Cover Letter

July 13, 2021

Ms. Tracie Gray, Director
Bureau of Accident and Health Insurance
Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

Re: Cover Letter for Oscar Health Plan of Pennsylvania, Inc.'s (Oscar's) Rate Filing Effective January 1, 2022
SERFF OHIN-132808338

Dear Ms. Gray:

This cover letter is in support of Oscar's Affordable Care Act (ACA) products in the individual market, to be offered with an effective date of January 1, 2022. The information requested in the Pennsylvania Insurance Department's (PID's) 2022 ACA Compliant Health Insurance Rate Filing Guidance dated March 31, 2021 is provided below.

1. Company Name and NAIC Number
 - Oscar Health Plan of Pennsylvania, Inc.
 - NAIC Number — 16590
2. Market (Individual or Small Group): Individual
3. On/Off or Off Exchange: On/Off
4. Effective Date of Coverage: January 1, 2022
5. Average Rate Change Requested: -7.9%
6. Range of Rate Change Requested: -14.1% to -3.4%
7. Total Additional Annual Revenue Generated from the Proposed Rate Change: -\$1,150,938
8. Products: HMO
9. Rating Areas and Any Changes from 2021:
 - Current Rating Areas: 3, 6, and 8
 - Expansion Rating Areas: 7
10. Metal Levels and Catastrophic Plans: Catastrophic, Bronze, Silver, and Gold
11. Current Number of Covered Lives and of Policyholders as of February 1, 2021:
 - 4,191 covered lives
 - 3,410 policyholders
12. Number of Plans Offered in 2022 and the Change this Represents from 2021:

- 29 plans offered in 2022
- 14 plans were offered in 2021

13. Corresponding Contract Form Number, SERFF, and Binder ID Numbers:

- Forms: OSC-PA-IVL-EOC-2022-HIX, OSC-PA-IVL-EOC-2022
- Form Filing: OHIN-132710310
- Rate Filing: OHIN-132808338
- Binder: OHIN-PA22-125108344

14. HIOS Issuer ID Number and Submission Tracking Number:

- HIOS Issuer ID Number: 98517
- Submission Tracking Number: 98517-2018877833535174669

Rate Change Summary

Oscar Health Plan of Pennsylvania, Inc. – Individual Plans

Rate request filing ID # XXXXX - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <https://www.insurance.pa.gov/Consumers/Pages/ACA-Rate-Filings.aspx>

Overview

Initial requested average rate change:	-7.9%
Revised requested average rate change:	N/A
Range of requested rate change:	-14.1% to -3.4%
Effective date:	January 1, 2022
Mapped Members:	4,191
Available in:	Rating Areas 3, 6, 7, 8

Key information

Jan. 2020-Dec. 2020 financial experience

Premiums	\$17,709,096.98
Claims	\$11,263,303.82
Administrative expenses	\$1,149,640.00
Taxes & fees	\$362,614.00
Company made (after taxes)	\$4,933,539.16

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2022:

Claims:	87.5%
Administrative:	9.1%
Taxes & fees:	3.1%
Profit:	0.30%

The company expects its annual medical costs to increase **4.01%**.

Explanation of requested rate change

Oscar Health Plan of Pennsylvania, Inc. is requesting a rate change of -7.9% due to:

- Trends in medical and prescription drug cost and utilization
- Changes in taxes, fees, administrative expenses, and profit
- Changes in the benefits and cost-sharing offered
- Changes in the factors used to model plan behavior changes
- Changes in Oscar's service area for 2022, including expansion into Rating Area 7
- Increases in the average morbidity of the Pennsylvania individual market single risk pool
- Changes in Oscar's anticipated reimbursement to health care providers
- Impact of COVID-19 on projected health care services in 2022

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

1. Scope and Range of Rate Increase

The purpose of this document is to present rate change justification for Oscar Health Plan of Pennsylvania, Inc. (Oscar's) individual Affordable Care Act (ACA) products, with an effective date of January 1, 2022, and to comply with the requirements of Section 2794 of the Public Health Service Act as added by Section 1003 of the Patient Protection and Affordable Care Act (ACA).

Using in-force business as of February 2021, the proposed average rate increase for renewing plans is -7.9%. Rate increases vary by plan due to a combination of factors including shifts in benefit leveraging and cost-sharing modifications. This rate increase is absent of rate changes due to attained age.

The rate increase impacts an estimated 4,191 members.

2. Reason for Rate Increase(s)

The significant factors driving the proposed rate change include the following:

Medical and Prescription Drug Inflation and Utilization Trends

The projected premium rates reflect the most recent emerging experience which was trended for anticipated changes due to medical and prescription drug inflation and utilization.

Administrative Expenses, Taxes and Fees, and Risk Margin

Changes to the overall premium level are needed because of required changes in federal and state taxes and fees. In addition, there are anticipated changes in both administrative expenses and targeted risk margin.

Prospective Benefit Changes

Plan benefits have been revised as a result of changes in the Center for Medicare and Medicaid Services (CMS) Actuarial Value Calculator and state requirements, as well as for strategic product considerations.

Anticipated Changes in the Average Morbidity of the Covered Population

Changes to the overall premium level are needed because of anticipated changes in the underlying morbidity of the projected marketplace.

Anticipated Changes in the Network Configuration

Changes to the overall premium level are needed because of anticipated changes in the underlying network configuration and associated unit costs.

COVID-19 Pandemic

Changes to the overall premium level are needed because of the expected residual costs attributed to the ongoing COVID-19 pandemic.

1. Introduction and Purpose

The purpose of this document, which is submitted in conjunction with the Part I Unified Rate Review Template (URRT) and Pennsylvania Actuarial Memorandum Rate Exhibits (Rate Exhibits), is to comply with the requirements of the Part III Actuarial Memorandum and to support the premium rates developed for Oscar Health Plan of Pennsylvania, Inc. (Oscar's) Affordable Care Act (ACA) products in the individual market, with an effective date of January 1, 2022.

This actuarial memorandum provides certain information related to the rate filing submission including support for the values entered into the URRT, which demonstrates compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the Pennsylvania Insurance Department (PID), the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of Oscar's individual market rate filing.

Future regulatory changes may affect the extent to which the rates presented herein are neither excessive nor deficient.

2. General Information

Company Identifying Information

Company Legal Name:	Oscar Health Plan of Pennsylvania, Inc.
State:	Pennsylvania
NAIC:	16590
HIOS Issuer ID:	98517
Market:	Individual
Effective Date:	January 1, 2022
Policy Forms:	OSC-PA-IVL-EOC-2022, OSC-PA-IVL-EOC-2022-HIX

Company Contact Information

Primary Contact Name:	[REDACTED]
Primary Contact Telephone Number:	[REDACTED]
Primary Contact Email Address:	[REDACTED]

3. Proposed Rate Increases

Reason for Rate Increase(s)

Exhibit A summarizes the proposed rate increases by plan effective January 1, 2022. Rate increases vary by plan due to a combination of factors including shifts in benefit leveraging, cost-sharing modifications, and geographic rating factors.

Using in-force business as of February 2021, the proposed average rate change for renewing plans is -4.2%. This rate change is absent of rate changes due to attained age.

The significant factors driving the proposed rate change include the following:

Medical and Prescription Drug Inflation and Utilization Trends

The projected premium rates reflect the most recent emerging experience which was trended for anticipated changes due to medical and prescription drug inflation and utilization.

Administrative Expenses, Taxes and Fees, and Risk Margin

Changes to the overall premium level are needed because of required changes in federal and state taxes and fees. In addition, there are anticipated changes in both administrative expenses and targeted risk margin.

Prospective Benefit Changes

Plan benefits have been revised as a result of changes in the Center for Medicare and Medicaid Services (CMS) Actuarial Value Calculator and state requirements, as well as for strategic product considerations.

Anticipated Changes in the Average Morbidity of the Covered Population

Changes to the overall premium level are needed because of anticipated changes in the underlying morbidity of the projected marketplace.

Anticipated Changes in the Network Configuration

Changes to the overall premium level are needed because of anticipated changes in the underlying network configuration and associated unit costs.

COVID-19 Pandemic

Changes to the overall premium level are needed because of the expected residual costs attributed to the ongoing COVID-19 pandemic.

[Rate Development Overview](#)

The plans included in this rate filing are to be offered for sale effective January 1, 2022. Oscar's rate development, including the methodology described below, is based on generally accepted actuarial principles for community rated individual blocks of business.

Underlying Claim Experience

Oscar started with Pennsylvania's individual claim experience from January 1, 2020 through December 31, 2020, with runout through March 31, 2021, as the experience basis in the projection. The claim amount includes an estimate for Incurred But Not Reported (IBNR) claims.

In the absence of fully credible base experience claim data, Oscar also utilized Texas individual claim experience from Oscar's legal entity (Oscar Insurance Company; NAIC code 15777) as the manual rate basis in the projection. The base experience used for the manual projection reflects claims from January 1, 2020 through December 31, 2020, with runout through March 31, 2021, and includes an estimate for (IBNR) claims.

Trend

Oscar applied utilization and unit cost trends to the underlying medical and prescription drug claims to reflect the expected claim levels in the projection period.

Benefit Adjustment

The projected claims were adjusted to reflect the benefits for each of the products to be offered on and off the exchange.

Demographics and Morbidity

The starting claim experience was adjusted to reflect changes in the anticipated morbidity and demographics corresponding to Oscar's projected 2022 membership distribution.

Market Morbidity

The starting claim experience was additionally adjusted to reflect changes in the anticipated market morbidity from the base period to the projection period in response to the uncertainty inherent in the marketplace and the March 10, 2021 passage of the American Rescue Plan (ARP).

Network Adjustment

The projected claims were adjusted to reflect changes in the anticipated provider reimbursement levels.

COVID-19 Pandemic

The starting claim experience was adjusted from the base period to the projection period to reflect the anticipated impact of items such as the normalization of the base period and the introduction of diagnostic testing and vaccine booster costs in response to the ongoing COVID-19 pandemic and its associated impact on the individual market in Pennsylvania. Future regulatory, legislative, or economic changes may affect the extent to which the rates presented herein are neither excessive nor deficient.

State-Based Reinsurance Program

The starting claim experience was adjusted to reflect changes in the anticipated market morbidity from the base period to the projection period due to the anticipated impact of the state-based reinsurance program proposed in the Pennsylvania 1332 waiver application that was approved by CMS on July 24, 2020.

The claim experience was adjusted to reflect the removal of the projected reinsurance recoveries. The reinsurance recoveries were developed on a percent of net claims approach using the proposed parameters for the 2022 plan year — \$60,000 attachment point, coinsurance of 45%, up to a reinsurance cap of \$100,000.

Risk Adjustment

The projected claims were adjusted to reflect payments to the individual (catastrophic and non-catastrophic) risk pool as a result of the risk adjustment program.

Administrative Expenses and Risk Margin

The premium incorporates an average 9.6% administrative charge, which is inclusive of general administrative expenses, commission, and risk margin.

Taxes and Fees

The premium rates reflect applicable state and federal taxes and fees for the 2022 plan year.

4. Market Experience

4.1. Experience and Current Period Premium, Claims, and Enrollment

Oscar's rates are developed using a single risk pool, established according to the requirements in 45 CFR Part 156, §156.80(d). The experience period data is based on all Oscar individual market policies in Pennsylvania and the

projection period reflects all projected covered lives for every non-grandfathered product/plan combination for Oscar in the Pennsylvania individual market.

The premium earned during the experience period and as reported on Worksheet 1, Section I of the URRT and Table 2 — Experience Period Claims and Premiums of the Rate Exhibits are from Oscar's data warehouse for calendar year 2020. The premiums do not reflect an adjustment for MLR rebates as Oscar does not anticipate paying rebates for the base period.

Experience Period Loss Ratio

The loss ratio, expressed as incurred claims over revenue (defined as gross premium +/- risk adjustment) for the experience period data is 60.3%, as shown in Table 2 — Experience Period Claims and Premiums of the Rate Exhibits.

Paid Through Date

The experience period in Worksheet 1, Section I of the URRT and Table 2 — Experience Period Claims and Premiums of the Rate Exhibits shows Oscar's earned premium and incurred claims for the experience period of January 1, 2020 through December 31, 2020, with claims paid through March 31, 2021.

Current Date

The current period in Worksheet 2, Section II of the URRT and Table 1 — Number of Members of the Rate Exhibits shows Oscar's premium and enrollment using in-force business as of February 2021.

Allowed and Incurred Claims Incurred During the Experience Period

Oscar's calendar year 2020 medical and pharmacy claim data was used for developing the single risk pool claims. Worksheet 1, Section I of the URRT outlines Oscar's best estimate of claims incurred during the experience period. The estimate includes:

- Claims processed through Oscar's claim system,
- Claims processed outside of the claim system (e.g. pediatric dental and vision services), and
- Oscar's best estimate of IBNR.

The IBNR estimate is calculated using a combination of claim lag methodology, seriatim case reserves, and projection methodology. A seriatim methodology is utilized for claims over \$250,000, supplemented by data supplied by Oscar's medical and claims operations areas. The historical lag pattern is used to calculate completion factors that are in turn used to estimate monthly incurred claims. For any recent month in the experience period where the claim experience may be too recent to be considered credible, Oscar uses a projection methodology, based on pricing assumptions adjusted for trend and seasonality. The trend factor is selected to reflect anticipated changes in per unit volume of services, mix of services and provider reimbursement levels. Claims per enrollee should fall within a predictable range, and thus, these statistics are used to check the reasonableness of the incurred claim estimate. The final IBNR estimate is calculated as incurred claims less paid claims for the experience period.

4.2. Benefit Categories

The benefit categories described below are based on the algorithm used by Milliman's *Health Cost Guidelines*TM (HCGs). The HCG grouper uses a combination of Diagnosis Related Groups (DRGs), Current Procedural Terminology Codes – Fourth Edition (CPT-4 Codes), Healthcare Common Procedural Coding System codes (HCPCS), and revenue codes to allocate detailed claims into roughly 60 benefit categories.

The utilization and unit cost data for rate development were assigned to benefit categories as shown in Worksheet 1, Section I of the URRT based on place and type of service using a detailed claim mapping algorithm, which can be summarized as follows:

Inpatient Hospital

Includes non-capitated facility services for medical, surgical, maternity, mental health and substance abuse, skilled nursing, and other services provided in an inpatient facility setting and billed by the facility.

