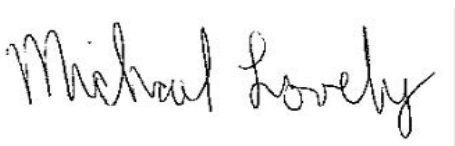
Dear Ms. Gray,

UPMC Health Benefits, Inc. respectfully requests approval of a rate filing for Small Group Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2020 through 12/31/2020.

Company Name/NAIC #: UPMC Health Benefits, Inc./11018
Market: Small Group
On or Off Exchange: Off Exchange Only
Effective Date of Coverage: 1/1/2020
Average Rate Change Requested: 10.67% ($24.44)
Range of Rate Change Requested: 1.64% to 64.35% ($3.76 to $147.36)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 3, 4, 5, 7, 9 (rating area 2 removed for 2020)
Metal Levels Offered: Silver, Gold, Platinum
Currently Enrolled Lives: 8,212
Currently Enrolled Policyholders: 4,752
Number of Plans Offered in 2020: 36 (1 more than approved 2019 filing)
Total additional annual revenue generated from the proposed rate change: $1,665,458
Corresponding Contract Form #: EPOF06, EPOF07, PPOF09, PPOF10
Binder ID#: UPMC-PA20-125092383
HIOS Issuer ID #: 67430
Submission Tracking #: UPMC-131943309

If you have any questions or require additional information, please call me at 412-454-7849 or email me at lovelymt@upmc.edu.

Sincerely,



Michael Lovely, FSA, CERA, MAAA

Attachment I

Rate Change Summary

UPMC Health Benefits, Inc. – Small Group Plans

Rate request filing ID # UPMC-131943309 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Initial requested average rate change:	11.47%
Revised requested average rate change:	11.47%
Range of requested rate change:	2.37% to 65.54%
Effective date:	1/1/2020
Mapped Members:	8,212
Available in:	Rating Areas 1, 3, 4, 5, 7, 9

Key information

Jan. 2018-Dec. 2018 financial experience

Premiums	$0
Claims	$0
Administrative expenses	$0
Taxes & fees	$0
Company made (after taxes)	**$0**

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2020:

Claims:	85.87**%**
Administrative:	9.24**%**
Taxes & fees:	4.89%
Profit:	0.00**%**

The company expects its annual medical costs to increase **2.99%**.

Explanation of requested rate change

Additional premium is needed to account for the higher cost and utilization of medical services each year. The proposed rate change also accounts for a decrease in anticipated Risk Adjustment receivable relative to the prior year and projected increases in taxes and fees for 2020.

Ms. Tracie Gray
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Life, Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Dear Ms. Gray,

UPMC Health Benefits, Inc. respectfully requests approval of a rate filing for Small Group Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2020 through 12/31/2020. The revised filing includes the following changes:

1.) *In response to Department question 4, round 1, the applied annual trends for each benefit category included in Tables 3 and 3b of the PA Actuarial Memorandum Exhibits have been corrected.*

2.) *In response to Department question 12, round 1, the index rate of the projection period included in the actuarial memoranda have been updated to show the first quarter index rate instead of the average index rate.*

3.) *In response to Department questions 15, 28, and 29, round 1, the risk adjustment user fee has been removed from table 5 of the PA Actuarial Memorandum Exhibits and has instead been accounted for in tables 6 and 10.*

4.) *In response to Department question 22, round 1, the actuarial certifications included at the end of the actuarial memoranda have been updated.*

5.) *In response to Department question 5, round 2, tables 2, 2b, 3, and 3b of the PA Actuarial Memoranum Exhibits as well as the actuarial memoranda have been updated to account for the capitation of pediatric dental claims.*

6.) *In response to Department question 14, round 2, an adjustment factor accounting for the 3-child maximum has been incorporated in the age calibration factor, which has been updated in table 10 of the PA Actuarial Memorandum Exhibits.*

Company Name/NAIC #: UPMC Health Benefits, Inc./11018
Market: Small Group
On or Off Exchange: Off Exchange Only
Effective Date of Coverage: 1/1/2020
Average Rate Change Requested: 11.47% ($26.26)
Range of Rate Change Requested: 2.37% to 65.54% ($5.43 to $150.07)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 3, 4, 5, 7, 9 (rating area 2 removed for 2020)
Metal Levels Offered: Silver, Gold, Platinum
Currently Enrolled Lives: 8,212
Currently Enrolled Policyholders: 4,752
Number of Plans Offered in 2020: 36 (1 more than approved 2019 filing)
Total additional annual revenue generated from the proposed rate change: $1,659,387

Corresponding Contract Form #: EPOF06, EPOF07, PPOF09, PPOF10

PA Actuarial Memorandum

Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

Company Information

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Benefits, Inc.
NAIC #: 11018
HIOS Issuer ID: 67430
Market: Small Group
Exchange: Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2020

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131943309
Form Filing SERFF Tracking #: UPMC-131920987, UPMC-131921050, UPMC-131921052, UPMC-131921054
Binder SERFF Tracking #: UPMC-PA20-125092383

Rate History and Proposed Variations in Rate Changes

Limited rate history exists since this is the second annual rate filing by the captioned company in this market. Rate filing tracking numbers from the 2019 rate filings for the captioned company and market are displayed in the table below.

SERFF Tracking #	Year	Rate Change relative to Prior Annual Filing
UPMC-131496028	2019	N/A
UPMC-131851705	2019 Q4	N/A

Average Rate Change

- Average rate change in Table 10, column AC of the PA Actuarial Memorandum Exhibits: 11.5%

- Change in 21-year-old non-tobacco premium PMPM in Table 11, cell AN13 of the PA Actuarial Memorandum Exhibits: 13.9%

Membership Count

Current and projected membership for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits. The remainder of this table is left blank since this company does not have any experience in the small group market during the experience period.

Benefit Changes

A table with these changes has been included in Appendix I. No plans have actuarial values that fall in the expanded de minimis range.

Single Risk Pool

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

Experience Period Claims and Premium

Tables 1, 2, 3, and 4 of the PA Actuarial Memorandum Exhibits and section I, worksheet 1 of the URRT are not populated with claims and premium data in the single risk pool from the experience period (January 2018 - December 2018) since the captioned company did not have any experience for ACA-related products in this market over this time period. Rate development relies completely upon data from the rate manual, which has its experience displayed in tables 2b, 3b, and 4b and section II, worksheet 1 of the URRT.

Credibility of Data

No experience period data is available for the captioned company in this market. Therefore, 0% credibility is used. The rate manual was developed using experience period data for UPMC's entire block of groups enrolled in a ACA-compliant plan, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The rate manual consists of 1,098,351 member months of experience. Adjustments include the trend and network adjustments discussed in the "Index Rate" section below.

Trend Identification

The overall annual trend used in rate development is 2.99%. 24 months of trend were applied to the experience period data to bring it to the projection period. Historical allowed claims were used to develop year over year trend factors for use in the projected rates. The entire block of ACA-compliant business was included in Table 3b of the PA Actuarial Memorandum Exhibits for manual trend development. Service categories were defined to be consistent with the URRT instructions. Please note that the minor changes made to benefit designs in order

to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and 3b. Please see Exhibit 8 of the Supporting Exhibits for trend development. We believe that trends will be higher than what is implied by the historical data, which is why a value of 2.99% was used in rate development.

Small Group Quarterly Trend Increases:
Quarterly trended rates beginning on the first day of each calendar quarter of 2020 are proposed in this filing. The proposed quarterly trend is 0.89%. Please see Exhibit 7 for the derivation of quarterly trend.

Historical Experience

Historical data from the four most recent calendar years for the captioned company and market with three months of run-out are not provided in Table 4 since the captioned company did not have any experience for ACA-related products in this market over this time period. The historical data listed in Table 4b belongs to our entire block of ACA-compliant business and was used in the development of manual trend.

Rate Development & Change

Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below. Table 5a is populated with the number of member months renewing in each quarter since quarterly trended rates are proposed for this filing.

Index Rate:
For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to the lack of credibility. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 2.99% annual trend to the manual rate. An adjustment accounting for changes in network costs is then applied to get from the single risk pool population to the plan offerings of this specific segment.

