Service Weight - Pennsylvania		22.0%	30.7%	20.5%	5.1%	2.5%	80.9%	19.1%	100.0%

Notes:

[1] Represents core utilization only, exclusive of demographic change impacts; includes expected impact of changes in business day content.
[2] Represents expected changes in intensity of services provided.
[3] Represents core unit pricing increases, exclusive of service mix / intenisty of services impact;
[4] Impact of member cost-share leveraging on net claims cost trend.
[5] Represents trend impact of age and gender changes; No provision included for Small Group business (age/gender community rating variable).
[6] Pricing models do not distinguish between Primary and Specialty medical care; same trends shown for both.

Mr. James Laverty | Actuary
Pennsylvania Insurance Department

Pennsylvania Insurance Department ID # UHLC-132831625

Dear Mr. Laverty,

This cover letter details the changes made to the PA Actuarial Memorandum Exhibits. The changes are due to our revised revenue neutrality adjustment that was inadvertently missed in our initial filings. We filed our adjustment without accounting for the PID formula in our resloping calculations. The initial filed revenue neutrality adjustment of -2.5% has been updated to -4.7%. We have reduced our base rate approximately 2.2% versus our initially filed rates. Exhibit 13 in our rate filing exhibits file has been updated. In addition, the following have been impacted as well due to this change.

- Tables 5, 5a, 6, 7, 8, 9, 10 and 11 of the PA Actuarial Memorandum Exhibits were updated in response to adjustment noted above. This change resulted in a revised rate change from -1.5% to -3.7%. The following files were also updated as a result of the above: Act Memo, Cover Letter, Rate Change Request Summary, Part III Memo, Plan Design Summary and Rate Tables, Rate Filing Exhibits, Federal Rate Tables, and URRT.

Should you have any questions or need any additional information, please contact me at [redacted] or [redacted]

Sincerely,

[redacted]

UnitedHealthcare®

July 13th 2021

Mr. James Laverty | Actuary
Pennsylvania Insurance Department

Pennsylvania Insurance Department ID # UHLC-132831625

Dear Mr. Laverty,

This cover letter details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made due to data call questions received on 7/6/2021.

- Tables 3 and 3b of the PA Actuarial Memorandum Exhibits were updated in response to UHIC question 1a from Oliver Wyman. This change resulted in a revised rate change from -1.8% in the 6/22 response to -1.5% in the 7/13 response; it also resulted in an update to the base rate to tie out the rates between Table 11 of the Actuarial Memorandum, the PA Plan Design Summary and Rate Tables, and the Federal Rate Tables. The following files were also updated as a result of the above: Act Memo, Cover Letter, Part III Memo, Plan Design Summary and Rate Tables, Rate Filing Exhibits, Federal Rate Tables, and URRT (changes in memo and cover have been redlined and highlighted in yellow).

Should you have any questions or need any additional information, please contact me at [redacted] or [redacted]

Sincerely,

[redacted]

July 6, 2021

RE: United Healthcare, Small Group PPO, ACA Filing for PY2022
Pennsylvania Insurance Department ID #: UHLC-132831625

The Pennsylvania Insurance Department has received and conducted a preliminary review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided July 13, 2021. If you have any questions or difficulties in providing the data within this time frame, please call me.

The following questions are from Oliver Wyman, our Actuarial Consultant:

The following questions apply to United's (the Company) Small Group market Pennsylvania (PA) rate filing (SERFF number UHLC-132831625):

1. The following questions relate to the response to question 2 from the objection responses dated 6/21/2021:
a. The utilization trend populated in Tables 3 and 3b of the PA Rate Template file for the other medical major service category is 0.0%, but tab '15 – Claims Trend Summary' of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file indicates the utilization trend for the other medical major service category is 3.0%. Please justify the difference, and if necessary, please revise any exhibits.

We have updated tables 3 and 3b to reflect the 3.0% as noted above. This was an inadvertent error as incorrect value was pulled into the tables.

b. The response to question 2a indicates that the difference between the annual trends populated in Tables 3 and 3b (i.e., 6.4%) and Table 5a (i.e., 9.0%) of the PA Rate Template file are the expected change in unit cost due to the impact of changes provider contracts, expected changes in utilization, and benefit leveraging is included in the 9.0% annual trend but excluded from the 6.4% annual trend. Please provide the following information:
i. Please provide a detailed narrative, with quantitative support, demonstrating that it is appropriate to assume that anticipated changes in provider contracts will result in higher unit cost trends. Please explain why the Company elected to account for this uncertainty in the quarterly trend factors instead of additional risk & profit margin.

