Re: Highmark Inc. 2022 ACA Rate Filing (Individual Market)
Filing # 1A-DP-21-HI (SERFF # HGHM-132820364)

This constitutes Notice pursuant to Section 707 of the Pennsylvania Right-to-Know Law that the attached Highmark Inc. 2022 Individual Market Rates Filing contains Trade Secret and Confidential Proprietary Information. Therefore, Highmark Inc. must, prior to the release of any portion of this Filing, be notified of any request by a third party for access to this Filing, and the Trade Secret and/or Confidential Proprietary Information identified by Highmark Inc. should be redacted before release.

Dear Ms. Gray:

This Filing includes the Highmark Inc. (“Highmark”, “Company”) Individual Market rates and the supporting rate development for policies with effective dates on or after January 1, 2022.

As a result of the Department’s review of this filing thus far, the following changes have been made to the prior version of the filing:

- Pursuant to the Department’s September 14, 2021 guidance, the impact of the state 1332 Reinsurance program is captured using the prescribed parameters of \$60,000 attachment point, 64% coinsurance rate, and \$100,000 reinsurance cap.

The remainder of this cover letter and all of the supporting documents have been revised to reflect the changes described above.

In the event the Department decides to publish this Filing in the PA Bulletin, the company information requested in the Department’s 2022 ACA-Compliant Health Insurance Rate Filing Guidance, Section B, is provided below:

Requested Company Information

1. Company Name & NAIC #: **Highmark Inc., NAIC # 54771**
2. Market: **Individual**
3. On or Off Exchange: **The Company anticipates selling plans on and off the exchange.**
4. Effective date of coverage: **January 1, 2022**
5. Average rate change requested: **1.8% decrease**
6. Range of rate change requested: **(18.5%) to 15.2%**
7. Total additional annual revenue generated from the proposed rate change: **(\$5,850,582)**
8. Product(s): **EPO, PPO**
9. Rating Areas and the change from 2020: **Rating Areas 1, 2, 4, 5, 6, 7, 9**

There are no changes in the covered Rating Areas from the 2021 rate filing.

10. Metal Levels and Catastrophic Plans: This filing reflects that the Company anticipates selling the following Metal Levels in the indicated Market: **Gold, Silver, Bronze, and Catastrophic**

11. Current number of covered lives as of February 1, 2021: **35,091**

12. Number of plans offered in 2022 and the change this represents from 2021: **84**

The Company offered 74 plans in 2021. For 2022, the Company is offering 48 new plans in the Market and removing 38 plans from the Market.

Please note that inclusion of premium rates in this filing for a given offering should not be construed to mean that the offering will ultimately be made available for sale in the Market. Final offering decisions will be made consistent with and within the timelines set forth in CMS rules and/or ACA regulations.

13. Corresponding contract form #, SERFF and Binder ID#s: **The corresponding SERFF binder number is HGHM-PA22-125107730, affecting the following Company products and forms:**

Product Name / Type	Contract Form & SERFF#
my Direct Blue EPO	EPO/WDP-4; HGHM-132793452

14. HIOS Issuer ID # and submission tracking number: **HIOS Issuer ID #33709, Company Filing #1A-DP-21-HI (SERFF Filing # HGHM-132820364)**

Additional Filing Disclosures

The Company has submitted all Required Documents stipulated by the Department, including the federal documents related to this filing, in its SERFF submission. In addition to the Required Documents, the Company has submitted a Supplemental Exhibits file containing additional detailed exhibits on items referenced in the PA Actuarial Memorandum. All tables, exhibits, and detail in support of this filing and the PA Actuarial Memorandum have been included in Excel format. To assist in the Department's review, the Excel files have retained their formulas to the extent possible.

Potential for Material Unforeseen Impacts

Per the Department's guidance, the impact of the state 1332 Reinsurance program is captured using the prescribed parameters. If the final parameters should change from those described in this filing, a revised submission would be required.

This rate filing also includes a COVID-19 adjustment and the impact of the American Rescue Plan Act (ARPA) was considered in the rate development and no adjustment was included at this time. This is due to several unknown factors such as competitor entry into market, morbidity of uninsured enrollment, pent-up demand for new entrants, and any potential group conversion to individual.

Other assumptions in the filing account for the elimination of the Individual Mandate penalty and the lack of CSR funding in 2022 by using the factors prescribed in the Department's guidance. Additional assumptions include that advance payment of premium tax credits (APTCs) will continue until the end of 2022, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and that there are no significant changes in the participation of QHP issuers that would materially change risk adjustment transfer amounts. Finally, modifications to the rate development may be necessary if significant unforeseen events occur. Examples include, but are not limited to, repeal or invalidation of the ACA or material developments in the course of the COVID-19 pandemic. As a result, Highmark reserves the right to submit a revised filing.

Request for Confidentiality

Please note that the rates and the supporting rate development contained in this Filing are competitively sensitive, are not in the public domain, and constitute business confidential proprietary/trade secret information that would cause harm to the competitive position of Highmark if disclosed to the public.

Public disclosure of any information contained in this Filing would allow Highmark competitors to better understand or discover its confidential and proprietary rating, pricing and/or marketing practices, would undermine competition in the Individual market and could have negative consequences for the operation of Highmark's business. Therefore, Highmark asserts that this

Filing, in its entirety, constitutes Trade Secret and Confidential Proprietary Information and should not be disclosed.

It is our understanding that the Department does not intend to publish the confidential & proprietary information contained in this Filing or to otherwise permit this Filing and its confidential information, other than the redacted information and final approved rates, to be disclosed or released.

Furthermore and pursuant to the Pennsylvania Right-to-Know Law ("RTKL"), Highmark must be notified prior to release of information contained in this Filing and be given the opportunity to respond to requests for such information. Should the Department receive such request or require the release of information contained in this Filing for its own purposes, Highmark asserts its right to release a redacted version of the Filing. In accordance with the RTKL, please contact the Highmark RTKL representative identified below prior to release of any information contained in this Filing:

[REDACTED]
RTKL Representative
Director Privacy & Data Ethics
Highmark Health
120 Fifth Avenue, Suite 2114
Pittsburgh, PA 15222

Furthermore, it should be noted that Highmark is equally concerned that even if this information is released in aggregate form, it still may be easy to identify the carrier that submitted it.

Should you have any questions regarding the attached Filing, please feel free to contact me at [REDACTED] or via e-mail at: [REDACTED]

Sincerely,

[REDACTED]

[REDACTED]
Vice President, Actuarial Services
Highmark Inc.

Rate Change Summary

Highmark Inc. – Individual Plans

Rate request filing ID # 1A-DP-21-HI HGHM-132820364 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at

<https://www.insurance.pa.gov/Consumers/Pages/ACA-Rate-Filings.aspx>

Overview

Initial requested average rate change:	0.3%
Revised requested average rate change:	-1.8% ¹
Range of requested rate change:	-18.5% to 15.2%
Effective date:	January 1, 2022
People impacted:	35,091
Available in:	Rating Areas 1, 2, 4, 5, 6, 7, and 9

Key information

Jan. 2020-Dec. 2020 financial experience

Premiums	\$226,033,994
Claims	\$168,416,955
Administrative expenses	\$19,607,291
Taxes & fees	\$6,991,240
Company made (after taxes)	\$31,018,508

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2022:

Claims:	89%
Administrative:	8%
Taxes & fees:	3%
Profit:	0%

The company expects its annual medical costs to increase **7.2%**.

Explanation of requested rate change

The proposed average rate change is being driven by changes in the base claims experience, trend, retention, and the ongoing anticipated impact of Covid-19.

¹ Rates revised to correct any inadvertent errors and/or Department recommended changes.

Actuarial Memorandum

1. Basic Information and Data

A. Company Information

The appropriate company information has been provided in Table 0. General information pertaining to this rate filing is summarized below:

- Company Name: Highmark Inc. (“Highmark”, “Company”)
- NAIC #: 54771
- HIOS Issuer ID: 33709
- State: Pennsylvania
- Market: Individual
- Effective Date: 1/1/2022
- SERFF Rate Filing #: HGHM-132820364

In accordance with the Department’s September 14, 2021 guidance, the impact of the state 1332 Reinsurance program is captured using the prescribed parameters of \$60,000 attachment point, 64% coinsurance rate, and \$100,000 reinsurance cap. If the final parameters should change from those described in this filing, a revised submission would be required.

This rate filing also includes a COVID-19 adjustment and the impact of the American Rescue Plan Act (ARPA) was considered in the rate development and no adjustment was included at this time. This is due to several unknown factors such as competitor entry into market, morbidity of uninsured enrollment, pent-up demand for new entrants, and any potential group conversion to individual.

Other assumptions in the filing account for the elimination of the Individual Mandate penalty and the lack of CSR funding in 2022 by using the factors prescribed in the Department’s guidance. Additional assumptions include that advance payment of premium tax credits (APTCs) will continue until the end of 2022, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and that there are no significant changes in the participation of QHP issuers that would materially change risk adjustment transfer amounts. Finally, modifications to the rate development may be necessary if significant unforeseen events occur. Examples include, but are not limited to, repeal or invalidation of the ACA or material developments in the course of the COVID-19 pandemic. As a result, Highmark reserves the right to submit a revised filing.

B. Rate History and Proposed Variations in Rate Changes

The three most recent rate changes in Pennsylvania for Highmark are as follows:

Year	Avg. Increase	SERFF ID#
2021	-0.7%	HGHM-132324142
2020	-1.2%	HGHM-131904489
2019	6.3%	HGHM-131475700

Historical rate changes varied by plan due to updated cost sharing levels to meet federal AV requirements as well as updates to AV and other pricing factors.

The proposed 2022 rate changes vary by plan. This is primarily due to updates in the pricing AV factors and benefit richness factors. The plan level rate changes can be found in Table 10.

As requested by the Department, a historical MLR Exhibit is included as Attachment H. MLR results reflect any amounts attributed to the applicable benefit year. As an example, Risk Adjustment paid in mid-2018 for the 2017 benefit year is attributed to the 2017 benefit year.

C. Average Rate Change

The average rate changes as presented in the filing are:

- Table 10: -1.8%
- Table 11: -1.8%

Table 10 calculates the percentage change in the member weighted average rate for 2021 and the member weighted average rate for 2022. Table 11 calculates the percentage increase for each plan and then member weights the percentage increases.

