Re: **Capital Advantage Assurance Company**
Small Group Rates
Filing No 20-39
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate

Dear Ms. Gray:

CAAC received an objection letter from the Department dated June 16, 2020. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Risk adjustment calculation workbook
- Expanded Bronze justification workbook
- PPO Choice and EPO Network calculation workbook
- Trend leveraging calculation workbook
- Completeness and Redaction Justification Checklist
- Broker commission schedules
- Revised Rate Development workbook
- Revised PAAM Exhibits
- Revised URRT
- Revised Rates (PA and Federal Templates)
- Revised Memos – Actuarial, Cover Letter

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 4: Update to Table 2 BEP risk adjustment
- Question 5: Correction to Table 2 capitation
- Question 9: Change to trend

Health care benefit programs issued or administered by Capital BlueCross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company® and Keystone Health Plan® Central, independent licensees of the BlueCross BlueShield Association.
Communications issued by Capital BlueCross in its capacity as administrator of programs and provider relations for all companies.

- Question 10: Change to Table 5, Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims, Projected Incurred Risk Adjustment PMPM
- Question 11: Change to projected risk adjustment
- Question 13: Change to risk adjustment fee amount
- Questions 14: Change to Table 7, 2020 amounts
- Question 15: Change to Table 9, 2020 amounts
- Question 17: Change to induced demand - change is to show formula only, values are the same
- Question 29: Correct formula in Exhibit L to include PCORTF. This flows to Table 10, taxes and fees
- Question 30: Change to projected loss ratio formula
- Question 31: Correction to Exhibit O1 and O2 – network factors
- Question 33: Correction to URRT Worksheet 2 formula

If you have any questions regarding this filing, please call me at [redacted] (or via email at [redacted]) or [redacted] at [redacted] ([redacted]). Thank you for your assistance in this matter.

Sincerely,

[redacted]

[redacted], ASA, MAAA
Manager, Actuarial Services
Capital BlueCross

[redacted], Corporate Counsel

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

Question and Answer
Small Group Rates
Effective January 1, 2021

With this response, please find corresponding Q&A Exhibits in SG_20-39_Initial_CAAC_PPO_Q&AExhibits1_Supporting_20200623.xlsx

Question 1. Per Pennsylvania Guidance, page 4, Table A: Required Documents, a Completeness and Redaction Checklist, and, if applicable, Redaction Justification is required. Please include with this data call response.

Answer 1. The requested document has been included with this submission. We withheld it from the initial submission because we have not yet provided a redacted public filing.

Question 2. The Cover Letter states that 40 plans will be offered in 2021. Per Table 10, there will only be 34 plans offered as 6 plans have been discontinued and mapped. Please update accordingly.

Answer 2. The cover letter has been corrected to show 34 plans.

Question 3. Per Table 1: Membership Count, the experience period member months is 504,577 and the projected member months is 396,615. Please explain the reasons behind the decrease in projected member months for the 2021 plan year.

Answer 3. Capital has experienced decreased enrollment throughout 2019 and 2020 due to both ASO plans and competitor PPACA plans. Average membership in 2019 is approximately 42,000 members, compared to 34,000 current members as of Feb 2020. Projected 2021 member-months assume a slight loss of about 3% over current month.

Question 4. Per Table 2: Experience Period Claims and Premiums, please update the Estimated Risk Adjustment, in cell L36, to reflect the amount provided in the Department issued RATEE files.

Answer 4. Risk adjustment has been updated with the amount provided by the Department.

Question 5. Per the Pennsylvania Actuarial Memorandum, CAAC does not have capitation. Please explain why capitation is included in Table 2: Experience Period, Table 3: Trend, and listed as $0.23 in the URRT.

Answer 5. Table 2 and the URRT have been corrected to show no capitation. The amounts shown in the capitation column are claim expenses and have been moved to the correct category. Trend is developed on a combined basis across CAAC and its subsidiaries, Capital Advantage Insurance Company (CAIC) and Keystone Health Plan Central (KHPC). Combined trend allows

pricing for plans across CBC subsidiaries to reflect benefit differences, which results in better consumer understanding. The capitation is from KHPC.

Question 6. Per Table 4: Historical Experience, the completion factors for Jan-16 and Oct-16 are 0.9382 and 0.9565 respectively. Please explain why these completion factors are so low. Also, explain why the Nov-19 completion factor is lower than the Dec-19 completion factor.

Answer 6. Lower completion factors in all 3 months are due to high claimants, with reserve amounts set according to actuarial standards of practice. Reserve amounts continue to be held for these members. Completion factors are developed and applied equally across the entire small group market. Below are the high claim reserves impacting completion factors:

Date	High Claim Reserve
Jan-16	$2,700,000
Oct-16	$2,100,000
Nov-19	$800,000

Question 7. Regarding Trend:

a. Is the data in Table 4 or 4b utilized in developing the proposed trend?
b. Is the data in Table 4 or 4b raw unadjusted data or has it been normalized or otherwise adjusted? If the data has been adjusted, please provide an exhibit that quantitatively shows the unadjusted allowed monthly data for the 48 months. Also include the following monthly data:
    i. The average age factor;
    ii. The average geographic factor;
    iii. The average tobacco factor;
    iv. The average benefit factor;
    v. The normalized average PMPM (should match the allowed PMPMs in Column L of Table 4b).

Answer 7.

a. The data in Table 4/4b is not utilized to develop trend.
b. The data in Table 4/4b is raw unadjusted data.

Question 8. Please provide support for not including any utilization trend in the Medical trend amounts.

Answer 8. Annually, the actuarial team meets with our Chief Medical Officer to discuss utilization trends by market segment based on provider conversations and emerging trends in the medical community. Based on those conversations, her best estimate is no change in utilization from 2019 to 2021. Please note this is pre-Covid-19, as Covid-19 factors will be applied separately.

Question 9. Please provide quantitative support for the 0.5% leveraging and 0.5% intensity adjustments utilized on the 'Exhibit E_Trend' tab.

Answer 9. Please see SG_20-39_Initial_CAAC_PPO_Leveraging_Supporting_20200623.xlsx , tab: LeveragingSGAllData. In order to determine the future impact of leveraging, including the impact of increasing cost sharing due to allowed costs rising, the exhibit shows a claim probability distribution with allowed amounts by range. The data is 2019 CBC ACA single risk pool population. The average AV in the Small Group market is approximately 0.85. From the data, I can infer that a deductible (applying to all services) of $1,296 is equal to 85% AV for this population. Using that deductible amount, I can measure incurred claims and member cost-sharing trend, given an allowed trend of 6.5%. Claims are trended in a database in order to move claims into the correct buckets. You can see that the total allowed amounts are increasing at 6.5% annually (columns P and Z). Given the deductible and allowed trend, incurred claims trend at 7.1%, member cost-share at 1.4% and leveraging is 7.1%-6.5% = 0.6%. The leveraging factor has been updated from 0.5% to 0.6% to match the calculation.

The intensity factor of 0.5% is being revised to 0% with this submission. While intensity of OP services continues to grow, that has been offset by reductions in IP services.

Question 10. Per Table 5: Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims, Projected Incurred Risk Adjustment PMPM, please update the amount, as necessary. Please remember to update the URRT as well.

Answer 10. All identified amounts and templates have been updated.

Question 11. Please provide quantitative development of the projected incurred risk adjustment PMPM included in Table 5 of the PA Rate Template. Specifically, provide the necessary quantitative and qualitative support, as well as the source and any adjustments to the source information, for each item included in the risk adjustment calculation (i.e., carrier and statewide PLRS, IDF, GCF, ARF, AV, premium).

Answer 11. The projected risk adjustment PMPM has been updated to reflect 2019 risk adjustment amounts provided by the Department as the baseline. The baseline is then adjusted for changes in risk between 2019 and May 2020. Please see SG_20-39_Initial_CAAC_PPO_RiskCalc_Supporting_CONF_20200623.xlsx for the RA calculation and assumptions including all values requested above. Please note that the 2019 amounts do not exactly match the Department's values, but are reasonably close. These will be updated once CMS releases their final report.

The Summary tab contains the final projected incurred risk adjustment PMPM, highlighted in yellow.

Question 12. Please provide quantitative and qualitative support for not applying any adjustment for a change in demographics or geography.

Answer 12. We utilize the assumption that new membership will resemble existing membership, making changes to demographics or region negligible.

Question 13. Per Table 6: Retention:

a. Please provide the proposed commission schedules for 2021.
b. Using the proposed commission schedules, quantitatively show the development of the percent and PMPM amounts in cells C51 and D51.
c. Using the 2019 SCHE in the Annual Statement, please quantitatively show the development of the Quality Improvements initiatives percent and PMPM amount.
d. Please update the risk adjustment user fee to $0.25, per the 2021 Final Benefit Notice and Payment Parameters.

