

DID YOU KNOW?

Scams are a billion-dollar business! Veterans and older adults are targeted for scams. Families and loved ones need to remain aware, vigilant, and involved. Don't give out personal information to anyone without a second opinion.

LOOK OUT FOR YOUR FELLOW VETERANS

Veterans are independent and hard-working, which is why they are targeted for scams! Reach out to make sure they are not receiving suspicious communication, or being asked for their personal or banking information unless it is from a reputable source.

DON'T BE FOOLED!

Veterans and older adults are specifically targeted! Romance scams, stolen identity scams, computer virus scams, and "grandparent" scams are just a few ways thieves take advantage of our older friends and relatives. Always check with a trusted friend or resource before believing something you read!

DON'T BE A VICTIM

Safeguard your personal information and don't provide it to anyone unless it is to a reputable source for a specific reason. Scammers creatively con trusting people into sharing valuable information, so don't let them fool you or a loved one.