Worksheet 2 of the URRT also shows a submission level rate change. This value is used in the development of the average rate change shown in the Federal Part II justification. A demonstration of this calculation is included in Attachment F.

D. Membership Count

Please see Table 1 for the average age, age breakdown, and total membership for the periods shown.

E. Benefit/Cost Sharing Changes

The majority of Highmark's renewing 2022 plans contain cost sharing that differs from the 2021 offering.

The screenshots from the HHS AV calculator, showing the plan benefits and the resulting actuarial values, can be found as a separate attachment within the *Supporting Documentation* section in SERFF. Also, the PA Plan Design Summary and Rate Tables along with the HIOS Plan IDs can be found within the *Rate/Rule Schedule* section in SERFF.

F. Experience Period Claims and Premium

Please see Table 2 for the experience period data for the most recent calendar year. The experience period paid claims data represents the 2020 calendar year results for all policies in the single risk pool, with run out through February 2021. This data is consistent with the data reported in Section I of Worksheet I of the URRT.

Table 2 is populated with the experience period data as follows:

- The Earned Premium represents actual revenues earned in the experience period.

- Incurred Claims represent claims paid by Highmark. Note that the URRT includes capitated services and is net of Rx Rebates. Those values are not included here as they are listed as separate items.
- The Allowed Claims represent our best estimate of the total claims prior to member cost sharing incurred during the experience period. The Allowed Claims include:
 - Two months of run out from the end of the experience period,
 - Claims processed outside of the Company's claims system (e.g., claim settlement costs), and
 - Our best estimate of claims incurred but not paid as of the end of the run out period.
 Note that allowed claims in the URRT include capitation and are net of drug rebates. They are not included here as they are called out separately in the exhibit.
- Allowed Charges for non EHB services are included in column G. The amount of non EHB included is shown in column H.
- Prescription Drug Rebates are used to reduce the level of Incurred Claims in the experience period.
- Total EHB capitation includes \$0.20 PMPM for the pediatric vision benefit.
- Estimated Risk Adjustment includes the transfer dollars and an estimate for the High Cost Risk Pool for the experience period. The Risk Adjustment transfer portion of the total is consistent with the results of the Department's RATEE analysis using the files dated May 3, 2021.

G. Credibility of Data

The experience period data for Highmark is large enough to be fully credible. The results are based 100% on the experience period data.

H. Trend Identification

Table 3 identifies the annual medical and prescription drug allowed claims cost and utilization trends. The underlying total annual trend is 7.00%. Additionally, there is an induced utilization adjustment of 0.21% per year applied to reach the overall trend of 7.22% shown in Table 3 column G. The definitions of service categories, cost, and utilization in Table 3 are consistent with the URRT instructions. The numbers entered in the Cost and Utilization columns are consistent with those entered in Worksheet I, Section 2 of the URRT, except as noted below.

The cost trends presented in Table 3 reflect the Company's expectations regarding increases in in-network contractual reimbursement, as well as projected out-of-network costs. The significant changes observed in the volume, demographics and morbidity of the ACA population from 2017 to 2020 yield component trends that are generally not directly applicable for trend analysis. The trend components in Table 3 therefore represent the same blended average for all types of service and are applied to the aggregate experience for pricing.

A multi-year regression analysis was developed by the Company's valuation team to analyze the ACA individual population trend levels. The analysis was completed at the medical and pharmacy level, then combined to develop a total trend assumption. The regression tool removes components of trend that are more explainable from the observed trend rates and then uses regression analysis to isolate the

underlying trend rate. Some of the more explainable variables include high dollar claims, workdays, provider contracting, demographics, and seasonality. The total trend is the sum of the explainable components and the estimated underlying trend rate. The valuation regression tool primarily informed the trend selection with the final requested trend also based on actuarial judgment.

I. Historical Experience

Table 4 presents the most recent 48 months (4 calendar years) of Highmark data with run-out through February 2021. This data was not used to develop the trend in Table 3. Please see Section H for further details.

2. Rate Development & Change

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

The development of the Projected Index Rate, Projected Market-Adjusted Index Rate, and Projected Total Allowed Claims, shown in Table 5, closely follows the methodologies discussed in the Part III Actuarial Memorandum submitted in the Rate Filing Justification. Please refer to the Part III Memorandum for further details.

Some of the items separately identified in Table 5 include:

- The Change in Morbidity adjustment of 1.240 is comprised of the following: the morbidity impact from claims experience, a state mandated morbidity adjustment for the Reinsurance program, the impact of health insurance coverage mandate elimination, and Covid-19 impact. Each of the components is described in more detail below.

The Morbidity Impact from Claims Experience

This adjustment reflects the change in the population mix/claim levels from the experience period to the projection period. We continue to observe a high degree of membership churn from year-to-year, which impacts the morbidity. This factor also takes into consideration the effects of adverse selection inherent to guaranteed issue markets. The Individual ACA risk pool continues to have a significantly higher proportion of older members with a high prevalence of chronic conditions compared to group business, which adds to the uncertainty of any future claim projections.

State Mandated Morbidity Adjustment for the Reinsurance Program

In accordance with the Department's guidance, there is an adjustment of -0.1% to reflect the impact of morbidity improvement due to the Reinsurance program.

Impact of Health Insurance Coverage Mandate Elimination

In accordance with the Department's guidance, the morbidity factor was increased by 1.0% to reflect the market uncertainty from the elimination of the health insurance coverage mandate.

Covid-19 Impact

In order to account for the impact of COVID-19 on projected claim costs, the Company took the following steps:

1. Adjusted the claims in the base experience period to a non-COVID-19 baseline environment. This was done to provide a more stable base from which to project future claims. Claims in the base experience period were increased by 5.3%, representing the expected degree of claims suppression experienced.
2. Projected claims to the projection period using trends with the impact of COVID-19 excluded. Again, this provides for a more stable projection of future claims, before applying the anticipated impact of COVID-19 in the projection period. This was accomplished by applying a trend of 7.0% (which excludes any impact from COVID-19) to our adjusted BEP claims.
3. The projected claims were then further adjusted by applying the anticipated impacts of COVID costs expected in the projection period. There are four components of this adjustment determined by the Company:
 - a. Treatment costs (\$0.11 PMPM) – COVID treatment utilization in 2022 are expected to follow a similar utilization pattern as flu treatment from 2018 and 2019, with COVID specific admission costs based on recent admission costs for COVID.
 - b. COVID Testing (\$0.41 PMPM for Western PA & \$0.32 PMPM for Central PA) – COVID testing utilization in 2022 are expected to follow a similar utilization pattern as flu testing from 2018 and 2019, with COVID specific testing costs based on recent testing costs for COVID.
 - c. COVID Vaccine (\$2.05 PMPM) – The Company is assuming that 43% of the population will be receiving vaccine boosters at a frequency of once every two years. This impact represents the expected cost that the Company will incur.
 - d. Additional morbidity (0.50% claims impact) – Due to insureds missing preventative care (maintenance care and testing services) and quarantine rules leading to a more sedentary lifestyle, the Company expects a general trend towards worsening member morbidity.

The application of the above COVID claim adjustments to the rating period results in a COVID adjustment factor of 1.061. Please see Attachment G for a more detailed calculation of the of these factors.

- The Change in Demographics adjustment of 1.004 reflects the change in age and geography factors we expect from the experience period to the projection period.

- There is a Change in Network adjustment of 0.970.
- There is no Change in Benefits adjustment.
- The Change in Other adjustment of 1.011 reflects changes in pharmacy rebates and expected changes in hospital/physician settlements.

Please see Attachments A and E for a more detailed calculation of these factors. These factors can also be found in the accompanying spreadsheet.

The projected paid-to-allowed ratio is 0.860. The formula found in Table 5 cell C28 was overwritten because, unlike the average factors found in Table 10 cells K15 and K16, the Company's paid-to-allowed factor is weighted on projected allowed charges and is also dampened by items such as capitation.

The quantitative development of the projected risk adjustment transfer amount for the Company is shown in Attachment B and included in the accompanying spreadsheet. The transfer amount is developed based on an analysis of the claims data underlying the manual rate development for this filing (risk scores as defined in the HHS Notice of Benefit and Payment Parameters, as well as other risk transfer formula components) and an estimate as to the market-wide risk profile. This market-wide risk profile is developed from available market data, including prior years' risk adjustment transfer results, publicly available data (such as MLR reports), and outside expertise from actuarial consultants. Applying the federally prescribed transfer formula at the level of granularity available in Attachment B yields a projected gross risk adjustment transfer of \$43.91 PMPM on a *billable* member month basis. This amount is then converted to a *total* member month basis of \$43.81 PMPM in order to be used in the rate development. The expected risk adjustment receivable reflects that the Company anticipates its average risk score (net of allowable rating factors) to be higher than the statewide average.

The \$41.48 PMPM value in cell C31 of Table 5 equals the \$43.81 PMPM value from Attachment B, a charge of (\$2.01) PMPM for the projected net impact of the High Cost Risk Pool program, and a further adjustment for the composite effect of catastrophic eligibility and benefits in addition to EHB. Please note that the risk adjustment user fee is captured in the taxes and fees portion of administrative costs.

The exchange user fee in cell C32 of Table 5 is developed by taking the required user fee percentage of 3.0% and multiplying by the percentage of total members expected to be on exchange of 88%. This results in a percentage of 2.6%. The PMPM of \$17.55 is calculated as 2.6% of the total required premium adjusted further for the composite effect of catastrophic eligibility and benefits in addition to EHB.

The projected incurred reinsurance recoveries of \$46.31 PMPM is found in cell C33 of Table 5. The reinsurance recoveries PMPM was developed by trending Highmark PA individual ACA CY2019 incurred claims by member to the CY2022 rating period, applying the parameters defined in Tab II.b, and calculating the amount of incurred claims expected to be reimbursed by the program. Highmark PA individual ACA business was considered due to its level of credibility. The modeling produced an estimated incurred claims savings of 6.8%. This percentage was converted to a PMPM and adjusted further for the composite effect of catastrophic eligibility and benefits in addition to EHB. The formula found in Table 5 cell C33 was overwritten to round the estimate calculated in Tab II.b to exactly 6.80%.