Answer 13.

a. Please see SG_20-39_Initial_CAAC_PPO_PPMABrokerGroup_Supporting_CONF_20200623 and SG_20-39_Initial_CAAC_PPO_SPMABrokerGroup_Supporting_CONF_20200623 for the unredacted commission schedules.

b. The commission amounts for 2021 are the same as 2020, so past and current financial line of business reports are used to determine the PMPM amount. $19.91 on Exhibit H - Retention is the 2020 budgeted CBC Small Group broker fee amount. (Note that 2019 also utilized the same commission schedule and actual broker commissions paid in the year were $20.66 PMPM.) $19.91 is then calculated as a percent of premium using average premium PMPM calculated in Exhibit I – Projected Loss Ratio. That premium is slightly higher than that shown in Table 6 due to using projected membership, while Table 6 relies on current membership averages to calculate retention PMPMs. This causes slight differences in the values between Exhibit H and Table 6.

c. According to MLR rebate rules, 0.4% is the maximum allowable Quality Improvement (QI) amount to include in the MLR rebate calculations without providing extensive documentation. For that reason, the same amount is used in pricing. But please note the 2019 SHCE shows a QI amount greater than 0.4%.

d. The risk adjustment fee amount has been updated to $0.25.

Question 14. Per Table 7: Normalized Market-Adjusted Projected Allowed Total Claims, the data in column J, 2020, appears to be inconsistent with the 2020 approved annual filing. Please update or explain.

Answer 14. The values have been corrected to reflect the 2020 approved annual filing. The original submission reflected values from the Q3/Q4 quarterly filing.

Question 15. Per Table 9: Year-over-Year Data to Support Table 8, the data listed in Column J, 2020, appears to be inconsistent with the 2020 annual approved filing. Please update or explain.

Answer 15. The values have been corrected to reflect the 2020 approved annual filing. The original submission reflected values from the Q3/Q4 quarterly filing.

Question 16. Per Table 10: Plan Rates, please confirm that all discontinued mapped lives comply with the CMS crosswalk guidance.

Answer 16. We confirm that all discontinued mapped lives comply with the CMS crosswalk guidance.

Question 17. Per the Department's published guidance, the Benefit Richness factors in Table 10 Column L should be developed based upon the following formula: (Plan Pricing AV in column K * CSR Defunding Adjustment in column P)^2 - (Plan Pricing AV in column K * CSR Defunding Adjustment in column P) + 1.24. Further, the value developed by the quadratic formula must then be multiplied by a normalization constant such that the value in Cell L15 or L16 balances back to 1.000. Please modify the cells in Column L to explicitly show the quadratic formula and normalizing constant to demonstrate compliance with our guidance.

Answer 17. The requested formula has been added. The values are the same as originally filed.

Question 18. Per Table 10: Plan Rates, column R, Admin Costs, please explain why the admin percent varies throughout all plans.

Answer 18. The admin cost is a fixed PMPM amount applied to all plans. This amount varies as a percentage of premium. The percentages are calculated on Exhibit L – Rate Development.

Question 19. Per Table 10: Plan Rates, column S, Taxes & Fees, please explain why the percent for taxes and fees changes from plan to plan and why this is appropriate.

Answer 19. Taxes and Fees vary slightly by plan due to the fixed dollar PCORTF amount. This is illustrated in Exhibit L – Rate Development.

Question 20. Please explain the significant variation of pricing AVs amongst plan in the same metal level. In particular, the 0.0897 difference between the highest and lowest Pricing AV amongst silver plans.

Answer 20. Capital uses a vendor manual cost model to determine pricing relativities. These relatitivies do vary from the AV calculator. While the AV calculator allows a 6% AV range within a metal level, it is reasonable that our model could see differences of 9%. It seems the largest variance between the two models is attributable to deductible (Capital's model gives larger credit for higher deductibles). Health status is not used to develop pricing AV.

For further clarification, here is a description of the manual cost model:

CBC uses Milliman, Inc. Health Cost Guidelines Commercial Rating Structures (for active employees) to develop benefit relativities. To help answer questions, I am pulling from Milliman's methodology description. Anything is quotations is directly from Milliman, Inc.

a. "Milliman utilizes an enrollment and utilization database of full medical and prescription drug claims experience for over 78 million lives, of which approximately 41 million lives were selected and used as the primary source in developing the [model]. Other sources include a database of inpatient admission representing a large percentage of all admissions nationwide, retail pharmacy information, and other reference data sources."
    I. CBC adjusts nationwide data to CBC's average costs and contracting in our service area.

b. The pricing AV is not calculated using the experience of that metal level. Instead, CBC uses the actuarial cost model noted above to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
c. Two points on how the model does not reflect morbidity:
    I. The model pulls from millions of lives and adjusts relative value by only the value of cost-sharing and differences in utilization (for example, cost barriers to emergency room care such as $500 copay, will not only reduce ER costs by $500, but more than $500 because members will find alternative, less costly care).
    II. The actuarial model is intended to produce benefit relativities that are offered to employers with several benefit options. Small Groups are able to select up to five benefit options. If the value of morbidity is priced into lower AV plans, higher morbidity members will begin to choose those plans because the difference in premium outweighs the difference in benefits (members can set premium dollars aside to pay for the extra cost-sharing). That will result in the deterioration of lower AV plans, and pricing would then be modified. For this reason, the model is designed to not reflect morbidity by plan. The same model/methodology is used in the Individual market.

Question 21. Given that Pricing AV is a measure of the percentage of health care costs that are paid by the health insurance plan, please explain how three of the Platinum plans have pricing AVs greater than one.

Answer 21. The pricing AV is calculated relative to the paid-to-allowed ratio. So if a platinum plan has a pricing AV of 1.026 and the paid-to-allowed ratio is 0.854, the benefits are 1.026/.854 -1 = 20% richer than the average plan in the projection period. It is important to note that the average pricing AV in Table 10 matches the pricing AV calculated in Exhibit G, so rates are not inflated. Relativities are developed from Capital's manual cost model.

Question 22. If the requested rate increase is not the same across all products and plans, provide an explanation as to why the rate changes vary by product or plan, given they are based on the same single risk pool of experience for the market. Explain how the impact of morbidity was removed from impacting the variance in the rates changes across products or plans.

Answer 22. The variance in rate change by plan is overwhelmingly due to differences in benefit changes between 2020 and 2021. For example, plans with Rx 250 signficantly increased Rx copays, lowering their annual premium increase. Please see Exhibit B – Benefit Changes for a

detailed listing for cost-sharing changes. Other reasons stem from calibrations to Capital's manual cost model, which determines pricing AV. Plan-specific or member-specific experience or morbidity are not used to determine pricing AV, therefore morbidity does not impact plan-specific rate change.

Question 23. Please provide quantitative support for the development of the area factors. This should include a demonstration of how morbidity differences were excluded from the area factor development.

Answer 23. Capital's Small Group area factors were approved in the 2020 filing, and we are continuing to rely on the data provided at that time. We are proposing no changes to the factors in 2021 in order to offer stabile pricing in the market.

Question 24. Per Table 14. Network Factors, PPO Choice is a new network being offered this year. Has this network been approved by the Pennsylvania Department of Health? If not, when is the expected approval date? If it has been approved, please add the DOH Approval Date in Cell O29.

Answer 24. The PPO Choice network has been offered to Capital's Large Group members since 2009. The network was approved in 2009, but we have not found documentation with the exact date. I have added 5/1/2009 as the approval date until we can locate the documentation.

Question 25. Is the network, PPO Choice, a narrow network?

Answer 25. PPO Choice is a tiered network narrow network with Choice 1 and Choice 2 providers.

Question 26. Please update Exhibit B_BenChange, Pricing AV columns, to reflect the years 2020 and 2021.

Answer 26. Exhibit B – Benefit Change has been corrected.

Question 27. Please provide support for not applying an induced utilization adjustment to the experience period allowed claims due to an increase in benefit mix as noted on 'Exhibit D_BenMix'.

Answer 27. The changes in benefit mix are small enough that we did not deem an induced demand factor greater than 1.0 necessary. We believe induced demand changes to allowed claims in this market segment are negligible. Exhibit D – Benefit Change shows the expected changes to incurred claims due to differences in cost sharing between the BEP and the projection period, which is used to develop the Paid-to-Allowed ratio in Exhibit G.

Question 28. The Federal Income Tax in 'Exhibit H_Ret' is calculated as a subset of the Contingency amount (21% of the 2% Contingency). However, it is included in the rate development as an amount in addition to the 2% Contingency amount. Please provide an explanation as to why this approach is appropriate and does not double-count the impact of

Federal Income Tax (i.e., 2.0% is stated as the Contingency amount in the actuarial memorandum but 2.42% is actually included into the rate development)

Answer 28. Federal income tax is estimated using 2% contingency and included as an allowable retention item. While federal income tax is tied to UW gain/loss, and that amount can only be estimated by considering contingency pricing, it is its own retention line item separate from contingency.

