**I agree to meet the VBE participation goal in full.**  
I have completed and am submitting with my bid or proposal a **VBE Utilization Schedule (VBE-3)**, which is required in order to be considered for award.

**I am requesting a partial waiver of the VBE participation goal.**  
After making good faith outreach efforts as more fully described in the **Guidance for Documenting Good Faith Efforts to Meet the VBE Participation Goal**, I am unable to achieve the total VBE participation goal for this solicitation and am requesting a partial waiver of the VBE participation goal. I have completed and am submitting with my bid or proposal both of the following, which are required in order to be considered for award:

1. a **VBE Utilization Schedule (VBE-3)** for that portion of the VBE participation goal that I will meet; AND
2. a **Good Faith Efforts Waiver Request** for the portion of the VBE participation goals that I am unable to meet.

**I am requesting a full waiver of the VBE participation goal**  
After making good faith outreach efforts as more fully described in the **Guidance for Documenting Good Faith Efforts to Meet the VBE Participation Goal**, I am unable to achieve any part of the VBE participation goal for this solicitation and am requesting a full waiver of the VBE participation goal.

I have completed and am submitting with my bid or proposal a **Good Faith Efforts Waiver Request** for the complete VBE participation goal, which is required in order to be considered for award.

NOTE: VBE primes who are submitting as bidders or offerors must complete a **VBE Utilization Schedule (VBE-3)** identifying any self-performance towards the VBE participation goal.

**Project:** White Oak Pond - Design, Construct & Rehabilitate Dam

**Address:** 877 White Oak Drive, Forest City, PA 18421

**Bid Due:** September 12, 2025 5:00 PM

**Scope:** White Oak Pond Dam is located in Clinton Township in Wayne County, Pennsylvania, and is approximately 26 ft high and 300 ft long. The dam impounds a 210-acre lake at normal pool on an unnamed tributary, about 4,000 ft upstream of the confluence with the West Branch of the Lackawaxen River near the village of Aldenville. White Oak Drive (SR 4004) is located immediately downstream of the dam. A 5.0-ft wide by 6.2-ft high arched masonry conduit, open at its upstream end, connects the reservoir with a wet well located near the centerline of the dam. Discharges through the dam are conveyed through a concrete-lined channel for a distance of about 70 ft before passing through a rectangular masonry culvert (5 ft wide by 6 ft high) beneath White Oak Drive. The culvert transitions to a 78-inch diameter pipe about halfway under the road. The culvert is owned and maintained by PennDOT. An auxiliary spillway is located on the left abutment of the embankment. The broad crested spillway is constructed of stone masonry and has a rectangular channel with masonry walls.

The Rehabilitation of White Oak Pond Dam generally includes: 1. Construction of a new embankment and straight drop spillway structure upstream of the existing dam; removal of a portion of the existing dam structure; and other miscellaneous items. 2. Removal of the existing culvert underneath White Oak Drive and replacement with a new 6.5-ft Precast R.C. Pipe culvert, wingwalls, and riprap protection. Other general scope items include the following:

- E&S Controls
- Clearing & Grubbing, Topsoil stripping
- Control of Water, surface runoff, and groundwater
- Foundation excavation and subgrade preparation
- CIP Concrete spillway as noted
- RipRap lined outlet channel through existing dam
- Placement of zoned earthfill and drainage fill for new embankment
- ACB armoring on upstream face of new embankment
- Demolition and removal of existing dam features including embankment, arched masonry conduit, wet well, and rectangular masonry conduit
- White Oak Drive culvert replacement as noted
- Pedestrian bridge over proposed spillway (Base Bid 2)

All materials and workmanship for construction of the pipe culvert and associated items as shown in the Drawings for Construction, State Route 4004-Section 670 including the ALSO Plans consisting of the Traffic Control Plan, Structure Plan S3-9944, and Cross Sections, to be in accordance with the Standard Specifications of the PennDOT, Publication 408 dated 2020, Change No. 11, and Supplements thereto unless otherwise noted or otherwise directed by the Specifications of

this Project. Applicable portions of Publication 408 are indicated by Item Number or the Project Special Provisions. Delete Publication 408, Section 100 and follow the General Conditions of the project Contract Documents and Technical Specifications.

The Construction Contract duration shall be 545 calendar days, including a winter shutdown.

***RFIs are due 9/01/2025 by 10am.***

**Project:** White Oak Pond - Design, Construct & Rehabilitate Dam

**Address:** 877 White Oak Drive, Forest City, PA 18421

**Bid Due:** September 12, 2025 5:00 PM

**Scope:** White Oak Pond Dam is located in Clinton Township in Wayne County, Pennsylvania, and is approximately 26 ft high and 300 ft long. The dam impounds a 210-acre lake at normal pool on an unnamed tributary, about 4,000 ft upstream of the confluence with the West Branch of the Lackawaxen River near the village of Aldenville. White Oak Drive (SR 4004) is located immediately downstream of the dam. A 5.0-ft wide by 6.2-ft high arched masonry conduit, open at its upstream end, connects the reservoir with a wet well located near the centerline of the dam. Discharges through the dam are conveyed through a concrete-lined channel for a distance of about 70 ft before passing through a rectangular masonry culvert (5 ft wide by 6 ft high) beneath White Oak Drive. The culvert transitions to a 78-inch diameter pipe about halfway under the road. The culvert is owned and maintained by PennDOT. An auxiliary spillway is located on the left abutment of the embankment. The broad crested spillway is constructed of stone masonry and has a rectangular channel with masonry walls.

The Rehabilitation of White Oak Pond Dam generally includes: 1. Construction of a new embankment and straight drop spillway structure upstream of the existing dam; removal of a portion of the existing dam structure; and other miscellaneous items. 2. Removal of the existing culvert underneath White Oak Drive and replacement with a new 6.5-ft Precast R.C. Pipe culvert, wingwalls, and riprap protection. Other general scope items include the following:

- E&S Controls
- Clearing & Grubbing, Topsoil stripping
- Control of Water, surface runoff, and groundwater
- Foundation excavation and subgrade preparation
- CIP Concrete spillway as noted
- RipRap lined outlet channel through existing dam
- Placement of zoned earthfill and drainage fill for new embankment
- ACB armoring on upstream face of new embankment
- Demolition and removal of existing dam features including embankment, arched masonry conduit, wet well, and rectangular masonry conduit
- White Oak Drive culvert replacement as noted
- Pedestrian bridge over proposed spillway (Base Bid 2)

All materials and workmanship for construction of the pipe culvert and associated items as shown in the Drawings for Construction, State Route 4004-Section 670 including the ALSO Plans consisting of the Traffic Control Plan, Structure Plan S3-9944, and Cross Sections, to be in accordance with the Standard Specifications of the PennDOT, Publication 408 dated 2020, Change No. 11, and Supplements thereto unless otherwise noted or otherwise directed by the Specifications of

this Project. Applicable portions of Publication 408 are indicated by Item Number or the Project Special Provisions. Delete Publication 408, Section 100 and follow the General Conditions of the project Contract Documents and Technical Specifications.

The Construction Contract duration shall be 545 calendar days, including a winter shutdown.

**RFIs are due 9/01/2025 by 10am.**
