## Introduction and Purpose

This report is created and prepared by the Pennsylvania Office of Mental Health and Substance Abuse Services (OMHSAS). The information contained within this report is extracted from the Patient Tracking System (PTS) of the State Facility Tracking System. The medical records staff at each of the six state hospitals and one restoration center are continually updating PTS with the necessary information of any individual served.

The purpose of this report is to provide the reader with an overview of lengths of stay, demographics, and diagnosis information, as it exists on the last day of the month for each of the state hospitals. This report is a limited data set designed for the purposes of research, public health, or health care operations in accordance with 45 C.F.R. § 164.502.

Counts of individuals that are less than 11 individuals include the designation of “<11” to protect the confidentiality of individuals in accordance with the Department’s data governance policies.

Each table, chart, and graph are labeled regarding the content contained within the visualization. For definitions of terminology and data used, please refer to the appendix.

This table provides the number of patients discharged during the past year whose length of stay in the state hospital system is less than a specified length of time. Counts are separated by facility and level of care.

This table is also available separated by mental health diagnosis later in this document.

## Distributions and Mean and Median Lengths of Stay

The plots in this section detail the distribution of lengths of stay at each state hospital and are separated by level of care. This section also contains plots that detail the average length of stay for each state hospital.

### Mean and Median Lengths of Stay of Patients as of December 31, 2023

Measure	Psychiatric						Forensic		Long Term	S RTP
	CLA	DAN	NOR	TOR	WAR	WER	NOR	TOR	SOU	TOR
Mean	7.59	4.64	2.31	5.17	4.83	5.50	1.61	1.41	5.92	11.11
Median	4.71	2.64	0.62	2.58	1.99	3.62	0.81	0.39	5.22	11.22

This table displays the mean and median lengths of stay, separated by state hospital and level of care by number of years.

## Distribution of Lengths of Stay of Patients as of December 31, 2023

This plot displays the distribution of lengths of stay for patients in all levels of care using a boxplot. Please note that any values above 20.9 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