Outpatient Hospital

Includes non-capitated facility services for surgical, emergency room, ancillary, observation and other services provided in an outpatient facility setting and billed by the facility.

Professional

Includes non-capitated primary care, specialty care, therapy, the professional component of laboratory and radiology, and other professional services, except for hospital based professionals whose payments are included in facility fees.

Other Medical

Includes non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, dental services and other services. The measurement units for utilization used in this category are a mix of visits, cases, and procedures.

Capitation

Includes the amount for any services that are provided on a capitated basis.

Prescription Drug

Includes drugs dispensed by a pharmacy. This amount is net of rebates received from drug manufacturers.

4.3. Projection Factors

This section includes a description of each factor used to project the experience period allowed claims to the projection period, supporting information related to the development of those factors is also included.

Trend Factors – Cost and Utilization

Average cost trends were developed based on Oscar's anticipated reimbursement levels. Utilization trends were developed at the broad service category level: inpatient facility, outpatient facility, professional, other, and prescription drugs. Utilization trend assumptions were generally estimated using Milliman's HCG secular utilization trend levels, which are based on large data sets and are widely used by insurers and others to estimate expected claim costs and model healthcare utilization.

Table 1 provides the annualized trend assumptions that were used to adjust the allowed claims from the experience period to the projection period. The overall trend used to get from the experience period to the projection period is based on an unleveraged prospective annual trend of 4.0%.

Table 1 Annual Trend Assumptions			
Benefit Category	Trend		
	Utilization	Unit Cost	Total
Inpatient	0.4%	2.1%	2.5%
Outpatient	1.4%	1.6%	3.0%
Physician	1.4%	4.7%	6.2%
Other	1.4%	4.7%	6.2%
Capitation	0.0%	0.0%	0.0%
Prescription Drug	2.4%	3.0%	5.5%
Grand Total	1.2%	2.7%	4.0%

The trend factors by benefit category are included in the “Year 1 Trend” and “Year 2 Trend” entries on Worksheet 1, Section II of the URRT and “Cost” and “Utilization” entries in Table 3 — Trend Components of the Rate Exhibits.

Adjustments to Trended EHB Allowed Claims PMPM

Morbidity Adjustment

The starting allowed claim experience was adjusted to reflect changes in the anticipated morbidity corresponding to Oscar’s projected demographic mix and membership distributions.

A second adjustment was included to reflect anticipated changes to the market morbidity primarily associated with changes in market membership between the experience period and the projection period. Oscar relied upon the Q1 2021 Enrollment by Metal Survey published by PID on April 28, 2021 supporting a market membership decrease of -0.4% between the 2020 and 2021 plan years, which was primarily driven by the structural dynamic that the ongoing COVID-19 pandemic has imposed on the individual market in Pennsylvania. Separately, Oscar anticipated membership growth attributed to increased affordability due to the expansion of the Advanced Premium Tax Credit (APTC) subsidies inherent in the ARP. Further supported by the enrollment windows being extended intra-year in response to the ARP, Oscar projected the market membership to increase by 8.8% between the 2021 and 2022 plan years.

In an effort to quantify the anticipated impact to market morbidity, Oscar analyzed its nationwide individual market membership which persisted from the 2019 to 2020 plan years and constructed a regression analysis to estimate the anticipated market morbidity changes in response to market membership movement between the experience period and the projection period.

In addition, an Individual Adjustment factor of 1.010 and Reinsurance Morbidity Adjustment factor of 0.999, as mandated by the PID, were applied to Oscar’s estimated morbidity adjustment.

These adjustments reflect the projected change in claim costs outside of the underlying demographics of the covered population and were also assumed when estimating the risk adjustment transfer for the projection period.

A combined factor of 1.043 is included in the “Morbidity Adjustment” entry on Worksheet 1, Section II of the URRT.

Separately, a combined factor of 1.044 is included in the “Change in Morbidity - All Other” entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits. This factor is net of the Reinsurance Morbidity Adjustment factor as that is provided separately in the “Change in Morbidity — Impact of Reinsurance Program” entry.

Demographic Shift

An adjustment was included to account for the anticipated changes in demographic mix — in both age/gender and geography — between the experience period and the projection period.

A factor of 1.023 is included in the “Demographic Shift” entry on Worksheet 1, Section II of the URRT and the “Change in Demographics” entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Plan Design Changes

Oscar applied an adjustment to account for the anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience period and projection period. Plan behavior change factors were applied at the plan level using factors developed from Oscar’s risk adjusted individual claim experience. The resulting allowed and net claim costs for each plan reflect differences due to cost sharing and the impact of plan behavior change only, and not due to health status.

A factor of 1.038 is included in the “Plan Design Changes” entry on Worksheet 1, Section II of the URRT and the “Change in Benefits” entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Other Adjustments – Changes in Network

Oscar applied an adjustment of 0.964 to account for anticipated changes in provider reimbursement levels between the experience period and projection period. The reimbursement changes are in response to modifications to Oscar’s underlying contracts with its providers.

A factor of 0.964 is included in the “Change in Network” entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Other Adjustments – Prescription Drug Rebates

An adjustment of 1.008 was included to account for the anticipated changes in the level of prescription drug rebates between the experience period and projection period.

Other Adjustments – Pooling Charge

An adjustment of 1.005 was included to account for Oscar experiencing lower than expected shock claims during the experience period. In this context, a shock claim is defined as annual costs in excess of \$750,000 per individual claimant.

Other Adjustments – COVID-19 Pandemic

Oscar anticipated that widespread immunity would be established prior to the 2022 plan year and due to the pandemic’s influence on the experience period, Oscar applied an adjustment of 0.983 to normalize the experience period in order to project claim costs to the projection period. In doing so, Oscar removed direct costs associated with the pandemic which included items such as COVID-19 treatment, virus testing, and vaccination costs. Oscar additionally applied a two-part adjustment to normalize the estimated impact of deferred utilization. First, Oscar extrapolated from a partial year of 2020 base experience by leveraging Q3 and Q4 claim experience in order to normalize out the immense dip in utilization witnessed during the first shelter-in-place orders that took place in late Q1 and early Q2. Expected seasonality was factored into the annualization process to capture items such as calendar seasonality and work-day adjustments. Once annualized, Oscar applied a second adjustment to the claim experience to offset deferred, forgone, and suppressed utilization that continued beyond the shelter-in-place orders to restore utilization levels to what would have been expected absent the pandemic.

Oscar applied an adjustment of 1.018 to account for the costs associated with the anticipated introduction of vaccine booster shots in the 2022 plan year. Oscar assumed a 66% adoption rate across the projected membership distribution and an allowed cost of \$120 — \$60 per dose and \$60 in administration — to administer the vaccination.

A second adjustment of 1.005 was included to account for the costs associated with continued virus testing in the projection period. Although it is expected that the majority of the market membership is expected to be vaccinated by the end of the 2021 plan year, Oscar assumed a small percentage of membership will require additional virus testing in the 2022 plan year with a cost of \$120 to administer each individual test.

A combined factor of 0.971 is included in the “Other” entry on Worksheet 1, Section II of the URRT.

Separately, a combined factor of 1.007 is included in the “Change in Other” entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits. The factor is net of the Changes in Network impact as that is accounted for in the “Change in Network” entry.

Manual Rate Adjustments

Since Oscar’s base experience in Pennsylvania is partially credible, a manual rate methodology was additionally developed for rating purposes as described in this section. The adjustments described below were used to develop the Manual EHB Allowed Claims PMPM entry on Worksheet 1, Section II of the URRT and Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Source and Appropriateness of Experience Data Used

Oscar started with individual claim experience from January 1, 2020 through December 31, 2020, with runout through March 31, 2021, as the manual rate basis in the projection. The starting claim experience is from Oscar’s legal entity (Oscar Insurance Company; NAIC code 15777) offering in the Texas individual market. The premium earned and incurred claims during the manual period and as reported on Worksheet 1, Section I of the URRT and Table 2 — Manual Period Claims and Premiums of the Rate Exhibits are from Oscar’s data warehouse for calendar year 2020.

In accordance with *Actuarial Standards of Practice (ASOP) #25 — Credibility Procedures*, Oscar’s internal credibility manual, determined from statistical relationships inherent in nationwide experience in the individual market, assigns full credibility at 70,000 member months. Oscar’s manual includes 1,130,335 member months and is considered fully credible for purposes of developing claim projections.

Adjustments Made to the Data

Exhibit B summarizes the adjustment factors, as described in this section, used to project the manual rate claims on an allowed basis to the projection period.

- Incurred But Not Reported

The starting claim experience represents Oscar’s best estimate of claims incurred during the manual period. The estimate includes:

- Claims processed through Oscar’s claim system,
- Claims processed outside of the claim system (e.g. pediatric dental and vision services), and
- Oscar’s best estimate of IBNR.

The IBNR estimate is calculated using a combination of claim lag methodology, seriatim case reserves, and projection methodology. A seriatim methodology is utilized for claims over \$250,000, supplemented by data

supplied by Oscar's medical and claims operations areas. The historical lag pattern is used to calculate completion factors that are in turn used to estimate monthly incurred claims. For any recent month in the manual period where the claim experience may be too recent to be considered credible, Oscar uses a projection methodology, based on pricing assumptions adjusted for trend and seasonality. The trend factor is selected to reflect anticipated changes in per unit volume of services, mix of services and provider reimbursement levels. Claims per enrollee should fall within a predictable range, and thus, these statistics are used to check the reasonableness of the incurred claim estimate. The final IBNR estimate is calculated as incurred claims less paid claims for the manual period.

- Trend Factors – Cost and Utilization

Average cost trends were developed based on Oscar's anticipated reimbursement levels. Utilization trends were developed at the broad service category level: inpatient facility, outpatient facility, professional, other, and prescription drugs. Utilization trend assumptions were generally estimated using Milliman's HCG secular utilization trend levels, which are based on large data sets and are widely used by insurers and others to estimate expected claim costs and model healthcare utilization.

Table 2 provides the annualized trend assumptions that were used to adjust the allowed claims from the manual period to the projection period. The overall trend used to get from the manual period to the projection period is based on an unleveraged prospective annual trend of 4.4%.

Table 2 Annual Trend Assumptions			
Benefit Category	Trend		
	Utilization	Unit Cost	Total
Inpatient	0.4%	4.4%	4.8%
Outpatient	1.4%	3.7%	5.2%
Physician	1.4%	2.3%	3.7%
Other	1.4%	2.3%	3.7%
Capitation	0.0%	0.0%	0.0%
Prescription Drug	1.4%	2.9%	4.3%
Grand Total	1.2%	3.2%	4.4%

A factor of 1.089 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Total Applied Trend Projected Factor" entry of Table 3b — Manual Trend Components of the Rate Exhibits.

- Plan Design Changes

Oscar applied an adjustment to account for the anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the manual period and projection period. Plan behavior change factors were applied at the plan level using factors developed from Oscar's nationwide risk adjusted individual claim experience. The resulting allowed and net claim costs for each plan reflect differences due to cost sharing and the impact of plan behavior change only, and not due to health status.

A second adjustment was included to account for anticipated changes in underlying benefit coverage between the manual period and the projection period capturing inherent differences in EHBs, state mandated benefits, and eliminated benefits.

A combined factor of 1.029 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Change in Benefits" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

- Demographic Shift

An adjustment was included to account for the anticipated changes in demographic mix — in age and gender — between the manual base period and the projection period.

A factor of 1.115 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Change in Demographics" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

- Changes in the Morbidity of the Covered Population

The starting claim experience was adjusted to reflect changes in the anticipated morbidity corresponding to Oscar's projected demographic mix and membership distributions.

A second adjustment was included to reflect anticipated changes to the market morbidity primarily associated with changes in market membership between the manual period and the projection period. Oscar relied upon the Q1 2021 Enrollment by Metal Survey published by PID on April 28, 2021 supporting a market membership decrease of -0.4% between the 2020 and 2021 plan years, which was primarily driven by the structural dynamic that the ongoing COVID-19 pandemic has imposed on the individual market in Pennsylvania. Separately, Oscar anticipated membership growth attributed to increased affordability due to the expansion of the Advanced Premium Tax Credit (APTC) subsidies inherent in the ARP. Further supported by the enrollment windows being extended intra-year in response to the ARP, Oscar projected the market membership to increase by 8.8% between the 2021 and 2022 plan years.

In an effort to quantify the anticipated impact to market morbidity, Oscar analyzed its nationwide individual market membership which persisted from the 2019 to 2020 plan years and constructed a regression analysis to estimate the anticipated market morbidity changes in response to market membership movement between the manual period and the projection period.

Additionally, an adjustment was made to account for the anticipated changes in market morbidity between the Texas and Pennsylvania individual markets. To estimate the market morbidity impact, Oscar relied upon the results of the *Interim Summary Report on Risk Adjustment for the 2020 Benefit Year* published by CMS on March 31, 2021, to estimate the market wide plan liability risk score, allowable rating factor, actuarial value, and induced demand factor for the Texas and Pennsylvania individual markets.

Lastly, an Individual Adjustment factor of 1.010 and Reinsurance Morbidity Adjustment factor of 0.999, as mandated by the PID, were applied to Oscar's estimated morbidity adjustment.

These adjustments reflect the projected change in claim costs outside of the underlying demographics of the covered population and were also utilized when estimating the risk adjustment transfer for the projection period.

A combined factor of 0.974 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT.

Separately, a combined factor of 0.975 is included in the "Change in Morbidity - All Other" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate

Exhibits. This factor is net of the Reinsurance Morbidity Adjustment factor as that is provided separately in the "Change in Morbidity — Impact of Reinsurance Program" entry.

- Change in Network

Oscar applied an adjustment to account for anticipated changes in provider reimbursement levels between the manual period and projection period. The reimbursement changes are in response to modifications to Oscar's underlying contracts with its providers.

A factor of 1.298 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT and the "Change in Network" entry of Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

- Other Adjustments — Prescription Drug Rebates

An adjustment was included to account for the anticipated changes in the level of prescription drug rebates between the manual period and projection period.

A factor of 1.008 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT.

- Other Adjustments — Pooling Charge

An adjustment was included to account for Oscar experiencing lower than expected shock claims during the manual period. In this context, a shock claim is defined as annual costs in excess of \$750,000 per individual claimant.

A factor of 1.001 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT.

