Project Name: Commonwealth of Pennsylvania - Revenue Replacement

Project Identification Number	PA1
Project Expenditure Category	6-Revenue Replacement
Project Expenditure Subcategory	6.1-Provision of Government Services
Status To Completion	Completed 50% or more
Adopted Budget	\$4,625,841,819.83
Program Income Earned	\$0.00
Program Income Expended	\$0.00
Total Cumulative Obligations	\$4,625,841,819.83
Total Cumulative Expenditures	\$4,616,474,924.76
Current Period Obligations	\$0.00

Current Period Expenditures	\$911,266.10
Project Description	<p>The Commonwealth of Pennsylvania has applied the revenue replacement funds available to counteract revenue loss within the General Fund and to aid with the provision of government services. This has also allowed Pennsylvania to create a series of programs to accelerate the recovery of selected businesses, nonprofits, and affected workers, also under the Revenue Replacement Expenditure Category.</p> <p>Please note: In Quarter 2 of 2022, project obligations and expenditures dating back to September 2021 were removed from PA1 to create a new project - Long-Term Living Programs (87375A). This resulted in negative Quarter 2 period obligations and expenditures for PA1.</p> <p>Please Note – The “Status to Completion” above is based on the percent expended, whereas the “Project Start Date” and “Project End Date” above are based on the first and last obligation or expenditure. The “Project End Date” will only be reported once the project is complete.</p>

Current Period Expenditures	\$30,000.00
	<p>PA Act 24 of 2021 appropriated \$282 million to the Department of Human Services for Long-Term Living Programs. Nursing facilities and personal care homes were greatly affected by the pandemic - experiencing employment loss, unexpected medical, cleaning, and infrastructure costs, expensive policy and operating changes, etc. This SLFRF funding assists providers with covering applicable expenses incurred as a result of the pandemic.</p> <p>Per Pennsylvania state law, Act 24 allows for funding to be divided into two main groups:</p> <ul style="list-style-type: none"> - \$5 million (through 87375A) for grants to any provider to improve indoor air management systems. The final budget is slightly less than \$5 million and matches the final obligations as of December 31, 2024. - \$277 million (through 87396A) for nursing facilities, personal care, and assisted living residences based on Medical Assistance days of care, total occupancy, and

Project Description	<p>number of residents who receive social security income payments. The final budget is slightly less than \$277 million and matches the final obligations as of December 31, 2024. The Commonwealth decided to move the 87396A funds to a separate project because it was determined that the nursing facilities, personal care, and assisted living residences should be considered beneficiaries, whereas the \$5 million for indoor air management systems grants would be provided to subrecipients. Also, separating the funds into these categories, and reporting them as separate projects, better aligns with the Commonwealth's accounting system.</p> <p>Please note:</p> <ul style="list-style-type: none"> - In previous quarters, this project data was included within PA1 (the Commonwealth's Revenue Replacement project). Starting in Quarter 2 of 2022, the Commonwealth reported this project separately. This EC best describes the grant recipients, however there are some recipients who are not nonprofits. - The commonwealth is reporting \$11,130,096.91 in capital expenditures for this project. This information was collected through a survey distributed to all beneficiaries in April 2024. <p>Please Note – The “Status to Completion” above is based on the percent expended, whereas the “Project Start Date” and “Project End Date” above are based on the first and last obligation or expenditure. The “Project End Date” will only be reported once the project is complete.</p>
Does this project include a capital expenditure?	Yes
What is the Total expected capital expenditure, including pre-development costs, if applicable	\$11,130,096.91
Type of capital expenditures, based on the following enumerated uses	Acquisition of equipment for COVID-19 prevention and treatment
Capital Expenditure Justification	<p>While most project funds go towards capital expenditures, individual grant awards are valued at \$37,327. Since individual grant awards do not exceed \$10M, additional labor reporting is not required.</p> <p>The decision to allocate funds toward capital expenditures within the Emergency Medical Services Recovery Grant Program is a strategic response to heightened use of these services by the public during the pandemic. The surge in usage, was not something these community organizations were prepared for, in terms of budget, supplies, staff, etc, and created an urgent need for an influx of grant dollars to be used at the grantee's discretion. This funding reflects a commitment to assisting local communities with their emergency services needs as a result of the pandemic, whatever they may have been.</p> <p>A capital expenditure makes sense for the Emergency Medical Services Recovery Grant Program, because Act 10 of 2022 requires the Commonwealth to provide grants to EMS companies "to provide services in response to the novel coronavirus pandemic" and noted that "no application shall be required to receive a grant under this subchapter". So essentially, as long as the EMS company was certified with the Pennsylvania Department of Health, they were eligible to receive grant funds, and spend them at their discretion, on capital expenditures or otherwise.</p> <p>Act 10 of 2022 does not specify designated uses for funds, creating constraints on pursuing alternative capital expenditures. Given greater flexibility, two potential options could have been explored:</p> <ul style="list-style-type: none"> • The Commonwealth could have conducted a comprehensive needs assessment of emergency medical services statewide, and through this study, determined the best way to spend the capital funds. • The Commonwealth could have contracted out the work of putting together a needs assessment of emergency medical