The Company intends to offer several plans that include benefits in addition to EHB. Thirty plans have an adult dental and vision benefit, and twelve plans have a hearing and personal assistance (i.e. Papa Pals) benefit. The Company relied on cost estimates from other departments for the following non-EHB benefits:

- **Adult dental benefit** – United Concordia Dental (UCD) estimated this benefit to be worth \$33.88 PMPM for Western PA plans and \$32.09 PMPM for Central PA plans on a paid basis
- **Adult vision benefit** – Davis Vision estimated this benefit to be worth \$2.18 PMPM on a paid basis.
- **Hearing benefit** – TruHearing estimated this benefit to be worth \$0.03 PMPM on a paid basis.
- **Personal assistance (i.e. Papa Pals) benefit** – Papa (the external vendor) estimated this benefit to be worth \$2.65 PMPM on a paid basis.

B. Retention Items

Table 6 has been completed with the requested retention elements for the proposed rates for the rating period. The amounts presented separately sum to the total administrative expenses and taxes and fees presented in the rate development.

Administrative costs reflect internal costs that the Company is projected to incur in the rating period and are developed from standard expense allocation methods. Administrative expenses do not vary by plan.

The proposed rate development assumes an average broker commission of \$3.75 PMPM for 2022. The assumed broker commission schedule and the development of the average value are included in Attachment D.

Expenses for Quality Improvement initiatives are assumed to be 0.30%.

The following is a summary of the Taxes & Fees included in the rate development:

- Pennsylvania Premium Tax is not applicable to this issuer and thus is set to 0.0%.
- Federal Income Tax is set to 0.0%.
- Health Insurance Provider Fee is set to 0.0%.
- Risk Adjustment User Fee is set to \$0.25 PMPM consistent with Federal regulations.
- Patient-Centered Outcomes Research Institute (PCORI) fee is set to \$0.24 PMPM.

The Profit/Contingency for all plans is set to 0%.

C. Normalized Market-Adjusted Projected Allowed Total Claims

The normalization factors presented in Table 7 are each determined from the underlying membership demographics expected in the projected rating period. The 2021 values are pulled from the prior year's filing, while the 2022 values represent our projection for 2022 assumed in the 2022 rate development.

D. Components of Rate Change

Table 8 presents the components of change in the proposed 2022 Calibrated Plan Adjusted Index Rate (PMPM). Cell C73 is populated with the base period allowed charges found in the 2021 plan year rate filing (\$631.91).

Table 9 presents the data elements supporting the calculations in Table 8. The 2021 values are populated using the 2021 filed factors adjusted for the membership mix as of February 1, 2021.

3. Plan Rate Development

Table 10 shows the plan rate development for 2022. This table shows the plans that Highmark intends to offer in 2022, as well as all plans offered in the 2021 portfolio. The calibrated plan adjusted index rates for 2021 are calculated according to the instructions. The 2022 rating factors are consistent with the factors found on Worksheet 2 of the URRT. The pricing effect on Table 10 is further broken out into Pricing AV, Benefit Richness, and Non-Funding of CSR Adjustment. Similar to the URRT, the admin effect on Table 10 is broken out into Admin Costs, Taxes and Fees, and Profit or Contingency.

The benefit richness factors in column L are populated with the factors found in Attachment C and the corresponding supporting spreadsheet included with this rate filing. The derivation of the AV and Cost Sharing factors can also be found in Attachment C. The values in column 8 of the attachment represent the pure induced utilization for each plan. The Company's induced utilization factors are based on the following state-defined formula: $(\text{Plan AV})^2 - (\text{Plan AV}) + 1.24$. The "Plan AV" is the product of the "Pricing AV" and "Non-Funding of CSR Adjustment." Each plan's factor was then normalized by the average utilization factor. The average is a weighted average using projected membership as the weight. After normalization the average factor as shown in attachment C is 1.000.

Note that the HHS Actuarial Value Calculator was unable to accommodate all of the Company's benefit designs. Plans needing certification are marked in column I of Table 10. Screen shots of all of the AV calculations and the appropriate certifications can be found as a separate attachment within the *Supporting Documentation* section in SERFF.

For discontinuing plans where members are being mapped into a new plan, an effective rate increase is calculated by comparing the 2021 rate of the discontinuing plan to the 2022 rate of the plan to which the member is being mapped.

Columns AG through AP are populated with the February 1, 2021 enrollment by 2022 plan and rating area.

Impact of Non-Payment of Cost Sharing Reduction Subsidies

In accordance with the Department's guidance, we have applied an additional adjustment to our AV pricing values for those Silver plans not offered exclusively off-exchange. This adjustment factor was 1.22 and represents the non-payment of Cost Sharing Reduction subsidies. Consistent with the Department's guidance, this adjustment was reflected in Table 10 in Column P.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 presents the Company's 21-year-old non-tobacco premium in the Individual Market. As mentioned in Section 1.C above, the change in 21-year-old non-tobacco premium PMPM calculated in this table is -1.8%.

5. Plan Factors

A. Age and Tobacco Factors

Please see Table 12 for Highmark's age and tobacco factors.

B. Geographic Factors

Please see Table 13 for Highmark's geographic factors. The Company's factors for the rating period are unchanged from the currently approved factors.

C. Network Factors

Please see Table 14 for a summary of the Company's network rating factors. The factors presented here represent the medical network factors from the prior approved rate filing (if applicable) and the projected medical network factors for the rating period.

The Company is splitting service area Zone C into two separate service areas (Zone AC & Zone AD). Quantitative support for the development of the proposed network factors for plans in these two new service zones can be found in Attachment I. The proposed network factors for the remaining service zones are unchanged from the factors used in the prior approved rate filing.

The Company is also transitioning the *my Blue Access* plans in the Central PA region from EPO designs to PPO designs. The anticipated additional cost of this change was assessed and deemed to be immaterial. Thus, no adjustment was made to the network factors for these plans.

D. Service Area Composition

The Plan Design Summary exhibit uploaded as a separate document contains the service areas related to this filing. As requested, service area maps are included.

6. Actuarial Certifications

I, [REDACTED], am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of Highmark to accompany its rate filing (for calendar year 2022) for the Individual Market on and off the Pennsylvania Exchange.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),

- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.

I certify that all factors, benefit and other changes from the prior approved filing have been disclosed in the 2022 PA Actuarial Memorandum Rate Exhibits.

I certify that new plans are not considered modifications of existing plans (per the uniform modification standards in 45 CFR 147.106).

I certify that the AV Metal Values included in Table 10 were based entirely on the Federal AV Calculator or one of the approved alternative approaches.

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

I certify that the information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2022 Rate Filing Justification.

Rate Effective Date:	01/01/2022

Table 5. Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

Development of the Projected Index Rate	Actual Experience Data	Manual Data	
Total Allowed EHB Claims + EHB Capitation PMPM (net of prescription drug rebates) PMPM	\$ 564.48	\$ -	<- Actual Experience PMPM should be consistent with the Index Rate for Experie
Two year trend projection Factor	1.150	1.000	
Unadjusted Projected Allowed EHB Claims PMPM	\$ 648.92	\$ -	
Single Risk Pool Adjustment Factors			
Change in Morbidity - Impact of Reinsurance Program	0.999	0.999	
Change in Morbidity - All Other	1.241		<- See URRT Instructions
Total Non-Morbidity Changes	0.984	0.000	
Change in Demographics	1.004		<- See URRT Instructions
Change in Network	0.970		
Change in Benefits	1.000		<- See URRT Instructions
Change in Other	1.011		<- See URRT Instructions
Total Adjusted Projected Allowed EHB Claims PMPM	\$ 791.84	\$ -	
Credibility Factors	100%	0%	<- See Instructions
Blended Projected EHB Claims PMPM		\$ 791.84	<- Projected Index Rate
Development of the Market-Adjusted Index Rate and Total Allowed Claims			
Adjusted Projected Allowed EHB Claims PMPM	\$ 791.84		<- Index Rate for Projection Period on URRT
Projected Paid to Allowed Ratio	0.860		
Projected Incurred EHB Claims PMPM	\$ 681.07		
Market-wide Adjustments			
Projected Incurred Risk Adjustment PMPM	\$41.48		
Projected Incurred Exchange User Fees PMPM	\$17.55		
Projected Incurred Reinsurance Recoveries PMPM	\$46.31		
Market-Adjusted Projected Incurred EHB Claims PMPM	\$ 610.82		
Market-Adjusted Projected Allowed EHB Claims PMPM	\$ 710.16		<- Market-Adjusted Index Rate
Projected Allowed Non-EHB Claims PMPM	\$ 6.12		
Market-Adjusted Projected Incurred Total Claims PMPM	\$ 616.08		
Market-Adjusted Projected Allowed Total Claims PMPM	\$ 716.28		

Table 6. Retention

Retention Items - Express in percentages	Percentages	PMPM Amounts
Administrative Expenses	8.02%	\$53.74
General and Claims	7.16%	\$47.98
Agent/Broker Fees and Commissions	0.56%	\$3.75
Quality Improvement Initiatives	0.30%	\$2.01
Taxes and Fees	0.07%	\$0.49
Risk Adjustment User Fee	0.04%	\$0.25
PCORI Fee	0.04%	\$0.24
PA Premium & Other Taxes (if applicable)	0.00%	\$0.00
Federal Income Tax	0.00%	\$0.00
Health Insurance Providers Fee (Prorated for Small Groups only)	0.00%	\$0.00
Profit/Contingency (after tax)	0.00%	\$0.00
Total Retention	8.09%	\$54.24
Projected Required Revenue PMPM	\$ 670.31	

Table 8. Components of Rate Change

Rate Components	2021	2022	Difference	Percent Change
A. Calibrated Plan Adjusted Index Rate (PMPM)	\$ 348.62	\$ 342.42	\$ (6.20)	-1.8%
B. Base period allowed claims before normalization	\$ 631.91	\$ 564.48	\$ (67.43)	-19.3%
C. Normalization factor component of change	\$ (331.41)	\$ (300.10)	\$ 31.32	9.0%
D. Change in Normalized Allowed Claims Adjustment Components

Re: Highmark Inc. 2022 ACA Rate Filing (Individual Market)
Highmark Filing # 1A-DP-21-HI (SERFF Filing # HGHM-132820364)

Dear Mr. Lavery:

Enclosed are responses to your June 10, 2021 questions regarding SERFF Filing # HGHM-132820364. We have included your questions along with our responses for your convenience.

