

**Pennsylvania eHealth Partnership
Advisory Board
Meeting**

February 10, 2023

1

This Session is being Recorded

The Wiretap Act
It is against the law in Pennsylvania to record oral conversations without the permission of the individuals involved, in most circumstances.

Consent to Recording
This session is being recorded for record-keeping purposes. By participating in this session, you are consenting to the recording of this session for preparation of meeting minutes. At any time if you have a question or comment, feel free to place that in the chat, and we will respond to you as soon as possible. If you would like to ask your question or to comment verbally – please note that by doing so, you are consenting to the recording of your statements for preparation of meeting minutes.

Agenda

- 10 a.m. Welcome and Introductions
- 10:05 Minutes of November 4, 2022, Advisory Board Meeting
- 10:10 PA eHealth Partnership Program Initiatives
- 10:30 State Medicaid Director Priorities
- 10:55 MMIS Streamlined Modular Certification Operational Readiness Review
- 11:15 DHIN's Collaborative Efforts with Pennsylvania
- 11:40 RISE-PA/Resources and Referral Tool Update
- 12:00 Networking Luncheon
- 12:45 Cognosante P3N Transition Update
- 1:30 Health Information Exchange Trust Community Committee Updates
- 1:45 New Business
- 1:50 Public Comment
- 2 p.m. Adjournment

February 10, 2023 3 

3

Welcome and Introductions

Paul McGuire
Post-Acute Care Representative
and
PA eHealth Advisory Board Vice-Chair

February 10, 2023 4 

4

PA eHealth Advisory Board

Mr. MARTIN CICCOCIOOPPO, Director, PA eHealth Partnership Program
Pennsylvania Department of Human Services (Secretary of DHS Designee)

Ms. PAMELA E. CLARKE, Senior Director, Quality, Health Promotion Council
(House Appointed HIO Representative)

Mr. JOSEPH FISNE, Associate Chief Information Officer
Geisinger Health System (Senate Appointed HIO Representative)

Mr. SCOTT FRANK, Chief Information Officer
Capital Blue Cross (Insurer Representative)

Dr. BRIAN HANNAH, formerly Vice President, Chief Medical Information Officer
Mercy Health (Hospital Representative)

Dr. TIMOTHY HEILMANN, Chief Medical Information Officer
UPMC Susquehanna (Physician or Nurse Representative)

Ms. TERI L. HENNING, Chief Executive Officer
Pennsylvania Homecare Association (Home Care or Hospice Representative)

February 10, 2023

5

5

PA eHealth Advisory Board continued

Ms. MUNEEZA IQBAL, Deputy Secretary for Health Resources and Services
Pennsylvania Department of Health (Secretary of Health Designee)

Ms. JULIE KORICK, Director of Finance & Business Development
Pennsylvania Association of Community Health Centers (Underserved Representative)

Ms. MINTA LIVENGOOD, Vice Chair, Consumer Subcommittee of the MAAC
(Consumer Representative)

Mr. PAUL MCGUIRE (Vice Chair), Chief Operating Officer, Quality Life Services
(Post-Acute Care Facility Representative)

Ms. KATIE MERRITT, Policy Director, Pennsylvania Insurance Department
(Insurance Commissioner Designee)

Dr. MICHAEL A. SHEINBERG, Chief Medical Information Officer
Penn Medicine Lancaster General Health (House Appointed HIO Representative)

VACANT - Consumer Representative

VACANT - Chair

February 10, 2023

6

6

Ex Officio Members

Ms. PHYLLIS SZYMANSKI, President
ClinicalConnect HIE (Nominated as Senate HIO Appointee)

Mr. DON REED, Chief Operating Officer

▶ CMS Streamlined Modular Certification

Agenda for January 24, 2023, P3N Operational Readiness Review with CMS and MITRE

9 a.m.	Introductions from Team Leaders
9:15	System and Program Overview
10:00	Release, Training, and Testing Plans
10:15	System Defects and Risks
10:30	System Demonstrations
11:30	Lunch Break
12:00	Metric Discussion
1 p.m.	Security and Privacy
1:30	Additional Q&A, Action Item Review, and Next Step Discussion
2 p.m.	Adjournment

February 10, 2023
15

15

▶ CMS Approved P3N SMC Outcomes

1. The P3N **Enterprise Master Patient Index (MPI)** improves patient care by providing improved matching and linking of patients using demographic data from multiple sources including state agencies and HIOs ensuring the treatment relationship between Providers and patients are maintained and the right care is delivered to the right patients.
2. The P3N **Patient Portal** improves patient care by allowing Beneficiary access to their demographics and personal healthcare information, including advance care planning and consent decision documents, enabling patients to clearly know what data is available on them and identifying care teams of Providers and Case Managers that are involved in their care.
3. The P3N **Provider Directory** improves patient care by offering a single, comprehensive Provider data store sourced from multiple sources (regional electronic contact information, state license, federal National Plan and Provider Enumeration System that can be accessed by Beneficiaries and Providers in support of care management. It also supports the Medicaid Provider Management processes.
4. The P3N **Provider Portal** improves patient care by supporting Medicaid Beneficiary eligibility and enrollment by making data available to Medicaid Providers that may not be readily available from one place, elsewhere. The P3N Provider Portal will allow Providers and case managers to confirm their demographics, license, and professional credential information; access patient medical records and care plans from multiple sources; and upload advance care planning and consent decision documents on the patients for which they have a treatment relationship.
5. The P3N **Clinical Data Registry and Repository** improves population health and the patient experience by hosting clinical data that includes patient consent decision documents, Care Plans, Advance Care Planning Documents, and Common Clinical Data Set Notes and Narratives.