Question 29. Please validate that the Patient-Centered Outcomes Research Trust Fund fee from the 'Exhibit H_Ret' tab flows through to the appropriate exhibits (i.e., 'Exhibit I_Proj_LR').

Answer 29. Exhibit I – Projected Loss Ratio has been corrected to display the same PCORTF amount found in Exhibit H. PCORTF was also missing from Exhibit L – Rate Development, which feeds retention percentages to Table 10. This has been corrected.

Question 30. Per Exhibit I_ProjLR, Quality Improvements is being subtracted from the denominator in calculating the federal medical loss ratio. Per my understanding, the federal medical loss ratio equation is (Incurred Claims + Quality Improvements) / (Premiums – Taxes & Fees). Please explain why it is appropriate to subtract Quality Improvements from the denominator instead of adding it to the numerator.

Answer 30. Exhibit I – Projected Loss Ratio has been corrected to use the formula described above.

Question 31. Please explain why the EPO and PPO Choice network factors are identical and do not take into account the savings identified within the networks mentioned on the 'Exhibit O1_EPONetwork' and 'Exhibit O2_PPOChoiceNetwork' tabs, respectively. In addition, please provide quantitative support for the development of the EPO and PPO Choice network factors.

Answer 31. Exhibits O1 and O2 contained errors that have been corrected with this submission. The medical rating factor in cell B16 now flows to G8 to G10. The EPO and PPO Choice network factors are no longer identical, EPO remaining at 0.92 and PPO Choice moving from 0.92 to 0.89.

Please see SG_20-39_Initial_CAAC_PPO_PPOChoice-EPO_Supporting_CONF_20200623.xlsx for quantitative support of PPO Choice network factors. We relied on two method for the pricing factors:

Method 1: Risk-weighted claims. This method utilizes CBC's member attribution database to assign members to providers based on that member's utilization history. This method allows CBC to assign PPO members to their preferred provider in order to analyze cost and utilization by provider. The data here is for all attributed CBC members regardless of market segment. The focus of the study is on two facilities: Wellspan (WSG) and Lancaster General Hospital (LGH). PPO Choice is offered in region 7 in the small group market, and is likely to gain most membership from groups in Lancaster, York, and Adams counties. Tower Health in Berks county is a Choice 2 provider, limiting sales opportunities in that county. Given this

concentration, it is reasonable to limit the analysis to two large providers in those counties: LGH (Choice 1) and WSG (Choice 2).

- Member Months (MM) are attributed members for the period 201809-201908.
- Claims are for the same period.
- Claims are by type Facility IP (FIP), Facility OP (FOP), Professional IP (PIP) and Professional OP (POP).
- Claims are normalized for risk using Medicare diagnosis-related group (DRG) risk factors for FIP and Medicare Current Procedure Terminology (CPT) risk for FOP, PIP and POP.
- LGH (Choice 1) is compared to WSG (Choice 2) on a PMPM basis.

Method 2: Medicare Benchmark Contract Pricing

Gather Medicare Contract Pricing as of 6/30/2019. CBC's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity. PPO Choice 1 facilities are listed on tab, PPO Choice Tier1 Hospital and PPO Choice 2 facilities are listed on tab, PPO Choice Tier2 Hospital. Choice 1 versus Choice 2 costs as a percentage of Medicare are summarized on the SummaryPPOChoice tab.

Method 1 was used for professional pricing and Method 2 was used for facility pricing. Please note that both methods produced similar facility results. Exhibit O1 has been updated to match the analysis (now shows 26% discount on facility and 19% discount on professional instead of 25% across all medical categories).

For Valley Advantage EPO pricing, please see Please see SG_20-39_Initial_CAAC_PPO_PPOChoice-EPO_Supporting_CONF_20200623.xlsx. CBC's Provider Contracting Unit develops Medicare Benchmark models by Facility that shows IP and OP allowed amounts as a percentage of Medicare. This model is used to compare facility pricing on a severity-adjusted basis as the Medicare benchmark normalizes for severity. Valley Advantage EPO is offered in region 6. The largest providers in region 6 are St. Luke's (EPO provider) and Lehigh Valley Hospital (LVH). For this analysis, CBC contracted allowed claims as a percentage of Medicare are compared between St. Luke's and LVH. Note that professional contracting is not included in the Medicare Benchmark. Professional claims are assumed equal between St. Luke's and LVH, but EPO members do have contracted savings, noted on the exhibit. The calculation is shown on SummaryEPO.

Question 32. We have the following questions related to the morbidity adjustment on the 'ExhibitQ_Morbidity' tab:

a. Please provide additional support to demonstrate that the higher loss ratio is not due to a shift in plan and/or rating area distribution (i.e., provide the information for all members and those active as of 202003 by metal level and rating area).
b. Please provide the average risk score for each grouping from item a.

c. Please provide quantitative and qualitative support for how the impact of new members as of 202003 were accounted for in the morbidity calculation. Also provide the distribution of new and continuing members as of 202003.

Answer 32.
a. Please see Q&A Exhibit 1 for the requested data.
b. Please see Q&A Exhibit 1 for the requested data. The risk score utilized here is CBC's internal risk score, which is useful in comparison of two populations.
c. Please see Q&A Exhibit 1 for the requested data. Renewing members are any members active in 2019 with enrollment in 202003. New members make up an insignificant percentage of the pool and are assumed to have characteristics similar to the renewing members.

Question 33. Per URRT, WKsh. 2 – Plan Product Info, Section IV: Projected Plan Level Information, it appears that the information has not been correctly inputted. Please update, as necessary.

Answer 33. URRT WS 2 has been corrected.

Question 34. Please provide an exhibit showing the average quarterly rate change (Q1 2021/Q1 2020 – approved, etc.) groups will see if the proposed rates are approved.

Answer 34. Please see Q&A Exhibit 2 for the requested data.

Question 35. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

Answer 35. Please see SG_20-39_Initial_CAAC_PPO_ExpandedBronze_Supporting_20200623 which contains detail pertaining to all CBC expanded bronze plans in the Small Group and Individual markets.

Question 36. Please confirm that you have tested the rates in Table 11 of the PA AM Exhibits, PA Plan Design Summary and Rate Tables, Federal Rate Template, and the binder to ensure that rates are identical.

Answer 36. I confirm that the exhibits above have been tested to ensure that rates are identical.

Question 37. Please provide by service category the emerging claims data for this policy for the calendar y-t-d as of the end of May and discuss how this data may impact the resulting trend.

Answer 37. Please see Q&A Exhibit 3 for the requested data. While 2020 has seen a dip in claims due to Covid-19, we expected claims to rebound in the fall continuing to 2021. Therefore it is reasonable to use typical trends from 2019 (no Covid impact) to 2021 (limited to no Covid impact).

Question 38. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost PMPMs for calendar years 2015-2019, as applicable.

Answer 38. Please see Q&A Exhibit 4 for the requested data.

Question 39. Please provide an exhibit showing the financial gains and losses for calendar years 2015-2019 for the following categories: Member Months, Total Administrative Expenses, Total Incurred Claims, Total Premium, Total Actual Paid Taxes and Fees, Profit, Annual Underwriting gain/loss and Underwriting gain/loss PMPY.

Answer 39. Please see Q&A Exhibit 5 for the requested data.

Re: **Capital Advantage Assurance Company**
Small Group Rates
Filing No 20-39
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate

Dear Ms. Gray:

CAAC received an objection letter from the Department dated July 7, 2020. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Revised risk adjustment calculation workbook
- Revised Rate Development workbook
- Revised PAAM Exhibits
- Revised URRT
- Revised Rates (PA and Federal Templates)
- Revised Memos – Actuarial, Cover Letter
- Rate Change Summary (Attachment 1)
- Public Filing

All changes are due to PID requests/questions and have been disclosed in the Q&A written response. Additionally, below is a summary of changes:

- Question 1: The COVID Factor is applied to Table 5, cells C16 and D16, and reflects the issuer's morbidity assumption * Individual Adjustment (individual market only) * COVID factor.
- Question 2: Update to Table 2 BEP risk adjustment
- Question 3: Update to Table 5 Projected Incurred Risk Adjustment PMPM

Health care benefit programs issued or administered by Capital BlueCross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company® and Keystone Health Plan® Central. Independent licensees of the BlueCross BlueShield Association.
Communications issued by Capital BlueCross in its capacity as administrator of programs and provider relations for all companies.

Question and Answer
Small Group Rates
Effective January 1, 2021

With this response, please find corresponding Q&A Exhibits in SG_20-39_Initial_CAAC_PPO_Q&AExhibits2_Supporting_20200720.xlsx

Question 1. On July 13th, the Department will communicate our guidance based upon updated survey information from the issuers on their best estimate of the COVID-19 impact on 2021 rates. Responses to the round two questions are due on July 16th. Please be sure that all documents in SERFF, after that date, reflect the impact of COVID-19 and are consistent with the Department's July 13th guidance.