	<p>services statewide, and through this study, the contractor could have determined the best way to spend the capital funds.</p> <p>While these alternatives present advantages such as expert guidance and a statewide perspective, upon consideration of Act’s requirements, neither alternative serves to have an immediate impact on emergency medical services statewide. Furthermore, the alternatives fail to recognize that local entities are in the best position to identify and prioritize the needs of their area. The chosen option aligns with the program goals of community involvement and empowerment. The decision to focus on direct grants to eligible entities was made to ensure a participatory approach that fosters local ownership and tailored solutions for Pennsylvania’s various emergency medical service providers.</p>

Estimated expenses to cover relevant legal and administrative requirements of SLFRF in 2025, 2026, and award closeout	\$450,000.00
Explanation of how the figure for the estimated fund required to cover eligible administrative and legal expenses was determined	\$450,000.00
Provide a description of the eligible administrative and legal costs	These funds will go towards administration of the Conservation Excellence Grant program, including subrecipient monitoring and record retention.
Explanation of how the figure for the estimated fund required to cover eligible administrative and legal expenses was determined	The Pennsylvania Department of Agriculture was asked to determine the amount of administrative and / or legal dollars they would need after 2024. They developed an account of the yearly costs associated with personnel, operations (travel, vehicles, fuel, and maintenance), and federal indirects, and based their estimate off that.

Project Description	<p>The COVID-19 ARPA HDBA Program will provide assistance to historically disadvantaged businesses located and operating in the Commonwealth of Pennsylvania. The program will be administered by the Pennsylvania Community Development Financial Institutions (CDFI) Network and other partner organizations to promote business startup, stabilization, and expansion of Historically Disadvantaged Businesses that employ 25 or fewer employees. The CDFI Network will allocate \$10.5 million to provide grants to businesses that were negatively impacted by the COVID-19 pandemic and owned by socially and economically disadvantaged individuals. Grants will be used for, but not limited to, inventory, equipment, marketing, operating costs. The Network will subaward \$4 million to CDFIs to provide technical assistance and business counseling services to historically disadvantaged businesses. The Network will also subaward \$4.5 million to partner organizations located in Philadelphia and Pittsburgh to provide outreach and business development to historically disadvantaged businesses through seminars, educational programs, networking, and informal advisory opportunities. Project Description	<p>The Commonwealth's Low-Income Household Energy Assistance Program (LIHEAP) provides three types of benefits for low-income households. It provides LIHEAP Cash, a one-time benefit to help reduce the household's energy costs; LIHEAP Crisis, a benefit for households who are without heat or in danger of being without heat; and LIHEAP Crisis Weatherization, which provides heating system replacement and repair for households without heat. The \$21.25 million in SLFRF funds were used exclusively for the LIHEAP Cash grants benefit and assisted 54,873 households. This in turn freed up existing federal funding to assist LIHEAP Cash and Crisis households more fully and resulted in the commonwealth extending its LIHEAP season by an additional two weeks. The LIHEAP Cash grants maximum benefit was \$1,000.</p> <p>Please Note – The “Status to Completion” above is based on the percent expended, whereas the “Project Start Date” and “Project End Date” above are based on the first and last obligation or expenditure. Does this project include a capital expenditure?	Yes
What is the Total expected capital expenditure, including pre-development costs, if applicable	\$10,632,630.00
Type of capital expenditures, based on the following enumerated uses	Technology and tools
Capital Expenditure Justification	<p>This project funds the implementation of a new Student Information System and is critically needed to improve the delivery of education and monitor student success, which was negatively impacted by the COVID-19 pandemic. In this case, a capital expenditure is appropriate because an investment in cloud software technology is necessary in order to renew and strengthen the information technology infrastructure; and standardize the student information system software across the PASSHE universities.</p> <p>Alternative capital expenditures include continuing to invest in upgrades to an aging system or outsourcing the enrollment, student billing and financial aid functions. Both of these options would impede the University’s ability to collaborate with the other PASSHE universities to provide a seamless educational experience to our students.</p>

Project Description	<p>The State Parks and Outdoor Recreation Program (Grants) provides grants that educate the public on, plan, acquire, develop, rehabilitate, or repair: greenways, recreational trails, open space, natural areas, river corridors and access to riverfronts, watersheds, community parks and recreation facilities, community conservation and beautification projects, heritage areas, and other conservation and recreation needs.</p> <p>Please Note – The “Status to Completion” above is based on the percent expended, whereas the “Project Start Date” and “Project End Date” above are based on the first and last obligation or expenditure. The “Project End Date” will only be reported once the project is complete.</p>