Additionally, an adjustment factor to account for change in network of 0.882 has been applied to the manual data as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. This factor is used to account for the fact that the manual experience data consists of a blend of data from UPMC's Premium Network and Standard Network in the small group market. The factor adjusts the blended manual data to bring it in line with the network characteristics of the MyCare Advantage Network, which is the only network in which plans for the projection period under the captioned company will be offered. The Premium Network is a broad network that covered rating areas 1, 2, 4, and 5, as well as portions of rating areas 3, 6, and 7 during the experience period, but has since expanded to include additional counties in rating areas 3, 6, 7, and 9 in the projection period. Projected costs are expected to increase due to this expansion. Meanwhile, the Standard Network only covers rating areas 1, 2, 4, and 5. Finally, the MyCare Advantage Network covers various counties in rating areas 1, 3, 4,

5, 7, and 9. Despite the fact that this is a relatively broad network, this network is anticipated to exhibit noticeably lower cost of delivery characteristics than the Premium and Standard Networks. This factor accounts for differing cost of delivery characteristics between each of these three networks. This factor has not been applied in the Other adjustment in section II, worksheet 1 of the URRT since this adjustment is only necessary for the manual data.

No other adjustments have been applied to the index rate. The average age for our experience period small group risk pool was 37.0 with an average premium factor of 1.53. This is nearly identical to our 2019 experience so far with age 37.1 and premium factor 1.53. Due to the stability of the population, no demographic adjustment has been made to the rates. Please note that the Index Rate of Projection Period of $423.15 shown in Table 5 matches the corresponding value shown in section II, worksheet 1 of the URRT.

Market-Adjusted Index Rate:

The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a receivable of $6.44, which is displayed in Table 5. Please see Exhibit 1 of the Supporting Exhibits for the derivation of this value. The value entered in section II, worksheet 1 of the URRT was $8.31 since the calculation of the Marketed Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The effect for this adjustment is a decrease in premium since less revenue will be required due to the anticipated receivable. No adjustment was made for the Marketplace User Fee since all plans included in this filing are only offered off exchange.

Total Allowed Claims:

The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $0.96 PMPM.

Retention Items

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

Administrative Expenses:

Administrative costs of 9.24% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

[This information redacted for publication.]

Taxes and Fees:
Taxes and Fees increased from 2% in 2019 to 4.89% in 2020 to account for the return of the Health Insurance Providers Fee in 2020. This load also accounts for the projected Federal Income Tax in 2020. Please note that the Risk Adjustment Administration Fee was included in the Taxes and Fees field in Table 6.

Profit/Contingency:
The projected profit margin for this company will remain at 0% for 2020. This value is listed in both Table 6 and the URRT. The same level of profit margin is expected for each plan included in this filing.

Projected Loss Ratio
The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 90.4%, as shown in Exhibit 6 of the Supporting Exhibits.

Normalized Market-Adjusted Projected Allowed Total Claims

Normalization factors for 2019 and 2020 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2019 factors have been taken from the prior annual rate filing of the captioned company and market. Detailed discussion on each of the 2020 factors are provided below.

Average Age Factor:
The average age factor was calculated using our projected ACA-related Small Group population with the prescribed HHS Age Factors for 2020. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant small group business, the average age factor is 1.53 and average age was 37.0 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.993, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.52. Please see Exhibit 4 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:
The calibration factor of 0.988 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 5 of the Supporting Exhibits. Please see the Geographic Factors section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:
No tobacco load is applied in the Small Group market, so the average tobacco factor is 1.0.

Average Benefit Richness:
Benefit richness factors were calculated so that the average value is 1.0 when weighted with current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Average Network Factor:
The network factor applied for all networks included in this filing is 1.0.

Components of Rate Change

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented in the 2019 columns have been taken from this company's 2019 annual rate filing.

Plan Rate Development

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2020 Plan Adjusted Index Rates. The allowable modifiers that are used in rate development are described below. Please note that the MyCare Advantage product offered with a mixture of tiered and non-tiered in-network benefits does not fit the format of the AV Calculator. Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final metal-level AVs for these tiered plans.

Plan Actuarial Value:
The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims.

Benefit Richness (induced demand)
Please see Exhibit 3 in the Supporting Exhibits for the induced utilization exhibit. Please note that the average tobacco factor was set to 1.0 in Exhibit 3 since the tobacco surcharge adjustment was removed from Table 10, which means that this factor should not be included in the induced utilization development. The benefit richness adjustment was used to keep relativities between plans similar to what they were in the previous year and account for differences in induced demand between plans with different metal levels. This will minimize rate increase variations by plan and consumer confusion that could result. In addition, current loss ratios exhibit significant variation between metal levels, which suggests a wider variation is necessary than what is indicated in the company-determined Pricing AV.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $0.96 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2020 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans. This load has not changed from the prior filing.

Provider Network
No adjustments were made to account for provider network since the projected costs for each network included in this filing do not exhibit any significant differences.

Catastrophic Eligibility
Catastrophic plans will not be offered under this company and market in 2020, so no adjustment is necessary.

Non-Funding of CSR Adjustment
This adjustment is not applicable to the small group market.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. Please see Exhibit 2 of the Supporting Exhibits for historical rate changes for this company and market for a 21-year-old non-tobacco user.

Plan Factors

Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2020 is used in the development of the Consumer Adjusted Premium Rates. No tobacco load will be applied for the small group market in 2020.

Geographic Factors

The geographic rating areas used within this filing are the same as those defined by the state. To better reflect the varying costs of delivery between each geographical region in which coverage is offered, rating area factors have been updated for 2020. The table below summarizes changes in these factors:

Region	2019	2020
1	0.96	0.94
3	1.12	1.12
4	1.00	0.99
5	1.00	0.99
7	1.17	1.16
9	1.15	1.15

Network Factors

No network adjustments were deemed necessary for 2020, since we do not anticipate significant variations in cost by network for the networks including in the small group market for this company.

Service Area Composition

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2020. Service area maps for 2019 and 2020 have been uploaded in the Supporting Documentation section in SERFF.

Composite Rating

No composite rating is used with these plans.

Warning Alerts

No validation errors appear in the URRT.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 2: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User
- Exhibit 3: Induced Utilization Derivation
- Exhibit 4: Derivation of Age Calibration Factor
- Exhibit 5: Derivation of Geographical Calibration Factor
- Exhibit 6: Derivation of Projection Period MLR
- Exhibit 7: Derivation of Quarterly Trend
- Exhibit 8: Derivation of Annual Trend

Actuarial Certification

I, [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

Table 5. Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

Development of the Projected Index Rate	Actual Experience Data	Manual Data	
Total Allowed EHB Claims + EHB Capitation PMPM (net of prescription drug rebates) PMPM	$ -	$ 452.42	<- Actual Experience PMPM should be consistent with the Index Rate for Experience Period on URRT
Two year trend projection Factor	1.000	1.061	
Unadjusted Projected Allowed EHB Claims PMPM	$ -	$ 479.90	
Single Risk Pool Adjustment Factors			
Change in Morbidity	1.000	1.000	<- See URRT Instructions
Change in Other	1.000	0.882	
Change in Demographics	1.000	1.000	<- See URRT Instructions
Change in Network	1.000	0.882	
Change in Benefits	1.000	1.000	<- See URRT Instructions
Change in Other	1.000	1.000	<- See URRT Instructions
Total Adjusted Projected Allowed EHB Claims PMPM	$ -	$ 423.15	
Credibidility Factors	0%	100%	<- See Instructions
Blended Projected EHB Claims PMPM		**$ 423.15**	**<- Projected Index Rate**
Development of the Market-Adjusted Index Rate and Total Allowed Claims			
Adjusted Projected Allowed EHB Claims PMPM	$ 423.15	<- Index Rate for Projection Period on URRT - Individual or First Quarter Small Group	
Adjusted Projected Allowed EHB Claims PMPM [will only populate for small group filings]	$ 429.64		
Projected Paid to Allowed Ratio	0.775		
Projected Paid EHB Claims PMPM	$ 333.11		
Market-wide Adjustments			
Projected Risk Adjustment PMPM	$ 6.44		
Projected Paid Exchange User Fees PMPM	$ -		
Market-Adjusted Projected Paid EHB Claims PMPM	$ 326.66		
Market-Adjusted Projected Allowed EHB Claims PMPM	$ 421.33	<- Market-Adjusted Index Rate	
Projected Allowed Non-EHB Claims PMPM	$ 0.96		
Market-Adjusted Projected Paid Total Claims PMPM	$ 327.41		
Market-Adjusted Projected Allowed Total Claims PMPM	$ 422.30		

For Informational Purposes only - No input required.