Answer 1. The documents in SERFF reflect the impact of COVID-19 and are consistent with the Department's July 13th guidance.

Question 2. Please update the 2019 experience period risk adjustment amount, in Table 2, to reflect the Department calculated revised risk adjustment transfer amount sent to your company on June 30th, 2020, or the final CMS transfer amount published on or before July 16th, if it differs from the Department calculation.

Answer 2. Table 2 BEP risk adjustment is updated to reflect the Department's calculated revised risk adjustment transfer amount sent on June 30, 2020.

Question 3. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the June 30th revisions, or the final CMS transfer amount published on or before July 16th, if it differs from the Department calculation, please provide narrative and detailed supporting data to justify the proposed changes.

Answer 3. Projected risk adjustment in Table 5 has been modified to reflect the June 30th revisions. Please see SG_20-39_Revised_CAAC_PPO_RiskCalc_Supporting_CONF_20200720.xls. The calculation is the same as that submitted in June with changes only for the revised statewide average PLRS. Additionally, the "Comparison" tab shows the change to projected RA in comparison to the change in 2019 amounts provided by the Department. The change in projection is consistent with the change in 2019 results.

Question 4. As a follow-up to question 11, please provide support for the following assumptions:

a. The 1.050 adjustment to the statewide average premium
b. The 1.030 adjustment to the statewide PLRS
c. The 0.980 adjustment to the statewide membership

i. Please note this adjustment should be updated to be applied as a multiplicative adjustment instead of an additive adjustment

d. The values listed as "202004 CBC Estimates", the support for these values should include the following:
   i. Source of the data used
   ii. The time-frame of the data used (e.g., 202001 – 202004 data)
   iii. The development of any completion factors which were applied if a full year of data was not utilized
   iv. Any adjustments which were applied to reflect any decrease in utilization which has occurred in 2020 as a result of COVID-19
   v. Any other adjustments which were applied to change the calculation from a 2020 estimate to a 2021 estimate

Answer 4.

a. 1.05 is the approximate SG premium change between 2019 and 2021. This accounts for rate increases as well as new lower-cost product entries in the market.
b. 1.03 is the approximate PLRS change in the SG market due to the continual availability of ASO plan options in this market. The estimated CBC PLRS as of 202005 is about 4% higher than 2019. 3% statewide is assumed to reflect CBC's own population while acknowledging that movement to ASO may be less in other areas of PA.
c. 0.98 is the approximate change in statewide membership due to movement to ASO. Please note that the calculation is performed on a PMPM basis, so changing the factor to 1.0 has little impact of the final result.
   i. The formula has been corrected.
d. Documentation of 202005 CBC Estimates is included on the "Documentation" tab of SG_20-39_Revised_CAAC_PPO_RiskCalc_Supporting_CONF_20200720.xlsx. Please note that the title of "202004 CBC Estimates" is corrected to "202005 CBC Estimates" with this submission.
   i. CBC collects and tracks member risk score information using the HHS risk model. This is referred to as Care Modeler data in the documentation.
   ii. Timeframe used: 202001-202005
   iii. Completion factors are developed by comparing PLRS as of 201905 to final PLRS as of 201912, but final PLRS derivation does vary by company/market. Actual PLRS as of 201905, factor applied, and notes are found on the "PLRSCompletion" tab.
   iv. No utilization adjustments are made for COVID-19.
   v. The only adjustment to move from 2020 to 2021 is noted in a. above – statewide average premium assumed to increase 2.5% annually.

Question 5. As a follow-up to question 12, please provide additional support for the assumption that projected membership distributions will resemble the experience membership distributions.

Answer 5. Please see Q&A Exhibit 1 for historical enrollment by age and region. The data is all Capital Individual ACA members enrolled between 201701 and 202006. The average age is consistent, although it does increase slightly each year. Regional distributions have moved some between 2017 and 2020. Using filed regional rating factors, the average factor moved from 1.039 in 2017 to 1.034 in 2020. For both age and region, this slight variation from year to year provides assurance that a factor of 1.0 is reasonable.

Question 6. As a follow-up to question 31, The EPO IP savings changed from 18% to 27% with the updated filing. Please provide support for the drivers of this increase in savings from the initial filing to the updated filing.

Answer 6. The original filing utilized a pricing analysis performed in 2018 to price the Valley Advantage EPO in the group market. Upon review (due to the Department's question), updated provider contracts show that St. Luke's and neighboring Lehigh Valley Hospital IP reimbursement amounts (as a percentage of Medicare) continue to widen. The Medicare benchmark analysis is based on contracting through 2021.

Question 7. The blended savings formula in cell B15 on both the 'Exhibit O1_EPO Network' and 'Exhibit O2_PPOChoiceNetwork' tabs utilizes a distribution that implicitly applies 0% savings to non-medical claims. However, the final factor in cell B16 is only applied to medical claims. As a result, the 0% savings to non-medical claims is being double-counted. Please adjust the formulas on these tabs to remove the double-counting of the 0% savings to non-medical claims (e.g., the final network factor should be what is calculated in cell B16).

Answer 7. The blended savings in B16 and B17 is the medical-only savings. This is medical contracted savings, tempered only for fact that higher severity cases will not move to the lower cost facility (i.e. the most-costly members will remain in a regular PPO product, assumptions shown in cells B13 and B14). The total rating factor in B18 is the factor to be applied to total claims (medical, Rx, and other). Here the medical-only factor is applied to medical claims and 1.0 is applied to non-medical to calculated the total factor. This factor is greater than the medical-only factor so not to overstate the total savings.

Question 8. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rates Template are identical.

Answer 8. I confirm that I have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rates Template are identical.

Question 9. Please ensure that the 7/16/20 versions of the following items are posted in SERFF with your July 16th response to this data call:

a. Cover letter identifying all changes made and the reason for the change. Also, show the revised rate change
b. PA Actuarial Memorandum
c. PA Actuarial Memorandum Exhibits

d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")
e. URRT
f. Federal Rate Template
g. Part III: Actuarial Memorandum
h. Updated Rate Change Request Summary (Attachment 1)
i. Public filing PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits subsequent to the initial submission, in addition to all the above items).

Answer 9. The following is included with this data call as of 7/16/2020:

a. Cover letter identifying all changes made, the reason for the change, and revised rate change.
b. PA Actuarial Memorandum
c. PA Actuarial Memorandum Exhibits
d. Department's Plan Design Summary and Rate Template Exhibits (rate template by county is populated with only numeric values – no "NA")
e. URRT
f. Federal Rate Template
g. Part III: Actuarial Memorandum
h. Updated Rate Change Request Summary (Attachment 1)
i. Public filing PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits subsequent to the initial submission, in addition to all the above items).

Re: **Capital Advantage Assurance Company**
Small Group Rates
Filing No 20-39
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate

Dear Ms. Gray:

By this filing Capital BlueCross, on behalf of its wholly owned subsidiary Capital Advantage Assurance Company, submits to the Department Small Group Rates effective January 1, 2021.

The following is a summary of the rate filing:

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2021
- Average Rate Change: -2.5%
- Range of Requested Rate Change: -12.1% to 0.7%
- Total additional annual revenue generated from the proposed rate change: $(6,744,275)
- Product: PPO and EPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 34,067/20,722
- 2021 Number of Plans: 40
- 2020 Number of Plans and Change: 34/No Plan Changes
- Contract Form #: C21-CAAC-SPG
- Form Filing SERFF #: CABC-132352702
- Binder SERFF #: CABC-PA21-125097619
- HIOS Issuer ID: 45127
- HIOS Submission Tracking Number: 45127-1735063902116677638

Health care benefit programs issued or administered by Capital BlueCross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company® and Keystone Health Plan® Central, independent licensees of the BlueCross BlueShield Association.
Communications issued by Capital BlueCross in its capacity as administrator of programs and provider relations for all companies.

In support of this filing, I have included an Actuarial Memorandum with supporting exhibits, URRT, Consumer Friendly Justification, Rates Table Template, and PA Plan Design Summary and Rate Tables.

If you have any questions regarding this filing, please call me at [redacted] (or via email at [redacted]) or [redacted] at [redacted] ([redacted]. Thank you for your assistance in this matter.

