

## **TREATING TRAUMA IN SCHOOLS: Foundations and Practical Applications for Professional Practice**

**FREE** asynchronous courses for school-based mental health professionals!

### **Course 1:** **Foundations: Trauma and its Impact on Teaching and Learning**

#### **The Foundations Course:**

- Equips school-based mental health clinicians and student support staff with foundational skills and practical knowledge to treat students affected by trauma
- Promotes comprehensive school mental health systems that are trauma-informed, healing-centered, and firmly grounded in culturally responsive, anti-racist, and equitable principles and practices
- Draws on the expertise of leaders in the research and practice of school-based mental health and trauma treatment

*You can earn 8 Social Work or Counseling Continuing Education Credits for course completion*

### **Course 2:** **Practical Applications: Providing Evidence-Based Treatments in Schools and Trauma Informed Care for Special Populations**

#### **The Practical Applications Course:**

- Presents evidence-based treatments for trauma in schools
- Equips school-based mental health clinicians and student support staff with best practices for treating special populations
- Each session is taught by a different subject matter expert

*You can earn 1-1.5 Social Work or Counseling Continuing Education Credits for course completion of each session (up to 12 possible credits if all 11 sessions are completed)*