- Other Adjustments — Impact of the COVID-19 Pandemic

Oscar anticipated that widespread immunity would be established prior to the 2022 plan year and due to the pandemic's influence on the manual period, Oscar applied an adjustment of 1.068 to normalize the manual period in order to project claim costs to the projection period. In doing so, Oscar removed direct costs associated with the pandemic which included items such as COVID-19 treatment, virus testing, and vaccination costs. Oscar additionally applied a two-part adjustment to normalize the estimated impact of deferred utilization. First, Oscar extrapolated from a partial year of 2020 base experience by leveraging Q3 and Q4 claim experience in order to normalize out the immense dip in utilization witnessed during the first shelter-in-place orders that took place in late Q1 and early Q2. Expected seasonality was factored into the annualization process to capture items such as calendar seasonality and work-day adjustments. Once annualized, Oscar applied a second adjustment to the claim experience to offset deferred, forgone, and suppressed utilization that continued beyond the shelter-in-place orders to restore utilization levels to what would have been expected absent the pandemic.

Oscar applied an adjustment of 1.012 to account for the costs associated with the anticipated introduction of vaccine booster shots in the 2022 plan year. Oscar assumed a 66% adoption rate across the projected membership distribution and an allowed cost of \$120 — \$60 per dose and \$60 in administration — to administer the vaccination.

A second adjustment of 1.003 was included to account for the costs associated with continued virus testing in the projection period. Although it is expected that the majority of the market membership is expected to be

vaccinated by the end of the 2021 plan year, Oscar assumed a small percentage of membership will require additional virus testing in the 2022 plan year with a cost of \$120 to administer each individual test.

A combined factor of 1.094 is included in the "Manual EHB Allowed Claims PMPM" entry on Worksheet 1, Section II of the URRT.

Separately, a combined factor of 1.093 is included in the "Change in Other" entry on Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Inclusion of Capitation Payments

Not applicable.

Credibility of Experience

In accordance with *Actuarial Standards of Practice (ASOP) #25 — Credibility Procedures*, Oscar's internal credibility manual, determined from statistical relationships inherent in nationwide experience in the individual market, assigns full credibility at 70,000 member months. Oscar's experience includes 41,456 member months and is considered 77.0% credible for purposes of developing claim projections. Furthermore, the base period experience was not used to develop the manual rate, so there is no double counting of base period experience.

Establishing the Index Rate

Experience Period

As shown in Worksheet 1, Section II of the URRT, the experience period index rate is \$319.81. The experience period index rate reflects the estimated total combined allowed essential health benefit (EHB) claim experience in the single risk pool, and is not adjusted for payments and charges under the risk adjustment program or for marketplace user fees.

Projection Period

The index rate is defined as the EHB portion of projected allowed claims with respect to trend, benefit, and demographics and divided by all projected single risk pool lives. Oscar's projection period index rate for the 2022 plan year as shown in Worksheet 1, Section II of the URRT is \$414.96.

Development of the Market-Wide Adjusted Index Rate

The market-adjusted index rate is calculated as the sum of the projection period index rate, the impact of the risk adjustment program, and the projected exchange user fees. Table 3 details the projection period index rate, allowable market-wide modifiers as defined in 45 CFR Part 156, §156.80(d), and the resulting market-adjusted index rate.

Table 3	
Market-Adjusted Index Rate	
Description	Value
Projection Period Index Rate	\$414.96
Net Impact of Risk Adjustment Program	\$177.36
Net Impact of State Reinsurance Program	(\$16.01)
Exchange User Fees	\$19.08
Market-Adjusted Index Rate	\$595.39

The adjustments in the table above reflect all of the market-wide modifiers allowed in federal regulation and the average demographic characteristics of the single risk pool. Please note the allowable market-wide modifiers were adjusted to an allowed basis in the development of the market-adjusted index rate which is consistent with the basis of the projected index rate. The market-adjusted modifiers on a net basis are summarized in Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits.

Reinsurance

The starting claim experience was adjusted to reflect the removal of the projected reinsurance recoveries due to the anticipated impact of the state-based reinsurance program proposed in the Pennsylvania 1332 waiver application that was approved by CMS on July 24, 2020. The reinsurance recoveries were developed on a percent of net claims approach using the proposed parameters for the 2022 plan year — \$60,000 attachment point, coinsurance of 45%, up to a reinsurance cap of \$100,000.

Oscar started with a subset of its nationwide claim experience in the individual market as the basis for estimating the impact of reinsurance recoveries on net claims. The claim experience was both trended to the 2022 plan year at similar trend rates to that of what were included in the premium rate projections and additionally calibrated to align with the projected index rate. Oscar then bootstrapped the projected population with membership samples in line with Oscar's population in the Pennsylvania market.

The expected impact of the state reinsurance program was estimated to be a recovery of approximately 3.9% of net claims (i.e. the mean of the bootstrapped samples), which was then applied evenly across all plans in Oscar's individual market single risk pool.

Additionally, Oscar adjusted the risk adjustment transfer to account for the estimated impact of the state-based reinsurance program to the statewide average premium, which was then applied to the rate projection to bring the medical expense (i.e. net claims +/- risk adjustment) levels to market-wide levels, which form the basis of the market-adjusted index rate.

The projected reinsurance recovery amount, expressed on an allowed basis, is estimated as a recovery of \$16.01 and is reflected on Worksheet 1, Section II of the URR.

Risk Adjustment Payment/Charge

To estimate the risk adjustment PMPM, Oscar relied upon the results of the *Summary Report on Permanent Risk Adjustment Transfers for the 2020 Benefit Year* published by CMS on June 30, 2021, in combination with the *Transfer Payment Issuer Report* supplied to Oscar by CMS, to estimate the market wide plan liability risk score, allowable rating factor, actuarial value, statewide average premium, and induced demand factor for the individual market. Oscar's geographic cost factor was also adjusted based on the anticipated geographic mix for the 2022 plan year.

Oscar modeled two independent risk adjustment transfers to appropriately correspond with the risk profile of the members in the underlying experience and manual projections. For the risk adjustment transfer that corresponds to the experience projection, Oscar relied upon projected risk and rating factors that are specific to the experience period in the Pennsylvania market. For the risk adjustment transfer that corresponds to the manual projection, Oscar crosswalked the market metrics — plan liability risk score, statewide average premium, and geographic cost factors — from the manual period (i.e. Texas market) to the projection period (i.e. Pennsylvania market) while maintaining similar relative risk profiles by metal level. The two risk adjustment transfers were then blended by the same credibility weighting used to project allowed claims.

Additional adjustments were made to account for the anticipated changes in the Health and Human Services Hierarchical Condition Categories (HHS-HCC) risk adjustment coefficient changes from the 2020 plan year to the 2022 plan year, for both Oscar and the market. These adjustments were determined from the HHS Risk Weight Conversion Tool that was supplied to Oscar by Wakely on June 22, 2021.

Oscar also included an adjustment to account for the anticipated impact of the Risk Adjustment Data Validation (RADV) audit on the 2022 plan year. To estimate the RADV impact, Oscar relied on historical nationwide experience in the

individual market, measured anticipated risk adjustment coding error rates inherent in the 2019 plan year, and forecasted those error rates to the projection period. The RADV impact is estimated as a payment of \$2.55 PMPM.

Lastly, Oscar considered the impact to the projected risk adjustment transfer for the addition of the high-cost risk pooling mechanism that was implemented starting with the 2018 plan year.

The projected risk adjustment transfer, net of the risk adjustment user fee and expressed on an allowed basis, is estimated as a payment of approximately \$177.36 and is reflected in Worksheet 1, Section II of the URRT.

Any resulting risk adjustment transfer payments would be allocated proportionally across all plans in Oscar's individual market single risk pool.

Detailed quantitative support of the risk adjustment transfer projection is provided in Exhibit C.

Exchange User Fees

The impact of the exchange user fee was based on an overall assessment of 3.2%, weighted on the projected premium associated with the distribution of membership expected to enroll on the exchange.

The projected exchange user fee, expressed on an allowed basis, is estimated as a payment of approximately \$19.08 and is reflected in Worksheet 1, Section II of the URRT.

4.4. Plan-Adjusted Index Rate

Projected Plan-Adjusted Index Rates

Exhibit D summarizes the plan-adjusted index rates, which are determined by applying the allowable plan-level modifiers to the market-adjusted index rate.

The allowable modifiers as described in 45 CFR Part 156, §156.80(d)(2) are the following:

Actuarial Value and Cost-Sharing

Each plan's actuarial value and cost-sharing factor includes a benefit relativity adjustment and the expected impact of the plan's cost sharing amounts on the member's utilization of services. Oscar's internal benefit pricing model, which uses a single claim distribution for all plans, was used to estimate how members purchase services differently based on the level of plan-specific cost sharing. By utilizing a static claim distribution, the pricing model's adjustments assume the same demographic and risk characteristics for each plan priced and therefore exclude expected differences in the health status of members assumed to select each plan.

Plan's Provider Network and Delivery System Characteristics

There are no anticipated plan-specific differences in the provider network or utilization management practices in Oscar's projected product suite.

Plan Benefits in Addition to the EHBs

Oscar's proposed product suite does not cover any benefits above and beyond the EHB services detailed in the Pennsylvania state benchmark plan.

Administrative Costs, Excluding Exchange User Fees

The net claims costs are adjusted to account for expected non-benefit expenses. The resulting administrative cost factors inherent in the plan-adjusted index rate development are not static due to the application of fixed cost allocation on a PMPM basis as opposed to a percent of premium basis. As documented in the market rating rules, 45 CFR 156.80(d)(2),

administrative costs are permitted plan-level adjustments to the index rate. Administrative costs in this context include administrative expenses, taxes and fees (excluding exchange user fees), and profit/risk loads.

Oscar modeled the plan-adjusted index rate development to allocate the fixed cost portion of total administrative expense on a PMPM basis to more appropriately align with the economics of the business.

Exhibit E summarizes the components of the administrative cost factor as shown in Worksheet 2, Section III of the URRT.

Expected Impact of the Specific Eligibility Categories for the Catastrophic Plan

A specific eligibility adjustment reflects the difference in expected demographics between the catastrophic plan and the non-catastrophic plans due to the unique eligibility requirements of the catastrophic plan (i.e. that only individuals under the age of 30 or eligible by reason of financial hardship can enroll). This adjustment reflects that costs vary by age and the cost of the population expected to enroll in the catastrophic plan is anticipated to be lower than non-catastrophic plans.

Oscar is proposing no change to the currently approved catastrophic eligibility adjustment.

4.5. Calibration

A composite calibration adjustment is applied uniformly to all plans. Detailed support of the calibration factor is provided in Exhibit F. The market-wide calibration factor is 1.738.

Age Curve Calibration

The average age factor used in the calibration process is 1.717 and was determined by applying the standard age curve established by HHS to the projected member distribution by age, with an adjustment for non-billable members who exceed the maximum of three child dependents under the age of 21 rule.

Under this methodology, the approximate average age, rounded to the nearest whole number, associated with the single risk pool is 49.

Geographic Factor Calibration

The average geographic rating factor is 1.005. In order to determine the geographic calibration factor the projected distribution of members by area was determined. The weighted average of the area factors was then calculated using this distribution.

Oscar intends to sell individual market products in Bucks, Carbon, Chester, Delaware, Lackawanna, Lancaster, Lehigh, Luzerne, Monroe, Montgomery, Northampton, Philadelphia, and Wyoming counties, which are within Rating Areas 3, 6, 7, and 8. Oscar is expanding its service area to Rating Area 7 effective with the 2022 plan year.

Exhibit G provides a summary of the proposed geographic rating factors applied to the plan-adjusted index rates.

Tobacco Factor Calibration

The average tobacco rating factor used in the calibration process is 1.008.

The tobacco factors by age were developed using a Milliman research report titled *Impact of Height, Weight, and Smoking on Medical Claim Costs*, which tabulates the medical claim costs by age for smokers and non-smokers using a government data source, the Medical Expenditure Panel Survey (MEPS). Smoker prevalence rates, which were utilized above to develop the tobacco calibration factor, were based on Oscar's empirical data, and are not anticipated to be substantially different in the projection period.

Oscar is proposing no change to the currently approved tobacco rating factors.

4.6. Consumer-Adjusted Premium Rate Development

Oscar derives consumer-adjusted premium rates by calibrating the plan-adjusted index rate and applying the rating factors specified by 45 CFR Part 147, §147.102. Exhibit H includes the proposed rate manual and a sample rate calculation.

5. Projected Loss Ratio

Oscar's projected loss ratio based on the federally-prescribed MLR methodology is 91.7%. The numerator of the projected loss ratio contains claim costs and HCQI expenses net of receipts from the risk adjustment program and the denominator consists of total premiums net of premium taxes and regulatory fees. Note the MLR in this context does not capture all adjustments, including multi-year averaging, credibility, and deductible averaging.

A summary of each component included in the loss ratio projection is provided in Exhibit I.

6. Plan Product Information

6.1. AV Metal Values

The AV metal values included in Worksheet 2, Section I of the URRT were based solely on the HHS actuarial value calculator. Copies of the results from the actuarial value calculator including screenshots for each plan are provided as a supplemental supporting document titled "ACA AV Screenshots" accompanying the rate filing submission.

6.2. Membership Projections

Oscar projected membership as displayed in Worksheet 2, Section IV of the URRT by considering the size of the projected Pennsylvania individual market in 2022 as well as our historical enrollment patterns of the Pennsylvania individual market, to estimate our assumed market penetration rate and member months projection. For silver level plans in the individual market, an estimate was made for the portion of projected enrollment that will be eligible for CSR subsidies at each subsidy level. When allocating membership within a metal level, Oscar distributed membership uniformly by plan within each metal level for both new and renewing plans.

Exhibit J summarizes the membership projection by metal level, including the alternative variant silver plans which CSR eligibles can purchase, and exchange status.

6.3. Plan Type

The plan types listed in Worksheet 2, Section I of the URRT appropriately describe Oscar's plans.

7. Miscellaneous Information

7.1. Effective Rate Review Information

CSR Subsidies

Oscar assumed that CSR subsidies will not be funded by the federal government for the 2022 plan year. If CSR funds are not appropriated and CSR plans continue to be offered, Oscar will then be solely responsible for covering cost sharing for these members. The proposed rates contained herein assume that CSR subsidies remain unfunded by the federal government and that the resulting shortfall will be applied exclusively to Oscar's on-exchange silver plans.

Terminated Products

Exhibit L summarizes both the discontinued plans that were included in the single risk pool during the experience period or made available thereafter and the corresponding mapped plans.