Since a majority of our health care costs are paid based on contract fee schedules, changes in provider contract fee schedules will drive a majority of our unit cost assumptions. For example, if provider A is

contracted for a particular service in 2020 at $100 and $110 for 2021, the trend in unit cost is 10%(110/110). In reviewing our trend assumptions, it is important to distinguish what our claim trend tables 3 and 3b (i.e., 6.4%) and tables 5a (i.e. 9.0%) represent. Our claims trend table of 6.4% takes our historical experience and projects this experience to our rating period. In order to derive this number, we take our known fee schedule contracts for 2021 and 2022 and calculate our expected changes in costs. Since our 2021 fee schedules are known and our 2022 fee schedules are partially complete, our blended overall unit cost trend is relatively known. In 2021, our unit cost numbers were somewhat lower based on some special one-time arrangements. Our forward pricing trends use only 2022 known and estimated fee schedule changes to price further into the future. Our 2022 unit cost numbers are more in line with our long term averages. Our 2021 unit cost numbers are lower than normal and represents an outlier situation. A normal 2022 unit cost assumption doesn't represent an additional risk or profit margin.

ii. Please provide a detailed narrative, with quantitative support, demonstrating that it is appropriate to assume that expected changes in utilization will result in higher utilization trends.

As discussed in our previous answer, the claims trend includes a blend of 2021 and 2022 changes. Our forward pricing trend includes only 2022 changes. Since we include administrative, environmental, technological, regulatory, and work-day differences in our utilization assumptions, I would assume some slight differences from year to year. A 40 basis point difference between a 2021/2022 blend versus a 2022 only utilization mix is not unreasonable.

iii. Please explain why the benefit leveraging component of the trend assumption included in the development of the 9.0% annual trend shown on tab '6 – Pricing Trend' increased relative to amount included in the development of the 7.4% annual trend shown on tab '15 – Claims Trend Summary' of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file, given that the Company indicated that the only difference between the two trend assumptions are utilization and unit cost differences.

Benefit leveraging is a function of both unit cost and utilization. As trend increases, so does benefit leveraging. In our 6/10/21 response, we generated a benefit leveraging simulation by service level using 2019 cost sharing information and applying unit cost and utilization assumptions. We assume no plan changes. If you were to increase either unit cost or utilization assumptions, benefit leveraging would change.

c. Please update the '2c. Historical PMPM' tab of the "Support_UHIC Data Call Received 6-10-21.xlsx" file to include member months by quarter.

Please see Excel Support file tab "1c. Historical PMPM".

d. Please provide an exhibit displaying the development of the historical trends summarized on the '2b. Historical Trend' tab of the "Support_UHIC Data Call Received 6-10-21.xlsx". Additionally, please demonstrate that the historical trends summarized on the '2b. Historical Trend' tab align with the information provided on the '2c. Historical PMPM' tab.

The development of the information provided on the "Historical Trend" is rather complex and requires additional information concerning demographics, work-day changes, and business mix characteristics. A simplified version of this process compares the current allowed "Same Store" to the prior allowed "Same Store" to compute an unadjusted core trend amount by quarter. The quarters are averaged to create an unadjusted annual core trend("Historical PMPM" tab Rows 94-100). The results are similar to the information provided on row 39 of the "1d. Historical Trends" tab of the Excel support file.

e. When developing the benefit leveraging trend adjustment, please explain why the deductible layer of cost sharing is the same between the baseline 2019 claims and simulation 2020 claims. Additionally, please explain why the calculated benefit leveraging trend adjustments do not reconcile to the trends shown on tab '6 – Pricing Trend' of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file.

In our benefit leveraging simulation, we assume no plan changes and the same exposure membership between 2019 and the simulated 2020 calendar year data. Since deductibles would not change, we assume the same deductible cost sharing dollars for 2020. For copays, we assume no change in the copay amounts. However, we assume the utilization trend increases the number of copays. For coinsurance, the calculation is a little bit more complicated. In our benefit leveraging calculation, we generated the claim trend version only. To generating the forward pricing trend benefit leveraging amount, we would replace the unit cost and utilization amounts in Section B of that exhibit.