February 10, 2023
16

16

CMS Approved P3N SMC Outcomes (cont.)

6. The P3N **Consent Registry, Super Protected Data (SPD) Tagging and Filtering Service** enforces technical controls, so information is shared with Providers while protecting the rights of patients by only allowing clinical data to be exchanged, or not, when authorized by the patient.
7. The P3N **Encounter Notification Service** reduces emergency department and hospital readmissions, reduces duplicative testing, and improves outreach and care coordination across care team Members.
8. The P3N **Clinical Data Push Service** improves patient care by delivering clinical data without the need to initiate a query and retrieval and will also provide clinical document exchange with healthcare systems in the absence of other, standardized document sharing infrastructure.
9. The P3N **Public Health Gateway (PHG) Service** improves upon the state's public health reporting requirements (Lab Reporting, Cancer, Immunization, Electronic Case Reporting, PDMP) and offers query access (Immunization, PDMP) by providing a single connection point to state registries from HIOs and Providers.

February 10, 2023

17

17

CMS Approved P3N SMC Metrics

1. Increasing numbers of **matching** and linking rates, over time, as additional patient demographic sources and data such as previous address, phone number, and email address are introduced to the **EMPI**.
2. Increasing Medicaid Beneficiary usage over time as the **Patient Portal** is implemented and matures.
3. Increasing both Medicaid Provider and Beneficiary usage over time as the **Provider Directory** is implemented and matures.
4. Increasing Medicaid Provider usage over time as the **Provider Portal** capability is implemented and matures.
5. Over time, the **Clinical Data Registry and Repository** will increase in the number of structured clinical data and documents while decreasing the number unstructured clinical data and documents in support of a richer, more tailored experience for both Medicaid Beneficiaries and Providers.
6. Increasing (over time) the number of Medicaid Providers that can receive **super protected data (SPD)** after patient authorization and decreasing (over time) the number (percentage) of patients that have elected to not share their clinical data.
7. Identifying (over time) the number of Medicaid Providers that send messages to the P3N **Encounter Notification Service** and the number of affected Medicaid Beneficiaries participating with an MCO, as this capability is implemented and matures.
8. Increasing (over time) both Medicaid Provider utilization of the **Clinical Data Push Service** and the number of Medicaid Beneficiaries affected as this capability is implemented and matures.
9. Increasing (over time) both Medicaid Provider utilization of the **Public Health Gateway (PHG) Service** by showing increasing number of messages to Pennsylvania's public health reporting registries of Medicaid Beneficiaries over time as this capability is implemented and matures.

February 10, 2023

18

18

CMS Certification Team ORR Recommendations

Recommendation 1: Prior to the Certification Review, the state should provide the CMS Certification Team with completed independent, third-party penetration testing results, accompanied by the Security Assessment Report (SAR), vulnerability scans, and the Plan of Action and Milestones (POA&M) outlining resolution of any significant deficiencies.

Recommendation 2: The state should conduct an actual Disaster Recovery exercise and provide evidence of Disaster Recovery test results to the CMS Certification Team in advance of the Certification Review.

DHIN’s Collaborative Efforts with Pennsylvania

Mark J. Jacobs, MHA, CPHIMSS, CHCIO, CDH-E
Chief Information Officer
Delaware Health Information Network (DHIN)

February 10, 2023 20 

20

DHIN's collaborative efforts with Pennsylvania

*Mark J. Jacobs, MHA, CPHIMSS, CHCIO, CDH-E
Chief Information Officer
February 10, 2024*

