RE: 4100082380

Dear Ms. Ream:

Please accept this letter as the final report to the above noted grant entitled Bridging the Gap: Building Community through Technology. The grant initially took effect in March 2019 with the equipment arriving and being placed into use in August 2019. A total of 3 systems were placed into service.

Thru this grant, the Home was able to purchase the "It's Never 2 Late" technology system, commonly known as "IN2L". IN2L is a portable system that can be moved throughout the facility to provide for person-centered interactive activities and therapies related to cognition fitness, socialization and spiritual life. The units are utilized in our common areas, therapy department and dementia unit. Their capabilities seem limitless.

Our goals were to improve resident satisfaction through increased activity, participation and socialization and decreased usage of psychotropic medications. These units also serve as vital communication links between residents and families during the COVID 19 pandemic.

It is our conclusion that this program has been and remains successful. Its continued use and capabilities make it an obvious asset in providing a happy and healthy living environment for our residents.

Sincerely,

Richard Walters, NHA
Administrator