Oscar confirms that all discontinued plans are being mapped in accordance with the hierarchy established in 45 CFR 155.355(j). Discontinued plans are mapped at the plan ID level and will be renewed to a different plan within the existing product. Members who do not actively select a different plan during open enrollment will be re-enrolled in a plan at the same metal level as their current QHP. Oscar Silver Classic Next members will be mapped to the Oscar Silver Classic plan and Oscar Silver Classic Copay members will be mapped to the Oscar Silver Elite- \$0 Ded plan.

Renewability

The products offered within this filing are all guaranteed issue (i.e., no medical underwriting) and guaranteed renewable as required under the ACA. This rate filing applies to non-grandfathered plans only that are open to new sales. Premiums will be charged on a monthly basis and are guaranteed for the duration of the 2022 plan year.

Pennsylvania Actuarial Memorandum and Rate Exhibits

The following information was added to comply with Section D of the 2022 ACA Compliant Health Insurance Rate Filing Guidance and a crosswalk of the various requirements is summarized in Exhibit K.

1A — Company Information

Refer to Table 0 — Identifying Information of the Rate Exhibits for general company information.

1B — Rate History and Proposed Variations in Rate Changes

Table 4 provides Oscar's most recent three years of historical rate changes in Pennsylvania, including the proposed rate change for 2022. Historical filed and approved rate changes varied by plan due to a combination of factors including shifts in benefit leveraging, cost-sharing modifications, and geographic rating factors.

Table 4		
Rate Change History		
Plan Year	Average Rate Change	SERFF ID
2022	-7.9%	OHIN-132808338
2021	6.9%	OHIN-132370048
2020	New Product	OHIN-131948291

1C — Average Rate Change

The average rate change over all plans from 2021 to 2022 using the calibrated adjusted index rate is -7.9%. The average rate change for a 21-year-old non-tobacco premium over all plans and rating areas from 2021 to 2022 is -5.3%. Rates are weighted on Oscar's Pennsylvania individual membership as of February 1, 2021. Refer to Table 10 — Plan Rates and Table 11 — Plan Premium Development for 21-Year-Old Non-Tobacco User of the Rate Exhibits for additional details.

1D — Membership Count

Refer to Table 1 — Number of Members of the Rate Exhibits for the projected and current (as of February 2021) average age and member months by age group in the rating period.

1E — Benefit Changes

Refer to the Cost Sharing Changes tab in the attached supplemental supporting document titled "ACA Supporting Rate Exhibits" accompanying the rate filing submission.

Refer to Section 4.4 — Plan-Adjusted Index Rate for a description of the pricing assumptions used in development of the proposed premium rates.

1I — Historical Experience

Refer to Table 4 — Historical Experience and Table 4b — Manual Historical Experience of the Rate Exhibits for historical experience estimates for both the experience period and manual period sources.

Refer to Section 4.3 — Projection Factors for a description of the unit cost and utilization trends by service category that were assumed in both the experience period and manual period rate development.

2A — Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

Table 5 provides support for the average projected paid-to-allowed ratio. The average projected allowed and incurred PMPM reflect the member month weighted average from Worksheet 2, Section IV of the URRT.

Table 5	
Projected Paid-to-Allowed Ratio	
Description	Value
Allowed Claim PMPM	\$414.96
Net Claim PMPM	\$330.72
Paid-to-Allowed Ratio	0.797

Please note the original formula of the paid-to-allowed ratio in Table 5 — Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims of the Rate Exhibits was linked to the membership-weighted average of the paid-to-allowed ratios in cell K15 from Table 10 — Plan Rates of the Rate Exhibits, which is based on current membership as of February 2021. This weighted average is not adjusted for differences in the magnitude of allowed and paid claims and is based on current membership as opposed to projected membership. The formula was overwritten as the ratio of the membership weighted average projected incurred claims PMPM and the membership weighted average allowed claims PMPM using projected membership for the 2022 plan year.

Refer to Section 4.3 — Projection Factors and Section 4.4 — Plan-Adjusted Index Rate for a detailed explanation of the development of the projected index rate, projected market-adjusted index rate, and projected allowed claims.

2B — Retention Items

Refer to Table 6 — Retention of the Rate Exhibits for an illustration of the non-benefit expenses, profit, and risk reflected in the projected premium rates.

The proposed commission schedule for the 2022 plan year that Oscar applies to policies in the individual market is \$20 PMPM for both new business and renewal business. This commission schedule shall remain in effect until terminated or replaced by Oscar in writing and within the company's sole discretion. For purposes of this commission schedule, "Initial Term" shall include the months of the first calendar year that the applicable coverage is in effect, up to and including December 31 of the first calendar year. "Renewal Term" shall refer to any months after the "Initial Term" for which the applicable coverage is in effect.

The percentage of members estimated to come through Oscar's broker channel is 23.0%. Using the proposed commission schedule of \$20.00 PMPM, along with override and bonus compensation, this results in a broker commission assumption of \$7.51 PMPM (or 1.4% of premium) at the total book level.

In addition, the net claims costs are adjusted to account for expected non-benefit expenses. The resulting administrative cost factors inherent in the plan-adjusted index rate development are not static due to the application of fixed cost

allocation on a PMPM basis as opposed to a percent of premium basis. As documented in the market rating rules, 45 CFR 156.80(d)(2), administrative costs are permitted plan-level adjustments to the index rate. Administrative costs in this context include administrative expenses, taxes and fees (excluding exchange user fees), and profit/risk loads.

Oscar modeled the plan-adjusted index rate development to allocate the fixed cost portion of total administrative expense on a PMPM basis to more appropriately align with the economics of the business.

2D — Components of Rate Change

Refer to Table 8 — Components of Rate Change and Table 9 — Year-Over-Year Data to Support Table 8 of the Rate Exhibits for the components of the rate change.

Note that Line H does not match Line A in Table 8 — Components of Rate Change of the Rate Exhibits for a number of reasons, including the following:

- The Calibrated Plan Adjusted Index Rate shown in Line A is weighted on current membership, but many of the factors applied to the base period allowed claims before normalization in Line B, including those in Table 7 — Normalized Market-Adjusted Projected Allowed Total Claims and Table 9 — Year-Over-Year Data to Support Table 8 of the Rate Exhibits, are weighted on projected membership.
- The Normalized Reinsurance Recoveries shown in Line D7 are added to the base period allowed claims (after normalization) in Line D1, when they should be subtracted.
- The retention components shown in Lines F1 to F3 are calculated as a percentage of the Plan Adjusted Index Rate in Table 10 — Plan Rates of the Rate Exhibits, but are applied as a percentage of the Calibrated Plan Adjusted Index Rate in Table 8 — Components of Rate Change. This leads to discrepancies when there are fixed PMPM administrative expenses as is the case for the 2022 plan year.

4 — Plan Premium Development for 21-Year-Old Non-Tobacco User

Refer to Table 11 — Plan Premium Development for 21-Year-Old Non-Tobacco User of the Rate Exhibits for an illustration of the development of the premium rate offered to a 21-year-old non-tobacco user in the Pennsylvania individual market for the 2022 plan year.

5E — Composite Rating

Not applicable.

Additional Exhibits — MLR Exhibit

Not applicable. Oscar entered the Pennsylvania individual market starting with the 2020 plan year.

7.2. Reliance

In developing this rate filing, several internal departments were relied upon for information and assumption setting. This information includes Corporate Actuarial providing rating factors, claim trend projections, and membership projections and Financial Planning and Analysis providing non-benefit expenses, taxes and fees. I have performed a limited review of this information and have deemed it to be reasonable.

7.3. Actuarial Certification

I, [REDACTED], am an Actuary for Oscar. I am a member of the American Academy of Actuaries and I meet the qualification standards of the Academy to render the actuarial opinion contained herein.

I hereby certify that the projected index rate is to the best of my knowledge and understanding:

- In compliance with all applicable state and federal statutes and regulations (45 CFR Part 156, §156.80(d)(2) and 45 CFR Part 147, §147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice, including but not limited to:
 - ASOP No. 5, *Incurred Health and Disability Claims*,
 - ASOP No. 8, *Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health Benefits*,
 - ASOP No. 12, *Risk Classification*,
 - ASOP No. 23, *Data Quality*,
 - ASOP No. 25, *Credibility Procedures*,
 - ASOP No. 26, *Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans*,
 - ASOP No. 41, *Actuarial Communications*,
 - ASOP No. 42, *Determining Health and Disability Liabilities Other than Liabilities for Incurred Claims*,
 - ASOP No. 45, *The Use of Health Status Based Risk Adjustment Methodologies*, and
 - ASOP No. 50, *Determining Minimum Value and Actuarial Value Under the ACA*.
- Reasonable in relation to the benefits provided and the population anticipated to be covered, and
- Neither excessive nor deficient.

I further certify that:

- The index rate and only the allowable modifiers as described in 45 CFR Part 156, §156.80(d)(1) and 45 CFR Part 156, §156.80(d)(2) were used to generate plan level rates,
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area,
- The AV calculator was used to determine the AV metal values shown on Worksheet 2 of the Part I URRT for all plans,
- All factor, benefit, and other changes from the prior approved filing have been discussed in the actuarial memorandum,
- The proposed new plans are not modifications of an existing plan, and
- The information presented in the Pennsylvania Actuarial Memorandum and Pennsylvania Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2022 Rate Filing Justification.

URRT and Rate Exhibit Methodology

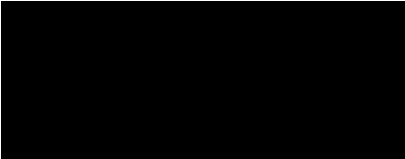

The Part I URRT and the Rate Exhibits do not demonstrate the process used by Oscar to develop proposed premium rates. It is representative of information required by federal and state regulation to be provided in support of the review

of rate increases, for certification of qualified health plans and for certification that the index rate is developed in accordance with federal regulations and used consistently and only adjusted by the allowable modifiers.

COVID-19 Pandemic

The starting claim experience was adjusted from the base period to the projection period to reflect the anticipated impact of items such as the normalization of the experience period and the introduction of diagnostic testing and vaccine booster costs in response to the ongoing COVID-19 pandemic and its associated impact on the individual market in Pennsylvania. Future regulatory, legislative, or economic changes may affect the extent to which the rates presented herein are neither excessive nor deficient.

Rating Area Data Collection

*Specify the total number of Rating Areas
Select only the Rating Areas you are
To validate, select the Validate button
To finalize, select the Finalize button*

Rating Area	Rating Factor
Rating Area 3	0.8779
Rating Area 6	1.0428
Rating Area 7	1.0578
Rating Area 8	1.0152

2022 Rates Table Template v11.0

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

Dear Jacob Dority,

Introduction:Oscar Individual Data Call - OHIN-132808338
June 10th, 2021

Dear Jacob Dority,

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. To complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided Tuesday, June 22nd. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandum and Pennsylvania Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Consultant Questions:

1. The current membership in the PA Rate Template (4,191) does not tie to the current membership in Exhibit A (3,644). Please provide an explanation for the discrepancy or update the necessary files accordingly.
 - a. Additionally, please state the month and year of membership used in exhibit G of the "Pennsylvania 2022 Actuarial Memorandum Supplement.xlsx" file.
2. Several of the values in table 2 of the PA Rate Template do not match what is displayed in table 4. The same issue seems to occur with tables 2b and 4b of the same workbook. For example, the premium in table 2 is \$23,597,930.61 and the premium in table 4 is \$23,597.61. Please provide an explanation for the discrepancy or update the necessary files accordingly.
3. Several plans in table 10 of the PA Rate Template have metallic tiers which do not align with the metallic tier actuarial value (AV) or the plan name (i.e. the "Bronze Classic" plan has a metallic tier of "Silver" with a metallic tier AV of 0.626). Please update all information in the table as well as any other items which are impacted by any changes to the table (e.g., Actuarial Memorandum, rate justification).

4. Please provide detailed quantitative support for the trend assumptions, both cost trend and utilization trend, included in Tables 3 and 3b of the PA Rate Template as well as the reasoning and support for the differences in the values between the two tables.
5. Please provide a detailed quantitative exhibit displaying the development and sources of data, as necessary, of the various adjustment factors referenced in the Actuarial Memorandum, for both the experience and manual projections. These adjustments as noted in the Actuarial Memorandum are listed below, but any additional items not listed but used in the development of the rates should be included.
 - a. Plan design changes
 - b. Demographic shift
 - c. Morbidity adjustment
 - i. Adjustment due to projected demographic mix and membership distribution changes
1. Provide quantitative support for this adjustment being mutually exclusive from the "demographic shift" adjustment
- ii. Market morbidity changes (e.g. due to passage of the American Rescue Plan)
- iii. Texas to Pennsylvania morbidity adjustment for the manual rate
- d. Network change
- e. Pharmacy drug rebates
- f. Pooling charge
- g. COVID-19 impact
- i. 2020 experience normalization
- ii. Vaccine and booster costs
- iii. Continued virus testing
6. Please provide additional quantitative support for the build-up of the membership distribution and claims cost assumptions included on tab 'II.b. Reins Table – Proj' of the PA Rate Template.
7. Please provide a detailed quantitative exhibit displaying the development of the projected 2022 risk transfer payment. This exhibit should provide the support and detail for all adjustments applied in moving from the base assumption (i.e. 2020 interim report) to the assumption used in the 2022 risk transfer payment calculation. In providing your response, please include the following information for both the experience and manual projections:
 - a. The Company's projected 2022 PLRS, ARF, IDF, and GCF factors for 2022. Please include quantitative support for the following adjustments used when developing the 2022 PLRS, as discussed in the Actuarial Memorandum:
 - i. Expected changes as a result of moving to the proposed 2022 risk adjustment model. Please explain whether the Company is assuming that changes to the risk adjustment model will impact the Company in the same manner as the rest of the PA Individual Market.
 - ii. How the Company's projected morbidity change was included in the calculation, as discussed in the Actuarial Memorandum.
 - iii. Additional detail and support for how the crosswalking of the market metrics for the manual projection was performed
 - b. The PA projected state average premium PMPM (prior to the application of the 0.86 adjustment), PLRS, ARF, IDF, and GCF for the individual market for 2022. Please include quantitative support for the following adjustments used when developing the 2022 PLRS, as discussed in the Actuarial Memorandum:
 - i. Expected changes as a result of moving to the proposed 2022 risk adjustment model.
 - ii. Expected changes in market-wide morbidity, as discussed in the Actuarial Memorandum.
8. Please provide a quantitative development of the projected incurred exchange user fee percentage applied in Table 5 of the PA Rate Template.
9. Please provide quantitative and qualitative support for the development of the current and proposed rating region factors.
10. For each month between January 2021 and the most recent date available (e.g., June 11, 2021), please provide the average count of Individual ACA enrollment, split by On-Exchange APTC, On-Exchange non-APTC, and Off-Exchange members. Please provide the enrollment data for each available month separately.
11. For the On-Exchange non-APTC members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.
12. For the Off-Exchange members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

Department Questions:

13. Per the PAAM Exhibits Table 1: Cell E18, the Total Projected Rating Period Member-Months is 50,770. However, based on the URRT, WKST 1: Cell F48, the Projected Member Months is 70,899. These two numbers should be consistent. Please make the necessary updates.
 - a. If the URRT, Projected Member Months figure changes, please be sure to update Worksheet 2, Section IV: Projected Plan Level Information, Row 4.9 Projected Member-Months as well.
14. In Section 1: Experience Period Data, Incurred Claims in the Experience Period is equal to \$11,263,303.82. However,

based on the PAAM Exhibits, Table 2, the incurred claims are equal to \$10,587,286.54. The incurred claims formula for Table 2, of the PAAM Exhibits, is Ultimate Incurred Claims (D36) + Total Prescription Drug Rebates (I36) + Total EHB Capitation (J36) + Total Non-EHB Capitation (K36). In the URRT calculation Total Prescription Drug Rebates are not included in the calculation of Incurred Claims in the Experience Period. Please update or explain why Total Prescription Drug Rebates are not included in the Incurred Claims calculation in the URRT worksheet.