2. The following questions relate to the response to question 3d from the objection responses dated 6/21/2021:

a. Please provide a summary of the distribution of members by metal level each month for 2019 and 2020, separately for the EPA, WPA, and nationwide populations, so that we may understand how changes in metal mix are impacting the results. Based on the information provided, it does not appear as though changes in the distribution of members by metal level were considered.

Please see Excel support file tab "2a. Metal Level Members" for distribution of members by metal level. Please note the EPA and WPA members are total UHIC and UHCPA. In developing our expected paid trend w/o Covid assumption, historical claims patterns normalized for work-day and age/gender differences were considered. These changes can fluctuate positive or negative in any given year, but generally cumulative plan changes result in a decrease in benefits. Therefore, plan change patterns consistent with recent experience are already built into the calculation.

b. Please provide an exhibit displaying the development of the expected paid trend w/o COVID utilized in the development of the EPA and WPA COVID-19 adjustments (i.e., 5.0%). Additionally, please demonstrate that changes in demographics and the impact of working days are not already included in the 5.0% trend assumption.

In developing our expected paid trend w/o Covid assumption, we used historical patterns normalized for work-day and age/gender differences. These changes can fluctuate positive or negative in any given year. Since we used a normalized expected paid trend w/o Covid assumption, specific work-day and age/gender differences were used.

c. Please explain why the Company elected to utilize the monthly abatement impact from the nationwide experience for July through December 2020, over any other approach. For example, it isn't clear why the Company isn't using nationwide experience for the entire calendar year or June through December 2020.

PA saw a larger than average impact from COVID. We wanted to select an approach that gave credit for this. Even though PA has a fairly credible experience base, we thought using strictly PA experience for all months resulted in a COVID adjustment that might be too large. We settled on the approach of using PA experience for the part of the year where the COVID impact was the largest (March-June) and nationwide experience for the remainder of the year.

3. The following questions pertain to the response to question 3e from the objection responses dated 6/21/2021:
a. Please provide an exhibit displaying allowed claims PMPM for claims in excess of $200,000 for 2017, 2018, and 2019 separately for the actual and manual rate experience.

Please see Excel support file tab "3a. Excess Claims".

b. Please provide a quantitative exhibit displaying the development of the "Expected Cat Claim Level %" (i.e., 7.9%) assumption underlying the catastrophic claim adjustment.

Please see Excel support file tab "3b. Expected Cat Claim".

The following are additional questions or comments from the PID:

1. Please provide an exhibit showing the actual experience for calendar years 2016-2020 and the projection experience for 2021 and 2022 for the following categories: Member Months, Total Administrative Expenses,

Total Incurred Claims, Total Premium, Total Actual Paid Taxes and Fees, Profit, Total Underwriting Gain/Loss and Underwriting Gain/Loss PMPM

Please see Excel support file tab "PID 1".

2. Does this company have any transitional membership? If so, has there recently been a significant drop in transitional membership? Do you anticipate a drop in 2022?

There is no transitional membership.

3. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the final CMS transfer amount published on June 30th, please provide narrative and detailed supporting data to justify the proposed changes.

No change to the projected risk adjustment transfer amount.

4. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rate Templates are identical.

We have confirmed the rates are identical. However, as noted in the Round 1 data call responses there are some immaterial differences due to rounding for some of the plan rates.

5. Please ensure that the 7/13/21 versions of the following items are posted in SERFF with your July 13th response to this data call.

a. Cover Letter identifying all changes made and the reasons for the change. Also, show the revised rate change.

b. PA Actuarial Memorandum

c. PA Actuarial Memorandum Exhibits

d. Department's Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no "NA"

e. URRT

f. Federal Rate Template

g. Part III: Actuarial Memorandum

h. Updated Rate Change Request Summary (Attachment I)

i. Public PDF with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits after the initial submission, in addition to all the above items).

Please be advised that there may be additional questions based on the responses to the above. However, it

is our hope to avoid 3rd round data calls. Towards this end, please provide complete detailed and thorough responses including supporting data and narrative.

Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets. Please retain all formulas.