*Empowering
Data-Driven Decisions*

21

21

Participation Levels*

DHIN Connections Across Delaware & Beyond

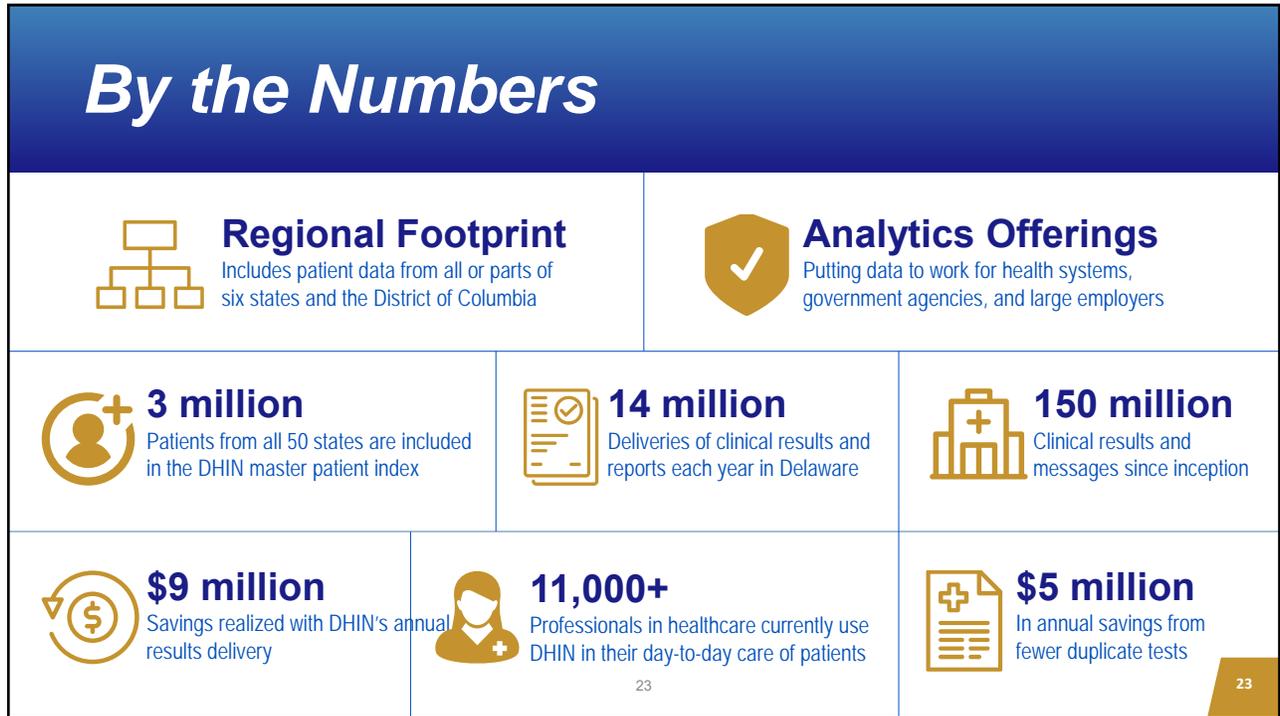

- 881 Participating Organizations Including:
 - 9 Hospitals/Health Systems
 - 492 Ambulatory Practices Receive Results
 - 377 Search Only Practices
 - 4,135 Providers Who Make Orders
 - 18 Urgent Care Clinics
 - 3 Public Health Agencies
 - 3 ACOs
 - 47 LTAC, SNFs and Nursing Homes
 - Connections to HIEs: Three (CRISP, P3N, NJSHINE)

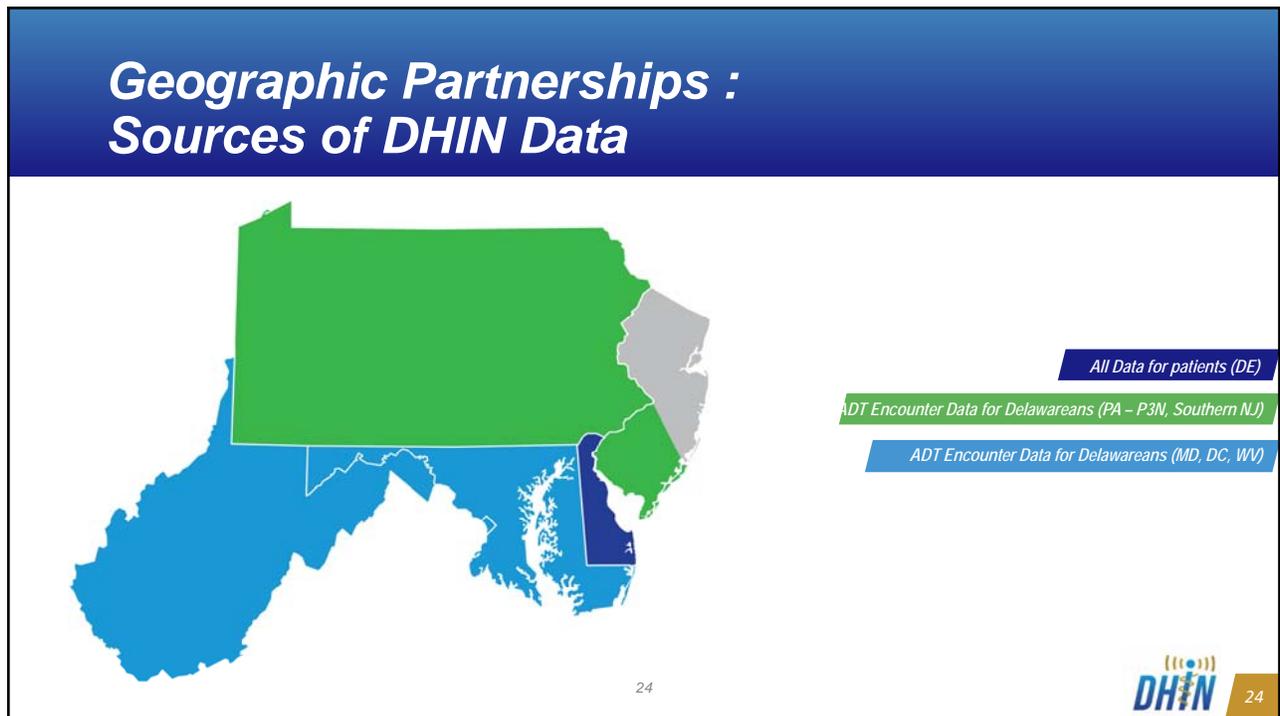

*DHIN provides participating organizations access to 3MM patient records and the ability to securely share a patient's clinical information electronically—saving time, money & lives
As of March 2022