Blended Base Period Unadjusted Claims before Normalization	$ 452.42	**<- Index Rate of Experience Period on URRT**
Blended Earned Premium	**$ 433,477,303.48**	
Blended Loss Ratio	**95.87%**	

Table 5A. Small Group Projected Index Rate with Quarterly Trend

Effective Date	1/1/2020	4/1/2020	7/1/2020	10/1/2020	Total Single Risk Pool
# of Member Months Renewing in Quarter	30,038	9,454	17,629	41,363	98,484
Adjusted Projected Allowed EHB Claims PMPM Q1	$ 423.15	$ 423.15	$ 423.15	$ 423.15	$ 423.15
Months of Trend	-	3	6	9	
Annual Trend	3.60%	3.60%	3.60%	3.60%	
Single Risk Pool Projected Allowed Claims	$ 423.15	$ 426.91	$ 430.70	$ 434.53	$ 429.64
Quarterly Trend Factor	100.0%	100.9%	101.8%	102.7%	101.5%
2020 Trend Factors by Quarter	0.9849	0.9936	1.0025	1.0114	

Table 6. Retention

Retention Items - *Express in percentages*	Percentages	PMPM Amounts
Administrative Expenses	9.24%	$35.23
General and Claims	6.28%	$23.95
Agent/Broker Fees and Commissions	2.26%	$8.62
Quality Improvement Initiatives	0.70%	$2.66
Taxes and Fees	4.89%	$18.63
RA User Fee	0.05%	$0.18
PA Premium Tax (if applicable)	2.00%	$7.63
Federal Income Tax	0.84%	$3.20
Health Insurance Providers Fee (Prorated for Small Groups only)	2.00%	$7.63
Profit/Contingency (after tax)	0.00%	$0.00
Total Retention	14.13%	$53.86
Projected Required Revenue PMPM	$ 381.27	

Table 7. Normalized Market-Adjusted Projected Allowed Total Claims

Normalization Factors	2019	2020
Average Age Factor	1.524	1.518
Average Geographic Factor	1.069	0.988
Average Tobacco Factor	1.000	1.000
Average Benefit Richness (induced demand)	0.914	1.000
Average Network Factor	1.000	1.000
Market-Adjusted Projected Allowed Total Claims PMPM	$ 438.06	$ 422.30
Normalized Market-Adjusted Projected Allowed Total Claims PMPM	$ 294.03	$ 281.57

Table 8. Components of Rate Change

Rate Components	2019	2020	Difference	Percent Change
A. Calibrated Plan Adjusted Index Rate (PMPM)	$ 228.98	$ 255.25	$26.26	11.5%
B. Base period allowed claims before normalization	$ 451.99	$ 452.42	$0.43	0.2%
C. Normalization factor component of change	$ (148.61)	$ (150.76)	-$2.15	-0.9%
D. Change in Normalized Allowed Claims Adjustment Components				
D1. Base period allowed claims after normalization	$ 303.38	$ 301.66	$ (1.72)	-0.8%

RFJ Part II – Consumer Friendly Justification

Small Group Exchange EPO/PPO Rate Filing

The rate change for UPMC Health Benefits Small Group plans is 11.47% for 2020. Additional premium is needed to account for the higher cost and utilization of medical services each year. The proposed rate change also accounts for a decrease in anticipated Risk Adjustment receivable relative to the prior year and projected increases in taxes and fees for 2020.

Scope and Range of the Rate Increase

The number of individuals affected by this rate increase is 8,212. There will be no variation in the increase among affected members. The proposed rate increase varies by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The range of the proposed rate change is 2.37% to 65.54%.

Financial Experience of the Product

Premiums	$	-
Claims	$	-
Administrative expenses	$	-
Taxes & fees	$	-
Company made (after taxes)	**$**	**-**

Changes in Medical Service Costs

For 2020, cost and utilization increases are expected to increase by approximately 2.99%

Changes in Benefits

No changes in benefits contributed significantly to the increase.

Administrative Costs and Anticipated Profits

No major changes in administrative costs or profits are anticipated and thus did not affect the increase.

RFJ Part III: Actuarial Memorandum

General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Identifying Information:
Company Legal Name: UPMC Health Benefits, Inc.
NAIC #: 11018
State: PA
HIOS Issuer ID: 67430
Market: Small Group
Exchange: Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2020

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131943309
Form Filing SERFF Tracking #: UPMC-131920987, UPMC-131921050, UPMC-131921052, UPMC-131921054
Binder SERFF Tracking #: UPMC-PA20-125092383

Rate History:
Limited rate history exists since this is the second annual rate filing by the captioned company in this market. Rate filing tracking numbers from the 2019 rate filings for the captioned company and market are displayed in the table below.

SERFF Tracking #	Year	Rate Change relative to Prior Annual Filing
UPMC-131496028	2019	N/A
UPMC-131851705	2019 Q4	N/A

Proposed Rate Increase(s)

Reasons for Rate Increase(s):
The proposed rate increase for PPO products in 2020 is 11.6%
The proposed rate increase for EPO products in 2020 is 13.4%

The major reasons for the increase include the following:

- Increasing cost and utilization trends
- Return of the Health Insurer Provider's Fee in 2020
- Decrease in anticipated Risk Adjustment receivable relative to prior year

Market Experience

Single Risk Pool

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

Experience Period Premium and Claims

Tables 1, 2, 3, and 4 of the PA Actuarial Memorandum Exhibits and section I, worksheet 1 of the URRT are not populated with claims and premium data in the single risk pool from the experience period (January 2018 - December 2018) since the captioned company did not have any experience for ACA-related products in this market over this time period. Rate development relies completely upon data from the rate manual, which has its experience displayed in tables 2b, 3b, and 4b and section II, worksheet 1 of the URRT.

Current Date:
Current enrollment and premium data is reported as of February 2019.

Benefit Categories

Medical claims are split into nine categories in our data warehouse. They are mapped into the categories in the URRT as follows:

UPMC Benefit Category	URRT Benefit Category
Inpatient	Inpatient Hospital
Catastrophic	Inpatient Hospital
Outpatient	Outpatient Hospital
Behavioral	Outpatient Hospital
PCP	Professional
Specialist	Professional
Diagnostic	Other Medical

ER	Other Medical
Other	Other Medical
Pediatric Dental	Other Medical
Pediatric Vision	Other Medical

Drug claims are in separate tables and directly mapped into the Prescription Drugs category.

Projection Factors

Trend Factors (cost/utilization):
The overall annual trend used in rate development is 2.99%. 24 months of trend were applied to the experience period data to bring it to the projection period. Historical allowed claims were used to develop year over year trend factors for use in the projected rates. The entire block of ACA-compliant business was included in Table 3b of the PA Actuarial Memorandum Exhibits for manual trend development. Service categories were defined to be consistent with the URRT instructions. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and 3b. Please see Exhibit 8 of the Supporting Exhibits for trend development. We believe that trends will be higher than what is implied by the historical data, which is why a value of 2.99% was used in rate development. In addition, quarterly rates effective on the first day of each calendar quarter in 2020 are proposed using 0.89% quarterly trend. Please see Exhibit 7 for the derivation of quarterly trend.

Adjustments to Trended EHB Allowed Claims PMPM

Changes in the Morbidity of the Population Insured:
We expect a morbidity trend of 0% when comparing our experience period population.

Changes in Benefits:
No changes were made to the PA EHB Benchmark plan for 2020, so no adjustments were necessary.

Changes in Demographics:
The average age for our experience period small group risk pool was 37.0 with an average premium factor of 1.53. This is nearly identical to our 2019 experience so far with age 37.1 and premium factor 1.53. Due to the stability of the population, no demographic adjustment has been made to the rates.