Should you have any further questions regarding this Filing, please feel free to contact me at [REDACTED] or via e-mail at: [REDACTED]

Sincerely,

[REDACTED]
[REDACTED]
[REDACTED]

Highmark Inc.

1. The following questions relate to the trend assumption:

- a. Please provide additional detail related to the population of Individual ACA members that were included in the Company's regression analysis. Specifically, did the regression analysis include all Individual ACA members who were enrolled with the Highmark's various legal entities during the time period of 2017 to 2020? Also, was the population analyzed limited to a subset of Individual ACA members enrolled through Highmark (e.g., members continuously enrolled through the time period analyzed)? Related to the latter, if not, please clarify.**
- b. Section 1H of the PA Actuarial Memorandum indicates that the regression analysis primarily informed the trend selection with the final requested trend also based on actuarial judgment. Please provide a detailed exhibit displaying the quantitative development of the trend estimates produced by the regression analysis and the results produced by the regression analysis performed, separately for medical and pharmacy services. Additionally, please explain why the particular trend assumption was chosen over another. For example, if the regression analysis suggested that the annual trend assumption should equal 6%, but the Company ultimately selected 7%, please explain how it was determined that the 7% assumption is more appropriate than 6%.**
- c. Please provide an exhibit displaying what explicit adjustments, if any, were made to the results of the regression analysis to arrive at the final proposed trend assumptions (e.g., an adjustment was applied to the results of the regression analysis to capture anticipated changes in the pharmacy formulary).**
- d. Section 1H of the PA Actuarial Memorandum states that the regression analysis was completed at the medical and pharmacy level, then combined to develop a total trend assumption. Please provide a detailed quantitative exhibit displaying how the medical and pharmacy results of the regression analysis were combined. Additionally, please provide support for the approach of assuming that the medical and pharmacy trends should be equal to one another (i.e., instead of assuming separate medical and pharmacy trends).**
- e. Please explain what adjustments, if any, were made to account for the impact of COVID-19 when developing the annual trend assumption utilized in the rate development.**
- f. Please provide a detailed quantitative exhibit displaying the development of the induced utilization assumption that is included in the trend assumptions and shown in Table 3 of the PA Rate Template file. In providing your response, please provide an exhibit displaying the development of the average induced demand factors underlying the 2020 experience and projected 2022 populations.**

Response:

- a. The ACA Individual population used in the regression analysis was based on the WPA and CPA members enrolled in each applicable month. Please see the attached exhibits labeled Q1a Response WPA and Q1a Response CPA which highlight the months used in the regression for both medical and drug. Months after February 2020 were not considered in the results due to the volatility associated with Covid-19.
- b. Please see the attached exhibit labeled Q1b Response for the development of the trend estimates produced by the regression analysis.
- c. The only adjustment made to the regression trend output was the actuarial judgment described in the exhibit labeled Q1b Response.
- d. Please see the attached exhibit labeled Q1b Response. The medical and pharmacy trends were set equal in the filing submission because the final trend developed was a total trend.

- e. The trend in the filing submission was developed excluding Covid-19. Please see the response to Question 3 below for more details on what level of Covid-19 factors were excluded.
- f. Please see the attached exhibit labeled Q1f Response for the development of the induced utilization assumption that is included in Table 3 of the PA Rate Template file.

2. The following questions relate to the morbidity adjustment:

- a. **Please provide a quantitative exhibit displaying the development of the 2020 Normalized Allowed PMPM shown in column D in Attachment A. Please demonstrate all calculations.**
- b. **Please provide support for and include a quantitative exhibit displaying the development of the assumed 2022 Member Distribution shown in Attachment A.**
- c. **Please provide a detailed quantitative exhibit displaying the development of the 2020 Normalized Allowed PMPM shown in column F in Attachment A. Please demonstrate all calculations.**

Response:

- a. Please see the attached exhibit labeled Q2a Response for the development of the 2020 normalized allowed PMPM (column D) in Attachment A.
- b. Please see the attached exhibit labeled Q2b Response for the development of the assumed 2022 member distribution shown in Attachment A. The development starts with the actual member distribution by region and population source as of the 2021 snapshot date. Based on the product/plan changes from 2021 to 2022, our internal Sales Department estimated that the WPA/CPA mix would change from 26%/74% to 36%/64%. We used this anticipated regional mix for 2022 to calculate the projected 2022 member distribution as shown in the exhibit by maintaining the same population source mix *within* each region. The assumed values that were incorporated into Attachment A reflect very minor adjustments in order to use more rounded assumptions.
- c. Please see the attached exhibit labeled Q2c Response for the development of the 2020 normalized allowed PMPMs (column F) in Attachment A. The composite PMPM is derived using the 2/1/2021 enrollment profile which is categorized into the following sources:

Renewal

- This represents our 2020 ACA members that re-enrolled in HMARK. The normalized allowed PMPM was calculated by normalizing the allowed PMPM for demographic, network, and benefit richness factors.

Other Highmark

- This represents the 2020 members from other Highmark markets such as group markets that enrolled in HMARK. The normalized PMPM was calculated by reviewing its allowed claims, adjusted for benefit differential if needed and then normalized for demographic, network, and benefit richness factors.

Prior ACA

- This represents our 2019 ACA members that lapsed in 2020 and now reenrolled in HMARK. We reviewed its 2019 ACA claims, trended to 2020, and used this as starting point to approximate the 2020 allowed claims. The normalized allowed PMPM was then calculated by normalizing the allowed PMPM for demographic, network, and benefit richness factors.

New

- This represents the catch-all category of the remaining members that enrolled in HMARK. The adjusted allowed claims PMPM for the “New” segment is set such that its normalized allowed PMPM was set equal to the “Renewal” segment.

Since the underlying claims only reflected the claims experience of the 2/1/2021 active enrollment, we added a death load adjustment to the underlying allowed PMPMs to capture the incremental claims of terminated members due to death as developed from historical experience. In conjunction with the claim adjustment, we also adjusted the risk scores as discussed further in the response to Question 6c below. These adjustments are necessary to account for the fact that the underlying claim projection is based on the active enrollment snapshot as of 2/1/2021. Absent this adjustment, the claim projection and risk scores would be artificially low because they would exclude the experience associated with members who lapse due to death each year.

3. The following questions pertain to the COVID-19 adjustment factor:

- Please provide a detailed quantitative exhibit displaying the development of the Company’s 7.6% and 8.5% adjustments to reflect the degree of claims suppression that was experienced in 2020 due to Deferred/Rescheduled/Induced Care for each of the Western and Central regions, respectively. In providing your response, for each region, please include the actual 2020 monthly claims experience that was considered, the estimated claims experience that was developed to estimate a 2020 non-COVID-19 baseline, and the detailed figures/adjustments that were utilized to develop the estimated claims experience for the 2020 non-COVID-19 baseline.**
- Please provide support for the assumption that 43% of the population will be receiving vaccine boosters once every two years, as discussed in Section 2A of the PA Actuarial Memorandum. In addition, please provide the assumed cost per person that was assumed for those receiving the vaccine booster and provide support for how that assumed cost was developed.**
- Please provide a detailed quantitative exhibit displaying the development of the 1.005 additional morbidity adjustment, as discussed in Section 2A of the PA Actuarial Memorandum. If a quantitative exhibit cannot be provided, please provide any other support (e.g., external study) that was utilized in developing the assumption.**

Response:

- Please see the attached exhibit labeled Q3a Response for the development of the Deferred/Rescheduled/Induced Care adjustments on the 2020 claims. Table 1 shows the development of the (7.6%) impact for the Western PA region, and Table 2 shows the development of the (8.5%) impact for the Central PA region. Each table starts with the actual member months and medical allowed claim PMPMs by month for 2020. Please note that the Western PA development includes experience from both the Highmark Inc. entity and the Highmark Choice Company. We then removed the impact of Deferred/Rescheduled/Induced Care by month to derive estimated 2020 PMPMs without these effects. The weighted average PMPMs with and without the impacts were compared to derive a composite annual impact to medical claims. This impact was then multiplied by the estimated medical claims as a % of total to convert it to a total impact basis.

The COVID impact of Deferred/Rescheduled/Induced Care was provided by the Company’s Actuarial Modeling & Factor Development team. Their process for estimating these factors involved the following steps:

- Normalize 2019 allowed medical claims for known factors

- Trend normalized 2019 allowed medical claims to 2020 to derive a 2020 non-COVID baseline
- Adjust 2020 actual allowed medical claims to remove the impact of COVID costs (i.e. Testing, Treatment, etc.)
- Subtract the 2020 non-COVID baseline from the 2020 actuals to estimate the Deferred/Rescheduled Care impact

Although we relied on the Actuarial Modeling & Factor Development team's inputs for this assumption, we did review the values for reasonableness. The direction and magnitude of the monthly factors seemed reasonable given the progression of the pandemic in 2020. Specifically, there was no impact in January/February, but there was a significant impact in March/April/May when healthcare providers & facilities were closing for all non-COVID related care. Then, the impact subsided over the summer & early fall before spiking again at the end of the year when COVID cases escalated.

- b. The 43% vaccine utilization assumption is based on population surveys, consulting firm publications, clinical feedback, CDC reported flu vaccination rates, and the directional relationship with emerging age 65+ COVID vaccination rates reported by the CDC. A reporting adjustment is included to convert utilization measures to Highmark's population and account for vaccines that were provided without a corresponding bill.

Please see the attached exhibit labeled Q3b Response for the development of the assumed cost per person of the vaccine. The vaccine cost is based on other vaccine costs in the CDC Vaccine Price List, federally contracted purchase prices for the COVID vaccine, CMS COVID vaccine assumptions for Medicare Advantage, clinical feedback, and public interviews with manufacturer CEOs.

- c. Please see the attached exhibit labeled Q3c Response for the development of the 0.5% morbidity adjustment. Listed below are numerous articles that indicate that population health has deteriorated during the pandemic, which will impact future cost of care. Using the references below, the Company determined specific categories of care which would be most impacted by the behavior changes brought about by the pandemic. The Company utilized prior analyses and actuarial judgement in determining the anticipated impact to claims.

4. Please provide a quantitative exhibit displaying the development of the average 2020 and 2022 network factors used in the development of the “Changes in Network” Index Rate Adjustment shown in Attachment A.