22

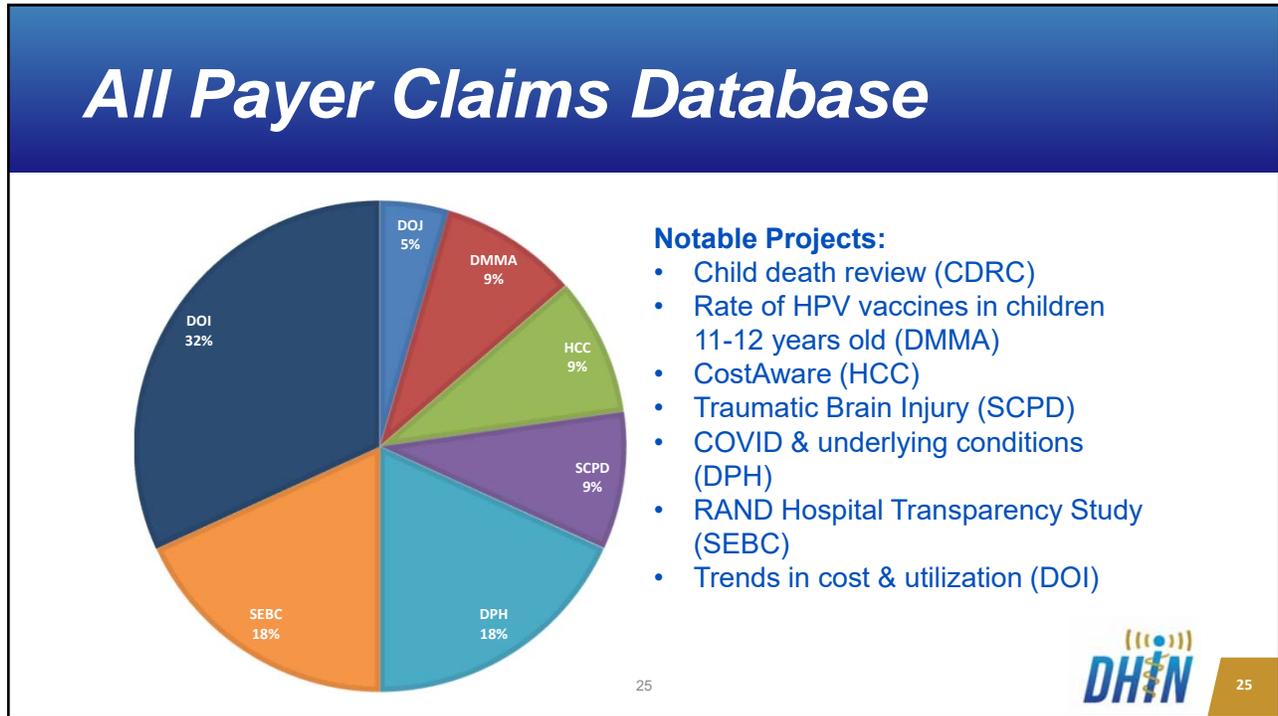

22

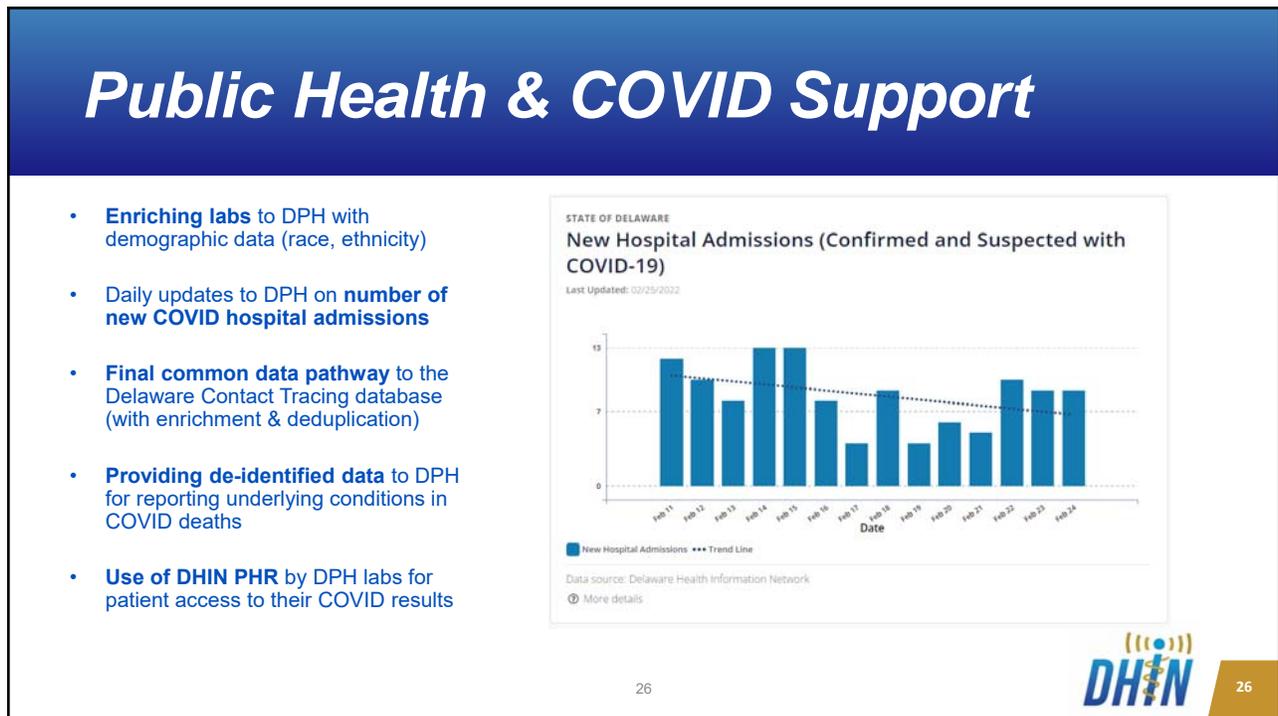

23

24

25

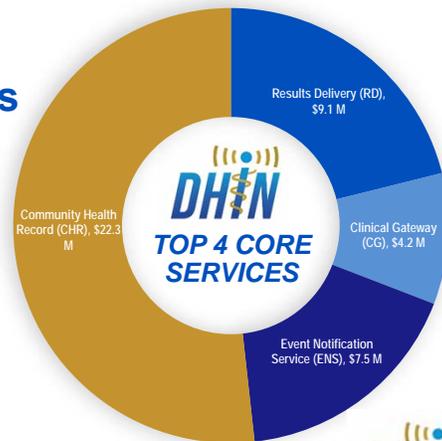

26

2021 3rd Party Value Assessment

Over \$43 million in value provided annually to stakeholders

- Community Health Record (CHR)
- Results Delivery (RD)
- Event Notification Service (ENS)
- Clinical Gateway (CG)