15. Per the PAAM Exhibits, Table 2: Experience Period Claims and Premium, the Earned Premium is \$23,597,930.61. However, based on Table 4: Historical Experience, the Total Annual Premium for Year 2020 is \$23,597.61. Please update so that these numbers are consistent.

16. Per the PAAM Exhibits, Table 2: Experience Period Claims and Premium, the Paid Claims are \$10,306,420.98. However, for Table 4: Historical Experience, the sum of incurred claims for year 2020 is \$10,728,075.52. Please explain the reason for the difference between these two numbers.

17. Per Table 6: Retention, the Agent/Broker Fees and Commissions is \$7.52 PMPM. Please provide the current commission schedule and quantitatively show the development of the \$7.52 PMPM amount.

18. Per Table 6: Retention, the Quality Improvement Initiatives is 1.54%. Please an exhibit which quantitatively supports this quality improvement initiatives amount. Also, provide a qualitative response explaining what the quality improvement initiatives Oscar plans on incorporating for plan year 2022.

19. In Exhibit H – Geographic Cost Factors, the current and proposed area factor are provided. Please quantitatively show the development of the Proposed Area Factors.

20. Currently the Service Area Map submitted only has one map. Per the Pennsylvania Final Rate Filing Guidance, there should be two service area maps, one which represents plan year 2021 and the other which represents plan year 2022. Please resubmit an updated Service Area Map.

21. Please provide a list which describes each location where any pricing assumptions were affected due to COVID-19

22. Please explain how the passage of the American Rescue Plan has influenced the rate filing assumptions.

23. Please provide an exhibit which demonstrates that the criteria for the expanded bronze plan(s) have been met.

24. Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Please be advised that there may be additional questions based on the responses to the above. Responses to this request should be provided via SERFF in Microsoft Excel spreadsheets. Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at (717) 805-5707 or davdagosti@pa.gov.

Sincerely,

David D'Agostino | Accident & Health Actuary
Bureau of Life, Accident & Health Insurance
Office of Insurance Product Regulation & Administration

Conclusion:

Sincerely,
David D'Agostino

Re: Objection Cover Letter for OHIN-132808338

Dear David D'Agostino,

This cover letter is in response to the June 10, 2021 questions regarding Oscar Health Plan of Pennsylvania, Inc. individual rate filing. This cover letter details the changes made to the Pennsylvania Actuarial Memorandum Rate Exhibits and the reasons for the changes.

1. In response to Question 2 and 15, Table 4 and 4b were corrected to match Table 2 and 2b, respectively.
2. In response to Question 3, the metallic tiers in Table 10 were corrected for the following plans
 - a. Bronze Classic
 - b. Bronze Elite- PCP Saver
 - c. Silver Simple- Specialist Saver
 - d. Silver Classic Off-Ex
 - e. Secure
 - f. Gold Classic
 - g. Bronze Simple- HSA
 - h. Silver Classic- HSA
 - i. Silver Elite- \$2000 Ded
 - j. Bronze Classic- \$3000 Ded
 - k. Bronze Classic- \$4700 Ded
 - l. Silver Simple- HSA
 - m. Silver Elite- \$0 Ded
 - n. Bronze Elite- \$1000 Ded
 - o. Bronze Elite- \$100 Ded
 - p. Silver Simple- For Diabetes
 - q. Silver Classic- PCP Saver
 - r. Silver Elite
3. In response to Question 13, the Total Projected Rating Period Member-Months in Table 1 has been updated to align with the URRT.
4. In response to Question 14, Table 2 and 2b were updated such that the Ultimate Incurred Claims (D36) is before Prescription Drug Rebates.
5. In response to Question 16, Table 2 was updated such that the incurred claims includes HCRA, CLA, and miscellaneous claims to align with Table 4.

Please feel free to reach out to us if you have any additional questions. Thank you.

Re: Response to Objection Letter for OHIN-132808338

Dear David D'Agostino,

This letter is in response to the June 10, 2021 questions regarding Oscar Insurance Company Individual rate filing. For your convenience, I have included your question in *blue italics* with my responses to each question below.

1. *The current membership in the PA Rate Template (4,191) does not tie to the current membership in Exhibit A (3,644). Please provide an explanation for the discrepancy or update the necessary files accordingly.*

The current membership estimate of 4,191 in the PA Rate Template includes members in all 2021 plans, while the current membership estimate of 3,611 in Exhibit A is limited to members in 2021 plans that are renewing in 2022 and excludes members in plans that will be terminated.

- a. *Additionally, please state the month and year of membership used in exhibit G of the "Pennsylvania 2022 Actuarial Memorandum Supplement.xlsx" file.*

Membership used in exhibit G of the "Pennsylvania 2022 Actuarial Memorandum Supplement.xlsx" file is as of March 2021.

2. *Several of the values in table 2 of the PA Rate Template do not match what is displayed in table 4. The same issue seems to occur with tables 2b and 4b of the same workbook. For example, the premium in table 2 is \$23,597,930.61 and the premium in table 4 is \$23,597.61. Please provide an explanation for the discrepancy or update the necessary files accordingly.*

Please see the updated PA Rate Template showing correct values for Table 4 that match Table 2. The small differences between Tables 2b and 4b are due to rounding.

3. *Several plans in table 10 of the PA Rate Template have metallic tiers which do not align with the metallic tier actuarial value (AV) or the plan name (i.e. the "Bronze Classic" plan has a metallic tier of "Silver" with a metallic tier AV of 0.626). Please update all information in the table as well as any other items which are impacted by any changes to the table (e.g., Actuarial Memorandum, rate justification).*

Please see the updated PA Rate Template showing correct metallic tiers. No other items are impacted by this update.

4. *Please provide detailed quantitative support for the trend assumptions, both cost trend and utilization trend, included in Tables 3 and 3b of the PA Rate Template as well as the reasoning and support for the differences in the values between the two tables.*

Utilization Trend

Oscar developed the utilization trends at the broad service category level for inpatient facility, outpatient facility, physician, other, and prescription drugs. Utilization trend assumptions were estimated using Milliman's 2020 HCG secular utilization trend levels, which are based on large data sets and are widely used by insurers and others to estimate expected claim costs and model healthcare utilization. These trends are consistent with other industry analyses and, among other things, reflect the following observations:

- Inpatient facility utilization trends have been low, and often negative, the last few years as there have been efforts in the healthcare industry to shift care from inpatient to less expensive outpatient settings, like ambulatory care centers.
- While outpatient facility and professional/other medical utilization trends have also been low in recent years, there has been a recent uptick. Much of this is due to shifts in sites of service, as discussed above, as well as the recovering economy, since these services are often more elastic and subject to consumer choice than inpatient services.
- While we relied on Milliman's HCGs for pharmacy trends, we assessed these trends relative to other industry pharmacy trend studies. More specifically, Milliman's HCG pharmacy trends are in line with those summarized by Evernorth in its 2020 Drug Report.
- These trend assumptions are secular, industry-wide trends and do not reflect any differences in projected utilization due to geographic region on either the state or county level. These trends are based on the healthcare environment at the time of the rate filing and do not reflect the impact of any potential health care reform or changes in market morbidity.

Unit Cost Trend

Oscar's physician and facility unit cost trends were developed from its contracts with providers and anticipated reimbursement levels for 2022. Prescription drug unit cost trends were developed based on Milliman's 2019 commercial HCGs and other industry sources described above. Pharmacy rates are reflective of changes to Oscar's anticipated 2022 contracts with its Pharmacy Benefit Manager (i.e., average wholesale price discounts, dispensing fees, rebates, and formulary).

Methodological Approach to Rating

Table 1 provides the annualized trend assumptions that were used to adjust the allowed claims from the experience period to the projection period. The overall trend used to get from the experience period to the projection period is based on an unleveraged prospective annual trend of 4.0%.

Table 1 Experience Annual Trend Assumptions			
Benefit Category	Trend		
	Utilization	Unit Cost	Total
Inpatient	0.4%	2.1%	2.5%
Outpatient	1.4%	1.6%	3.0%
Physician	1.4%	4.7%	6.2%
Other	1.4%	4.7%	6.2%
Capitation	0.0%	0.0%	0.0%
Prescription Drug	2.4%	3.0%	5.5%
Grand Total	1.2%	2.7%	4.0%

In contrast, Table 2 provides the annualized trend assumptions that were used to adjust the allowed claims from the manual period to the projection period. The overall trend used to get from the manual period to the projection period is based on an unleveraged prospective annual trend of 4.4%.

Table 2 Manual Annual Trend Assumptions			
Benefit Category	Trend		
	Utilization	Unit Cost	Total
Inpatient	0.4%	4.4%	4.8%
Outpatient	1.4%	3.7%	5.2%
Physician	1.4%	2.3%	3.7%
Other	1.4%	2.3%	3.7%
Capitation	0.0%	0.0%	0.0%
Prescription Drug	1.4%	2.9%	4.3%
Grand Total	1.2%	3.2%	4.4%

The differences between the experience and the manual trend assumptions can be mostly attributed to differences in unit cost trends between Pennsylvania (experience rate) and Texas (manual rate), including differences in anticipated escalators that we have in contract with our networks in the two states. Oscar's methodological approach is to trend both projections to the projection period prior to deriving the network adjustment, which ensures that both projections are on similar bases prior to the application of credibility.

5. *Please provide a detailed quantitative exhibit displaying the development and sources of data, as necessary, of the various adjustment factors referenced in the Actuarial Memorandum, for both the experience and manual projections. These adjustments as noted in the Actuarial Memorandum are listed below, but any additional items not listed but used in the development of the rates should be included.*

Please reference the "Rate Factor Development" sheet included in the attachment titled "PA Objection 20210622 Exhibit.xlsx" for a summary of the quantitative components included in the factor projections.

6. *Please provide additional quantitative support for the build-up of the membership distribution and claims cost assumptions included on tab 'II.b. Reins Table – Proj' of the PA Rate Template.*

Oscar started with a sample of its claim experience inherent in the manual rate which included roughly 670k member months in the individual market from January 1, 2019 through December 31, 2019, with claim runout through March 31, 2021, as the basis for estimating the impact of reinsurance recoveries on net claims. Oscar deemed experience from the 2019 plan year to be more appropriate for reinsurance parameter modeling as the 2020 plan year was materially impacted by the pandemic. The 2019 plan year claim experience was trended to the 2022 plan year at similar trend rates to that of what were included in the premium rate projections. Oscar then bootstrapped the population with membership samples in line with Oscar's membership projection for the Pennsylvania market.

7. *Please provide a detailed quantitative exhibit displaying the development of the projected 2022 risk transfer payment. This exhibit should provide the support and detail for all adjustments applied in moving from the base assumption (i.e. 2020 interim report) to the assumption used in the 2022 risk transfer payment calculation. In providing your response, please include the following information for both the experience and manual projections:*

Please reference the "Risk Adjustment Factors" sheet included in the attachment titled "PA Objection 20210622 Exhibit.xlsx" for a more granular summary of the risk adjustment forecast including the individual component parts for both the experience and manual projections.

a. The Company's projected 2022 PLRS, ARF, IDF, and GCF factors for 2022. Please include quantitative support for the following adjustments used when developing the 2022 PLRS, as discussed in the Actuarial Memorandum:

The carrier-specific PLRS, ARF, IDF, and GCF components inherent in the 2022 risk adjustment forecast are displayed on the "Risk Adjustment Factors" sheet included in the attachment titled "PA Objection 20210622 Exhibit.xlsx."

i. Expected changes as a result of moving to the proposed 2022 risk adjustment model. Please explain whether the Company is assuming that changes to the risk adjustment model will impact the Company in the same manner as the rest of the PA Individual Market.

Additional adjustments were made to account for the anticipated changes in the Health and Human Services Hierarchical Condition Categories (HHS-HCC) risk adjustment coefficient changes from the 2020 plan year to the 2022 plan year, for both Oscar and the market. These adjustments were determined from the HHS Risk Weight Conversion Tool that was supplied to Oscar by Wakely on February 15, 2021.

Oscar estimated the coefficient changes, expressed as a percent change in PLRS, from the 2021 plan year to the 2022 plan year to be the following:

- -1.1% for the state market, non-catastrophic risk pool,
- +4.0% for the state market, catastrophic risk pool,
- -1.2% for Oscar, non-catastrophic risk pool, and
- -1.2% for Oscar, catastrophic risk pool.

ii. How the Company's projected morbidity change was included in the calculation, as discussed in the Actuarial Memorandum.