Other Adjustments:
Additionally, an adjustment factor to account for change in network of 0.882 has been applied to the manual data as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. This factor is used to account for the fact that the manual experience data consists of a blend of data from UPMC's Premium Network and Standard Network in the small group market. The factor adjusts the blended manual data to bring it in line with the network characteristics of the MyCare Advantage Network, which is the only network in which plans for the projection period under the captioned company will be offered. The Premium Network is a broad network that

covered rating areas 1, 2, 4, and 5, as well as portions of rating areas 3, 6, and 7 during the experience period, but has since expanded to include additional counties in rating areas 3, 6, 7, and 9 in the projection period. Projected costs are expected to increase due to this expansion. Meanwhile, the Standard Network only covers rating areas 1, 2, 4, and 5. Finally, the MyCare Advantage Network covers various counties in rating areas 1, 3, 4, 5, 7, and 9. Despite the fact that this is a relatively broad network, this network is anticipated to exhibit noticeably lower cost of delivery characteristics than the Premium and Standard Networks. This factor accounts for differing cost of delivery characteristics between each of these three networks. This factor has not been applied in the Other adjustment in section II, worksheet 1 of the URRT since this adjustment is only necessary for the manual data.

Credibility Manual Rate Development

Source and Appropriateness of Manual Rate Used:
The rate manual was developed using experience period data for groups enrolled in an ACA-compliant plan, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The rate manual consists of 1,098,351 member months of experience.

Adjustments Made to the Data:
Adjustments made to the manual data are discussed in the "Projection Factors" section above.

Inclusion of Capitation Payments:
Pediatric dental benefits are projected to be paid for via capitation.

Credibility of Experience

No experience period data is available for the captioned company in this market. Therefore, 0% credibility is used.

Establishing the Index Rate

For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to the lack of credibility. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 2.99% annual trend to the manual rate. The adjustments described in the Projection Factors section above were then applied to the trended manual rate to generate the Index Rate of the Projection Period. Please note that the Index Rate of Projection Period of $423.15 shown in Table 5 matches the corresponding value shown in section II, worksheet 1 of the URRT. Claims for routine foot care and acupuncture were not included in the calculation of the index rates despite being covered during the experience period since they are classified as non-EHBs.

Small Group Quarterly Trend Increases:
Quarterly trended rates beginning on the first day of each calendar quarter of 2020 are proposed in this filing. The proposed quarterly trend is 0.89%. Please see Exhibit 7 for the derivation of quarterly trend.

Paid to Allowed Ratio

The Paid to Allowed Average Factor was calculated by taking the weighted average of the company-determined Actuarial Values for all plans using current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Development of the Market Adjusted Index Rate

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment and Marketplace Fees adjustments are described below in the Projected Risk Adjustments PMPM and Taxes and Fees sections, respectively.

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:
No experience period Risk Adjustment data is available for the captioned company in this market.

Projected Risk Adjustments PMPM:
Projection period Risk Adjustment PMPM has been estimated to be a receivable of $6.44, which is displayed in Table 5. Please see Exhibit 1 of the Supporting Exhibits for the derivation of this value. The value entered in section II, worksheet 1 of the URRT was $8.31 since the calculation of the Marketed Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The effect for this adjustment is a decrease in premium since less revenue will be required due to the anticipated receivable.

Exchange User Fees:
No adjustment was made for the Marketplace User Fee since all plans included in this filing are only offered off exchange.

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:
Administrative costs of 9.24% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

[This information redacted for publication.]

Profit & Risk Margin:
The projected profit margin for this company will remain at 0% for 2020. This value is listed in both Table 6 and the URRT. The same level of profit margin is expected for each plan included in this filing.

Taxes and Fees:
Taxes and Fees increased from 2% in 2019 to 4.89% in 2020 to account for the return of the Health Insurance Providers Fee in 2020 and Risk Adjustment User Fee.

Plan Adjusted Index Rates

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2020 Plan Adjusted Index Rates. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:
The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims. Please see the "AV Metal Values" section below for a discussion on the treatment of plans that did not fit the AV Calculator.

Benefit Richness (induced demand)
Please see Exhibit 3 in the Supporting Exhibits for the induced utilization exhibit. Please note that the average tobacco factor was set to 1.0 in Exhibit 3 since the tobacco surcharge adjustment was removed from Table 10, which means that this factor should not be included in the induced utilization development. The benefit richness adjustment was used to keep relativities between plans similar to what they were in the previous year and account for differences in induced demand between plans with different metal levels. This will minimize rate increase variations by plan and consumer confusion that could result. In addition, current loss ratios exhibit significant variation between metal levels, which suggests a wider variation is necessary than what is indicated in the company-determined Pricing AV.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $0.96 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2020 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans. This load has not changed from the prior filing.

Provider Network
No adjustments were made to account for provider network since the projected costs for each network included in this filing do not exhibit any significant differences.

Catastrophic Eligibility
Catasrophic plans will not be offered under this company and market in 2020, so no adjustment is necessary.

Non-Funding of CSR Adjustment
This adjustment is not applicable to the small group market.

Calibration

Age Curve Calibration:
The average age factor was calculated using our projected ACA-related Small Group population with the prescribed HHS Age Factors for 2020. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant small group business, the average age factor is 1.53 and average age was 37.0 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.993, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.52. Please see Exhibit 4 in the Supporting Exhibits for the calculation of this factor.

Geographic Factor Calibration:
The geographic rating areas used within this filing are the same as those defined by the state. To better reflect the varying costs of delivery between each geographical region in which coverage is offered, rating area factors have been updated for 2020. The table below summarizes changes in these factors:

Region	2019	2020
1	0.96	0.94
3	1.12	1.12
4	1.00	0.99
5	1.00	0.99
7	1.17	1.16
9	1.15	1.15

The calibration factor of 0.988 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 5 of the Supporting Exhibits.

Tobacco Use Rating Factor Calibration:
No tobacco load is applied in the Small Group market, so no adjustment is necessary.

Consumer Adjusted Premium Rate Development

The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates. Please see Exhibit 2 of the Supporting Exhibits for historical Consumer Adjusted Premium Rate changes for this company and market for a 21-year-old non-tobacco user.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 90.4%, as shown in Exhibit 6 of the Supporting Exhibits.

Plan Product Info

AV Metal Values

Metal values were determined using the final 2020 HHS AV Calculator. Please note that the MyCare Advantage product offered with a mixture of tiered and non-tiered in-network benefits does not fit the format of the AV Calculator. Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final metal-level AVs for these tiered plans.

Membership Projections

Membership projections were developed based on our anticipated competitive positioning in the market combined with our current enrollment distribution by plan.

Terminated Plans and Products

Please see Table 10 of the PA Actuarial Memorandum Exhibits for a mapping of all terminated SCIDs to a 2020 plan.

Warning Alerts

No validation errors appear in the URRT.

Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conductive effective rate review for all submitted rates.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Experience and Projection Periods
- Exhibit 2: Historical Changes in Consumer Adjusted Premium Rate for Age 21, Non-tobacco User
- Exhibit 3: Induced Utilization Derivation
- Exhibit 4: Derivation of Age Calibration Factor
- Exhibit 5: Derivation of Geographical Calibration Factor
- Exhibit 6: Derivation of Projection Period MLR
- Exhibit 7: Derivation of Quarterly Trend
- Exhibit 8: Derivation of Annual Trend

Actuarial Certification

I, [redacted]am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

2020 Rates Table Template v9.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
	If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.			
HIOS Issuer ID*	67430			
Federal TIN*	25-1844144

2020 Rates Table Template v9.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
	If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.			
HIOS Issuer ID*	67430			
Federal TIN*	25-1844144			
Rate Effective Date*	10/1/2020			
Rate Expiration Date*	12/31/2020			
Rating Method*	Age-Based Rates			

Plan ID*	Rating Area ID*	Tobacco*	Age*	Individual Rate*
Required: Enter the 14-character Plan ID	**Required:** Select the Rating Area ID	**Required:** Select if Tobacco use of subscriber is used to determine if a person is eligible for a rate from a plan	**Required:** Select the age of a subscriber eligible for the rate	**Required:** Enter the rate of an Individual Non-Tobacco or No Preference enrollee on a plan

Dear Mr. Lovely:

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. The updated URR instructions require the quantitative impacts of the rate increase drivers. Please provide an estimate of the amount of the average rate increase contributed by the rate increase factors, considering the drivers included in the Part III memo are different than the categories in Table 8 of the PAAM.