With \$9-10M in annual operating revenue, DHIN core services return \$4 for every \$1 in operating revenue

27

27

27

Current State Value Assessment

Community Health Record - CHR

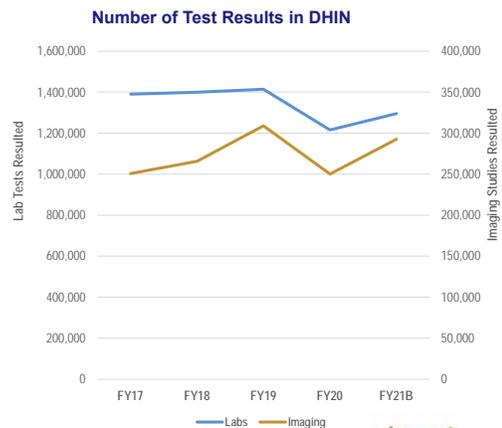

Timely access to the CHR improves the provider's ability to diagnose, make treatment decisions and coordinate care with others. *An estimated 5 to 10% of tests & paid claims are avoided, at \$30 per lab test & \$200 per imaging exam.*

"Allows our practice to know if our patients have been seen by another facility, along with any lab results/studies done"

"Being able to see results done by other providers so I don't duplicate"

"We have a significant number of patients that live in southern Delaware and DHIN allows us to easily connect with admission, ED, and labs info to make timely plan of care decisions"

28

28

28

CHR Value Assessment

One connection to the CHR saves time and resources.

Providers, hospitals, labs, etc. can view current information and historical medical records when and where the information is needed.

Requesting & collecting information from multiple sources can require 5 to 10 minutes per chart accession.

"The greatest value in the DHIN CHR is in having the records we need in a timely manner instead of going to other outside sources"

FY20 Average Daily Views by Customer Group

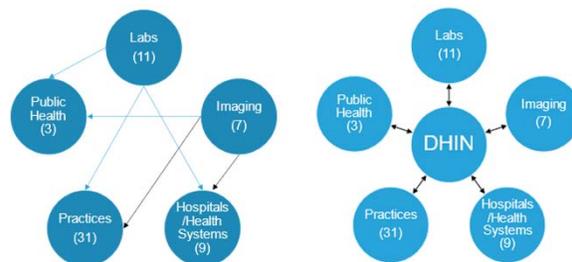

Practices	44,000
Inpatient	3,600
State	2,700
SNF/Post-Acute	1,900
Behavioral Health	1,100
ED/Urgent Care	1,000
Other	14,800

Results Delivery Value Assessment

- A DHIN Premier service
- Traditional point to point connections meant the same result would need to be delivered to multiple providers.
- **One connection to DHIN replaces 1,152 point to point interfaces.**
- 11.9M clinical results delivered through DHIN results delivery services (FY20)

Minimum Annual DHIN Impact on Interface Development, Maintenance, Data Normalization: \$9.1M

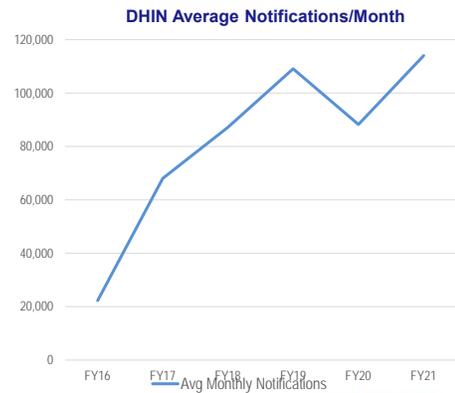

ENS Value Assessment

ACOs, providers with attributed patients and payers use ENS to reduce ED visits & readmissions. By tracking alerts & examining trends, patients can be educated & care transitions managed.

"As an ACO, ENS is a great service. The availability to reference patient's visits to other facilities and determine care that was received elsewhere to help compliment what we offer."

"The ability to know when our patients go to the major health systems especially the emergency room."

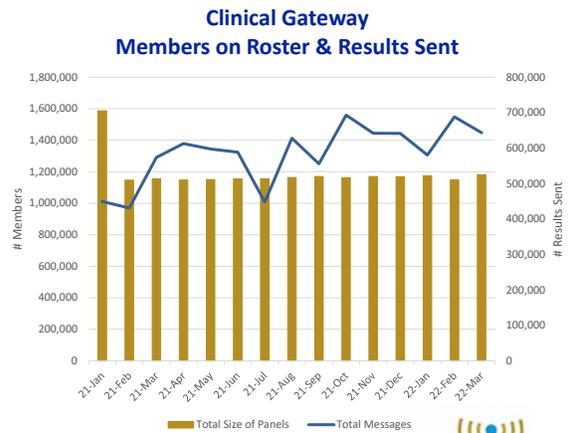

Clinical Gateway Value Assessment

Clinical data is matched to patient panels and sent in bulk to the subscribing organization. This enables matches with beneficiary data and is used by payers, ACOs and care coordinators to manage care.

"Identifying patients that have recently been to the ED or had a hospitalization so we can follow up with them in a timely manner."

There are nearly 1.6 million members on multiple hospital, payer and ACO rosters.

