PENNSYLVANIA HAI SUMMIT

Healthcare-associated
Infections and
Antimicrobial Resistance

May 12-13, 2026

Strengthening Core Principles and Exploring New Innovations in
Infection Prevention and Control

Presenting the latest data and scientific advances in the field, including:

- ♦ Whole genome sequencing and its utility in outbreak response
- ♦ Multisociety guidance on sterilization and high-level disinfection
- ♦ Building an infection prevention program for behavioral health
- ♦ Infection prevention and its role in managing a measles outbreak
- ♦ Antimicrobial stewardship activities in Pennsylvania
- ♦ Regional carbapenemase-producing organism epidemiology
- ♦ *Candida auris*—using data for action

Continuing education credits will be provided!
