claims and premiums are listed as $682.38 and $686.11, respectively. However, these values do not match the incurred claims and premiums shown on Worksheet 2, Section

IV of the URRT which are equal to $598.82 and $689.06, respectively. Please explain why these two sources differ and revise any files if necessary.

The projected claims of $682.38 which are used in our MLR calculation are coming from cell C29 of Table 5. The URRT incurred claims of $598.82 are instead aligned with cell C34 of Table 5 (Market-Adjusted Projected Incurred EHB Claims PMPM). The difference between these two amounts is caused by risk adjustment, which is removed from the numerator of the MLR calculation shown in the memorandum.

The explanation of the premium differences is a bit more complex. The $686.11 value is pulled from Table 6 cell C64. The difference between this value and the $689.06 from the URRT has to do with the order of operations and specifically that the sum of a product is not equal to the product of a sum. Table 5 and Table 6 are calculating the premiums for the whole book by multiplying member weighted average factors together. This is the product of sums equation, and it multiplies average factors together to get a total market average. Table 10 and the URRT are calculating the plan-specific premiums and weighting them up by membership to get the average premium. This is the sum of products equation where total premium is the result of products at the plan level, then summed to a total market average. Multiplying the product of the weighted Pricing AV and Benefit Richness by the Market Adjusted Index Rate and membership is not the same value as weighting the Pure Premiums or the URRT Premium by membership. This is causing the difference between premiums on Table 6 and the URRT.

We do not believe that any revisions are necessary.

8. Regarding the High Cost Risk Pool Charge Estimate PMPM value of $[redacted] on the Risk Adjustment tab of the supporting exhibits, what percent of premium are you using in the calculation? The CMS Summary Report on Permanent Risk Adjustment Transfers for the 2022 Benefit Year shows 0.49 percent for the small group market in Table 3 on Page 13. When multiplying that percent by $686.11 from Table 6, we get a value of $3.36. Please provide what percent of premium you are using in your calculation and support for that value.

We cannot share the percent of premium used in the development of the $[redacted] HCRP charge estimate PMPM because it is confidential and proprietary information that we receive from our 3rd party vendor. The $3.36 derived from the Summary Report on Permanent Risk Adjustment Transfer relies on 2022 data and does not reflect expected HCRP charges in 2024. We expect the percent of premium attributable to the HCRP to be higher in 2024 than 2022 when taking leveraged trend over 1 million dollars into consideration, so a higher estimate of HCRP charges is more appropriate for 2024.