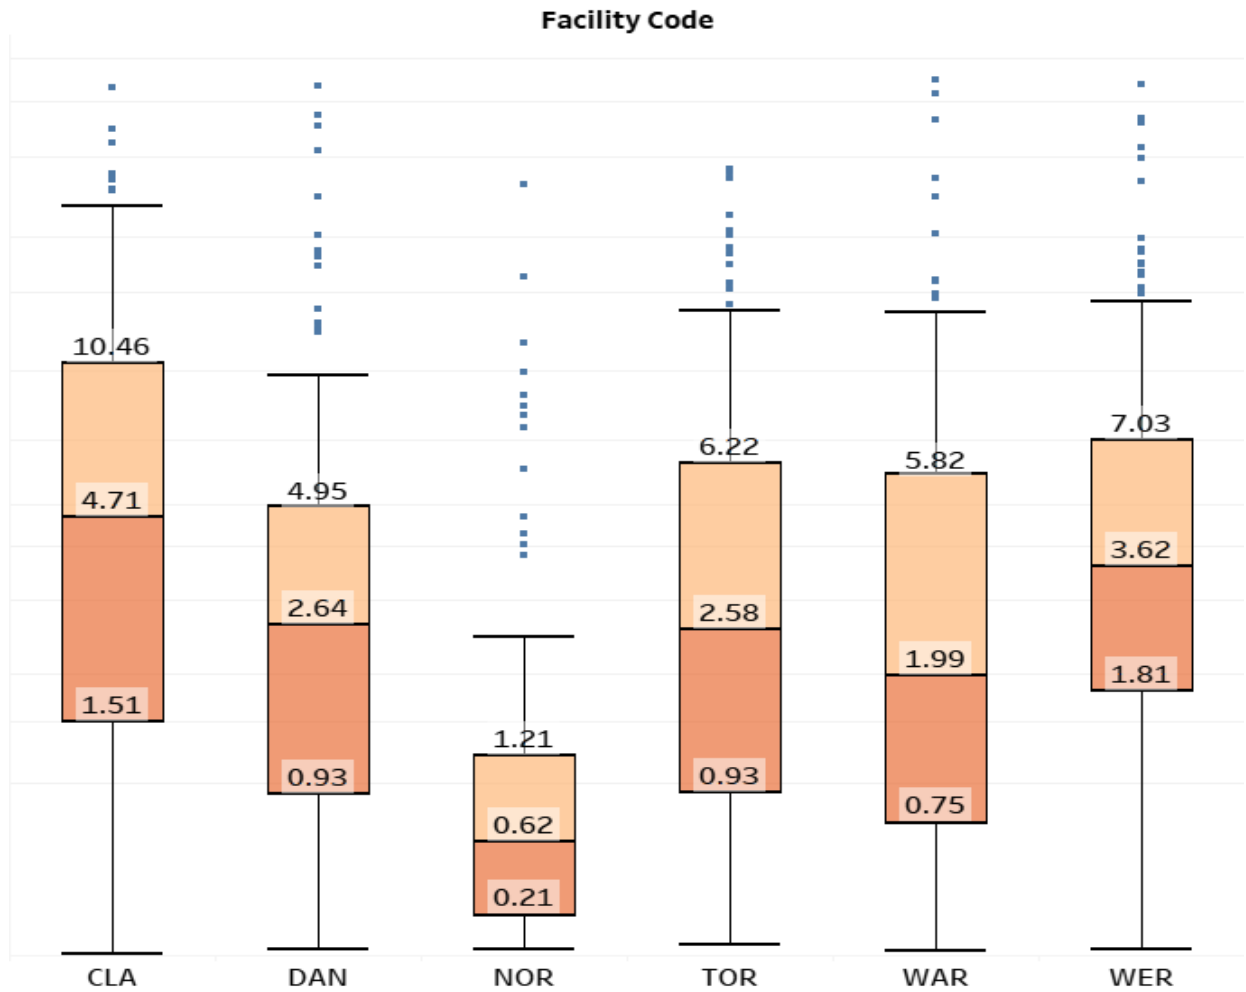

The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median. For example, the median for CLA on this plot is approximately 4.71 years, the first quartile is 1.51 years, and the third quartile is 10.46 years. On a box plot, 25% of the data fits between each quartile. Therefore, for CLA on this plot, 25% of the lengths of stay at CLA are below 1.51 years, 25% of lengths of stay are between 1.51 years and 4.71 years, 25% are between 4.71 years and 10.46 years, and 25% are above 10.46 years.

## Distribution of Lengths of Stay of Patients as of December 31, 2023, FO

This plot displays the distribution of lengths of stay for patients in forensic care using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 3.5 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

## Distribution of Lengths of Stay of Patients as of December 31, 2023, PS

This plot displays the distribution of lengths of stay for patients in psychiatric care using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 20.9 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

## Distribution of Lengths of Stay of Patients as of December 31, 2023, LT

This plot displays the distribution of lengths of stay for patients in long term care using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 17.9 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

## Distribution of Lengths of Stay of Patients as of December 31, 2023, SRTP

This plot displays the distribution of lengths of stay for patients in the sexual responsibility and treatment program using a boxplot. The lower and upper ends of the box represent the first and third quartiles, respectively, while the line through the middle of the box represents the median (labeled). Please note that any values above 30.7 years (twice the greatest third quartile) are not displayed (this has no effect on the distribution).

## County of Origin for New Patients

This section breaks down the new patients to the state hospital system by county of origin and provides the raw counts of patients admitted from each county, and that county's total population. Additionally, these charts display the percent of all new patients that were admitted from each county, and the percent of the PA state population that resides within that county.

If a county did not commit any patients to the state hospital system during the year, then that county will not be displayed in the table. Their population will still be taken into account when calculating population proportions.

## County of Origin for New Patients for CY2023, All Levels of Care

County	Total Population	County's Proportion of State Population	Number of Patients	Percent of Total Patients Admitted

## Census by Diagnosis Type

The following tables detail the census for each state hospital, separated by level of care, for patients who have a specific category of diagnosis. Please note that patients may have multiple diagnoses and may therefore be represented on each table more than once.

### Number of Patients by Mental Health Diagnosis of December 31, 2023

Tobacco	17	50	<11	24	53	24	<b>168</b>	<11	<11	<b>&lt;11</b>	<11	<11	<b>177</b>

This table is a census of all patients diagnosed with a substance use disorder in the state hospital system taken on December 31, 2023, separated by facility, level of care, and substance.

## Appendix

### Glossary of Terms

- Level of Care
  - PS: Psychiatric Care (Civil Units)
  - FO: Forensic Care
  - LT: Long Term Care
  - SRTP: Sexual Responsibility and Treatment Program (Act-21)
- State Hospital Abbreviations/Facility Codes
  - CLA: Clarks Summit State Hospital
  - DAN: Danville State Hospital
  - NOR: Norristown State Hospital
  - SOU: South Mountain Restoration Center
  - TOR: Torrance State Hospital
  - WAR: Warren State Hospital
  - WER: Wernersville State Hospital
- Calendar Year
  - CY: Calendar Year

### Data Sets

- Patient Tracking System (PTS)
  - These data are extracted from the State Facility Tracking System and provided to us by the PA Dept. of Human Services. The extraction date of the data for this report is Feb 20th, 2024.
  - Pennsylvania Department of Human Services, State Facility Tracking System. (2024). *Patient Tracking System* [XLSX file] Harrisburg, PA.
  - The variables used in this data set are listed below with their definitions.
- Pennsylvania County Population Data
  - These data are pulled from the U.S. Census Bureau’s American Community Survey or Pennsylvania Demographics.
  - United States Census Bureau, Population Division. (June 2022). *U.S. Census Bureau, American Community Survey 1-Year Estimates* [CSV file].
  - Pennsylvania Counties by Population Retrieved from [https://www.pennsylvania-demographics.com/counties\\_by\\_population](https://www.pennsylvania-demographics.com/counties_by_population)
  - This data set provides population estimates for CY 2022.

## Methodology

- Null/Missing County Data
  - 0% of the records in the PTS data set contain missing county data.
  - Within the PTS data set, the Base Service Unit (BSU) is also recorded. The BSU is defined as “...an organizational unit consisting of multidisciplinary professional and nonprofessional staff capable of planning, directing and coordinating appropriate services for individuals with an intellectual disability and in need of service from the county program” (055 PA Code § 6201.12).
  - For each record with missing county data, the county corresponding to that patient’s BSU of record will be used instead. This leaves only 0% of the records with missing county data.
- Population Estimates
  - The U.S. Census Bureau tends to release new population estimates each June for the previous year. Therefore, all calculations in this report that require population counts will be conducted using population counts from the previous year.
  - Populations for each area tend to have little variation in the span of a single year, so the estimates from the previous year will be considered an analogous and valid alternative.
- County of Origin for New Patients
  - It should be noted that patients listed as “Out of State” will have zero percent of the state population.