Sincerely,

Attachment I

Rate Change Summary

Capital Advantage Assurance Company (CAAC) – Small Group Plans

Rate request filing ID # CABC-132352718 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Initial requested average rate change:	-6.9%[1]
Revised requested average rate change:	N/A[1]
Range of requested rate change:	-16.0% to -4.0%
Effective date:	1/1/2021
Mapped Members:	34,067
Available in:	Rating Areas 6, Rating Area 7, and Rating Area 9

Key information

Jan. 2019-Dec. 2019 financial experience

Premiums	$330,630,487
Claims	$254,809,606
Administrative expenses	$31,447,494
Taxes & fees	$14,817,570
Company made (after taxes)	**$29,555,818**

How it plans to spend your premium
This is how the insurance company plans to spend the premium it collects in 2020:

Claims:	86.10%
Administrative:	11.41%
Taxes & fees:	0.49%
Profit:	2.00%

The company expects its annual medical costs to increase **6.65%**.

Explanation of requested rate change

Favorable Experience Net Risk Adjustment: -9%
Less migration of groups from ACA to ASO arrangements: -3%
Suspension of the Health Insurer Fee: -2%
Future Cost and Utilization: 7%

[1] Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

- Primary Contact Email Address: [redacted]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital BlueCross (CBC), submits rates for products to be made available to all small groups effective January 1, 2021.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2017	CABC-130539601	3.4%
Small Group	CAAC	7/1/2017	CABC-130954662	6.2%
Small Group	CAAC	1/1/2018	CABC-131022141	7.9%
Small Group	CAAC	1/1/2019	CABC-131455101	0.7%
Small Group	CAAC	1/1/2020	CABC-131921797	11.3%
Small Group	CAAC	7/1/2020	CABC-132294731	7.0%

Average Rate Change

CAAC is proposing an aggregate annual -6.9% rate change. The rate change does vary by plan. The rate change is calculated in PA Rate Exhibits Part III, Table 10, cell AC15.

The key drivers of the rate change, and approximate impact, are as follows:

Favorable Experience Net Risk Adjustment: -9%
Less migration of groups from ACA to ASO arrangements: -3%
Suspension of the Health Insurer Fee: -2%
Future Cost and Utilization: 7%

Please note the filing includes a COVID-19 adjustment of 1.0.

Rate Change Disclosure

As discussed with the Department on 4/3/2020, CBC inadvertently released Q2 2020 Small Group renewals and sold new groups using Q1 2020 rates. This administrative error does not impact the rate change calculation, as the 2021 calculation is Q1 2021 over Q1 2020. But please note that Q2 2021 groups would receive a -2.5% aggregate rate change without the administrative error, but instead will see -1.1% on average. The average is calculated across all CBC subsidiaries – CAAC, CAIC and KHPC.

Membership

Membership is shown in PA Rate Exhibits Part I, Table 1. The average age is 39.

Benefit Changes 2020-2021

A summary of proposed 2021 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2021. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for CAAC in the small group market.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2019 and December 31, 2019.

Transitional membership is not included in PA Rate Exhibits Table 2 or URRT.

Paid Through Date: Claims in the BEP are paid through February 29, 2020

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments (CSR does not apply to Small Group).
- CBC only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from CBC's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.
5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims\ = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to corporate 2019 budgeted amounts and will be updated once finalized transfer payments are available.

Loss Ratio in BEP: Loss ratio is 77.07%

<u>Credibility of Data</u>

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from CBC subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. The credibility manual BEP includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2019 and December 31, 2019. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.65%

Trend levels reflect CBC's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. CBC uses the following to project future costs:

    a. Vendor Physician Cost Model and Internal Hospital Contracting Model
        i. The medical cost models use best estimates of Capital BlueCross (CBC)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the CBC book of business level for all commercial business.
    b. Internal Prescription Drug Trend Model
        i. Price Inflation
        ii. Contract Pricing
        iii. Member Cost-Sharing
        iv. Units per Script
        v. Brand/Generic Mix
        vi. Therapeutic Mix
        vii. Cost per Script
        viii. Pipeline (new drugs)

2. Utilization Considerations:
    a. Intensity of medical services rendered
    b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
    c. Further migration from brand prescription drugs to generic prescription drugs

d. Favorable impacts of value based benefits designs
e. Medical utilization estimates reviewed by CBC's Chief Medical Officer

3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.

4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.

5. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. CBC strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in URRT come directly from CBC's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Morbidity Adjustment", and PA Rate Exhibits, Table 5. CBC projects 1.6% change in morbidity due to the presumed statewide movement of small group PPACA business to ASO. The morbidity factor is based on the following analysis:

1. Gather BEP medical and Rx claims, membership and premium for all PPACA groups active during the period.
2. Develop Loss Ratio A using data from (1)
3. Gather BEP medical and Rx claims, membership and premium for only PPACA groups still active in a PPACA product as of 3/31/2020
4. Develop Loss Ratio B using data from (2)
5. Loss Ratio B/Loss Ratio A – 1 = 1.6%
6. 1.6% is applied in rating

Because CBC is competing against statewide carriers in the SG ASO market, we assume this transition is occurring statewide and will continue 2020-2021. Further, the statewide transition translates to a worsening PPACA risk pool, not unique to CBC. Therefore, we project no explicit change to CBC risk adjustment transfer amounts from this migration.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2019 to 2021. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from CBC's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: A network adjustment is applied to show the value of implementing EPO and 2-tier PPO network plans in the projection period. The value is calculated as:

$$\begin{aligned} &Network\ Factor \\ &\qquad = ([Projected\ MM\ by\ Plan] \times [Network\ Factor\ by\ Plan]) \\ &\qquad \div [Total\ Projected\ MM] \end{aligned}$$

Other Adjustments: An additional adjustment is applied to reflect pharmacy contracting savings in the projection period. Capital BlueCross (CBC) has contracted a new Pharmacy Benefit Manager (PBM) effective 1/1/2020, with calculated savings (combined price and Rx rebate savings) of 5% over CBC's current contract. The other adjustment factor is calculated as:

$$\begin{aligned} &Other\ Adjustment \\ &\qquad = ([Rx\ Savings\ Factor] - 1) \times [BEP\ Allowed\ Prescription\ Drug\ PMPM] \\ &\qquad \div [BEP\ Allowed\ Total\ PMPM] + 1 \end{aligned}$$

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

Index Rate

The experience period index rate is CAAC's allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted,

is the *Projected Allowed Claims at Current Benefits.* This number is reflected in Worksheet 1 of URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
    a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
    b. BEP Member Months

2. Develop BEP *Paid and Incurred Claims*:

$$BEP\ Paid\ and\ Incurred\ Claims = \frac{BEP\ Paid\ Claims}{Completion\ Factor}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP\ Paid\ and\ Incurred\ Claim\ PMPM = \frac{BEP\ Paid\ and\ Incurred\ Claims}{BEP\ Member\ Months}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

$$Trended\ Claim\ PMPM = [BEP\ Paid\ and\ Incurred\ Claim\ PMPM] \times (1 + [Trend\%])^{Trend\ Months/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$Projected\ Paid\ and\ Incurred\ Claims\ PMPM = [Trended\ Claim\ PMPM] \times [Benefit\ Adjustment] \times [Morbidity\ Adjustment] \times [Other\ Adjustment]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Other Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

   a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
   b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$Benefit\ Level\ Adjustment = \frac{Average\ Manual\ Cost\ in\ Projection\ Period}{Manual\ Cost\ of\ Base\ Plan}$$

   c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$Base\ Plan\ Paid\ and\ Incurred\ Claims\ PMPM = \frac{Benefit\ Adjusted\ Paid\ and\ Incurred\ Claims\ PMPM}{Benefit\ Level\ Adjustment}$$

   d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$Benefit\ Relativity\ A = \frac{Manual\ Cost\ of\ Benefit\ A}{Manual\ Cost\ of\ Base\ Plan}$$

e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:

   i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than $1000.

   ii. Adjustments for plan designs that fall outside of the actuarial cost model.

a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} &Projected\ Claims\ PMPM\ Benefit\ A \\ &\qquad = Projected\ Claims\ PMPM\ Base\ Plan \\ &\qquad \times Pricing\ Relativity\ A \end{aligned}$$

b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in 2021. The *Total Projected Claims PMPM* :

$$\begin{aligned} = Projected\ Claims\ PMPM\ Benefit\ A\ &\times Expected\ Member\ Dist\ of\ Benefit\ A \\ &+ Projected\ Claims\ PMPM\ Benefit\ B \\ &\times Expected\ Member\ Dis\ of\ Benefit\ B + \cdots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$Paid\ to\ Allowed\ Ratio = \frac{Total\ Projected\ Claims\ PMPM}{Projected\ Allowed\ Claims\ at\ Current\ Benefits}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

<u>Market Adjusted Index Rate</u>

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$\begin{aligned} &[Market\ Adjusted\ Index\ Rate] \\ &\qquad = ([Index\ Rate]\ x\ [Paid\ to\ Allowed\ Ratio] \\ &\qquad - [Projected\ Incurred\ Reinsurace\ Recoveries] \\ &\qquad - [Projected\ Incurred\ Risk\ Adjustment\ PMPM] \\ &\qquad + [Exchange\ Fees\ PMPM]) \div [Paid\ to\ Allowed\ Ratio] \end{aligned}$$

Projected Incurred Risk Adjustments PMPM:

Relevant to 2021 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2021. The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2018-2019 risk adjustment results
5. Market improvement in coding risk: CBC's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that CBC is disadvantaged in the market. This will drive CBC's relative risk to the market down over time.