Oscar anticipated that the morbidity changes inherent in both the carrier-specific population and the market-specific population would be identical, which has an offsetting effect in the risk adjustment transfer projection.

iii. Additional detail and support for how the crosswalking of the market metrics for the manual projection was performed

For the risk adjustment transfer that corresponds to the manual projection, Oscar crosswalked the risk and rating terms inherent in the risk adjustment transfer formula — including items such as plan liability risk score, statewide average premium, and geographic cost factors — from the manual period (i.e. Texas market) to the projection period (i.e. Pennsylvania market) while maintaining similar relative risk profiles by metal level. The two risk adjustment transfers were then blended by the same credibility weighting used to project allowed claims.

At a high level, in the risk adjustment transfer calculation, Oscar replaced the statewide average premium from the manual period market (i.e. Texas) with the statewide average premium from the projection period market (i.e. Pennsylvania). The statewide average premium metrics, prior to 2021 and 2022 premium trend, were sourced from the *Interim Summary Report on Risk Adjustment for the 2020 Benefit Year* (Interim Report) published by CMS on March 31, 2021. Similarly, the relative PLRS and ARF metrics, measured from the Interim Report, between the two markets was considered when adjusting the market risk and rating terms for anticipated differences in the PLRS and ARF between the manual period market (i.e. Texas) and the projected period market (i.e. Pennsylvania). The relative measures were considered due to lack of PLRS completion inherent in the Interim Report, which inherently assumes the completion pattern is similar across both states. The AV and IDF metrics for the market risk and rating terms were sourced directly from the Interim Report. The sole exception in the transfer formula relates to the GCF components, which were sourced from the Wakely WNRAR reporting project for the 2020 plan year.

b. The PA projected state average premium PMPM (prior to the application of the 0.86 adjustment), PLRS, ARF, IDF, and GCF for the individual market for 2022. Please include quantitative support for the following adjustments used when developing the 2022 PLRS, as discussed in the Actuarial Memorandum:

The market-specific PLRS, ARF, IDF, and GCF components inherent in the 2022 risk adjustment forecast are displayed on the "Risk Adjustment Factors" sheet included in the attachment titled "PA Objection 20210622 Exhibit.xlsx."

i. Expected changes as a result of moving to the proposed 2022 risk adjustment model.

See the response to question 7a(i).

ii. Expected changes in market-wide morbidity, as discussed in the Actuarial Memorandum.

See the response to question 7a(ii).

8. Please provide a quantitative development of the projected incurred exchange user fee percentage applied in Table 5 of the PA Rate Template.

Please see the table below for the quantitative support of the projected exchange user fee.

Projected Exchange User Fee		
Description		Definition
% of projected MM on exchange	96.3%	A
Exchange user fee, % of premium	3.0%	B
Projected exchange user fee, % of premium	2.9%	$C = A \times B$
Projected premium, PMPM	\$526.18	D
Projected exchange user fee, PMPM	\$15.20	$E = C \times D$

9. Please provide quantitative and qualitative support for the development of the current and proposed rating region factors.

The rating area factors are based on Milliman's 2020 Commercial Health Cost Guidelines (HCGs) and Oscar's anticipated 2022 provider contracts. The geographic factors used incorporate differences in unit cost and utilization (i.e., provider practice pattern) differences only, and do not reflect any differences in population morbidity.

The table below provides the change in area factor between the 2021 and 2022 plan years. Additional quantitative support is detailed in question 19.

Rating Area	Description	Member Distribution ¹	Area Factor		% Change
			Current ²	Proposed	
3	Scranton	14.6%	0.843	0.878	4.1%
6	Allentown	15.7%	1.013	1.043	3.0%
7	Central PA	0.0%	n/a	1.058	n/a
8	Philadelphia	69.7%	1.029	1.015	-1.4%
Total		100.0%	0.999	0.999	0.0%

¹Membership distribution as of March 2021.

²The current factors were normalized with the current distribution for comparison purposes.

10. For each month between January 2021 and the most recent date available (e.g., June 11, 2021), please provide the average count of Individual ACA enrollment, split by On-Exchange APTC, On-Exchange non-APTC, and Off-Exchange members. Please provide the enrollment data for each available month separately.

The table below summarizes Oscar's monthly membership as of June 11, 2021.

Month	On-Exchange APTC	On-Exchange Non-APTC	Off-Exchange	Total
January 2021	3,273	382	118	3,773
February 2021	3,497	483	114	4,094
March 2021	3,501	470	114	4,085
April 2021	3,558	466	110	4,134
May 2021	3,695	479	110	4,284

11. *For the On-Exchange non-APTC members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.*

Our membership projection model primarily anticipates migration from two sources — the uninsured/employer markets to the ACA individual market and from off-exchange to on-exchange within the ACA market. Inherent in the model is an assumption that 100% of on-exchange, non-APTC membership will remain on-exchange.

12. *For the Off-Exchange members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.*

We expect that 20% of the current off-exchange members will enroll through the exchange in the projection period and take advantage of the enhanced and expanded subsidies as a result of the ARP.

13. *Per the PAAM Exhibits Table 1: Cell E18, the Total Projected Rating Period Member-Months is 50,770. However, based on the URRT, WKST 1: Cell F48, the Projected Member Months is 70,899. These two numbers should be consistent. Please make the necessary updates.*

Table 1 in the PAAM Exhibits has been updated with the corrected rating period member month distribution that aligns with Worksheet 1 of the URRT.

a. If the URRT, Projected Member Months figure changes, please be sure to update Worksheet 2, Section IV: Projected Plan Level Information, Row 4.9 Projected Member-Months as well.

Not applicable.

14. *In Section 1: Experience Period Data, Incurred Claims in the Experience Period is equal to \$11,263,303.82. However, based on the PAAM Exhibits, Table 2, the incurred claims are equal to \$10,587,286.54. The incurred claims formula for Table 2, of the PAAM Exhibits, is Ultimate Incurred Claims (D36) + Total Prescription Drug Rebates (I36) + Total EHB Capitation (J36) + Total Non-EHB Capitation (K36). In the URRT calculation Total Prescription Drug Rebates are not included in the calculation of Incurred Claims in the Experience Period. Please update or explain why Total Prescription Drug Rebates are not included in the Incurred Claims calculation in the URRT worksheet.*

Table 2 in the PAAM Exhibits has been updated such that the Ultimate Incurred Claims (D36) is before Prescription Drug Rebates. As such, the incurred claim total in Table 2 is equal to \$11,263,303.82, matching the incurred claim total in the URRT.

Table 2b in the PAAM Exhibits has also been updated such that the Ultimate Incurred Claims (D36) is before Prescription Drug Rebates.

15. *Per the PAAM Exhibits, Table 2: Experience Period Claims and Premium, the Earned Premium is \$23,597,930.61. However, based on Table 4: Historical Experience, the Total Annual Premium for Year 2020 is \$23,597.61. Please update so that these numbers are consistent.*

Table 4 in the PAAM Exhibits has been corrected to align with Table 2 in the PAAM Exhibits.

16. Per the PAAM Exhibits, Table 2: Experience Period Claims and Premium, the Paid Claims are \$10,306,420.98. However, for Table 4: Historical Experience, the sum of incurred claims for year 2020 is \$10,728,075.52. Please explain the reason for the difference between these two numbers.

In addition to paid medical and Rx claims, the incurred claims in Table 4: Historical Experience includes HCRA, CLA, and miscellaneous claim items. The miscellaneous claim items include step benefits, pediatric dental and vision benefits, orphaned claims spend estimates, and uncollected grace premium spend estimates. These items have been added to the Paid Claims totals in Table 2 and Table 2b.

17. Per Table 6: Retention, the Agent/Broker Fees and Commissions is \$7.52 PMPM. Please provide the current commission schedule and quantitatively show the development of the \$7.52 PMPM amount.

The commission schedule in place that Oscar applies to policies in the individual market is displayed in the tables below. This commission schedule shall remain in effect until terminated or replaced by Oscar in writing and within the company's sole discretion.

For purposes of this commission schedule, "Initial Term" shall include the months of the first calendar year that the applicable coverage is in effect, up to and including December 31 of the first calendar year. "Renewal Term" shall refer to any months after the "Initial Term" for which the applicable coverage is in effect. To the extent that a Producer earns a commission as set forth in the applicable Appointed Producer Agreement, the commission amount shall be as follows.

New

Maximum Lives per Policy	Percentage of Premium	Flat Dollar Amount
1-5	Not applicable.	\$20 PMPM

Renewing

Maximum Lives per Policy	Percentage of Premium	Flat Dollar Amount
1-5	Not applicable.	\$20 PMPM

Projected Broker Fees and Commissions		
Description		Definition
% of projected MMs broker driven	23%	A
Broker commissions, PMPM	\$20	B
Projected broker commissions, PMPM	\$4.60	C = A x B
Projected broker bonuses, PMPM	\$2.92	D
Projected broker fees and commissions, PMPM	\$7.52	E = C + D

18. Per Table 6: Retention, the Quality Improvement Initiatives is 1.54%. Please an exhibit which quantitatively supports this quality improvement initiatives amount. Also, provide a qualitative response explaining what the quality improvement initiatives Oscar plans on incorporating for plan year 2022.

HCQI expenses are assumed to be \$8.12 PMPM, or approximately 1.5% of the average gross premium estimate of \$526.18 PMPM. The itemized list of HCQI initiatives and associated PMPM allocation are provided in the table below.

HCQI Expenses	
Initiative	PMPM
Improve Health Outcomes	\$0.79
Activities to Prevent Hospital Readmissions	\$5.34
Improve Patient Safety and Reduce Medical Errors	\$0.69
Wellness and Health Promotion Activities	\$1.31
Total	\$8.12

Improve Health Outcomes

This category includes HEDIS Reporting and Compliance, Diabetes Care Management Program, Baby Care Care Management Program, and Delegated Case Management. Oscar utilizes its Member Services and Utilization Management teams to optimize its quality improvement functions. All expenses are allocated based on estimates of time spent on functions that improve the health outcomes of our members.

Activities to Prevent Hospital Readmission

This category includes Post-Discharge Planning and Delegated Discharge Planning. Oscar utilizes its Utilization Management, Medical Operations and Member Services teams to help prevent hospital readmissions. All expenses are allocated based on a study done based on the amount of time they spent on functions that help reduce the amount of hospital readmission of our members.

Improve Patient Safety and Reduce Medical Errors

This category includes Prospective Drug Utilization Reviews, Delegated Prospective Utilization Review Vendors, Prospective Drug Utilization Review Diabetes Program and Prospective Drug Utilization Review Baby Care Program. Oscar utilizes its Utilization Management and Medical Operations teams to improve patient safety and reduce medical errors. All expenses are allocated based on a study done on the amount of time they spent on functions that help reduce the amount of hospital readmission of our members.

Wellness and Health Promotion Activities

This category includes Well Child Visit Call Campaign, Wellness Assessments, Patient Coaching & Education Blog, Flu Vaccine Incentive Program and VNS Flu program, and Wellness Incentive Program. Oscar utilizes its Member Services and Utilization Management team. All expenses are allocated based on time spent on activities that improve the health and wellness of Oscar's members.

19. In Exhibit H – Geographic Cost Factors, the current and proposed area factors are provided. Please quantitatively show the development of the Proposed Area Factors.

The rating area factors are based on Milliman's 2020 Commercial Health Cost Guidelines (HCGs) and Oscar's anticipated 2022 provider contracts. The geographic factors used incorporate differences in unit cost and utilization (i.e., provider practice pattern) differences only, and do not reflect any differences in population morbidity.

Moderate smoothing was considered in the development of the final area factors included in the 2022 rate filing. Oscar applies smoothing factors in an effort to aid in managing the level of volatility inherent in the geographic cohorts, which prevents the area factor model from potentially overcorrecting over time. Actuarial judgement was applied in making the smoothing adjustments.

		A	B	C = A * B	D	E	F = (C / D)^E * D	G = F / F [Total]
Rating Area	Member Distribution ¹	Unit Cost Relativity ²	Utilization Relativity ²	Area Factor [2022, Indicated]	Area Factor [2021, Filed]	Smoothing Adjustment	Area Factor [2022, Smoothed]	Area Factor [2022, Proposed] ³
3	14.6%	0.846	1.125	0.951	0.843	0.333	0.878	0.878
6	15.7%	0.997	1.108	1.105	1.013	0.333	1.043	1.043
7	0.0%	0.935	1.131	1.057	n/a	n/a	1.057	1.058
8	69.7%	1.000	0.987	0.987	1.030	0.333	1.015	1.015
Total	100.0%	0.977	1.026	1.000	1.000		0.999	1.000

¹Membership distribution as of March 2021.

²Unit cost and utilization relativities are expressed on a relative basis to RA 8.

³The factors were calibrated such that the average using the current distribution equals to 1.000.

20. Currently the Service Area Map submitted only has one map. Per the Pennsylvania Final Rate Filing Guidance, there should be two service area maps, one which represents plan year 2021 and the other which represents plan year 2022. Please resubmit an updated Service Area Map.

We have submitted an updated service area map that includes two mappings — one which summarizes the 2021 plan year service area and a second which summarizes the 2022 plan year service area.

21. Please provide a list which describes each location where any pricing assumptions were affected due to COVID-19.

COVID-19 Adjustments Applied to the Experience Rate

In the "Other" entry on Worksheet 1, Section II of the URRT,

- Oscar applied an adjustment of 0.983 to normalize the experience period in order to project claim costs to the projection period. In doing so, Oscar removed direct costs associated with the pandemic which included items such as COVID-19 treatment, virus testing, and vaccination costs. Oscar additionally applied a two-part adjustment to normalize the estimated impact of deferred utilization. First, Oscar extrapolated from a partial year of 2020 base experience by leveraging Q3 and Q4 claim experience in order to normalize out the immense dip in utilization witnessed during the first shelter-in-place orders that took place in late Q1 and early Q2. Expected seasonality was factored into the annualization process to capture items such as calendar seasonality and work-day adjustments. Once annualized, Oscar applied a second adjustment to the claim experience to offset deferred, forgone, and suppressed utilization that continued beyond the shelter-in-place orders to restore utilization levels to what would have been expected absent the pandemic.
- An adjustment of 1.018 to account for the costs associated with the anticipated introduction of vaccine booster shots in the 2022 plan year. Oscar assumed a 66% adoption rate across the projected membership distribution and an allowed cost of \$120 — \$60 per dose and \$60 in administration — to administer the vaccination.

- An adjustment of 1.005 to account for the costs associated with continued virus testing in the projection period. Although it is expected that the majority of the market membership is expected to be vaccinated by the end of the 2021 plan year, Oscar assumed a small percentage of membership will require additional virus testing in the 2022 plan year with a cost of \$120 to administer each individual test.