The quantitative impacts of the rate increase drivers listed in the Part III Memo are:

● Increasing cost and utilization trends: 3.0% (average across products)

● Return of the Health Insurer Provider's Fee in 2020: 3.4% (average across products)

● Decrease in anticipated Risk Adjustment receivable relative to prior year: 3.1% (average across products)

These aren't the only factors that exist, which is why they don't exactly line up with the total.

2. Please explain how variations in rate increases by plan were developed and how morbidity was removed per the URR instructions.

All pricing AVs were determined using the same pricing tool, which uses claims data and a base population from UPMC's fully insured commercial block of business. Since the same tool was used for all plans, this eliminates any impact from morbidity at the plan level, and differing rate increases by product type are purely based on differences in benefit design for all plans within a given product.

3. The federal actuarial memorandum indicates a current date as of February 2019, however, the current enrollment on the URRT of 8,212 does not match the PAAM amount of 8,207. Please explain the discrepancy.

These exhibits require different levels of data detail. Not all of this detail is available within our underlying data. We deemed this discrepancy immaterial.

4. Since the trends were not developed from Exhibit 8, please provide support for the trends used in the PA Exhibits.
a. Please explain why the trends provided in Exhibit 8 of the Supporting Exhibits file do not match the PAAM.
b. Please explain how the 3% trend was selected.
c. Please explain why the trends for the Other Medical category are significantly different than the other benefit categories and provide support for the 28.41% Other Medical cost trend.
d. Please explain the low trends for the other service categories.

a. There was an error with the calculations in exhibit 8, which has been corrected as part of this correspondence. Please note that the trends displayed in exhibit 8 now match those shown in the PA Exhibits and the URRT. Also, this correction has not affected the magnitude of the applied annual trend.

b. The raw historical data implies an annual trend of 1.3% as shown in exhibit 8. We do not believe that this value accurately represents future trends that will be observed in this market,

leading to the decision to increase the trend applied in rate development. This was done by introducing an adjustment factor that uniformly increases the historical trends for each benefit category so that an overall annual trend of 3.0% is applied in rate development.

c. Please note that the overall value for other medical annual trend has changed from 28.41% to 14.2% as a result of the correction mentioned in the response to part a. As shown in rows 27-31 of exhibit 8, historical data shows a large increase in unit cost for the other medical benefit category. It is worth noting that this large increase is somewhat offset by a notable decrease in utilization PTPM implied by historical data for this same category. Since the adjustment factor was uniformly applied to the trends for all benefit categories, the adjustment factor brings the overall other medical trend up from the value implied by historical data to the applied value of 14.2%.

d. The low trend observed for prescription drug can be attributed to utilization of brand drugs shifting over to generic drugs, leading to lower unit costs for pharmacy and ultimately a lower than expected unit cost trend. It can also be attributed to an increase in pharmacy rebates in recent years. For the remaining categories, lower than expected trends can be attributed to small increases in historical unit costs (or a decrease in the case of outpatient hospital) as well as relatively large decreases in historical utilization PTPM as shown in columns E and F of exhibit 8.

5. Please explain why the projected member months on WS2 of the URRT (98,496) do not match the 98,484 included in the PAAM.

These exhibits require different levels of data detail. Not all of this detail is available within our underlying data. We deemed this discrepancy immaterial.

6. What are the measurement units used for the "Other Medical" category?

Services are the measurement unit for the Other Medical category.

7. Did trend assumptions consider changes in provider contracting? If not, why? If so, what impact did they have on trend assumptions?

Changes in provider contracting were considered but were ultimately assumed to have negligible impact on trend.

8. Were trends adjustment for unexpected large claims? If so, what was the impact?

No unexpectedly large claims were observed in terms of frequency and severity. Therefore, no adjustment was made.

9. If adjustments are made for large claim pooling, was the federal risk adjustment program considered?

We considered the impact of UPMC's expected large claims versus the nation's large claims and assumed a neutral impact.

10. Please explain why the adjustment method for trend was changed from Plan Year 2019 to Plan Year 2020. Please recalculate and provide the adjustment factors needed to produce the original requested trends using a consistent method for both Plan Years so that a comparison may be made.

We feel that the adjustment method used in the current filing makes more sense than the approach used in the prior filing. The old approach adjusts the trends for each benefit category by applying a scalar multiplier. The new approach adjusts the trends in a more additive manner. Despite the fact that this change in adjustment methods results in different annual trends for each benefit category and noticeably different adjustment factors, the overall annual trend factor

applied in rate development remains the same. The goal of this adjustment process is bring the trend implied by historical data to a level more reflective of anticipated future trends in the market, regardless of the adjustment method implemented. Please see exhibit 10 of the response exhibits Excel file for the derivation of the prior filing's applied trend using the approach employed in the current filing.

11. Please explain why it is appropriate to assume the same relative risk between UPMC Health Benefits and UPMC Health Options for the purpose of risk adjustment considering the product offerings and the populations are much different.

Accounting for differences in risk between these legal entities would require an assumption to account for a less favorable projected risk adjustment transfer for this filing. If this assumption is made, it follows that an additional assumption accounting for lower induced utilization would also be required. These two adjustments would have an offsetting effect and were ultimately excluded from rate development.

12. The URR instructions indicate the URRT index rate should reflect 1Q2020 and not the average index rate indicated in the PAAM. Please correct.

This has been corrected as part of this correspondence.

13. We see Exhibit 3 calculates the induced demand factors, however, the AV and cost sharing is hard coded. Please provide substantial narrative and quantitative support for the platinum level induced demand factors. The relativity of platinum to silver is almost 41%, compared to the HHS risk adjustment induced demand factors which provide a relativity of 1.15/1.03 – 1 of 12%.

As our small group ACA membership grows, the percentage of groups in gold plans continues to increase while the percentage in platinum has decreased. When a small portion of the total block lies in the richest plans, it stands to reason that the amount of claims experienced due to induced demand would be higher than compared to a more evenly spread enrollment. The CMS numbers may work for some markets, though they have not changed since inception and are the same across small group and individual.

14. Please provide support for the multiple AV & cost sharing for each of the metal level plans.

AV and cost sharing factors reflect differences in company-determined pricing AV. This implies that differences in benefit designs lead to slight differences in AV and cost sharing factors for plans within a given metal level.

15. The updated URR instructions indicate that the risk adjustment on the URRT should no longer be net of the risk adjustment user fee and should instead be included with taxes and fee. Please update materials so the risk adjustment fee is not included with risk adjustment transfers as a market-wide adjustment.

This update has been made as part of this correspondence.

16. Considering unique plan designs were included, please provide or point us to the unique plan design certification.

This certification has been uploaded in the Supporting Documentation section in SERFF.

17. Please identify any rating factors for medical management along with any change in factors from Plan Year 2019.

No separate rating factors for medical management have been implemented.

18. <REDACTED>

19. Please provide an actuarial certification that includes the list and title of all applicable of ASOPs the actuary is certifying work conformity.

Many ASOPs apply to our work. Per URRT instructions, we place particular emphasis on the following ASOPS:

- **ASOP No. 5, Incurred Health and Disability Claims**
- **ASOP No. 8, Regulatory Filings for Health Plan Entities**
- **ASOP No. 12, Risk Classification**
- **ASOP No. 23, Data Quality**
- **ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages**
- **ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans**
- **ASOP No. 41, Actuarial Communications**
- **ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act**

20. If Pediatric Dental is administered and paid by Dominion Dental, like the other entities of the UPMC group, please identify the fees paid to Dominion Dental on a PMPM basis. Is this fee paid on a capitation basis or on a fee for service basis? By how much PMPM is this fee projected to increase from 2019 to 2020?