Response:

Please see the attached exhibit labeled Q4 Response for the development of the average 2020 and 2022 network factors. As demonstrated in Attachment A of the rate filing, these two factors are used to develop the “change in network” factor shown in Table 5 of the PA Rate Template file.

5. Please provide a detailed quantitative exhibit displaying the 1.011 “Change in Other” Index Rate adjustment shown in Table 5 of the PA Rate Template file. In providing your response, please break out the estimated impact due to changes in pharmacy rebates and expected changes in hospital/physician settlements separately. Additionally, please clarify what the adjustment for changes in hospital/physician settlements is intended to reflect.

Response:

Please see the attached exhibit labeled Q5 Response for the development of the “Change in Other” factor. The change in hospital/physician settlements is intended to reflect changes in non-claim system programs such as value-based reimbursement programs from the base period to the projection period.

6. The following questions relate to the risk transfer assumption:

- a. Please provide a detailed quantitative exhibit displaying the development of the Company-specific average PLRS, ARF, GCF, ID, AV, and premium PMPM assumptions underlying the projected 2022 risk adjustment transfer, as shown in Attachment B. In providing your response, please include the average PLRS, ARF, GCF, ID, AV, and premium PMPM underlying the RATEE file that will be used by CMS to calculate risk transfers for 2020. Additionally, please provide a comparison of the 2022 factors being projected vs. the 2020 factors underlying the RATEE file and provide justification to the extent the projected 2022 factors are different than the 2020 factors.
- b. Please provide a detailed quantitative exhibit displaying the development of the market wide average PLRS, ARF, GCF, ID, AV, and premium PMPM assumptions underlying the projected 2022 risk adjustment transfer, as shown in Attachment B. Additionally, please provide a comparison of the 2022 factors being projected vs. the 2020 factors shown in the Interim 2020 risk adjustment transfer report and provide justification to the extent the projected 2022 factors are different than the 2020 interim factors.
- c. To the extent that a portion of the Company’s morbidity adjustment reflects anticipated changes in morbidity specific to the Company’s internal book of business (i.e., in addition to, or rather than, any changes in the morbidity of the overall PA Individual ACA market), please explain how the morbidity adjustment was considered in the development of the Company’s risk adjustment transfer assumption.
- d. Please reconcile the difference between the Company-specific projected 2022 ARF shown in Attachment B and the average projection period age factor shown in Attachment E.
- e. Please provide a detailed quantitative exhibit displaying the anticipated receipt and assessment associated with the high cost risk pool component of the projected risk transfer results.

Response:

- a. Please see the attached exhibit labeled Q6a Response for the development of the Company-specific assumptions underlying the projected 2022 risk transfer. The Company-specific PLRS, ARF, GCF, IDF, and AV assumptions shown in Attachment B and used to develop the projected

2022 risk transfer were developed for the population of members that comprised the normalized allowed PMPM development discussed in the response to Question 2c above.

The exhibit labeled Q6a Response also includes the relevant factors underlying the RATEE file that CMS will use to calculate risk transfers for 2020. Please note that the GCF value is listed as “unknown” because this factor cannot be derived without access to all of the other issuer RATEE files in the market. The 2022 factors are different from the 2020 factors because the 2022 population is anticipated to be different than the 2020 population for several reasons. First, the size of the populations is much different. There were about 30,000 average members in 2020. We expect close to 40,000 average members in 2022. Second, the geographic footprint of the populations has changed. In 2020, only about 6% of the membership was located in Western Pennsylvania counties. In 2022, we expect 36% of the membership to be located in Western Pennsylvania counties.

- b. The statewide factors included in rows 13 and 18 of Attachment B for the 2022 projection were developed by starting with information from the following sources: (1) the PID’s 2020 RATEE study released on May 9, 2021, (2) the PID’s 1Q2021 Enrollment Survey released on April 28, 2021, and (3) the CMS Interim Summary Report for 2020 released on March 31, 2021. The attached exhibit labeled Q6b Response demonstrates how we used the information from these sources in order to derive the 2022 statewide average estimates shown in Attachment B. Most of the assumed 2022 statewide factors are identical to our best estimates of the 2020 or 2021 statewide factors. The only exception is the statewide average risk score where we assumed a slight reduction of 1%. Table 3 shows a comparison of the 2022 factors being projected vs. the 2020 factors shown in the CMS Interim Report. In general, the factors being used for 2022 are very similar to the factors from the Interim Report. Where differences exist, it’s because we are using more accurate and/or more recent data to develop our estimates. For example, using results from the PID RATEE analysis is preferable to the CMS Interim Report because they are based on actual EDGE Server submissions by all plans with run-out through the April 2021 deadline.
- c. The Company-specific PLRS factors shown in the attached exhibit labeled Q6a Response were developed using the 2020 HHS-HCC risk adjustment model. The risk scores were increased by 4.5% in conjunction with the death load claim adjustment discussed in the response to Question 2c above. We selected a 4.5% risk score load based on a review of the data.
- d. The projected 2022 average age factor shown in Attachment E is based on members’ ages as of 2021. The 2022 allowable rating factor (ARF) shown in Attachment B and used in the risk adjustment development is based on members’ ages as of 2020 in order to ensure consistency with the ages used in the Company-specific risk scores and the statewide average ARF.
- e. Please see the attached exhibit labeled Q6e Response for the development of the high cost risk pool component of the projected risk transfer results. We relied upon estimates from an external actuarial consulting company’s study to inform our selection of an appropriate percentage of premium charge for 2022. The external study was based upon data collected by issuers across the country and included over 135 million submitted member months. Given the extremely volatile and unpredictable nature of claims in excess of the \$1 million attachment point, as a simplifying assumption we assumed there would be no anticipated reimbursements in 2022. Instead, we selected a percentage of premium charge that was lower than what could have been reasonably supported by the external study. As a point of reference, we have only had three members reach the attachment point from 2018-2020 in all our Pennsylvania entities combined.

Additional Carrier Enrollment Questions

1. For each month between January 2021 and the most recent date available (e.g., June 11, 2021), please provide the average count of Individual ACA enrollment, split by On-Exchange APTC, On-Exchange non-APTC, and Off-Exchange members. Please provide the enrollment data for each available month separately.

Response:

Please see the table below for the requested monthly membership information:

Month Year	OFF -Exchange & No APTC	ON - Exchange & No APTC	ON - Exchange with APTC	Grand Total
21-Jan	5,396	3,884	25,431	34,711
21-Feb	5,570	4,109	26,124	35,803
21-Mar	5,602	4,079	26,270	35,951
21-Apr	5,705	4,227	26,815	36,747
21-May	5,763	4,253	27,667	37,683

2. For the On-Exchange non-APTC members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

Response:

We estimate that approximately 10-15% of the currently enrolled On-Exchange No-APTC members as of May 2021 will enroll through the Exchange and take advantage of the enhanced and expanded subsidies resulting from ARPA. In fact, we understand that Pennie already performed a subsidy redetermination in early June 2021, and so we expect most of the transition will be realized in the June 2021 enrollment figures once they are available. As a result, we anticipate minimal additional movement between these two buckets in 2022.

3. For the Off-Exchange members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

Response:

We estimate that approximately 10-20% of the currently enrolled Off-Exchange members will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies resulting from ARPA.

The following are additional questions or comments from the PID:

1. Please confirm that you have tested to ensure that the rates in Table 11 of the PA AM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Response:

We have tested and confirmed that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

2. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost PMPMs for calendar years 2017-2020, as applicable.

Response:

Please see the attached exhibit labeled PID Q2 Response for a comparison of the actual to projected claim cost PMPMs from calendar years 2017-2020 where applicable. Please note that the actual paid claim PMPM for 2020 is low due to the COVID pandemic.

3. The requested rate increase for this filing was above average among PA individual-market issuers. Please provide a shortlist of bullet points that explain the main issues causing this higher-than-average requested increase.

Response:

Since we do not know what specific assumptions or adjustments were made by the other individual market issuers in their rate filings, it is difficult to assess what may be causing our rate change to vary from the average. However, it is important to note that per the Department's published rate filing instructions, we did not include the impact of the state 1332 Reinsurance program in our initial submission. Once the reinsurance parameters are finalized and/or the Department instructs us to incorporate the impact of the program, the average rate change will decrease and will ultimately be significantly less than the annual trend.

4. Please provide an exhibit which demonstrates that the criteria for the expanded bronze plan(s) have been met.

Response:

The Prescription Drug Benefit Plan provides three major services of coverage (as defined on page 94142 of the 2018 Notice of Benefit and Payment Parameters) that are less than or equal to 50% coinsurance and available prior to any deductible. These services include: generic drugs, specialty drugs, and preferred brand drugs. The coinsurance percentages and certifications of the values corresponding to these categories can be found in the AV screenshots and Certifications document provided as a separate attachment with the initial SERFF submission.

5. Per Pennsylvania Final Rate Filing Guidance, Table 5, the "Change in Morbidity – All Other" in individual filings should be formula based and listed as $1.01 \times \text{Issuer Assumption}$. Please update the equation to comply with the Pennsylvania Final Rate Filing Guidance.

Response:

We intend to make this update to Table 5 later in the review process since, at a minimum, we know that we will also need to incorporate the impact of the reinsurance program into the rate development. By making both changes at the same time, we can minimize the number of versions of this document that are produced.

Highmark Inc.

Response to Objection 1 - Question 1b

Description	WPA Medical	WPA Rx	CPA Medical	CPA Rx	Total	Notes
2022 Mix	36%	36%	64%	64%		Please see Attachment G from filing submission
2020 Allowed 12-Month PMPM With Covid	\$366.13	\$166.37	\$427.11	\$151.90	\$ 562.27	Source is supporting monthly PMPMs streams with Covid included.
2022 Allowed 12-Month PMPM With Covid	\$459.20	\$206.02	\$490.67	\$185.09	\$ 671.96	Source is supporting monthly PMPMs streams with Covid included.
2020 Covid Adjustment					1.053	Please see Attachment G from filing submission
2022 Covid Adjustment					1.008	Please see Attachment G from filing submission
2020 Allowed 12-Month PMPM Without Covid					\$ 591.86	Increase Claims to Remove Covid in 2020
2022 Allowed 12-Month PMPM Without Covid					\$ 666.63	Decrease Claims to Remove Covid in 2022
Allowed Annual Trend 2020 to 2022					6.1%	
Actuarial Judgment					0.8%	Reasonable range around deterministic estimate applied including consideration for significant enrollment changes
Rounding					0.0%	
Required Annual Trend Before Induced Demand Factor					7.0%	Required trend level considers factors such as Individual market volatility, trend surveys, other segment trends
Induced Demand Factor					0.21%	Difference in average metal AV from current benefits to 2022 benefits.
Required Annual Trend w/Induced Demand*					7.23%	

* Trends are then applied to the relevant mix for the entity and adjusted for Capitation to produce the resulting 7.22% as shown in Table 3.