Does this project include a capital expenditure?	Yes
What is the Total expected capital expenditure, including pre-development costs, if applicable	\$25,000,000.00
Type of capital expenditures, based on the following enumerated uses	Parks, green spaces, recreational facilities, sidewalks
Capital Expenditure Justification	<p>While all project funds go towards capital expenditures, individual grant awards will not exceed \$10 million. Therefore, additional labor reporting is not required.</p> <p>Each individual grant addresses significant impacts on and demand for recreation and conservation opportunities/facilities as a result of historic increases in public participation/use since the start of the pandemic.</p> <p>The decision to allocate funds toward capital expenditures within the State Parks and Recreation Grant Program is a strategic response to heightened public engagement with outdoor spaces post-pandemic. The surge in public participation highlights the urgent need for improved recreation and conservation infrastructure. By developing, rehabilitating, and repairing these assets, Pennsylvania can create lasting benefits for current and future outdoor enthusiasts, address immediate community needs, and ensure the resilience of its natural areas. This funding reflects a commitment to making transformative and enduring improvements to our state's outdoor environments.</p> <p>A capital expenditure makes sense for the State Parks and Outdoor Recreation Grant Program, because Act 54 of 2022 requires that the Commonwealth to provide grants to eligible entities for projects that plan, educate the public of, acquire, develop, rehabilitate or repair of various outdoor public spaces (including but not limited to greenways, recreational trails, open space, natural areas, river corridors, access to riverfronts, watersheds, community parks, recreational facilities, community conservation / beautification, and heritage areas).</p> <p>Act 54 of 2022 specifies designated uses for funds, creating constraints on pursuing alternative capital expenditures. Given greater flexibility, two potential options could have been explored:</p> <ul style="list-style-type: none"> • The Commonwealth could have conducted a comprehensive needs assessment of outdoor public space improvements statewide, and through this study, determined the best way to spend the capital funds. • The Commonwealth could have contracted out the work of putting together a needs assessment of outdoor public space improvements statewide, and through this study, the contractor could have determined the best way to spend the capital funds. <p>While these alternatives present advantages such as expert guidance and a statewide perspective, upon consideration of Act's requirements neither alternative serves to have an immediate impact on statewide outdoor resources. Furthermore, the alternatives fail to recognize that local entities are in the best position to identify and prioritize the needs of their area. The chosen option aligns with the program goals of community involvement and</p>

	empowerment. The decision to focus on direct grants to eligible entities was made to ensure a participatory approach that fosters local ownership and tailored solutions for Pennsylvania's diverse outdoor spaces.

Project Description	<p>PA Act 54 of 2022 appropriated \$74.946 million to the Department of Human Services for personal assistance services provided by home health care agencies, home care agencies and direct care workers. Personal assistance services were greatly affected by the pandemic - experiencing employment loss, unexpected costs, expensive policy and operating changes, etc. This SLFRF funding assists providers with covering applicable expenses incurred as a result of the pandemic.</p> <p>Per Pennsylvania state law, Act 54 allows for funding to be divided into two main groups:</p> <ul style="list-style-type: none"> - \$14.989 million (through 87389B) for one-time payments to each direct care worker employed through the participant-directed employer model who provide personal assistance services. These payments are based on the number of 15-minute units each worker was employed for through the model, in the third quarter of 2021. The payments function as retention payments to direct care workers. The final budget is slightly less than \$14.989 million and matches the final obligations as of December 31, 2024. - \$59.957 million (through 87397A) for the purpose of making payments for personal assistance services provided by home health care agencies and home care agencies. This piece of the project was previously reported under 87389B, but the current obligation was moved under the Long-Term Living Programs (Beneficiary) project (87397A) starting in quarter 3 of 2024. The final budget is slightly less than \$59.957 million and matches the final obligations as of December 31, 2024. <p>The Commonwealth decided to move the 87397A funds to a separate project because it was determined that home health care agencies and home care agencies should be considered beneficiaries, whereas the \$14.989 million for one-time payments to direct care workers would be provided to subrecipients. Also, separating the funds into these categories, and reporting them as separate projects, better aligns with the Commonwealth's accounting system.</p> <p>Please Note – The “Status to Completion” above is based on the percent expended, whereas the “Project Start Date” and “Project End Date” above are based on the first and last obligation or expenditure. Project Description	<p>This project will provide institutional aid to students of the greatest need at Pennsylvania State System Universities. These universities can most directly respond to the negative impact the pandemic has had on low income populations by providing institutional aid for reducing the cost of tuition, fees, room, and board. This directly supports students' opportunities for success by addressing the students' financial barriers. A university's best measure of financial need is the Expected Family Contribution (EFC) provided through the Free Application for Federal Student Aid (FASFA). The EFC takes into consideration family size, income, and assets.</p> <p>Please Note – The “Status to Completion” above is based on the percent expended, whereas the “Project Start Date” and “Project End Date” above are based on the first and last obligation or expenditure.