DHIN is Delaware's Healthcare Claims Database

Our Vision

Provide meaningful data to advance the triple aim of improved health, healthcare and lower costs

Promote population health research and analysis (e.g., disease prevalence)

Promote value-based and alternative payment arrangements

Support provider risk-sharing arrangements

33

33

34

17

This year's Initiatives

- **Granular Patient Consent Tool** enabling patient input, who can see how much of your data
- Expected statewide implementation of **Student absenteeism alert system** (working on other SDOH applications)
- Completion of routine test pilots (Aledade & Delaware Med. Society)
- **Standard claims data extract** for Delaware state agency use
- Enable DHINs **clinical data for data analytics**

35

35

35

Trends

Strategic Plan 2022: *Address DHINs sustainability through strategic partnerships and value – HIE Due Diligence*

- Surveyed 20 HIEs (Status, Accomplishments, Changes and Trends)
- Key Themes:
 - Consolidation
 - Changing National Network Landscape
 - TEFCA
 - Driving need for workflow into EMR
 - Growing number EHR Vendor networks (Epic, etc.)
 - Statewide HIEs reported a greater reliance by Public Health
 - Addressing SDOH issues
 - Emerging Data Utility Model
 - **Driving need for new data sources and collaborations**

36

36

36

DHIN & Pa Collaboration

History of Collaboration with Pennsylvania:

- **March 2012** - DHIN provided supporting testimony to Sen. Fulmer's Senate committee hearing leading to the passage of Act 121 of 2012 establishing the PA eHealth Partnership Authority as an independent state agency.
 - Act 76 of 2016 transferred the Authority into the Department of Human Services and renamed the PA eHealth Partnership
 - DHIN saw this as a positive move for Pennsylvania and the region.
- **July 2019:** ADT Data sharing with HSX - Patients that receive care in PA (6 Hospitals)
- **Jan 2022:** DHIN went into production with the P3N ADT Service

Collaboration agreement between DHIN and P3N :

- P3N agreed to deliver ADT messages to DHIN for all Del. residents receiving care in PA facilities.
- DHIN would deliver ADT messages to the P3N ADT for all PA residents receiving care in Del. facilities.
- DHIN would filter out certain "sensitive diagnoses" utilizing a list provided by P3N and would likewise not send ADTs related to those diagnoses through the interface.
- P3N and DHIN agreed that they will only keep data received from the other if either (i) such HIE already has an existing "match" on that patient in its MPI, or (ii) such a patient "match" occurs within two weeks following the receipt of such ADT.
- ADTs that do not meet those requirements will be securely destroyed.

37

37

37

DHIN & Pennsylvania Collaboration

Collaboration today :

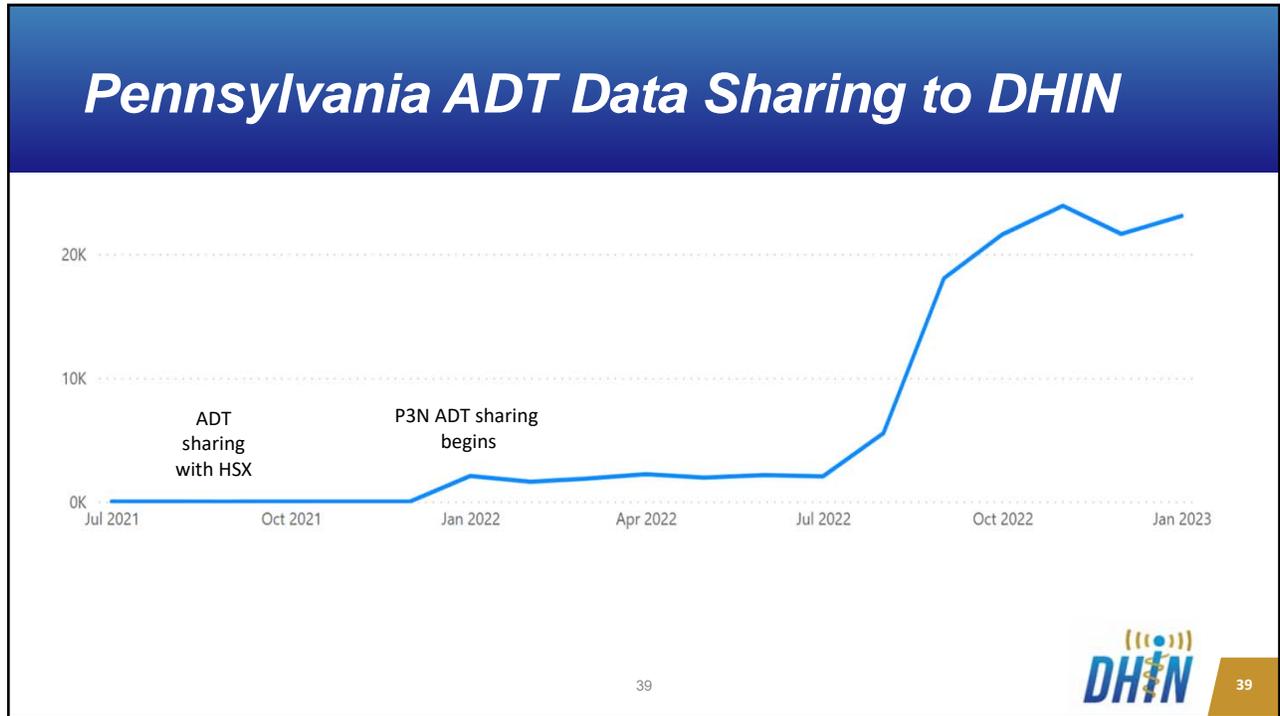

- *DHIN/P3N actively sharing ADT data - going exceptionally well!*
- *DHIN applies filters on incoming ADT's blocking sources not configured our downstream systems*
- *DHIN working to get any new data sources added as they evolve*
- *No issue with patients matching to DHINs Master Patient Index*