Harrisburg, PA 17120

Re: Highmark Inc. 2022 ACA Rate Filing (Individual Market)
Highmark Filing # 1A-DP-21-HI (SERFF Filing # HGHM-132820364)

Dear Mr. Lavery:

Enclosed are responses to your July 6, 2021 questions regarding SERFF Filing # HGHM-132820364. We have included your questions along with our responses for your convenience. In conjunction with these responses, we are also submitting revisions to relevant filing documents to reflect the following changes:

- In response to PID question 5 of the Department's objection letter dated June 10, 2021, the Company is adding the requested formula in Table 5, cell C16 of the PAAM Exhibits.
- Pursuant to the Department's July 6, 2021 guidance, the Company is adding the impact of the state 1332 Reinsurance program using the prescribed parameters of a \$60,000 attachment point, a 45% coinsurance rate, and a \$100,000 reinsurance cap.

Should you have any further questions regarding this Filing, please feel free to contact me at [REDACTED] or via e-mail at: [REDACTED]

Sincerely,

[REDACTED]

[REDACTED]

[REDACTED]

Highmark Inc.

cc:

[REDACTED]

[REDACTED]

1. Please provide additional detail related to the decision to apply actuarial judgement and utilize a 7.0% trend assumption (prior to induced utilization) rather than the calculated 6.1% trend assumption as outlined in the response to question 1b. In providing your response, please include specific details to address why the Company believes 7.0% is more appropriate to utilize as the trend assumption than 6.1%.

Response:

The decision to use a 7.0% trend rather than the 6.1% deterministic modeling estimate was based on a number of factors, including:

- Significant population changes have occurred in this filing Entity, which increases the expectation of future trend volatility.
- Normal population changes in the Individual market due to enrollment churn introduce trend volatility. This volatility will likely continue in 2021 and 2022.
- Trend survey information from consultants and industry experts is indicating future trends that exceed the 7% level. These trend surveys from multiple sources are provided to Highmark on a Confidential and Proprietary basis, so details regarding the surveys are not provided here.
- Actuarial judgement is commonly applied to trend estimates because a reasonable range of trend around a deterministic estimate recognizes that a deterministic, point estimate expectation implies that the probability of trend X% is 100%, which is not likely to occur.

2. The following questions are related to the response to question 2c from the objection responses dated 6/22/2021:

- a. **Please provide an exhibit displaying quantitative support for, and the development of, the death load adjustment (i.e., 1.055).**
- b. **Please provide quantitative support for the assumption that “New” members will have an average normalized allowed claims PMPM amount equal to that of the persisting Renewal members. In providing your response, using claims experience from the Company’s other Individual market legal entities as necessary, please include a comparison of the average normalized allowed claims PMPM for those members who would be considered “New” in each of 2019 and 2020 relative to the average normalized allowed claims PMPM for persisting members in those respective years.**

Response:

- a. Please see the attached exhibit labeled Q2a Response for the development of the death load adjustment. This exhibit shows the additional claim expense and risk score associated with members who lapsed due to death.
- b. Given the high degree of churn in the Individual ACA market as well as the inherent degree of uncertainty surrounding new business, the Company has been tracking the relative performance of “New” members for several years. Our previous experience with this cohort supported a claim load for these members, but changes in current marketplace dynamics led us to the conclusion that the emerging new population will be more closely aligned with the persisting population. This conclusion is supported by a review of our 2020 statewide actual experience, which showed that risk adjusted MLRs between the two populations were equivalent. The Company intends to continue to monitor emerging relativities going forward since adjustments may be warranted in future years.

3. Please provide a detailed quantitative exhibit displaying the development of the COVID-19 Impact of Deferred/Rescheduled/Induced Care assumptions separately for each region, as shown

in column E of the Excel response to question 3a from the objection responses dated 6/22/2021. In particular, please provide the following information discussed in the response to question 3a:

- a. Actual calendar year 2019 allowed PMPM for each month and all normalization adjustments applied to calculate normalized 2019 allowed medical claims.**
- b. The trend assumption utilized to trend the normalized 2019 allowed medical claims to derive 2020 allowed claims absent the impact of COVID-19.**
- c. The adjustments applied to the actual 2020 allowed medical claims for each month to remove the impact of COVID-19 costs. Additionally, please indicate whether a similar analysis was performed to estimate the impact of COVID-19 on pharmacy claims in the 2020 plan year. If so, please provide the results of that analysis and provide support for not making any adjustment to the pharmacy costs as well. If a similar analysis was not performed on pharmacy claims, please provide support for not doing so and provide a comparison of the normalized pharmacy claims PMPM for 2019 relative to the normalized pharmacy claims PMPM for 2020.**

Response:

- a. Please see the attached exhibit labeled Q3 Response for additional detail regarding the development of the COVID-19 impact of the Deferred/Rescheduled/Induced Care assumptions. After further consultation with the Company's COVID-19 actuarial subject matter experts, we learned that the modeling was performed on a paid claim basis. Thus, the PMPM values shown in the attached exhibit reflect paid claims (not allowed charges). Due to the model complexity and to aid in the presentation, the additional detail is being provided on an annual basis rather than by month. However, it is important to note that the monthly pattern was aligned with the average results from a BCBSA survey performed to assess the impact of COVID-19.
- b. Please see the attached exhibit labeled Q3 Response for the trend assumption used in the COVID-19 modeling. Please note that these are historical modeling trends developed for the specific purpose used in the internal COVID-19 model. Thus, they differ from the assumed future pricing trends contained in this rate filing.
- c. The Company's internal monitoring of the COVID-19 impacts for 2020 resulted in the conclusion that Rx claims were minimally affected, and no adjustment was warranted. The trend data submitted previously in the responses to Question 1a from the objection responses dated 6/22/2021 show a 2020 normalized Rx trend of 12.9% across our Pennsylvania regions. This is within 3% of the 2016-2019 average.

4. Please provide an exhibit displaying the development of the Company-specific average 2022 PLRS factor for each population shown in the exhibit provided in the response to question 6a from the objection responses dated 6/22/2021 (i.e., renewal, other Highmark, prior ACA, and new for each region). In providing your response, please provide the following information:

- a. Please demonstrate how the death load factor is considered in the calculations, and please explain why a death load adjustment equal to 4.5% was applied as opposed to the 5.5% adjustment applied in the response to question 2c.**
- b. Please provide a narrative explaining how the average PLRS factor was calculated for the other Highmark, prior ACA, and new cohorts for each region. In providing your response please comment on the data and any assumptions used in the calculations, and any explicit adjustments applied.**
- c. The response to question 2c indicates the Company has assumed that the other Highmark, prior ACA, and new cohorts for each region will all be enrolled in a gold plan (i.e., the benefit richness factor is 1.08). However, the average IDF and AV for these populations shown in the response to question 6a indicates that the Company**

believes these members will not all enroll in gold plans. Please explain how the two approaches reconcile with one another.

- d. Using the ACA segment as the 1.0 index, please provide an exhibit comparing the assumed morbidity relativities as provided in Attachment A from the “2022_Indiv_HI_PAAM_Attachments_AtoI_052121.xlsx” file to the normalized PLRS (i.e., PLRS divided by the ARF and AV factors) factors provided in the response to question 5a from the objection responses dated 6/22/2021. For each segment, please address and reconcile any differences that exist between the assumed morbidity and normalized PLRS relativities and provided detailed quantitative support for why it is appropriate to assume that the relativities should not be the same.**

Response:

The Company-specific PLRS factors were developed using actual claims experience for each population shown (where available) and the 2020 HHS-HCC risk adjustment model. An explicit adjustment was applied for the death load impact. Please see the attached exhibit labeled Q4 Response for a demonstration of the calculation. Further detail surrounding the development can be found in the responses below:

- a. As discussed in the response to Question 2a above, the attached exhibit labeled Q2a Response shows the development of the death load adjustment. This exhibit shows the additional claim expense and risk score associated with members who lapsed due to death. We selected a 4.5% risk score load based on a review of the data which produced a 4.2% load.
- b. The average PLRS factors for the Other Highmark cohorts were derived by running actual 2020 claims experience for members in this cohort through the 2020 HHS-HCC risk adjustment model. Similarly, the average PLRS factors for the Prior ACA cohorts were derived by running actual 2019 claims experience for members in this cohort through the 2020 HHS-HCC risk adjustment model. The average PLRS factors for the New cohorts were set equal to each region's average PLRS factor for the Renewal cohort multiplied by the ARF relationship between the New and Renewal cohort. The resulting average risk scores for all of these cohorts were increased by 4.5% to reflect the death load adjustment as discussed in the response to Question 4a above.
- c. The 1.08 benefit richness factor shown in the response to Question 2c from the objection responses dated 6/22/2021 is used to normalize the underlying allowed charges. It is intended to mirror the benefit richness formula prescribed by the Department, which is now a function of the pricing AV's rather than simply the standard factors used by CMS in the risk adjustment transfer formula.
- d. Please see the attached exhibit labeled Q4d Response for the requested comparison. The regionally indexed normalized PLRS and Allowed PMPM values are directionally aligned for most of the segments. The Central PA Other Highmark and Prior ACA segments have the largest variances, but this could be attributable to the significantly smaller sample sizes of these segments. The Company is using actual claims experience and actual risk scores generated by the claims experience to develop the values shown. The ACA risk adjustment program does not produce perfect relativities as evidenced by the published HHS-HCC risk adjustment model R-squared values that generally range from 0.3 to 0.4.

Additional Carrier Enrollment Questions

These questions were asked during Round 1. Please indicate if you have any updated information regarding these three enrollment questions.

1. For each month between January 2021 and the most recent date available (e.g., June 11, 2021), please provide the average count of Individual ACA enrollment, split by On-Exchange APTC, On-Exchange non-APTC, and Off-Exchange members. Please provide the enrollment data for each available month separately.

