The National Center for Safe Supportive Schools (NCS3) is a Category II Center of **The National Child Traumatic Stress Network**. NCS3 provides states, districts, and schools with the knowledge and tools to implement culturally responsive, trauma-informed policies and practices that promote equity and well-being. NCS3 is a collaboration between the **National Center for School Mental Health at the University of Maryland School of Medicine**, the **Center for Childhood Resilience at the Lurie Children's Hospital of Chicago**, and the **Center for Trauma Care in Schools at the Alliance for Inclusion and Prevention in Boston**.