38

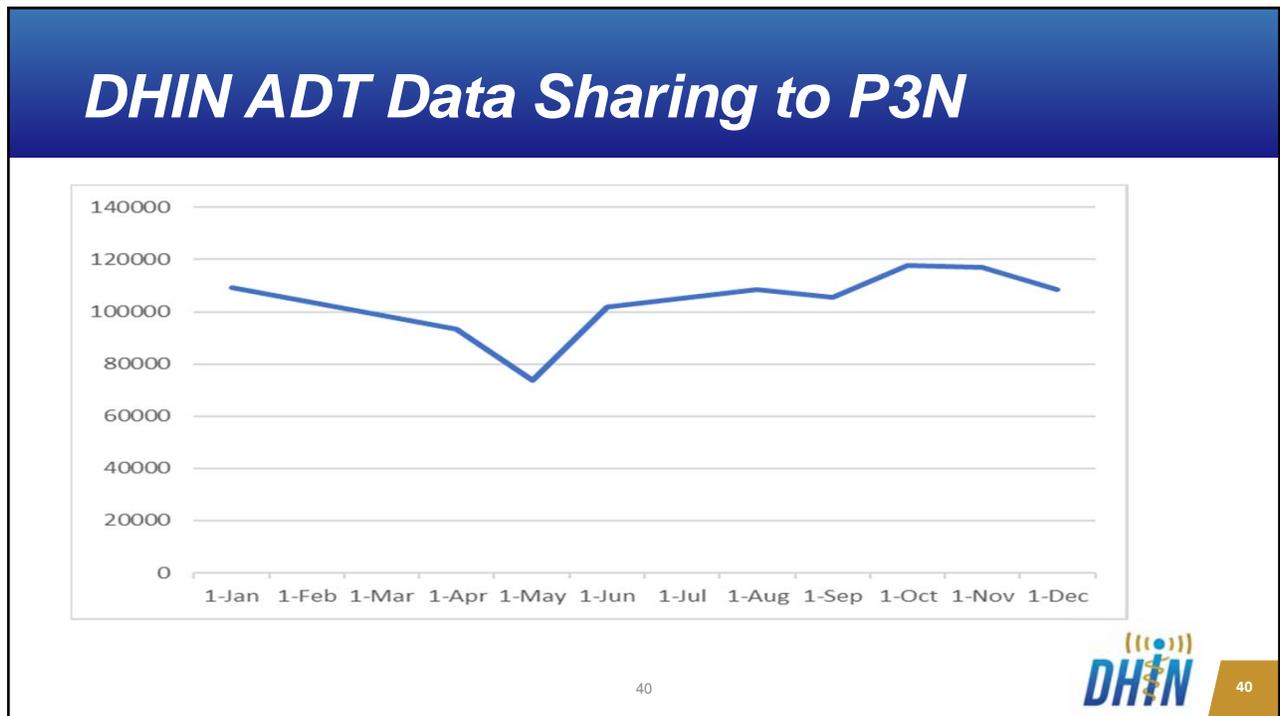

38

38

39

40

Feedback from DHIN's Stakeholders

- **Christiana Care** : *"How can we make it easier for care management and care delivery systems to have the most up to date information about their patients and members? Our caregivers need simplified healthcare-centric workflows that promote efficiency and effectiveness. DHINs collaboration with the P3N simplifies the process of data sharing for the health systems so that we do not have to produce costly connections with individual HIE's. Let's make it easy for the patient and provider team to work on wellness. The recent DHIN collaboration with Pennsylvania P3N is a big step in that direction!" Elizabeth Hukill, CEA, ChristianaCare Health System*
- **Bay Health**: *"Exciting ! Our biggest ask is that information be easy to obtain and things like consent and faxing be eliminated as much as possible. Participation with the DHIN or other state frameworks such as the P3N so that data is accessible in the workflow of the recipient is also key." Jonathan Kauffman, MD, CMIO Bay Health*
- **Beebe Healthcare**: *"We are able to leverage the partnership and information from the DHIN to enhance the care of the community members we are honored to serve. For an ask (and from a clinical perspective), I would like for PA to ensure that the DHIN has access to the residencies information to ensure that our clinicians can care for these patients when they vacation and/or decide to move to our area." William Chasanov, MD, Beebe Healthcare*

41

41

Vision for Future

- Continue improving upon and strengthening the DHIN-P3N collaboration
- Potential expansion of the DHIN/P3N data sharing
 - Clinical results (ORU messages – lab, path, rad, trans)
- CCD exchange
- Possible Public Health Data (Immunizations, Syndromic, Reportable Labs)

44

44

RISE-PA Update for eHealth Partnership

Bill Marella, VP Value Based Care & Analytics

February 10, 2023

45

45

RISE-PA is now PA NAVIGATE

- **Goals:**
 - Building a Statewide platform for connecting patients to social services
 - Making SDOH data as shareable as clinical data
 - Enabling a Population-level view of citizens' needs and CBO capacity to meet them
 - Help make Social Care sustainable