Please note that corporate budgeted amounts are used in the BEP. While CBC has done additional work to project 2020/2021 CRA expectations, those calculations will be finalized once 2019 CRA results are released, and a detailed calculation will be provided at that time. At the time of the initial filing, a placeholder is being used, reflecting best estimates to date.

Projected Incurred Reinsurance Recoveries:

Reinsurance does not apply to the small group market.

Exchange Fee PMPM:

CAAC only offers off-exchange plans in the small group market, so the exchange fee is $0.

The exchange fee PMPM is calculated as:

$$Exchange\ Fee\ PMPM = [Avg\ 2021\ On - Exchange\ Premium\ PMPM] \times [\%\ Members\ On - Exchange]$$

Where

$$[Avg\ 2021\ On - Exchange\ Premium\ PMPM = [Avg\ 2020\ On - Exchange\ Premium\ PMPM\ \times (1 + [Avg\ Proposed\ Rate\ Change])$$

See Exhibit K for the development of the Market Adjusted Index Rate.

<u>Retention Items</u>

Administrative Expense Load:

1. Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of $0.19 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
2. Administrative Expense: Calculated using an allocation method from CBC's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to CBC small group products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.
    a. Value-Based Benefits (VBB): Standard with each plan, Capital BlueCross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
        i. Complete biometric screening and receive a gift card.
        ii. Meeting biometric measure or finish online coaching program and receive a gift card reward.
        iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
        iv. Fees are included in overall administrative expense fee discussed above.
        v. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
3. Broker Expense: Calculated based on CBC's explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. The 2020 broker commission schedule is yet to be finalized. Attached please find the 1/1/2019 copy of the broker agreement – redacted version. Files are as follows:
    a. Redacted Standard Producer Master Agreement: "SG_20-39_Initial_CAAC_PPO_SPMABrokerGroupRedacted_Supporting_20200519.pdf"
    b. Redacted Preferred Producer Master Agreement: "SG_20-39_Initial_CAAC_PPO_PPMABrokerGroupRedacted_Supporting_20200519.pdf"

4. Additional Quality Improvement: The Final Notice of Benefit and Payment Parameters (NBPP) for 2020 finalized the rule to allow issuers to apply a standard 0.8% of premium for quality improvement (QI) measures in the MLR calculation. Additional QI amounts applied in rating equal 0.4%. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 2, "Profit & Risk Load", and PA Rate Exhibits Table 6.

Taxes and Fees:

1. Exchange Fee: N/A
2. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, "Taxes and Fees", and PA Rate Exhibits, Table 6.

See Exhibit H as well as PA Rate Exhibits Table 6 for all retention values.

Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC's actuarial cost model. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
2. Induced Demand: Induced Demand: Please see Table 8. Induced Demand is calculated as:

$$[Pricing\ AV]^2 - [Pricing\ AV] + 1.24$$

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

3. Provider Network: CAAC is offering 3 networks: PPO, Valley Advantage EPO, and PPO Choice (2-tiered PPO). The network factors are the same across each plan in the network.
    a. The Valley Advantage EPO plan is built around St. Luke's delivery system and is available in Lehigh and Northampton counties.
        i. St. Luke's offers savings over area hospitals in IP, OP and professional settings.
        ii. We assume that 75% of claims are attributable to a St. Luke's facility (EPO plans are offered as multi-options within the counties, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. The rating factor of 0.92 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        iv. See Exhibit O1 for the development of the EPO network factor.
    b. The PPO Choice tiered design allows members to choose lower cost providers within their region.
        i. The product is offered in Region 7.
        ii. We assume that 75% of claims will be attributable to tier 1 providers (PPO Choice plans are offered as multi-options within the counties/groups, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. To establish the network factor, a risk-adjusted claim analysis was performed comparing tier 1 provider claim levels to other region 7 providers. The analysis showed roughly 25% savings across IP, OP and Professional services.
        iv. The rating factor of 0.92 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        v. See Exhibit O2 for the development of the PPO Choice network factor.
4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Retention Items section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibrated Plan Adjusted Index Rates

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in CBC. Age factors are applied in accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_20-39_Initial_CAAC_PPO_List-Billed_Supporting_20200519.xlsb for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the CBC member-weighted average by region.

Geographic factors are unchanged from 2020.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[Calibrated\ Plan\ Adjusted\ Index\ Rate] = [Plan\ Adjusted\ Index\ Rate] \div ([Age\ Curve\ Calibration] \times [Geographic\ Factor\ Calibration]\ x\ [Tobacco\ Factor])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$[Member - Level\ Consumer\ Adjusted\ Premium\ Rate] = [Calibrated\ Plan\ Adjusted\ Index\ Rate] \times [Age\ Factor] \times [Geographic\ Factor] \times [Tobacco\ Factor]$$

2. $[Family\ Consumer\ Adjusted\ Premium\ Rate] = \sum[Member - Level\ Consumer\ Adjusted\ Premium\ Rate]$
   With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

Plans: 45127PA0010057, 45127PA0010089, 45127PA0010161, 45127PA0010199, 45127PA0010135, and 45127PA0130001 use alternative method 156.135(b)(2) to establish AV. SG_20-39_Initial_CAAC_PPO_UniquePlanDesign_Suppporting_20200519 includes a detailed explanation of the approach.

All other AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

AV Pricing Values

All AV Pricing values were developed using CBC's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of URRT were developed by assuming that moderate decline in enrollment and similar distribution to current.

Actuarial Statement

I, [redacted], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [redacted], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
    a. Actuarial Standard of Practice No. 5, "Health and Disability Claims"
    b. Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans"
    c. Actuarial Standard of Practice No. 12, "Risk Classification"
    d. Actuarial Standard of Practice No. 23, "Data Quality"
    e. Actuarial Standard of Practice No. 25, "Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage"
    f. Actuarial Standard of Practice No. 26, "Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans"
    g. Actuarial Standard of Practice No. 41, "Actuarial Communications".

2. The index rate is:
    a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
    b. Developed in compliance with the applicable Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
    e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in were calculated in accordance with actuarial standards of practice.

4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.

    a. The analysis was
        i. conducted by a member of the American Academy of Actuaries, and

ii. performed in accordance with generally accepted actuarial principles and methods.

5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.

6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.

7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.

8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2021 Rate Filing Justification.

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

ACTUARIAL MEMORANDUM
Small Group Rates
Effective January 1, 2021

General Information

Company Information

- Company Legal Name: Capital Advantage Assurance Company – CAAC
- State: PA
- HIOS Issuer ID: 45127
- Market: Small Group
- Effective Date: 1/1/2021

PID Company Information

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2021
- Average Rate Change: -6.9%
- Range of Requested Rate Change: -16.0% to -4.0%
- Total additional annual revenue generated from the proposed rate change: $(18,450,941)
- Product: PPO and EPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 34,067/20,722
- 2021 Number of Plans/Change from 2020: 34/-6
- Contract Form #: C21-CAAC-SPG
- Form Filing SERFF #: CABC-132352702
- Binder SERFF #: CABC-PA21-125097619
- HIOS Issuer ID: 45127
- HIOS Submission Tracking Number: 45127-1735063902116677638

Company Contact Information

- Primary Contact Name: [redacted]
- Primary Contact Telephone Number: [redacted]
- Primary Contact Email Address: [redacted]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital BlueCross (CBC), submits rates for products to be made available to all small groups effective January 1, 2021.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2017	CABC-130539601	3.4%
Small Group	CAAC	7/1/2017	CABC-130954662	6.2%
Small Group	CAAC	1/1/2018	CABC-131022141	7.9%
Small Group	CAAC	1/1/2019	CABC-131455101	0.7%
Small Group	CAAC	1/1/2020	CABC-131921797	11.3%
Small Group	CAAC	7/1/2020	CABC-132294731	7.0%

Average Rate Change

CAAC is proposing an aggregate annual -6.9% rate change. The rate change does vary by plan. The rate change is calculated in PA Rate Exhibits Part III, Table 10, cell AC15.

The key drivers of the rate change, and approximate impact, are as follows:

Favorable Experience Net Risk Adjustment: -9%
Less migration of groups from ACA to ASO arrangements: -3%
Suspension of the Health Insurer Fee: -2%
Future Cost and Utilization: 7%

Please note the filing includes a COVID-19 adjustment of 1.0.