Response:

The Company does not have any updated information readily available to provide at this time.

2. For the On-Exchange non-APTC members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

Response:

The Company does not have any updated information readily available to provide at this time.

3. For the Off-Exchange members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

Response:

The Company does not have any updated information readily available to provide at this time.

The following are additional questions or comments from the PID:

1. Please provide an exhibit showing the actual experience for calendar years 2016-2020 and the projection experience for 2021 and 2022 for the following categories: Member Months, Total Administrative Expenses, Total Incurred Claims, Total Premium, Total Actual Paid Taxes and Fees, Profit, Total Underwriting Gain/Loss and Underwriting Gain/Loss PMPM.

Response:

Please see the attached exhibit labeled PID Q1 Response for the requested information.

2. Does this company have any transitional membership? If so, has there recently been a significant drop in transitional membership? Do you anticipate a drop in 2022?

Response:

This company does not have any transitional membership.

3. In the PAAM Exhibits, II.a.Reins Table – Exp tab, please update the Coinsurance Rate, in cell E5, to 40%.

Response:

In accordance with the Department's subsequent guidance from July 6, 2021, the PAAM Exhibits have been updated to reflect a coinsurance rate of 45% (rather than 40%).

4. Please provide a list of any assumptions that have changed because of the change in the coinsurance rate and explain why.

Response:

The Company is not changing any assumptions as a result of the change in the coinsurance rate.

5. Please be aware that the final coinsurance parameter will be communicated on Friday, July 16th. Then, the revised exhibits and rates will be due on Tuesday, July 20th.

Response:

If the Department selects a final coinsurance parameter other than 45%, the Company would appreciate if the decision could be communicated as soon as practically possible given this would require updating all of the filing documents in a short amount of time.

6. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the final CMS transfer amount published on June 30th, please provide narrative and detailed supporting data to justify the proposed changes.

Response:

The Company does not intend to modify its projected 2022 risk adjustment transfer amounts based on the 2020 results.

7. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Response:

We have tested and confirmed that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, and the Federal Rates Template are identical.

8. Please ensure that the 7/13/21 versions of the following items are posted in SERFF with your July 13th response to this data call.

- a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits
- d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Updated Rate Change Request Summary (Attachment I)
- i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Response:

All of the relevant rate filing documents are being updated and submitted in SERFF in conjunction with these responses.

Part II of the Preliminary Justification

Highmark – Individual Market

Scope and Range:

Highmark is requesting an average ACA individual market rate change of -2.5%, ranging from -18.5% to -0.1%. Products submitted with this filing will have effective dates from January 1, 2022 to December 31, 2022. This rate change is projected to affect 23,999 members.

Historical Financial Experience:

Highmark incurred an underwriting gain in its ACA individual market programs in 2020.

Change in Medical Service Costs:

The projected average cost of medical care for the projected population is expected to increase. The increase will emerge in utilization and average cost per service, and is spread across all types of services.

Change in Benefits and Cost Sharing:

Some cost sharing parameters were changed in order to maintain compliance with Federal AV requirements. Additionally, some out of pocket maximum parameters were changed to keep up with the rising cost of health care. These out of pocket maximum changes also aided in mitigating the rate increase.

Administrative Costs and Anticipated Operating Results:

The anticipated administrative costs and operating results are not excessive or unreasonable. In accordance with regulations, the projected medical loss ratio is over 80%.

Part III Actuarial Memorandum

Highmark Inc.

Individual Rate Filing

Effective January 1, 2022

I. General Information

Document Overview

This document contains the Part III Actuarial Memorandum for Highmark Inc.'s (Highmark) individual block of business rate filing, for products with an effective date of January 1, 2022. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I Unified Rate Review Template, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the Pennsylvania Insurance Department, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of Highmark's rate filing. However, we recognize that this certification may become a public document. Highmark makes no representations or warranties regarding the contents of this letter to third parties. Likewise, third parties are instructed that they are to place no reliance upon this actuarial memorandum that would result in the creation of any duty or liability under any theory of law by Highmark.

The results are actuarial projections. Actual experience is likely to differ for a number of reasons, including population changes, claims experience, and random deviations from assumptions.

I.1 Company Identifying Information:

- Company Legal Name: Highmark Inc.
- State: The Commonwealth of Pennsylvania has regulatory authority over these policies.
- HIOS Issuer ID: 33709
- Market: Individual
- Effective Date: January 1, 2022

I.2 Company Contact Information:

- Primary Contact Name: [REDACTED]
- Primary Contact Telephone Number: [REDACTED]
- Primary Contact Email Address: [REDACTED]

II. Proposed Rate Changes

For all rate changes by plan, see the ‘Cumulative Rate Change % (over 12 mos prior)’ found in Worksheet 2, line 1.11 of the URRT. The rate change varies by plan due to an update in several of our pricing factors and changes in cost sharing required to meet Actuarial Value and other cost sharing restrictions under the Affordable Care Act.

The primary drivers of the rate change are changes in the base claims experience, trend, retention, and the ongoing anticipated impact of Covid-19.

In accordance with the Department’s September 14, 2021 guidance, the impact of the state 1332 Reinsurance program is captured using the prescribed parameters of \$60,000 attachment point, 64% coinsurance rate, and \$100,000 reinsurance cap. If the final parameters should change from those described in this filing, a revised submission would be required.

This rate filing also includes a COVID-19 adjustment and the impact of the American Rescue Plan Act (ARPA) was considered in the rate development and no adjustment was included at this time. This is due to several unknown factors such as competitor entry into market, morbidity of uninsured enrollment, pent-up demand for new entrants, and any potential group conversion to individual.

Other assumptions in the filing account for the elimination of the Individual Mandate penalty and the lack of CSR funding in 2022 by using the factors prescribed in the Department’s guidance. Additional assumptions include that advance payment of premium tax credits (APTCs) will continue until the end of 2022, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and that there are no significant changes in the participation of QHP issuers that would materially change risk adjustment transfer amounts. Finally, modifications to the rate development may be necessary if significant unforeseen events occur. Examples include, but are not limited to, repeal or invalidation of the ACA or material developments in the course of the COVID-19 pandemic. As a result, Highmark reserves the right to submit a revised filing.

III. Experience and Current Period Premium, Claims, and Enrollment

III.1 Paid through Date:

Experience Period claims were based on incurred calendar year 2020, paid through February 2021. This includes 2020 experience in Affordable Care Act compliant plans. Highmark did not offer any transitional plans in 2020.

III.2 Current Date:

The current date shown represents a snapshot of February 1, 2021.

III.3 Allowed and Paid Claims Incurred During the Experience Period:

- Historical Experience: We chose Highmark’s current experience for the individual block of business for the period January 1, 2020 through December 31, 2020, with

claims paid through February 2021 as the basis for the 2022 projected individual market pricing.

- **Claims Incurred During the 12-month Experience Period:** Worksheet 1, Section I shows our best estimate of the amount of claims that were incurred during the 12-month experience period for Highmark’s individual book-of-business. This section includes:
 - The amount of claims which were processed through Company’s claims system,
 - Claims processed outside of the Company’s claims system, and
 - Our best estimate of claims incurred but not paid as of the paid through date stated above.
- **Method for Determining Allowed Claims:** For non-capitated claims, the allowed charges are summarized from the Company’s detailed claim-level historical data. This experience includes 2020 claims for Affordable Care Act compliant business. For capitated and other off-system claims, historical capitations and experience were tabulated and added to the claims.
- **Paid Claims:** We also summarized the paid claims from detailed member records. The paid-to-allowed ratio for the experience period reflects the 2020 plan designs chosen by each member.
- **Incurred but Not Paid (IBNR) Claims Estimate:** The Company is using a completion factor of 0.972 to include IBNR claims in allowed charges. The IBNR completion factor was developed using our corporate reserving system for the Company’s individual business. We applied it equally to both paid and allowed total claims (as a change to utilization) to complete the experience.

IV. Benefit Categories

The index rate of the experience period was summarized at the defined benefit categories included in Worksheet 1, Section II of the URRT.

The data provided in this section closely adheres to the preferred definitions of the Benefit Categories included in the URRT instructions, including the “Other Medical” category. The “Other Medical” category units reflect visits for PDN/home health, trips for ambulance and procedures for DME/prosthetics. Prescription drugs utilization were converted to a “per 30-day” script count.

V. Projection Factors

V.1 Trend Factors

This development of the CY2022 rates reflects an annual trend rate of 7.0% (4.0% cost, 2.9% utilization). These trends reflect Highmark's expectations regarding increases in in-network contractual reimbursement and out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The trend represents a blended average for all types of service and is applied to the aggregate experience for pricing. These trends represent assumed community-wide expectations. Claim variations due to the specific projected enrolled population in this single risk pool are reflected in the morbidity adjustment.

V.2 Changes in the Morbidity of the Population Insured

The Change in Morbidity adjustment of 1.240 is comprised of the following: the morbidity impact from claims experience, a state mandated morbidity adjustment for the Reinsurance program, the impact of health insurance coverage mandate elimination, and Covid-19 impact. Each of the components is described in more detail below.

The Morbidity Impact from Claims Experience

This adjustment reflects the change in the population mix/claim levels from the experience period to the projection period. We continue to observe a high degree of membership churn from year-to-year, which impacts the morbidity. This factor also takes into consideration the effects of adverse selection inherent to guaranteed issue markets. The Individual ACA risk pool continues to have a significantly higher proportion of older members with a high prevalence of chronic conditions compared to group business, which adds to the uncertainty of any future claim projections.

State Mandated Morbidity Adjustment for the Reinsurance Program

In accordance with the Department's guidance, there is an adjustment of -0.1% to reflect the impact of morbidity improvement due to the Reinsurance program.

Impact of Health Insurance Coverage Mandate Elimination

In accordance with the Department's guidance, the morbidity was increased by 1.0% to reflect the market uncertainty from the elimination of the health insurance coverage mandate.

