SUMMARY: Bill establishes a Hit-and-Run Advisory Alert System intended to reduce hit-and-run accidents and enable quick identification of motorists who flee the scene of an accident in which serious bodily injury or death result.

ANALYSIS: Bill provides that Pennsylvania Department of Transportation (PennDOT) will establish the Jayanna Powell Hit-and-Run Direct Notification System to compile information regarding vehicles that have fled the scene of a motor vehicle accident in order to notify vehicle repair facilities. This system would be developed by PennDOT with law enforcement authorities entering information related to the vehicle involved. This information would alert all vehicle repair facilities in Pennsylvania.

FISCAL IMPACT: Currently, PennDOT does not have a system capable of the provisions of the bill. The system would cost \$375,000 to build. PennDOT would need 10 months to build the system.