Rate Change Disclosure

As discussed with the Department on 4/3/2020, CBC inadvertently released Q2 2020 Small Group renewals and sold new groups using Q1 2020 rates. This administrative error does not impact the rate change calculation, as the 2021 calculation is Q1 2021 over Q1 2020. But please note that Q2 2021 groups would receive a -2.5% aggregate rate change without the administrative error, but instead will see -1.1% on average. The average is calculated across all CBC subsidiaries – CAAC, CAIC and KHPC.

Membership

Membership is shown in PA Rate Exhibits Part I, Table 1. The average age is 39.

Benefit Changes 2020-2021

A summary of proposed 2021 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2021. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in URRT and PA Rate Exhibits abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered, non-transitional product/plan combination for CAAC in the small group market.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2019 and December 31, 2019.

Transitional membership is not included in PA Rate Exhibits Table 2 or URRT.

Paid Through Date: Claims in the BEP are paid through February 29, 2020

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments (CSR does not apply to Small Group).
- CBC only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from CBC's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.
5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims\ = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to corporate 2019 budgeted amounts and will be updated once finalized transfer payments are available.

Loss Ratio in BEP: Loss ratio is 77.07%

<u>Credibility of Data</u>

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from CBC subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. The credibility manual BEP includes completed fee-for-service paid and incurred claims and capitation for dates of service between January 1, 2019 and December 31, 2019. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.65%

Trend levels reflect CBC's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. CBC uses the following to project future costs:

    a. Vendor Physician Cost Model and Internal Hospital Contracting Model
        i. The medical cost models use best estimates of Capital BlueCross (CBC)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the CBC book of business level for all commercial business.
    b. Internal Prescription Drug Trend Model
        i. Price Inflation
        ii. Contract Pricing
        iii. Member Cost-Sharing
        iv. Units per Script
        v. Brand/Generic Mix
        vi. Therapeutic Mix
        vii. Cost per Script
        viii. Pipeline (new drugs)

2. Utilization Considerations:
    a. Intensity of medical services rendered
    b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
    c. Further migration from brand prescription drugs to generic prescription drugs

d. Favorable impacts of value based benefits designs
e. Medical utilization estimates reviewed by CBC's Chief Medical Officer

3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles and copays, to the paid trend.

4. Intensity: Measure of cost increase due to change in treatment sophistication. An example is migration from x-rays to MRIs at significantly higher cost.

5. Underwriting Cycle: The underwriting cycle is defined as the tendency to swing between profitable and unprofitable periods over time. The underwriting cycle is exacerbated partly by pricing performed with incomplete information as to the level of current experience trends. A reaction delay occurs, as carriers tend to rely on measurements of past experience in developing current pricing assumptions. As a result, carriers are often increasing their pricing trends when actual experience trends have begun to decline, and decreasing their pricing trends actual trends are increasing. CBC strives to mitigate the underwriting cycle by keeping trends consistent through times of increasing and decreasing claim cost and utilization.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in URRT come directly from CBC's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Morbidity Adjustment", and PA Rate Exhibits, Table 5. CBC projects 1.6% change in morbidity due to the presumed statewide movement of small group PPACA business to ASO. The morbidity factor is based on the following analysis:

1. Gather BEP medical and Rx claims, membership and premium for all PPACA groups active during the period.
2. Develop Loss Ratio A using data from (1)
3. Gather BEP medical and Rx claims, membership and premium for only PPACA groups still active in a PPACA product as of 3/31/2020
4. Develop Loss Ratio B using data from (2)
5. Loss Ratio B/Loss Ratio A – 1 = 1.6%
6. 1.6% is applied in rating

Because CBC is competing against statewide carriers in the SG ASO market, we assume this transition is occurring statewide and will continue 2020-2021. Further, the statewide transition translates to a worsening PPACA risk pool, not unique to CBC. Therefore, we project no explicit change to CBC risk adjustment transfer amounts from this migration.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2019 to 2021. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from CBC's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: A network adjustment is applied to show the value of implementing EPO and 2-tier PPO network plans in the projection period. The value is calculated as:

$$\begin{aligned} &Network\ Factor \\ &\qquad = ([Projected\ MM\ by\ Plan] \times [Network\ Factor\ by\ Plan]) \\ &\qquad \div [Total\ Projected\ MM] \end{aligned}$$

Other Adjustments: An additional adjustment is applied to reflect pharmacy contracting savings in the projection period. Capital BlueCross (CBC) has contracted a new Pharmacy Benefit Manager (PBM) effective 1/1/2020, with calculated savings (combined price and Rx rebate savings) of 5% over CBC's current contract. The other adjustment factor is calculated as:

$$\begin{aligned} &Other\ Adjustment \\ &\qquad = ([Rx\ Savings\ Factor] - 1) \times [BEP\ Allowed\ Prescription\ Drug\ PMPM] \\ &\qquad \div [BEP\ Allowed\ Total\ PMPM] + 1 \end{aligned}$$

Benefits, Demographics, Network and Other adjustments are found in URRT Worksheet 1 and PA Rate Exhibits Table 5.

Index Rate

The experience period index rate is CAAC's allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted,

is the *Projected Allowed Claims at Current Benefits.* This number is reflected in Worksheet 1 of URRT ("Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)").

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J as well as PA Rate Exhibits Table 5 for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
    a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
    b. BEP Member Months

2. Develop BEP *Paid and Incurred Claims*:

$$BEP\ Paid\ and\ Incurred\ Claims = \frac{BEP\ Paid\ Claims}{Completion\ Factor}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP\ Paid\ and\ Incurred\ Claim\ PMPM = \frac{BEP\ Paid\ and\ Incurred\ Claims}{BEP\ Member\ Months}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

$$Trended\ Claim\ PMPM = [BEP\ Paid\ and\ Incurred\ Claim\ PMPM] \times (1 + [Trend\%])^{Trend\ Months/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

$$Projected\ Paid\ and\ Incurred\ Claims\ PMPM = [Trended\ Claim\ PMPM] \times [Benefit\ Adjustment] \times [Morbidity\ Adjustment] \times [Other\ Adjustment]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Other Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

   a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
   b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$Benefit\ Level\ Adjustment = \frac{Average\ Manual\ Cost\ in\ Projection\ Period}{Manual\ Cost\ of\ Base\ Plan}$$

   c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

$$Base\ Plan\ Paid\ and\ Incurred\ Claims\ PMPM = \frac{Benefit\ Adjusted\ Paid\ and\ Incurred\ Claims\ PMPM}{Benefit\ Level\ Adjustment}$$

   d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$Benefit\ Relativity\ A = \frac{Manual\ Cost\ of\ Benefit\ A}{Manual\ Cost\ of\ Base\ Plan}$$

e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:

   i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than $1000.

   ii. Adjustments for plan designs that fall outside of the actuarial cost model.

a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} &Projected\ Claims\ PMPM\ Benefit\ A \\ &\qquad = Projected\ Claims\ PMPM\ Base\ Plan \\ &\qquad \times Pricing\ Relativity\ A \end{aligned}$$

b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in 2021. The *Total Projected Claims PMPM* :

$$\begin{aligned} = Projected\ Claims\ PMPM\ Benefit\ A\ &\times Expected\ Member\ Dist\ of\ Benefit\ A \\ &+ Projected\ Claims\ PMPM\ Benefit\ B \\ &\times Expected\ Member\ Dis\ of\ Benefit\ B + \cdots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$Paid\ to\ Allowed\ Ratio = \frac{Total\ Projected\ Claims\ PMPM}{Projected\ Allowed\ Claims\ at\ Current\ Benefits}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

<u>Market Adjusted Index Rate</u>

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$\begin{aligned} &[Market\ Adjusted\ Index\ Rate] \\ &\qquad = ([Index\ Rate]\ x\ [Paid\ to\ Allowed\ Ratio] \\ &\qquad - [Projected\ Incurred\ Reinsurace\ Recoveries] \\ &\qquad - [Projected\ Incurred\ Risk\ Adjustment\ PMPM] \\ &\qquad + [Exchange\ Fees\ PMPM]) \div [Paid\ to\ Allowed\ Ratio] \end{aligned}$$

Projected Incurred Risk Adjustments PMPM:

Relevant to 2021 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2021. The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2018-2019 risk adjustment results
5. Market improvement in coding risk: CBC's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that CBC is disadvantaged in the market. This will drive CBC's relative risk to the market down over time.

Please note that corporate budgeted amounts are used in the BEP. While CBC has done additional work to project 2020/2021 CRA expectations, those calculations will be finalized once 2019 CRA results are released, and a detailed calculation will be provided at that time. At the time of the initial filing, a placeholder is being used, reflecting best estimates to date.

Projected Incurred Reinsurance Recoveries:

Reinsurance does not apply to the small group market.

Exchange Fee PMPM:

CAAC only offers off-exchange plans in the small group market, so the exchange fee is $0.