The fees paid to Dominion Dental are $14.01 PMPM for catastrophic pediatric PPO plans and $15.93 PMPM for all other deductible levels of pediatric PPO plans. These fees are paid on a capitation basis and are not projected to change from 2019 to 2020.

21. Did the certifying actuary rely on any information or assumptions provided by another individual? If so, please provide an actuarial certification that includes reliance statements.

We did not rely on any external consultants. Data and other information was sourced internally, and there were no circumstances which warranted specific mention of reliance.

22. The Actuarial certification in the Federal Actuarial Memorandum appears to be based on last year's URRT and instructions. For example, it refers to "The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV," which is not part of the current URRT. Please revise the certification consistent with this year's URR instructions.

The line referenced above was carryover from actuarial memoranda used in prior filings. This line has been removed from the memoranda as part of this update.

23. The Federal actuarial memorandum Plan Product Info section states, "Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final metal-level AVs for these tiered plans." The PA actuarial memorandum has a similar statement under Plan Rate Development section. We note that there is no experience period data available according to the actuarial memoranda. Please explain.

The calculator referenced in these sections is the HHS AV calculator provided by CMS.

24. Please provide the Rate Change from 4Q2019 to 1Q2020.

Please see exhibit 24 of the response exhibits Excel file for the calculation of this rate change.

25. The PA AM indicates that data representing UPMC's entire block of ACA-compliant individual business was the basis for the manual rate. Please identify each entity contributing to this aggregate data. Also, discuss what, if any, adjustments were made to the data to reflect product and regional differences for this entity and the manual data pool.

The manual rate for this filing was developed using experience period data for UPMC's entire block of groups enrolled in a ACA-compliant plan. This includes the legal entities UPMC Health Benefits, UPMC Health Coverage, and UPMC Health Options. Adjustments made to the manual rate to reflect regional differences for this entity relative to the manual data pool are discussed in the Index Rate section of the PA actuarial memorandum.

26. Regarding Trend:
a. Is the data in Table 4b raw unadjusted data or has it been normalized of otherwise adjusted? If the data has been adjusted, please provide an exhibit that quantitatively shows the unadjusted allowed monthly data for the 48 months. Also include the following monthly data:
i. The average age factor;
ii. The average geographic factor;
iii. The average tobacco factor;
iv. The average benefit factor; and
v. The normalized average pmpm (which should match the allowed pmpms in column L of table 4b.).
b. Exhibit 8 of the supporting exhibit applies a "Trend Adjustment Factor" of 1.02 to adjust the developed cost and utilization assumptions.
i. Please explain what this factor is adjusting for and how it was developed.
ii. Please explain why the sum of the allowed 2018 benefit category claims (496,915,566) is not consistent with the amount shown in Table 2b (498,028,969 net of rebates).
iii. For inpatient services, for calendar year 2017 and 2018, provide a list of facilities, the total inpatient days at each hospital, total paid to each facility and the average cost per day at each facility.
1. Discuss the negotiated contract changes effective in 2019 and the expected changes for 2020 at each facility.
iv. For outpatient services, for calendar year 2017 and 2018, provide a list of facilities, the total procedures at each facility, total paid to each facility and the average cost per outpatient procedure.
1. Discuss the negotiated contract changes effective in 2019 and the expected changes for 2020 at each facility.

a. The data in Table 4b is raw unadjusted data.

b. i. This factor is used to adjust the annual trend factor implied by the raw historical data (1.013) to the applied annual trend factor (1.03). As shown in exhibit 8, this factor is simply the ratio of the latter factor relative to the former factor.

ii. The discrepancy can be explained by the former value including EHB data only, while the latter contains both EHB and non-EHB data.

iii & iv. We look at trend at a more aggregate level rather than building it up at a facility level so that level of detail was not used in developing trend.

27. Regarding Table 5:
a. The PA AM indicates that an adjustment (0.882) accounting for changes in network costs is applied to the projected index rate. Provide narrative and a worksheet that quantitatively shows the adjustment and the development, including all assumptions.
b. Using experience period data, please show the development of the Premium Network factor, the Standard Network factor and the MyCare Advantage Network Factor.

c. Are the proposed network factors consistent with the experience factors? If not, please discuss why and show adjustments.
d. Please explain why the MyCare Advantage Network factors are anticipated to be lower than the Standard Network factors even though the Standard Network is narrower than the MyCare Advantage Network.

a. Please see exhibit 27 of the response exhibits Excel file for the calculation of this factor. Assumptions relevant to the development of this factor are discussed in the Index Rate section of the PA actuarial memorandum.

b. The MyCare Advantage network does not have experience data as this was a new product in 2018. We estimated the difference in cost differentials by network taking into account the product offerings in each network. The MyCare Advantage network consists solely of tiered network plans, the Standard network consists solely of HMOs, and Premium houses PPOs and EPOs.

c. The proposed factors used existing factors as a starting point with adjustments made to account for changes in plan offerings as well as normalization.

d. The term "narrow" in this case meant the smaller number of counties in which the networks were offered rather than the typical meaning of fewer providers. We understand the confusion this caused and thus have updated the memorandum accordingly.

28. Regarding Table 6:
a. Using the submitted commission schedules, quantitatively show the development of the percent and pmpm amounts in cells C51 and D51.
b. Using the 2018 SHCE in the Annual Statement, please quantitatively show the development of the Quality Improvement Initiatives percent and pmpm amount.
c. We have repurposed row 54 to capture RA User Fees. Please provide the RA User Fee percentage and pmpm amount in cells C54 and D54.
d. Please provide quantitative support for the health insurer fee assumption.
e. Provide the actual paid HIT fees on a pmpm and percent of premium for calendar years 2018 and 2016.

a. The commission amounts from the financial statements were adjusted in correspondence with Finance department to more accurately reflect the projection period operational environment

b. The QI amounts from the financial statements were adjusted in correspondence with Finance department to more accurately reflect the projection period operational environment.

c. This change has been made as part of this correspondence.

d & e. From our internal financial records, 2018 HIT Tax / Revenue eligible = 40.6M/2.06B = 2% (and so 2% was used for 2020 pricing).

2016 Tax Paid = $23.9M on $1.37B eligible = 1.68%

29. Regarding the projected Risk Transfer pmpm
a. Where is the RA User Fee of $0.18 pmpm included in the rate calculation? This amount should be included in cells C54 and D54 of Table 6 as indicated above.

The RA User Fee is accounted for in table 6 as part of this correspondence.

30. Regarding Table 10:
a. The supporting Exhibit 4 shows the projected age band distribution. Please revise this exhibit to also show the current member distribution as of 2/1/19 and show the resulting average factor.

b. The PA AM indicates that no adjustment was made to the demographics for the 3-child max. Please explain why. Please show the development of the 3-child max factor based on the current billable member distribution.

a. The current and projected age band distributions are assumed to be identical. The heading in column C of this exhibit was revised to better reflect this.

b. Per the guidance, an adjustment accounting for the 3-child max is permitted but not required. Such an adjustment was considered but ultimately determined to have negligible impact on the age calibration factor and enrollment distribution and was not included in rate development. This approach is consistent with our approach in prior rate filings. Approximately 0.25% of the population in this market consists of non-billable members.

31. Regarding Adjustment Data Validation process (RADV):
a. Please describe any adjustments or considerations made due to the Risk Adjustment Data Validation process (RADV).
b. As you know CMS is performing a risk adjustment validation starting with 2017 risk adjustment data. We are considering allowing an estimate of the impact of risk adjustment modifications in rate filings as an adjustment to the projected risk adjustment. Before implementation, we are soliciting feedback from our issuers on the pros and cons of the inclusion of this adjustment. If allowed, all issuers would be required to submit an estimate. The estimate may be $0. Please provide any feedback that you would like us to consider.

a. We considered our position to be in line with other issuers and thus a neutral final impact.

b. Our internal estimates indicate that we will not receive a material adjustment as a result of RADV, and would not want to make adjustments to risk adjustment to account for this.

32. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.

We can confirm that we have tested to ensure that the rates match.

33. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost pmpms for calendar years 2015 – 2018, as applicable.

