DEPARTMENT OF HEALTH

Palmerton

Saturday, October 5, 2024

10 AM - 2 PM

Palmerton Library

402 Delaware Ave

Palmerton, PA

Are you interested in knowing the condition of your soil? Do you garden or grow crops? Do children spend time in your yard? Are you concerned about soil exposures?

Join the Pennsylvania Department of Health at the Palmerton Library for a free community soil lead screening! Bring a dry soil sample in a freezer bag and we will screen it for lead! Instructions on back.

What to expect?

- Your soil screening result
- Best practices to avoid lead exposure
- Tips to garden safely
- Blood lead testing resources

Why should I get my soil tested?

- Soil testing is the first step to reduce your or your child's risk of inhalation or ingestion exposure to lead during gardening or outdoor activities
- Soil that is near an industry that emits lead, next to older homes and under roof drip lines, and/or in urban areas or near highways can have high levels of lead

SOIL COLLECTION INSTRUCTIONS

How-to video:

<https://youtu.be/GM7-19oSfD8>

- **Step 1:** Identify an area of interest for your soil sample.
- **Step 2:** Collect Soil - For a large area, collect soil from 5-10 random spots in that area, and combine in a clean container. For a small area, collect soil from 3 random spots and combine in a clean container.
- **Step 3:** Mix soil well in clean container.
- **Step 4:** Remove pebbles, rocks, and roots, and air dry.
Do not use a flame, oven, or hairdryer to dry the soil!
- **Step 5:** Transfer 1-2 cups of the mixed soil into a clean one-quart Ziplock bag and label.

LIMIT 3 BAGS PER PERSON

How deep do I collect my soil?

- For Garden samples, collect soil at the surface and down to 6-8 inches deep.
- For Play Areas/Non-Garden areas, collect soil at the surface and down to 1-2 inches deep.