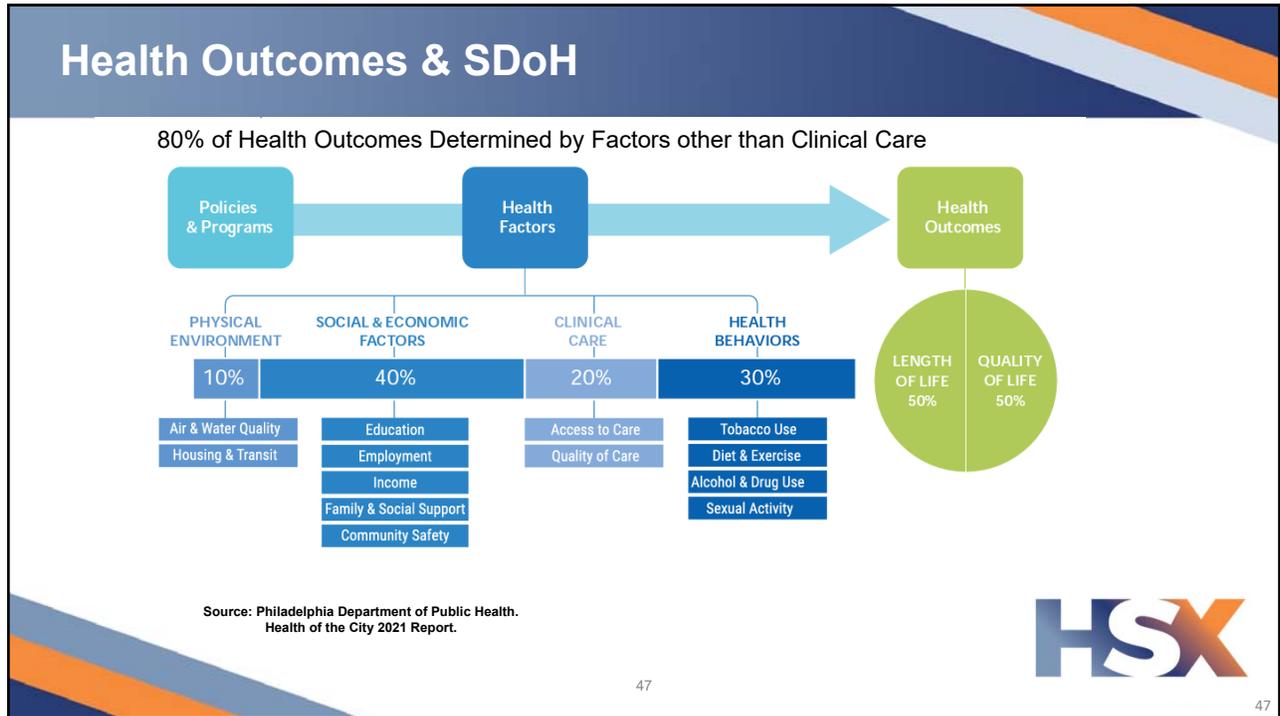

PA NAVIGATE
linking patients to community resources

46

46

47

Value - Tower Health/Reading Hospital Case Study

- Accountable Health Community survey showed a population that was food insecure, significant % low-income, immigrant, living in food desert
- Community Connection Project included providers, payers, CBOs (food banks/pantries)
- Used Wellsky for SDOH screening, referrals. Among food insecure patients, 85% referrals fulfilled, and 74% had food needs resolved within 1 year.
- Results: Among patients whose food needs resolved:
 - ✓ 32% fewer ED visits
 - ✓ 32% fewer hospital admissions
 - ✓ 30% fewer readmissions
 - ✓ 31% reduced hospital costs

Nearly 69 percent of respondents stated that over the past 12 months, they often worried that their food would run out before they had the money to buy more.

Source: Wellsky/Tower Health. Impacting SDOH through cross-sector collaboration.

HSX

48

Current Status

- Grant period: Aug 31, 2022 - Jan 31, 2024 (likely extension thru Jan 2025)
- PA DHS Funding: Up to \$15.42M across four HIEs:
 - \$900K to each HIE (\$3.6M)
 - \$2.25M x 4 for selected vendor (\$9M)
 - 90+ Member/CBO integrations (\$2.82M)
- 7 proposals received
- Timeline:
 - Complete Vendor Procurement - Q1 2023
 - Member Integrations Complete by End of Grant
 - Procurement Envisions 5-Year Period of Performance

HSX

49

49

49

Community Value

- Better coverage of SDOH needs → better outcomes
- Single solution for SDOH data sharing
- Population health monitoring for social needs
- State subsidy benefits members and CBOs
- Tracking health outcomes of addressing social needs
- Standardizing/streamlining workflows

HSX

50

50

50

Challenges

- Many SDOH Referral systems already in use, with one vendor dominant
- CBO community engagement & capacity
- SDOH-related data standards emerging
- Provider EMR capabilities are not mature in this area
- Sustainability and future funding

51

51

51

How eHealth Partnership Can Help

- State agencies are a significant stakeholder
- Require use of PA NAVIGATE in Medicaid MCO contracts
- Collaboration on future funding model, e.g., 1115 waiver, Medicaid Modernization Funds, etc.
- CBO engagement
- In-kind support for marketing and adoption

M&O Activities

Activity	Description
Monthly HIO Meetings	Review status of current implementations, defects, and upcoming activities.
Security Testing	Maintain HITRUST & ISO certifications, perform regular vulnerability scans & penetration testing.
Reporting	Provision of metrics on traffic and utilization across the P3N.
System Monitoring/ Operational & Performance Metrics	Monitor applications, respond to system-wide performance changes, and optimize resource utilization.
System Upgrades	Upgrades to the various system components are typically scheduled as part of our bi-weekly release schedule/cadence
Help Desk Support	Service request management, Help Desk ticketing, and issue monitoring.
Maintenance Activities	Events that keep the system operational, including preventative actions.
Defect Management	Identification, tracking and resolution of system defects.
Disaster Recovery & Backup	Performance of tabletop exercises to ensure processes outlined in DR plan are functioning correctly.
Onboarding & Offboarding	On-going maintenance of stakeholder access to applicable P3N systems.
Training	Make available resources to train stakeholders on P3N systems.

62
