

# CANDIDA AURIS: WHAT EVS STAFF NEED TO KNOW

## Hand Hygiene

Alcohol-based hand sanitizer or soap and water are both effective against *C. auris*. Change your gloves frequently.

## Thorough Cleaning

Cleaning patient rooms and shared equipment is essential. Disinfectants should stay wet for the entire contact time.

## List P

EPA-approved products approved for *C. auris* are on List P. If these are not accessible, List K products are recommended.