Upon receipt of your responses to the above requested data, the Department will continue to review your filing. Please note that there may be additional questions and/or requirements as the Department conducts a more in-depth review.

Should you have any questions regarding this correspondence, please contact me at (717) 783-2117 or e-mail at jlaverty@pa.gov.

Sincerely,

James Laverty, FSA, MAAA
Actuary
Bureau of Accident & Health Insurance

UnitedHealthcare®
A UnitedHealth Group Company

[redacted]

June 22nd, 2021

Mr. James Laverty | Actuary
Pennsylvania Insurance Department

Pennsylvania Insurance Department ID # UHLC-132831625

Dear Mr. Laverty,

This cover letter details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made due to data call questions received on 6/10/2021.

- Table 6 of the PA Actuarial Memorandum Exhibits was updated to remove 0.53% from the Health Insurance Providers Fee row. This change was made in response to question number 5 from Oliver Wyman.

- Tables 10 and 11 of the PA Actuarial Memorandum Exhibits were updated. In addition, the PA Actuarial Memorandum and Cover letter were also updated (changes in memo and cover have been redlined and highlighted in yellow). These changes were made in response to question number 4 from PID.

Should you have any questions or need any additional information, please contact me at [redacted] or [redacted]

Sincerely,

[redacted]

June 10, 2021

RE: United Healthcare, Small Group PPO, ACA Filing for PY2022
Pennsylvania Insurance Department ID #: UHLC-132831625

The Pennsylvania Insurance Department has received and conducted a preliminary review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided June 22, 2021. If you have any questions or difficulties in providing the data within this time frame, please call me.

The following questions are from Oliver Wyman, our Actuarial Consultant:

The following questions apply to United's (the Company) Small Group market Pennsylvania (PA) rate filing (SERFF number UHLC-132831625):

1. Please explain why the Company elected to assign partial credibility to its actual 2020 experience given the experience basis is large and may be considered fully credible (i.e., approximately 315,000 member months). Additionally, please provide support for why the Company selected the assumed 5% weight to the manual rate. For example, it isn't clear why the 5% assigned weight is more reasonable than 10%. If a credibility formula is used, please provide support for the development of the credibility formula and full credibility threshold.

We are treating our entire block (UHIC + UHCPA) as fully credible and blending experience from both together. UHIC comprises 95% of our PA SG ACA block, so we call UHIC the experience and UHCPA the manual and utilize a 95%/5% weighting in our rate development. For UHCPA, we call UHCPA the experience and UHIC the manual and use a 5%/95% weighting in our rate development. This is consistent with our approach last year except that UHCPA now comprises a slightly larger share of our block.

2. The following questions relate to the trend assumptions:

a. Please explain how the historical annualized trend assumption shown in Tables 3 and 3b of the PA Rate Template file (i.e., 6.4%) relate to the annualized trend assumption shown on the '6 - Pricing Trend' tab of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file (i.e., 9.0%). Please provide a detailed quantitative exhibit displaying all of the adjustments applied to the historical 6.4% annual trend to arrive at the forward-looking 9.0% annual trend. Additionally, please provide support explaining why it is appropriate to utilize the 6.4% annual trend to project experience period cost to the projection period and the 9.0% annual trend when developing the quarterly premium rates.

Table 3 PAAM values come from Claims Trend summary which is in "Exhibit 15 – Claims Trend Summary". Leveraging is not included in the table 3 trend factor as our claims trend factor is 7.4%. In developing our trends, we incorporate the impact of our provider contracts in our unit cost assumptions. For our future trends, some of these contracts have not yet been resolved. Given the uncertainty of the situation, our contract cost assumptions will vary from historic patterns based on the current economic situation. For our utilization assumptions, the same applies. The uncertainty in changes for technology, regulatory, and administrative situations usually produces slightly higher assumptions as we project further into the future.

b. Please provide a detailed summary of actual historical utilization, service mix, and unit cost trends by major medical and pharmacy service category for calendar years 2018, 2019, and 2020 underlying the actual experience. Please describe any adjustments made to the underlying data (e.g., normalizing for changes in demographics) and include quantitative support for any adjustments. If normalizing adjustments were not applied, please provide support for why such adjustments weren't required.