2019 was the first year in which we offered ACA-compliant products in this market under this legal entity, so this information cannot be provided.

34. Please provide an exhibit showing the financial gains and losses for calendar years 2014 – 2018 for the following categories: Member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy. Regarding Table 13 - Geographic Rating Area Factor Support you have revised all of the geographic factors contained in this table but have not provided any supporting documentation or data. Consistent with Federal guidance, Pennsylvania requires the small group geographic rating factors and premiums be based on the primary location of the employer. Please submit factors that are developed on this basis.

2019 was the first year in which we offered ACA-compliant products in this market under this legal entity, so this information cannot be provided.

35. Please explain how updated geographic rating factors were determined and how the impact of morbidity was eliminated.

Geographic factors were updated to better reflect cost differences by area. Points of consideration included differences in fee schedules, anticipated shifts in utilization between providers, and less favorable contracting terms in areas with few facilities (including those without UPMC facilities).

36. Please provide your quantitative analysis of the development of the geographic area rating factors for this market. This data must minimally include county level claims data for calendar years 2016, 2017 and 2018, based on the primary location of the employer. For each period, this data should show the following county level data: total ultimate incurred claims, estimated cost sharing, allowed claims, total number of days/visits/procedures, as appropriate, the number of member months, average age, average tobacco factor, average benefit factor and capitations. Separate tabs should be provided to show the development of the average age factor, average tobacco factor and average benefit factor by county. Within each county, show the estimated impact of favorable provider contracting. Ensure that all data and your in-depth analysis is submitted to support the current and proposed factors.

Proposed geographic pricing was developed consistent with prior pricing. We looked at each rating area as a whole rather than specific county-level data in determining the factors.

37. For calendar years 2016, 2017 and 2018, please provide the actual unit cost experience data by county by benefit category (inpatient, outpatient, physician surgery, physician radiology, etc.) to support the proposed changes. UPMC must provide data and discussion at the level of detail necessary for the department or its consultant, to independently calculate and verify all proposed adjustments.

Proposed geographic pricing was developed consistent with prior pricing. We looked at each rating area as a whole rather than specific category-level data in determining the factors.

38. Please fully demonstrate how new data and recent provider contracting has developed the proposed factors. Please provide the full details of the providers that were renegotiated and their total percent of claims in each county.

Provider contract negotiations happen at all different timeframes and not all are finalized for 2020 at this point. The factors we used represent our best estimate for when they are finalized.

39. Please describe and quantitatively demonstrate how the actual experience utilized in the Area Factor Analysis was normalized for differences in morbidity between the counties shown.

Differences in contracted rates were the main basis for geographic factors rather than experience period claims. This method inherently excludes morbidity.

40. UPMC offers 1 MyCare Advantage Network for PPOs and EPOs.
a. Is there a network difference between these products? Typically, the EPO networks represent a subset of the broader network.
b. In exchange for lower premiums, consumers select narrower networks. Is there a pricing differential between these products?
i. If so, where is this differential in the pricing. Quantitatively demonstrate the consistency of the EPO pricing

a. PPO and EPO have same in-network, while PPO has an out of network benefit.

b. There is no pricing differential for in-network benefits because they are the same between relevant matched EPO and PPO plans.

i. n/a

41. Please revise Appendix 1 to include Pricing AV columns for 2019 and 2020. Please show the approved 2019 Pricing AVs for all plans in the 2019 column and the proposed 2020 Pricing AVs in the 2020 column. Also provide a supporting worksheet that shows the quantitative development of the proposed factors.

The 2019 and 2020 Pricing AVs for each plan are displayed in Appendix II, which has been uploaded in the Supporting Documentation section in SERFF. The Pricing AVs are generated by calculations performed within a sophisticated pricing model that cannot be easily demonstrated

in an Excel exhibit. Please see the Plan Actuarial Value section of the PA actuarial memorandum for a discussion of this pricing model.

42. Please review the AV and Cost Sharing factors in column H of Exhibit 3 to ensure they are consistent with the AV and Cost Sharing Factors in Section II of Worksheet II of the URRT.

We can confirm that the AV & Cost Sharing factors in exhibit 3 and the URRT do match.

43. Please show the development of the FIT in Table 6.

The FIT was derived by taking the Health Insurer's Providers Fee of 2% plus the PA Premium Tax of 2% multiplied by the Federal Corporate Income Tax rate of 21%, which results in 0.84%.

Please be advised that there may be additional questions based on the responses to the above.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at (717) 787-5172.

Sincerely,

Cherri Sanders-Jones
Actuarial Review Division
Bureau of Accident & Health Insurance

Dear Mr. Lovely:

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. From the June 25 Response to Question 4 regarding trend, you have not provided support for the 3.0% trend. Please provide quantitative justification for the 3.0% trend.

When choosing the appropriate trends for projection, we considered experience for both ACA and non-ACA groups. Non-ACA groups had higher calendar year trends than the ACA groups. It is relevant to consider that experience because of the continually changing mix of the Small Group ACA block of business (where incoming groups are from this bigger pool). Weighing the filed ACA experience trends together with other internal groups, we arrived at 3% as appropriate for projections for the ACA group. Exhibit 1 of the response exhibits contains experience for our Fully Insured Group block of business trends.

2. From the June 25 Response to Question 11 regarding risk adjustment, you have only briefly explained your position and you seem to be suggesting that both risk adjustment and induced demand factors will need recalculated. Please speak to both of these items separately.
a. What is a more appropriate risk adjustment transfer assumption? Provide a quantified justification.
b. Explain why you believe a different risk adjustment transfer assumption would require a different induced demand. We question why induced demand would change since the benefit and cost sharing would not change. Induced demand is only for the impact of cost sharing on utilization. Provide data that supports your position with a quantified justification.

In thinking through this further, it would be most appropriate to update the morbidity of the expected population rather than induced demand. Across our small group filings, even though the product offerings are different, the richness of the plans is fairly similar. So we anticipate that the population would also be fairly similar across all of the small group filings. Therefore, no adjustments to morbidity and risk adjustment have been made for this filing.

3. From the June 25 Response to Question 13 regarding platinum level induced demand factors, you have not provided quantitative support. Please provide the requested item.

As the Department is aware, the ACA Grandmother or Transitional policy has created separate risk pools in the small group market. It is anticipated that, each year, a number of groups will move from the medically underwritten (MUW) Transitional market to the community rated ACA market. Importantly, it has been our observation that groups typically make such a move between markets only when they are unable to maintain a MUW premium that is lower than that in a comparable ACA plan. As such, a group moving from the MUW to ACA market is expected to come from the highest-utilization segment of the MUW pool, supporting a higher than average projection of induced demand. Moreover, because in our primary service geography employer group plans typically include rich benefits, we expect that many of these higher-utilization groups will trend toward higher-AV products and in particular the Platinum products. This expectation is also broadly supported by the fact that the MLR in our Platinum product is near 100% even with the prior year's Bronze-Platinum induced demand spread of 30%. Given the perceived relationship between market behavior in the Platinum product and the existence of the Transitional market, we do anticipate consideration for narrowing of the Bronze-Platinum spread when the Transitional and MUW markets are combined in 2021.

4. From the June 25 Responses to Question 13 regarding the silver plans having a lower induced demand factor than the bronze plans, your response indicates that this was allowed for Plan Year 2019. Please justify this relationship for Plan Year 2020. The prior year approval doesn't justify this.

The induced demand factors for Silver and Bronze as submitted have remained static through our prior year filings. In the absence of any basis by which to anticipate different market behavior in induced demand for 2020, we have elected to maintain these values as originally adopted a number of years ago.

5. From the June 25 Responses to Question 20 regarding Pediatric Dental, your response indicates that Pediatric Dental is provided via a capitation. Please correct rate filing materials and templates to reflect the capitation.

Rate filing materials and templates have been updated to reflect the capitation.

6. From the June 25 Responses to Questions 19, 21 and 28 regarding ASOP 41 and Reliance, your responses to these questions demonstrate that you may be relying upon material information from the Finance department and that you are aware of the ASOP 41 requirements regarding Reliance. Please provide the required disclosures for this rate filing per ASOP 41.