Covid-19 Impact

In order to account for the impact of COVID-19 on projected claim costs, the Company took the following steps:

1. Adjusted the claims in the base experience period to a non-COVID-19 baseline environment. This was done to provide a more stable base from which to project future claims. Claims in the base experience period were increased by 5.3%, representing the expected degree of claims suppression experienced.
2. Projected claims to the projection period using trends with the impact of COVID-19 excluded. Again, this provides for a more stable projection of future claims, before applying the anticipated impact of COVID-19 in the projection period. This was accomplished by applying a trend of 7.0% (which excludes any impact from COVID-19) to our adjusted BEP claims.
3. The projected claims were then further adjusted by applying the anticipated impacts of COVID costs expected in the projection period. There are four components of this adjustment determined by the Company:
 - a. Treatment costs (\$0.11 PMPM) – COVID treatment utilization in 2022 are expected to follow a similar utilization pattern as flu treatment from 2018 and 2019, with COVID specific admission costs based on recent admission costs for COVID.
 - b. COVID Testing (\$0.41 PMPM for Western PA & \$0.32 PMPM for Central PA) – COVID testing utilization in 2022 are expected to follow a similar utilization pattern as flu testing from 2018 and 2019, with COVID specific testing costs based on recent testing costs for COVID.
 - c. COVID Vaccine (\$2.05 PMPM) – The Company is assuming that 43% of the population will be receiving vaccine boosters at a frequency of once every two years. This impact represents the expected cost that the Company will incur.
 - d. Additional morbidity (0.50% claims impact) – Due to insureds missing preventative care (maintenance care and testing services) and quarantine rules leading to a more sedentary lifestyle, the Company expects a general trend towards worsening member morbidity.

The application of the above COVID claim adjustments to the rating period results in a COVID adjustment factor of 1.061.

V.3 Changes in Demographics

We project that the average rating factor (age, tobacco load and area combined) will increase by about 0.4% due to the change in the population. This is primarily due to the expectation that the new members from the group and/or uninsured populations to be slightly older than the population in the underlying experience. This increases the projected allowed claims (utilization) by the same amount.

V.4 Changes in Benefits

There is no change in benefits related to the essential health benefit (EHB) categories so the factor is set to 1.0. The cost sharing changes for the EHBs are captured in the paid to allowed ratio factors discussed in the AV and Cost Sharing Design of Plan section X.1.

V.5 Changes in Other

The 0.985 factor represents the changes in utilization due to changes in pharmacy rebates, and hospital/physician settlements.

VI. Manual Rate Adjustments

Highmark's individual experience is fully credible. No manual rate is developed or used in this projection.

VII. Credibility of Experience

The experience is from Highmark's individual book of business in 2020. It is large enough to be fully credible. Our results are based 100% on the experience rate, as adjusted.

VIII. Index Rate

The index rates as shown on Worksheet 1 of the URRT are simply the single risk pool average allowed claims for the Essential Health Benefits for the experience and projected populations, respectively, for Highmark. For the experience period, only non-grandfathered plans are included. The projection period Index Rate is not adjusted for reinsurance or risk adjustment programs or any other fee.

IX. Market Adjusted Index Rate [MAIR]

The Market Adjusted Index Rate is the Projected Index Rate further adjusted for risk adjustment and the exchange fee.

IX.1 Projected Reinsurance PMPM

As outlined in the waiver application, the State is anticipating the Reinsurance Program will have the following parameters for 2022: an attachment point of \$60,000, a coinsurance rate of 64%, and a cap of \$100,000. HCA estimated the impact of the reinsurance program under these tentative parameters by trending Highmark PA individual ACA CY2019 incurred claims by member to the CY2022 rating period, applying the parameters, and calculating the amount of incurred claims expected to be reimbursed by the program. The modeling produced an estimated incurred claims savings of 6.8%. This percentage was converted to a PMPM and adjusted to an equivalent allowed claim basis by dividing the PMPM by the paid-to-allowed factor and the composite effect of catastrophic eligibility. This amount is reflected in worksheet 1 of the URRT.

IX.2 Projected Risk Adjustment PMPM

The estimated average risk score for Highmark's projected 2022 population was developed by using Highmark's 2020 claim diagnoses and the risk adjustment coefficients as finalized in the Notice of Benefit and Payment Parameters. Similarly, actuarial value factors and induced demand factors were estimated for Highmark based upon its projected 2022 population.

We estimated the statewide average risk transfer factors based on current market assumptions. We estimated the statewide average premium using current market premium assumptions with adjustments for anticipated rate changes for 2022.

The actual calculation of the risk transfer followed the risk transfer methodology as prescribed.

The analysis resulted in Highmark receiving from the risk adjustment pool. The \$48.23 PMPM value shown in worksheet 1 of the URRT is developed by taking the expected risk transfer amount plus the projected High Cost Risk Pool charge and adjusting it to an equivalent allowed claims basis by dividing it by the paid-to-allowed factor and the composite effect of catastrophic eligibility and benefits in addition to EHB.

For the purposes of this rate filing, Highmark has assumed no adjustment to the projected risk adjustment transfer for the Risk Adjustment Data Validation (RADV) program.

IX.3 Exchange User Fee %

The 2.87% value shown in worksheet 1 of the URRT is developed by multiplying the 3% exchange user fee by the assumed percentage of on exchange membership. This calculated amount is then divided by the paid-to-allowed factor to bring it to an equivalent allowed claims basis and adjusted further for the composite effect of catastrophic eligibility and benefits in addition to EHB.

X. Plan Adjusted Index Rate [PAIR]

The Plan Adjusted Index Rates can be found on line 3.10, Worksheet 2 of the URRT. The PAIR rates are calculated by applying the allowable rating factors as described below to the Market Adjusted Index Rate.

X.1 AV and Cost Sharing Design of Plan

The AV and Cost Sharing allowable rating factor is comprised of the following components:

- The utilization due to differences in cost sharing is based on the factors calculated using a methodology prescribed in the Department's guidance relative to the weighted average. No differences due to health status are in these adjustments.
- The pricing AV for the benefits and cost sharing of the plan and a CSR load for the on exchange silver plans.

Impact of Non-Payment of Cost Sharing Reduction Subsidies

In accordance with the Department's guidance, we have applied an additional adjustment to our AV pricing values for those Silver plans not offered exclusively off-exchange. This adjustment factor was 1.22 and represents the non-payment of Cost Sharing Reduction subsidies.

X.2 Provider Network Adjustment

The provider network adjustments are developed by dividing the plan level network factors by the overall weighted average from all plans.

X.3 Benefits in Addition to EHB

Non-EHB benefits have been added to several plans. Thirty plans have an adult dental and vision benefit and twelve plans have a hearing and personal assistance (i.e. Papa Pals) benefit.

X.4 Administrative Expense

The proposed rates reflect internal administrative costs including quality improvement administrative expenses. This cost was developed based on standard expense allocation methods.

X.5 Taxes and Fees:

The following fees were added:

- \$0.25 PMPM for Risk Transfer User Fee
- \$0.24 PMPM for Patient Centered Outcomes Research Institute (PCORI) Fee
- 0.0% for the Health Insurance Provider Fee
- 0.0% for the PA Premium Tax

X.6 Profit (or Contribution to Surplus) & Risk Margin:

The profit/contingency factor is set to 0%.

X.7 Catastrophic Adjustment

For catastrophic plans, we use a 0.92 factor for the specific eligibility adjustment.

XI. Calibration

XI.1 Age Curve Calibration:

The projected weighted average age factor for billable members is 1.902. This factor is calculated by dividing the all members age factor of 1.900 by the ratio of billable members to total members 0.999. The age curve calibration factor is $1/1.902 = 0.5259$.

XI.2 Geographic Calibration Factor:

The projected weighted average geographic factor is 1.004. Each Plan Adjusted Index Rate represents the rate for an average member with a geographic factor of 1.004. The geographic calibration factor is $1/1.004 = 0.9958$.

XI.3 Tobacco Calibration Factor:

The projected weighted average tobacco factor is 1.007. Each Plan Adjusted Index Rate represents the rate for an average member with a tobacco factor of 1.007. The tobacco calibration factor is $1/1.007 = 0.9927$.

XI.4 Consumer Adjusted Premium Rate Development:

The calibrated plan adjusted index rate represents the base rate for an age factor of 1.0, geographic rating factor of 1.0 and tobacco rating factor of 1.0. Thus, the approximate premium for a specific member can be derived by multiplying this rate by the HHS age curve factor, the rating area factor on Worksheet 3 of the URRT, and the appropriate tobacco factor. Please note that this method will only produce approximate rates due to URRT rounding constraints.

XII. Projected Loss Ratio

The projected loss ratio for 2022 using the federally-prescribed MLR methodology is 92.5%.

XIII. AV Metal Values

The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based the Federal AV Calculator. Some plans did require an adjustment to the inputs entered into the AV calculator. Screen shots and certifications for these plans were submitted as part of Highmark's QHP application.

XIV. Membership Projections

Membership projections reflect Highmark's expectations for 2022. These projections reflect expected changes in market share due to market competition, relative price levels, and changes in plan offerings (where applicable).

Highmark expects membership in 2022 to follow a similar metal level distribution as the Individual ACA experience period in the markets where plans will continue to be offered.

For the Silver level plans, the projected membership by cost sharing subsidy levels is based on the observed distribution of ACA members that were eligible under the federal poverty levels as determined by the federal health insurance exchange. The projected enrollment by plan and subsidy level is as follows:

CSR Silver Plan Membership Distribution			
FPL	Subsidy Level	% of Silver Membership	% of Total Membership
<150%	94%	35.1%	7.6%
150%-200%	87%	47.6%	10.3%
200%-250%	73%	5.7%	1.2%
<u>>250%</u>	<u>70%</u>	<u>11.6%</u>	<u>2.5%</u>
Total		100.0%	21.8%

XV. Terminated Plans and Products

Plans in the 2020 experience period that will no longer be available in 2022 can be found in Exhibit I.

Highmark also has some plans that were offered only in 2021 (not offered in the experience period or in the projection period). These plans are shown in Exhibit I.

XVI. Plan Type

The Plan types listed in Worksheet 2, Section I of the Part I Unified Rate Review Template describe Highmark's plans adequately.

XVII. Actuarial Certification

I, [REDACTED], am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared to accompany Highmark's rate filing for the individual combined market on and off the Pennsylvania Exchange.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.

I certify that the AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based on the Federal AV Calculator. If any adjustments were required outside of the AV Calculator, appropriate certification has been provided to CMS through the QHP application process.

I certify that the geographic rating reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

The Part I Unified Rate Review Template does not demonstrate the process used by Highmark to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

2022 Rates Table Template v11.0		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.			
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.