COVID-19 Adjustments Applied to the Manual Rate

In the “Manual EHB Allowed Claims PMPM” entry on Worksheet 1, Section II of the URRT,

- Oscar applied an adjustment of 1.068 to normalize the manual period in order to project claim costs to the projection period. In doing so, Oscar removed direct costs associated with the pandemic which included items such as COVID-19 treatment, virus testing, and vaccination costs. Oscar additionally applied a two-part adjustment to normalize the estimated impact of deferred utilization. First, Oscar extrapolated from a partial year of 2020 base experience by leveraging Q3 and Q4 claim experience in order to normalize out the immense dip in utilization witnessed during the first shelter-in-place orders that took place in late Q1 and early Q2. Expected seasonality was factored into the annualization process to capture items such as calendar seasonality and work-day adjustments. Once annualized, Oscar applied a second adjustment to the claim experience to offset deferred, forgone, and suppressed utilization that continued beyond the shelter-in-place orders to restore utilization levels to what would have been expected absent the pandemic.
- An adjustment of 1.012 to account for the costs associated with the anticipated introduction of vaccine booster shots in the 2022 plan year. Oscar assumed a 66% adoption rate across the projected membership distribution and an allowed cost of \$120 — \$60 per dose and \$60 in administration — to administer the vaccination.
- An adjustment of 1.003 to account for the costs associated with continued virus testing in the projection period. Although it is expected that the majority of the market membership is expected to be vaccinated by the end of the 2021 plan year, Oscar assumed a small percentage of membership will require additional virus testing in the 2022 plan year with a cost of \$120 to administer each individual test.

22. Please explain how the passage of the American Rescue Plan has influenced the rate filing assumptions.

Oscar anticipated membership growth attributed to increased affordability due to the expansion of the Advanced Premium Tax Credit (APTC) subsidies inherent in the ARP. Further supported by the enrollment windows being extended intra-year in response to the ARP, Oscar projected the market membership to increase by 8.8% between the 2021 and 2022 plan years. Additionally, Oscar anticipated the market membership growth to correspond to a 1.3% decrease in the market morbidity level, which was accounted for in both the allowed claim and the risk adjustment transfer projections. Please note these membership growth and market morbidity estimates correspond to the prospective impact between the 2021 and 2022 plan years and are not explicitly itemized in the actuarial memorandum (which includes a two-year forecast from the 2020 to 2022 plan years).

23. Please provide an exhibit which demonstrates that the criteria for the expanded bronze plan(s) have been met.

A summary of the expanded bronze plans and their associated criteria is provided in the attachment titled "PA Objection 20210622 Exhibit.xlsx".

24. Please confirm that you have tested to ensure that the rates in Table 11 of the PAAM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

Oscar confirms the various submissions are aligned.

Please feel free to reach out to us if you have any additional questions. Thank you.

Dear Jacob Dority,

Introduction:Oscar Individual Data Call - OHIN-132808338
July 6th, 2021

Dear Jacob Dority,

The Pennsylvania Insurance Department has received and conducted a review of the above captioned filing. To complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided Tuesday, July 13th. If you have any questions or difficulties in providing the information within this time frame, please call me.

Please note, each response to a Department data call must contain a cover letter that details the changes made to the Actuarial Memorandum and Pennsylvania Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Consultant Questions:

1. Regarding the response to the prior objection 5, please provide a quantitative development of the below factors which are found on the "Rate Factor Development" tab of the 'PA Objection 20210622 Exhibit' Excel file for both the experience rate and the manual rate.
 - a. Average Risk Score for the Experience Period and Projection Period Membership
 - i. For the projection period membership, why is this factor not the same for the experience rate and manual rate?
 - b. Population Mix Morbidity Adjustment
 - c. Plan Behavior Factor in the Experience Period and Projection Period
 - d. Total Allowed Unit Cost Relativity to PA-008 (manual rate only)
 - e. Utilization Relativity to PA-008 (manual rate only)
2. The following questions are regarding the response to the prior objection 7:
 - a. Please provide the quantitative development and support for the following factors used in the manual rate development portion of the risk adjustment transfer calculation; this development should show and support the adjustments in the cross

walking of the risk and rating terms from the manual period to the projection period as stated in the objection response.

- i. PLRS – Oscar
- ii. PLRS – Market
- iii. ARF – Oscar
- iv. ARF – Market

b. When taking the weighted average of the risk transfer PMPMs based on credibility, we get a value of -\$146.02. Please explain the difference between this amount and the amount in the 'Rate Development & Change' tab of the Actuarial Memorandum (-\$145.94).

3. The following questions are regarding the response to the prior objection 19:

- a. Please provide the quantitative development of the "Unit Cost Relativity" and "Utilization Relativity" factors and show how the Milliman HCGs and Oscar's anticipated 2022 provider contracts were incorporated into these factors.
- b. Subscript 2 states that "Unit cost and utilization relativities are expressed on a relative basis to RA8," but the "Utilization Relativity" for RA8 is not 1.00. Please reconcile this apparent disconnect. In addition, please provide support for not also adjusting the filed 2021 area factors to be expressed on a relative basis to RA8.

4. Regarding the response to the prior question 21, please provide the quantitative development of all aspects of the COVID-19 adjustment noted in the first bullet for both the experience rate and manual rate.

5. Regarding the response to the prior question 22, please provide the location(s) where the 1.3% decrease in the market morbidity were incorporated into the rate development for both the PAAM Exhibits and the URRT.

a. In addition, were any adjustments made in the development of the 1.3% to account for Oscar having a different distribution of on-Exchange membership than the market in total?

6. While this information was previously requested in Round 1, please provide updated information regarding the following items:

a. For each month between January 2021 and the most recent date available, please provide the average count of Individual ACA enrollment, split by On-Exchange APTC, On-Exchange non-APTC, and Off-Exchange members. Please provide the enrollment data for each available month separately.

b. For the On-Exchange non-APTC members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

c. For the Off-Exchange members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.

Department Questions:

7. In the PAAM Exhibits, II.a.Reins Table – Exp tab, please update the Coinsurance Rate, in cell E5, to 40%.

8. Please provide a list of any assumptions that have changed because of the change in the coinsurance rate and explain why.

9. Please update the 2020 experience period risk adjustment amount, in Table 2, to reflect the final CMS risk adjustment amount released on June 30th.

10. If the projected risk adjustment transfer amount in Table 5 was modified due to the final CMS transfer amount published on June 30th, please provide narrative and detailed supporting data to justify the proposed changes.

11. Please provide an exhibit showing the actual experience for calendar years 2016 – 2020 and the projection experience for 2021 and 2022 for the following categories: Member Months, Total Administrative Expenses, Total Incurred Claims, Total Premium, Total Actual Paid Taxes and Fees, Profit, Total Underwriting Gain/Loss and Underwriting Gain/Loss PMPM.

12. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

13. Please ensure that the 7/13/21 versions of the following items are posted in SERFF with your July 13th response to this data call.

- a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits
- d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA")
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Updated Rate Change Request Summary (Attachment I)

i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

14. Please be aware that the final coinsurance parameter will be communicated on Friday, July 16th. Then, the revised exhibits and rates will be due on Tuesday, July 20th.

Please be advised that there may be additional questions based on the responses to the above. Responses to this request should be provided via SERFF in Microsoft Excel spreadsheets. Please retain all formulas.

Should you have any questions regarding this correspondence, please contact me at (717) 805-5707 or davdagosti@pa.gov.

Sincerely,
David D'Agostino | Accident & Health Actuary
Bureau of Life, Accident & Health Insurance
Office of Insurance Product Regulation & Administration

Conclusion:

Sincerely,
David D'Agostino

July 13, 2021

Re: Objection Cover Letter for OHIN-132808338

Dear David D'Agostino,

This cover letter is in response to the July 6, 2021 questions regarding Oscar Health Plan of Pennsylvania, Inc. individual rate filing. This cover letter details the changes made to the filing materials and the reasons for the changes.

1. In response to Question 7 and 9, Oscar's rate development was updated to reflect a coinsurance rate of 45% and the Summary Report on Permanent Risk Adjustment Transfers for the 2020 Benefit Year published by CMS on June 30, 2021. This resulted in a slight increase to margin and no change from the rates previously filed on May 18, 2021. The following rate filing materials were impacted as a result of this update:
 - a. Part I - Unified Rate Review Template (URRT)
 - b. Part III - Actuarial Memorandum
 - c. PA Actuarial Memorandum Rate Exhibits
2. As part of the updates made to the PA Actuarial Memorandum Rate Exhibits, the Pricing AVs were corrected for the two terminated plans, 98517PA0010009 and 98517PA0010016. As a result of this correction, the Proposed Rate Change Compared to Prior 12 months in cell AC15 on the III Plan Rates tab updated -7.9%. The following rate filing materials were impacted as a result of this update:
 - a. Part II - Consumer Justification Narrative
 - b. Part III - Actuarial Memorandum
 - c. PA Actuarial Memorandum Rate Exhibits
 - d. PA Cover Letter
 - e. Rate Change Request Summary (Attachment 1)

Please feel free to reach out to us if you have any additional questions. Thank you.

Re: Response to Objection Letter for OHIN-132808338

Dear David D'Agostino,

This letter is in response to the July 6, 2021 questions regarding Oscar Health Plan of Pennsylvania, Inc. individual rate filing. For your convenience, I have included your question in *blue italics* with my responses to each question below.

Consultant Questions:

1. *Regarding the response to the prior objection 5, please provide a quantitative development of the below factors which are found on the "Rate Factor Development" tab of the 'PA Objection 20210622 Exhibit' Excel file for both the experience rate and the manual rate.*

a. Average Risk Score for the Experience Period and Projection Period Membership

The risk scores represent the concurrent risk scores from the Milliman Advanced Risk Adjuster (MARA) model. Since the claim cost projections include separate demographic adjustments, Oscar normalized the risk scores for differences in underlying demographics (i.e. age and gender) at the cohort level (i.e. metal). Then, the average risk score for the experience period is calculated using the experience period membership distribution as weights, while the average risk score for the projection period is calculated using the projection period membership distribution as weights.

Please see both Table 1 and Table 2 below for the development of the average risk scores for the experience rate and the manual rate.

Table 1 Development of Average Risk Scores for the Experience Rate			
Metal	Normalized Risk Score	Experience Period Membership Distribution	Projection Period Membership Distribution
Gold	1.547	1%	14%
Silver	0.989	57%	28%
Bronze	0.792	37%	53%
Catastrophic	0.827	5%	5%
Average, with Experience Period Distribution	0.913		
Average, with Projection Period Distribution	0.955		

Table 2 Development of Average Risk Scores for the Manual Rate			
Metal	Normalized Risk Score	Experience Period Membership Distribution	Projection Period Membership Distribution
Gold	2.202	2%	14%
Silver	1.660	30%	28%
Bronze	0.711	65%	53%
Catastrophic	0.784	3%	5%
Average, with Experience Period Distribution	1.024		
Average, with Projection Period Distribution	1.190		

- i. *For the projection period membership, why is this factor not the same for the experience rate and manual rate?*

From a methodological perspective, the reason that the projection period risk scores are different is because the basis of the experience rate is Oscar's demographic mix and membership distributions for the Pennsylvania market, while the basis of the manual rate is Oscar's demographic mix and membership distributions for the Texas market. Oscar normalized the risk scores in the base period for both the experience and manual populations for differences in underlying demographics (i.e. age and gender) at the cohort level (i.e. metal) prior to deriving the blended morbidity adjustment for the projected membership distribution, which results in factors that are specific to each independent projection.

Prior to applying credibility, Oscar included a factor of 0.841 (Item D in Table 3 below) to account for the anticipated changes in market morbidity between the Texas and Pennsylvania individual markets.

Table 3 Development of Morbidity Adjustment			
Description	Experience Rate	Manual Rate	Definition
Average Risk Score for the Experience/Manual Period	0.913	1.024	A
Average Risk Score for the Projection Period	0.955	1.190	B
Market Morbidity Factor	0.987	0.987	C
Manual to Experience Morbidity Adjustment	n/a	0.841	D
Population Mix Morbidity Factor	0.987	0.830	$E = C * D$
Individual Adjustment	1.010	1.010	F
Reinsurance Morbidity Adjustment	0.999	0.999	G
Final Factor	1.043	0.974	$H = B / A * E * F * G$

- b. *Population Mix Morbidity Adjustment*

For the experience rate, the population mix morbidity adjustment reflects anticipated changes to the market morbidity primarily associated with changes in market membership between the experience period

and the projection period. Oscar relied upon the Q1 2021 Enrollment by Metal Survey published by PID on April 28, 2021 supporting a market membership decrease of -0.4% between the 2020 and 2021 plan years, which was primarily driven by the structural dynamic that the ongoing COVID-19 pandemic has imposed on the individual market in Pennsylvania. Separately, Oscar anticipated membership growth attributed to increased affordability due to the expansion of the Advanced Premium Tax Credit (APTC) subsidies inherent in the ARP. Further supported by the enrollment windows being extended intra-year in response to the ARP, Oscar projected the market membership to increase by 8.8% between the 2021 and 2022 plan years.

For the manual rate, in addition to the above-mentioned market morbidity factor, an adjustment was made to account for the anticipated changes in market morbidity between the Texas and Pennsylvania individual markets. To estimate the market morbidity impact, Oscar relied upon the results of the *Interim Summary Report on Risk Adjustment for the 2020 Benefit Year* published by CMS on March 31, 2021 to estimate the market wide plan liability risk score, allowable rating factor, actuarial value, and induced demand factor for the Texas and Pennsylvania individual markets.