The exchange fee PMPM is calculated as:

$$Exchange\ Fee\ PMPM = [Avg\ 2021\ On - Exchange\ Premium\ PMPM] \times [\%\ Members\ On - Exchange]$$

Where

$$[Avg\ 2021\ On - Exchange\ Premium\ PMPM = [Avg\ 2020\ On - Exchange\ Premium\ PMPM\ \times (1 + [Avg\ Proposed\ Rate\ Change])$$

See Exhibit K for the development of the Market Adjusted Index Rate.

<u>Retention Items</u>

Administrative Expense Load:

1. Risk Adjustment User Fee: To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of $0.19 PMPM. The Risk Adjustment Fee PMPM is included in URRT Worksheet 1, URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
2. Administrative Expense: Calculated using an allocation method from CBC's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to CBC small group products. Administrative expenses are included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.
    a. Value-Based Benefits (VBB): Standard with each plan, Capital BlueCross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
        i. Complete biometric screening and receive a gift card.
        ii. Meeting biometric measure or finish online coaching program and receive a gift card reward.
        iii. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
        iv. Fees are included in overall administrative expense fee discussed above.
        v. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.
3. Broker Expense: Calculated based on CBC's explicit per contract broker fee. Broker Expense is included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. The 2020 broker commission schedule is yet to be finalized. Attached please find the 1/1/2019 copy of the broker agreement – redacted version. Files are as follows:
    a. Redacted Standard Producer Master Agreement: "SG_20-39_Initial_CAAC_PPO_SPMABrokerGroupRedacted_Supporting_20200519.pdf"
    b. Redacted Preferred Producer Master Agreement: "SG_20-39_Initial_CAAC_PPO_PPMABrokerGroupRedacted_Supporting_20200519.pdf"

4. Additional Quality Improvement: The Final Notice of Benefit and Payment Parameters (NBPP) for 2020 finalized the rule to allow issuers to apply a standard 0.8% of premium for quality improvement (QI) measures in the MLR calculation. Additional QI amounts applied in rating equal 0.4%. Included in URRT Worksheet 2, "Administrative Expense", and PA Rate Exhibits Table 6.

Profit (or Contribution to Surplus) & Risk Margin:

5. Contingency: Contingency is included in URRT Worksheet 2, "Profit & Risk Load", and PA Rate Exhibits Table 6.

Taxes and Fees:

1. Exchange Fee: N/A
2. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in URRT Worksheet 2, "Taxes and Fees", and PA Rate Exhibits, Table 6.

See Exhibit H as well as PA Rate Exhibits Table 6 for all retention values.

Plan Adjusted Index Rates

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC's actuarial cost model. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a $0 office visit copayment and a $25 ER copayment. Given a particular benefit design (for example, $20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
2. Induced Demand: Induced Demand: Please see Table 8. Induced Demand is calculated as:

$$[Pricing\ AV]^2 - [Pricing\ AV] + 1.24$$

Where *Pricing AV* is adjusted by the Non-Funding of CSR factor: PA Rate Exhibits, Table 10, column K x column P.

3. Provider Network: CAAC is offering 3 networks: PPO, Valley Advantage EPO, and PPO Choice (2-tiered PPO). The network factors are the same across each plan in the network.
    a. The Valley Advantage EPO plan is built around St. Luke's delivery system and is available in Lehigh and Northampton counties.
        i. St. Luke's offers savings over area hospitals in IP, OP and professional settings.
        ii. We assume that 75% of claims are attributable to a St. Luke's facility (EPO plans are offered as multi-options within the counties, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. The rating factor of 0.92 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        iv. See Exhibit O1 for the development of the EPO network factor.
    b. The PPO Choice tiered design allows members to choose lower cost providers within their region.
        i. The product is offered in Region 7.
        ii. We assume that 75% of claims will be attributable to tier 1 providers (PPO Choice plans are offered as multi-options within the counties/groups, lowering the overall cost savings as high cost members stay in PPO plans).
        iii. To establish the network factor, a risk-adjusted claim analysis was performed comparing tier 1 provider claim levels to other region 7 providers. The analysis showed roughly 25% savings across IP, OP and Professional services.
        iv. The rating factor of 0.92 is the aggregate factor applied to the total medical, Rx, dental and vision premium given that the discount only impacts medical claims.
        v. See Exhibit O2 for the development of the PPO Choice network factor.
4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Retention Items section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Calibrated Plan Adjusted Index Rates

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in CBC. Age factors are applied in accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_20-39_Initial_CAAC_PPO_List-Billed_Supporting_20200519.xlsb for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the CBC member-weighted average by region.

Geographic factors are unchanged from 2020.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[Calibrated\ Plan\ Adjusted\ Index\ Rate] = [Plan\ Adjusted\ Index\ Rate] \div ([Age\ Curve\ Calibration] \times [Geographic\ Factor\ Calibration]\ x\ [Tobacco\ Factor])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Exhibits Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$[Member - Level\ Consumer\ Adjusted\ Premium\ Rate] = [Calibrated\ Plan\ Adjusted\ Index\ Rate] \times [Age\ Factor] \times [Geographic\ Factor] \times [Tobacco\ Factor]$$

2. $[Family\ Consumer\ Adjusted\ Premium\ Rate] = \sum[Member - Level\ Consumer\ Adjusted\ Premium\ Rate]$
   With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

Plans: 45127PA0010057, 45127PA0010089, 45127PA0010161, 45127PA0010199, 45127PA0010135, and 45127PA0130001 use alternative method 156.135(b)(2) to establish AV. SG_20-39_Initial_CAAC_PPO_UniquePlanDesign_Suppporting_20200519 includes a detailed explanation of the approach.

All other AV Metal Values included in URRT Worksheet 2 and PA Rate Exhibits, Table 10 are based on the federally issued AV Calculator.

AV Pricing Values

All AV Pricing values were developed using CBC's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of URRT were developed by assuming that moderate decline in enrollment and similar distribution to current.

Actuarial Statement

I, [redacted], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [redacted], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
    a. Actuarial Standard of Practice No. 5, "Health and Disability Claims"
    b. Actuarial Standard of Practice No. 8, "Regulatory Filings for Rates and Financial Projections for Health Plans"
    c. Actuarial Standard of Practice No. 12, "Risk Classification"
    d. Actuarial Standard of Practice No. 23, "Data Quality"
    e. Actuarial Standard of Practice No. 25, "Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage"
    f. Actuarial Standard of Practice No. 26, "Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans"
    g. Actuarial Standard of Practice No. 41, "Actuarial Communications".

2. The index rate is:
    a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
    b. Developed in compliance with the applicable Actuarial Standards of Practice.
    c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
    d. Neither excessive nor deficient.
    e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.

3. The percent of total premium that represents essential health benefits included in were calculated in accordance with actuarial standards of practice.

4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.

    a. The analysis was
        i. conducted by a member of the American Academy of Actuaries, and

ii. performed in accordance with generally accepted actuarial principles and methods.

5. Geographic area rating factors reflect only differences in the costs of delivery and not differences due to population morbidity.

6. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.

7. New plans are not considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.

8. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2021 Rate Filing Justification.

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.
RFJ Part II – Consumer Friendly Justification

Rate Increase Considerations: Changes being requested are based upon consideration of the factors that influence future period cost structures. The primary drivers of change in future costs are:

- Slowing migration to non-ACA group coverage options
- Suspension of the Health Insurer Fee in 2021
- Anticipated increase in facility and physician unit costs
- Anticipated changes in prescription drug unit costs
- Continuing change in utilization such as
  - Intensity of medical services rendered
  - Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
  - Further migration from brand prescription drugs to generic prescription drugs
  - Favorable impacts of value based benefits designs
- Prescription drug patent expirations and new to market brand drugs
- Leveraging associated with unchanged cost share components such as deductible and copays
- Inflation adjustment to administrative expenses

Health care benefit programs issued or administered by Capital BlueCross and/or its subsidiaries, Capital Advantage Insurance Company®, Capital Advantage Assurance Company® and Keystone Health Plan® Central. Independent licensees of the BlueCross BlueShield Association. Communications issued by Capital BlueCross in its capacity as administrator of programs and provider relations for all companies.

2021 Rates Table Template v10.0	*All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.*			
	If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
	If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
	If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
	To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.			
HIOS Issuer ID*	45127			
Rate Effective Date*	4/1/2021			
Rate Expiration Date*	6/30/2021			
Rating Method*	Age-Based Rates			

Plan ID*	Rating Area ID*	Tobacco*	Age*	Individual Rate*
Required: Enter the 14-character Plan ID	**Required:** Select the Rating Area ID	**Required:** Select if Tobacco use of subscriber is used to determine if a person is eligible for a rate from a plan	**Required:** Select the age of a subscriber eligible for the rate	**Required:** Enter the rate of an Individual Non-Tobacco or No Preference enrollee on a plan