The reliance statement has been uploaded in the Supporting Documentation section in SERFF.

7. From the June 25 Responses to Question 23 regarding the blending of tiered and non-tiered benefits, we are merely asking what data was used to blend together the actuarial values calculated for the benefits since this carrier doesn't have experience period membership. If a "sister" carrier data was used please provide details.

An estimate for utilization by tier was taken from similar products sold under the UPMC Health Options, Inc. legal entity. An excel file named "Response to question 7" showing the calculation has been uploaded.

8. From the June 25 Responses to Question 28: "Regarding Table 6: a) Using the submitted commission schedules, quantitatively show the development of the percent and PMPM amounts in cells C51 and D51. b) Using the 2018 SHCE in the Annual Statement, please quantitatively show the development of the Quality Improvement Initiatives percent and pmpm amount." Provide quantitative justification for these amounts and fully explain the adjustments decided upon based upon Finance department correspondence.

The values for both the Quality Improvement Initiatives and Commissions are directly based on Finance Department estimates. A reliance statement to this effect has been submitted.

9. From the June 25 response to questions 36 and 37, you indicated that UPMC reviewed each rating area as a whole rather than specific county-level data in determining the geographic factors. Please provide the requested data by rating area. Please be aware that the proposed factors cannot be approved without detailed quantitative support.

The 2016-2018 data by rating area available in our data warehouse has been uploaded.

10. From the June 25 Responses to Questions 36, 37, 38, and 39: Please provide a comprehensive explanation of how changes in provider contracting impacted (or why it did not impact) trend, network factors, and geographic factors

While early estimates from our Reimbursement team have included a guarded estimate of stability, we note that a number of our 2020 provider contracts are not final. As such, while we do not currently anticipate a material deviation from the trend in prior year contract rates, we

cannot yet rule this out. In the absence of evidence to the contrary, we have initially incorporated provider contracting as a stable element of factor development.

11. From the June 25 Response to Question 41: "Please revise Appendix 1 to include Pricing AV columns for 2019 and 2020. Please show the approved 2019 Pricing AVs for all plans in the 2019 column and the proposed 2020 Pricing AVs in the 2020 column. Also provide a supporting worksheet that shows the quantitative development of the proposed factor." You indicate that the calculations are performed within a sophisticated model that cannot be easily demonstrated in an Excel exhibit. Start by providing the requested demonstration for the plans with the largest projected membership in 2020 for each metal level. Provide all requested information for these most popular plans.

We have prepared the Excel file "Confidential AV Exhibit - HB SG" with the requested information, in our redacted/confidential section. Further explanation and details are in those attached files.

12. As requested, you have added the RA User Fees in Table 6. Please confirm that there was no offsetting adjustments made elsewhere, as this fee was not included in the initial submission.

The RA User Fee was included in the original submission, in the Risk Adjustment row, Table 5, "Projected Risk Adjustment PMPM" (so the PMPM was a net value, consistent with our interpretation at the time). Now: the $0.18 user fee PMPM is reflected in Table 6 as requested, and the table 5 PMPM is $0.18 higher because it no longer subtracts that fee. So, the revised submission includes the fee, accounted for as requested; but the original submission also included the fee, so there is no rate impact.

13. In response to the Department's RADV survey, issuers indicated that they did not include an adjustment in the initial submission, as there was no supportable reason for a RADV adjustment in the 2020 rate submission. Therefore, the Department has determined that there should be no RADV adjustments in the 2020 rate filings; please modify the filing accordingly, if necessary.

No adjustments were made for RADV as part of this filing.

14. In that the Department's review authority requires rates to be adequate, not excessive or unfairly discriminatory, please explain why you believe the rates to be adequate without an adjustment for the 3-child maximum.

As part of this update, an adjustment accounting for the 3-child maximum has been incorporated into the derivation of the age calibration factor as shown in exhibit 4 of the supporting exhibits.

15. If the risk adjustment results released on June 28, 2019 are inconsistent with your projected assumptions, you may modify the risk adjustment transfer amount in Table 5. If such a modification is made, revise all the documents and exhibits impacted and the PA Actuarial Memorandum to discuss this change. This change must be made with your responses due by July 12, 2019.

No modifications were made to risk adjustment due to the projections being different than final results.

16. Concerning your network and geographic factors, please provide in Excel your base period member months, current membership, and projected member months for each network and geographic area. Also please provide your non-normalized network and geographic factors for 2018, 2019 and 2020.

Please see exhibit 16 of the response exhibits for the requested data. Please note that provider network factors are not applied for this legal entity in the Small Group market.

<Redacted>

Please be advised that there may be additional questions based on the responses to the above.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at (717) 787-5172.
Sincerely,

Cherri Sanders-Jones
Actuarial Review Division

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided by July 18, 2019. If you have any questions, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandums and PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

1. From the June 25 Response to Question 13 regarding platinum level induced demand factors, you have not provided quantitative support.
In your latest reply you said, "As the Department is aware, the ACA Grandmother or Transitional policy has created separate risk pools in the small group market. It is anticipated that, each year, a number of groups will move from the medically underwritten (MUW) Transitional market to the community rated ACA market. Importantly, it has been our observation that groups typically make such a move between markets only when they are unable to maintain a MUW premium that is lower than that in a comparable ACA plan. As such, a group moving from the MUW to ACA market is expected to come from the highest-utilization segment of the MUW pool, supporting a higher than average projection of induced demand. Moreover, because in our primary service geography employer group plans typically include rich benefits, we expect that many of these higher-utilization groups will trend toward higher-AV products and in particular the Platinum products. This expectation is also broadly supported by the fact that the MLR in our Platinum product is near 100% even with the prior year's Bronze-Platinum induced demand spread of 30%. Given the perceived relationship between market behavior in the Platinum product and the existence of the Transitional market, we do anticipate consideration for narrowing of the Bronze-Platinum spread when the Transitional and MUW markets are combined in 2021."
The induced demand factor is only intended to reflect the economic situation that when the cost (cost sharing) is lower, the demand is higher. It should not reflect the population purchasing since that is a morbidity consideration, which is not allowed. Please provide Benefit Richness factors (induced demand) that do not include morbidity. We consider the risk adjustment induced demand factor for Platinum of 1.15 a "safe harbor". Any factor larger than 1.15, will need significant support.

Our spread between the Platinum Induced Demand (ID) factor and Bronze ID factor has been set at 1.234. Following analysis of final 2018 Risk Adjustment (RA) data just released on June 28, we have calculated the post-RA differential in Medical Expense Ratio (MER) between Bronze and Platinum as 9%. Assuming the RA program results in morbidity-adjusted MER values such that the remaining differential in performance is attributable solely to induced demand (and not morbidity), the calculated differential suggests that our previously submitted Platinum ID of 1.4 is a reasonable representation of the ID range between the Bronze and Platinum products given an existing factor of 1.3 that could justifiably increase by a multiplicative factor of 1.09.

With that said, we also recognize the inherent "noise" and potential flaws in the RA program calculations. On this basis, we believe it is reasonable to assume that some portion of the post-RA Bronze and Platinum MER differential is in fact attributable to errors or noise related to RA morbidity calculations; we estimate the range of this attribution to be between 30 and 50 percent. In recognition of the reviewer's instruction to establish an ID factor that completely excludes any morbidity considerations, we are adopting a conservative assumption, within the foregoing range, that true induced demand represents only 60 percent of the Bronze-Platinum MER differential (with the remaining 40 percent potentially attributable to RA error or other factors). Based on this assumption, we have reduced our previously submitted Platinum ID to Bronze ID spread from 1.4 to 1.234.

2. From the June 25 Responses to Question 13 regarding the silver plans having a lower induced demand factor than the bronze plans, your response indicates that this was allowed for Plan Year 2019. Please justify this relationship for Plan Year 2020. The prior year approval doesn't justify this.

Market behavior is only allowed to the extent that it is economically based not based on morbidity. We consider the risk adjustment induced demand factors a "safe harbor". Any factor larger than the risk adjustment factors, will need significant support. It is irrelevant what was used in the past for your 2020 filings, which must stand on their own.

There are no bronze plans offered in the small group market under this legal entity.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.