Table 4
Development of Population Mix Morbidity Factor

Description	Experience Rate	Manual Rate	Definition
Market Morbidity Factor	0.987	0.987	A
Manual to Experience Morbidity Adjustment	n/a	0.841	B
Population Mix Morbidity Factor	0.987	0.830	C = A * B

c. Plan Behavior Factor in the Experience Period and Projection Period

The plan behavior change factors for the experience period, manual period, and projection period, were estimated by taking the average induced demand factor weighted on the plan-level membership distributions. The induced demand factors in this context represent the internally-derived factor set appropriate for claim cost forecasting and are not intended to align with the induced demand factors inherent in the plan-adjusted index rate development and mandated by PID. Quantitative support of the plan behavior adjustments is included in the attachment titled "PA Objection 20210713 Exhibit.xlsx".

d. Total Allowed Unit Cost Relativity to PA-008 (manual rate only)

Oscar applied an adjustment of 1.304 to account for anticipated differences in the provider reimbursement levels between the manual period and Rating Area 8 in the projection period. The reimbursement changes (i.e. unit cost relativities) are reflective of the underlying differences between Oscar's contracts with its providers in the manual experience (i.e. Oscar's Texas statewide network configuration) and the rating period (i.e. Oscar's Pennsylvania, Rating Area 8 network configuration) by service category. The unit cost relativities were established using percent of Medicare rates. Note this adjustment only incorporates differences in the unit costs structure and does not reflect any difference in population morbidity. Please see Table 5 below for additional quantitative support.

Table 5 Unit Cost Relativity Development		
Service Category	Unit Cost Relativity ¹	Allowed Claim Distribution ²
Inpatient	1.608	19.8%
Outpatient	1.308	16.6%
Professional	1.396	33.5%
Rx	1.000	30.1%
Total	1.304	100.0%

¹Pennsylvania, Rating Area 8 relative to Texas.

²Represents the manual period distribution.

e. Utilization Relativity to PA-008 (manual rate only)

Oscar applied an adjustment of 0.995 to account for the anticipated differences in utilization between the manual period (i.e. Oscar's Texas statewide network configuration) and the projection period (i.e. Oscar's Pennsylvania, Rating Area 8 network configuration). Oscar utilized Milliman's *Health Cost Guidelines (HCGs)*, which provides utilization relativities on 60 benefit categories (further described in Section 4.2 of the Actuarial Memorandum). These geographic utilization relativities established in the HCGs are normalized for differences in morbidity and therefore represent differences in provider practice patterns exclusively. The average utilization relativities for both the manual period and projection period are weighted on the claim distribution of the benefit categories, which are shown in Table 6 below.

Table 6 Utilization Relativity Development		
Description	Value	Definition
TX Utilization Area Factor	0.992	A
Pennsylvania, Raing Area 8 Utilization Area Factor	0.987	B
Utilization Area Factor	0.995	C = B / A

2. The following questions are regarding the response to the prior objection 7:

- a. Please provide the quantitative development and support for the following factors used in the manual rate development portion of the risk adjustment transfer calculation; this development should show and support the adjustments in the cross walking of the risk and rating terms from the manual period to the projection period as stated in the objection response.*
 - i. PLRS – Oscar*
 - ii. PLRS – Market*
 - iii. ARF – Oscar*
 - iv. ARF – Market*

Please reference the attachment titled "PA Objection 20210713 Exhibit.xlsx" for additional quantitative support for the manual rate development portion of the risk adjustment calculation.

- b. When taking the weighted average of the risk transfer PMPMs based on credibility, we get a value of -\$146.02. Please explain the difference between this amount and the amount in the 'Rate Development & Change' tab of the Actuarial Memorandum (-\$145.94).

The slight difference in risk transfer PMPM is due to differences in calculation methodology. Oscar started by taking the weighted average of the risk and rating factors based on credibility, then calculated the PMPM transfer amount.

3. The following questions are regarding the response to the prior objection 19:

- a. Please provide the quantitative development of the "Unit Cost Relativity" and "Utilization Relativity" factors and show how the Milliman HCGs and Oscar's anticipated 2022 provider contracts were incorporated into these factors.

The unit cost relativities evaluate the differences in the contractual provider reimbursements across the Pennsylvania rating regions. The relativities for medical spend were established using percent of Medicare rates normalized for geographic cost differences. Pharmacy contractual arrangements are consistent across regions and therefore all have relativity of 1.000.

The utilization relativities reflect anticipated differences in provider practice patterns. We utilized Milliman's *Health Cost Guidelines (HCGs)*, which provides utilization area factors on 60 benefit categories, and calculated an average utilization area factor for each of the rating areas weighted on the claim distribution of the benefit categories.

Please see additional quantitative support in Table 7 below.

Table 7 Relativity Development for both Unit Cost and Utilization				
Rating Area	Unit Cost Relativity [Medical]	Unit Cost Relativity [Pharmacy]	Unit Cost Relativity [Total] ¹	Utilization Relativity [Total]
Definition	A	B	C = A * 74.7% + B * 25.3%	D
3	0.794	1.000	0.846	1.125
6	0.996	1.000	0.997	1.108
7	0.912	1.000	0.935	1.131
8	1.000	1.000	1.000	0.987

¹Total unit cost relativity calculated using a claim distribution of 74.7% medical and 25.3% pharmacy.

- b. Subscript 2 states that "Unit cost and utilization relativities are expressed on a relative basis to RA8," but the "Utilization Relativity" for RA8 is not 1.00. Please reconcile this apparent disconnect. In addition, please provide support for not also adjusting the filed 2021 area factors to be expressed on a relative basis to RA8.

Please note that rebasing the utilization relativities does not impact the final proposed area factors since Oscar normalizes the factors such that the statewide average factor, based on the current member distribution, is 1.000. The relativities are sufficient as long as they capture the relative relationship between each region's provider practice patterns. The combination of the geographic calibration factor and the

application of the geographic rating factors ensure that the projected premium rates reflect the appropriate regional differences relative to the statewide market-adjusted index rate.

The area factors approved for the 2021 plan year were expressed on a relative basis to Rating Area 8, but the factor for Rating Area 8 does not equal 1.000 because it was normalized such that the statewide average factor, based on current member distribution, equals to 1.000.

4. *Regarding the response to the prior question 21, please provide the quantitative development of all aspects of the COVID-19 adjustment noted in the first bullet for both the experience rate and manual rate.*

Please see Table 8 below for development of the three COVID-19 adjustments.

Table 8 Development of COVID-19 Adjustments			
Description	Experience Rate	Manual Rate	Definition
Removal of direct COVID-19 costs	0.891	0.944	A
Normalization of suppressed Q1/Q2 utilization based on Q3/Q4	1.031	1.018	B
Normalization of deferred/forgone utilization in Q3/Q4	1.070	1.112	C
COVID-19 normalization adjustment	0.983	1.068	$D = A * B * C$
Projected booster vaccine adoption rate ²	66%	66%	E
Projected booster vaccine unit and admin cost	\$120	\$120	F
Projected booster vaccine cost, PMPM	\$6.62	\$6.62	$G = E * F / 12$
Projected allowed claims	\$372.06	\$558.41	H
COVID-19 booster vaccine adjustment	1.018	1.012	$I = G / H + 1$
Projected testing utilization ³	17.0%	17.0%	J
Projected testing unit and admin cost	\$120	\$120	K
Projected testing cost, PMPM	\$1.70	\$1.70	$L = J * K / 12$
Projected allowed claims	\$372.06	\$558.41	M
COVID-19 testing adjustment	1.005	1.003	$N = L / M + 1$

²Booster vaccine adoption rate projected based on current COVID vaccination rate, vaccination intention survey results, and historical flu vaccination rates.

³Projected COVID testing utilization is based on the projected vaccine adoption rate and regression between current vaccination rate and testing utilization.

5. *Regarding the response to the prior question 22, please provide the location(s) where the 1.3% decrease in the market morbidity were incorporated into the rate development for both the PAAM Exhibits and the URRT.*

In the PAAM Exhibits, the 1.3% decrease in market morbidity was incorporated in the "Change in Morbidity — All Other" entry on Table 5 for both the experience rate and the manual rate developments.

In the URRT, the market morbidity factor was incorporated in the "Morbidity Adjustment" and the "Manual EHB Allowed Claims PMPM" entries on Worksheet 1, Section II.

- a. *In addition, were any adjustments made in the development of the 1.3% to account for Oscar having a different distribution of on-Exchange membership than the market in total?*

Since the factor was developed to reflect anticipated changes to the marketwide morbidity associated with changes in market membership, we only considered the market's distribution of on-exchange membership when projecting the impact of ARP on market membership, while the relationship between market membership and market morbidity was developed by analyzing Oscar's nationwide individual market membership which persisted from the 2019 to 2020 plan years and constructing a regression analysis to estimate the anticipated market morbidity changes in response to market membership movement.

6. *While this information was previously requested in Round 1, please provide updated information regarding the following items:*

- a. *For each month between January 2021 and the most recent date available, please provide the average count of Individual ACA enrollment, split by On-Exchange APTC, On-Exchange non-APTC, and Off-Exchange members. Please provide the enrollment data for each available month separately.*

Table 9 below summarizes Oscar's monthly membership as of July 13, 2021.

Table 9 Membership by Month				
Month	On-Exchange APTC	On-Exchange Non-APTC	Off-Exchange	Total
January 2021	3,274	380	118	3,772
February 2021	3,496	486	114	4,096
March 2021	3,496	473	114	4,083
April 2021	3,551	464	110	4,125
May 2021	3,654	475	112	4,241
June 2021	3,814	447	109	4,370

- b. *For the On-Exchange non-APTC members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.*

Oscar's membership projection model primarily anticipates migration from two sources — the uninsured/employer markets to the ACA individual market and from off-exchange to on-exchange within the ACA market. Inherent in the model is an assumption that 100% of on-exchange, non-APTC membership will remain on-exchange.

- c. *For the Off-Exchange members who are currently enrolled as of the most recent date available, please specify the percentage of those individuals that you expect will enroll through the Exchange in 2022 and take advantage of the enhanced and expanded subsidies as a result of ARPA.*

Oscar anticipated that 20% of the current off-exchange members will enroll through the exchange in the projection period and take advantage of the enhanced and expanded subsidies as a result of the ARP.

Department Questions:

7. *In the PAAM Exhibits, II.a.Reins Table – Exp tab, please update the Coinsurance Rate, in cell E5, to 45%.*

This update has been reflected in the attachment titled "2022 PA Actuarial Memorandum Rate Exhibits_20210713.xlsm."

8. *Please provide a list of any assumptions that have changed because of the change in the coinsurance rate and explain why.*

The primary assumption that was updated as a result of the change in the coinsurance rate is the expected recovery of net claims from 4.9% to 3.9%, which was then applied evenly across all plans in Oscar's individual market single risk pool.

Additionally, Oscar adjusted the risk adjustment transfer to account for higher statewide average premium as a result of the change in the coinsurance rate. Oscar also considered a change in market morbidity as a result of higher market premiums and lower market membership, but deemed the impact to be immaterial.

9. *Please update the 2020 experience period risk adjustment amount, in Table 2, to reflect the final CMS risk adjustment amount released on June 30th.*

This update has been reflected in the attachment titled "2022 PA Actuarial Memorandum Rate Exhibits_20210713.xlsm."

10. *If the projected risk adjustment transfer amount in Table 5 was modified due to the final CMS transfer amount published on June 30th, please provide narrative and detailed supporting data to justify the proposed changes.*

The risk adjustment transfer was updated with the results from the *Summary Report on Permanent Risk Adjustment Transfers for the 2020 Benefit Year*, in combination with the *Transfer Payment Issuer Report* published by CMS on June 30, 2021, to estimate the market wide plan liability risk score, allowable rating factor, actuarial value, statewide average premium, and induced demand factor for the individual market.

Additional adjustments were made from the updated HHS Risk Weight Conversion Tool that was supplied to Oscar by Wakely on June 22, 2021 to account for the anticipated changes in the HHS-HCC risk adjustment coefficient changes from the 2020 plan year to the 2022 plan year, for both Oscar and the market.

Oscar estimated the coefficient changes, expressed as a percent change in PLRS, from the 2020 plan year to the 2022 plan year to be the following:

- +0.9% for the state market, non-catastrophic risk pool,
- +3.1% for the state market, catastrophic risk pool,
- +2.4% for Oscar, non-catastrophic risk pool, and
- +4.0% for Oscar, catastrophic risk pool.

Oscar also updated the anticipated impact of the Risk Adjustment Data Validation (RADV) audit on the 2022 plan year from an estimated payment of \$1.55 PMPM to \$2.55 PMPM.

Please reference sheet "Exhibit C - Risk Adjustment" in Pennsylvania 2022 Actuarial Memorandum Supplement_20210713.xlsm for additional detail.

11. Please provide an exhibit showing the actual experience for calendar years 2016 – 2020 and the projection experience for 2021 and 2022 for the following categories: Member Months, Total Administrative Expenses, Total Incurred Claims, Total Premium, Total Actual Paid Taxes and Fees, Profit, Total Underwriting Gain/Loss and Underwriting Gain/Loss PMPM.

Please see Table 10 below for Oscar’s actual experience for the 2020 plan year, which represents the first year that Oscar entered the Pennsylvania individual market, and the projected experience for both the 2021 and 2022 plan years.

Table 10
Financial Metrics by Plan Year

Year	Member Months	Admin Expense	Incurred Claims ¹	Premium	Taxes/Fees	Profit	UW Margin	UW Margin PMPM
Definition	A	B	C	D	E	F = D - E - C - B	G = D - C	H = G / A
2020	41,456	\$2,348,917	\$17,296,467	\$23,597,931	\$880,533	\$3,072,014	\$6,301,463	\$152.00
2021	40,634	\$2,004,585	\$19,884,654	\$22,523,426	\$690,702	-\$56,515	\$2,638,772	\$64.94
2022	70,899	\$3,403,137	\$32,647,855	\$37,305,439	\$1,141,875	\$112,572	\$4,657,584	\$65.69

¹Incurred claims in this context represent estimates net of Rx rebates, risk adjustment transfers, and state reinsurance estimates.

12. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

Due to the limitations of the Federal Rate Template, the rates calculated using the calibrated plan-adjusted index rates from the PA Actuarial Memorandum Exhibits did not satisfy the requirement that age 64 rates not exceed three times the amount of age 21 rates. To satisfy this requirement, a penny was added to the age 21 rates reflected in the Federal Rate Templates and the PA Plan Design Summary and Rate Tables.

13. Please ensure that the 7/13/21 versions of the following items are posted in SERFF with your July 13th response to this data call.

- Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.
- PA Actuarial Memorandum
- PA Actuarial Memorandum Exhibits
- Department’s Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no “NA”)
- URRT
- Federal Rate Template
- Part III: Actuarial Memorandum
- Updated Rate Change Request Summary (Attachment I)
- Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

14. Please be aware that the final coinsurance parameter will be communicated on Friday, July 16th. Then, the revised exhibits and rates will be due on Tuesday, July 20th.

Please feel free to reach out to us if you have any additional questions. Thank you.