The Excel support file tab "2b. Historical Trend" provides utilization, service mix, and unit cost by quarter for PA small group. Monthly totals are not available. In order to eliminate business mix issues, our PA small group experience is limited to accounts that exist in both the prior and current period of experience. We call this a "Same Store" assessment. The change in "Same Store" allowed cost is adjusted for demographics and working day differences.

c. Please provide medical allowed and paid claim costs PMPM and utilization per 1,000 estimates by month for calendar years 2018, 2019, and 2020 for each major medical service category (e.g., inpatient, outpatient, etc.) underlying the actual experience.

The Excel support file tab "2c. Historical PMPM" provides allowed, paid, and utilization for fee-for-service claims by quarter for PA small group all accounts and 'Same Store" accounts.

d. Please provide script counts per 1,000 and allowed and paid claim costs PMPM by month for calendar years 2018, 2019, and 2020 for each drug tier (e.g., generic, brand formulary, etc.) underlying the actual experience.

The Excel support file tab "2d. Pharmacy" includes allowed, paid, and utilization data by quarter for all PA small group accounts. Brand versus generic data is not available. However, pharmacy drugs by type are included.

e. Please provide a detailed quantitative exhibit displaying the development of the leveraging component of the trend assumption shown on the '6 - Pricing Trend' tab of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file. Additionally, please explain why the leveraging component of the trend assumption is utilized given the annualized trend is applied to allowed claims, not paid claims.

The Excel support file tab "2e. Schedule D" includes a process that simulates a net trend calculation assuming the impact of various cost sharing components at the service level. This process assumes the same membership across calendar years to estimate the impact of deductibles, copays, and coinsurance.

f. Please provide a detailed quantitative exhibit displaying the development of the COVID-19 adjustments utilized in the development of the trend assumptions discussed in Section 6 of the Part III Actuarial Memorandum (i.e., future treatment, vaccination and testing costs due to COVID-19).

Please reference Excel support file tab "Covid Cost". Future Covid costs (2021-2022) are outlined in the exhibit and are part of our trend assumptions. Historical Covid costs (2020) are incorporated in our Covid adjustment factor

g. Please provide support demonstrating that it is appropriate to assume that the actual and manual rate experience should utilize the same trend assumptions.

Due to UHCPA not being credible on its own we feel it is appropriate to utilize the same trend assumptions.

3. The following questions relate to the Index Rate adjustments applied to the actual experience and manual rate experience:

a. Please provide a detailed quantitative exhibit displaying the development of the "Change in Demographics" adjustments for the actual and manual rate experience, separately.

Please reference Excel support file tab "3a".

b. Please provide an exhibit displaying the distributions of members by age underlying the 2020 actual and manual rate experience, separately.

Please reference Excel support file tab "3b".

c. Please provide a detailed quantitative exhibit displaying the development of the "Change in Benefits" adjustments for the actual and manual rate experience, separately.

Please reference Excel support file tab "3c".

d. Please provide a detailed quantitative exhibit displaying the development of the 7.7% and 8.5% COVID-19 adjustment factors shown on tab '18 – COVID' tab of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file. In providing your response, please include the following information:

i. Please provide an exhibit displaying the actual claims PMPM by month for calendar years 2019 through 2020, separately for EPA, WPA, and nationwide experience, that were used in the development of the COVID-19 adjustment.

Please reference Excel support file tab "Covid".

ii. Please provide a detailed quantitative exhibit displaying the development of the Company's estimated claims PMPM by month without the impact of COVID-19 in 2020, separately for EPA, WPA, and nationwide experience. Please demonstrate all adjustments included in the calculations. Additionally, please explain whether changes in demographics, metal mix, the Company's internal morbidity, or anything else that may have occurred between 2019 and 2020 were considered in the development of the 2020 estimated claims PMPM without the impact COVID-19.

Please reference Excel support file tab "Covid" which provides the requested information. Demographics, work-days, and seasonality are used to create the underlying Covid adjustment factors.

iii. Please demonstrate how the WPA and EPA experience was blended with nationwide experience to calculate the COVID-19 adjustments. Please state the credibility assigned to the actual experience and provide support for the assumption.

Please reference Excel support file tab "Covid Adjustment. We assume any deviation from the expected or derived claim PMPM is Covid related and part of the Covid adjustment factor. We are weighting the EPA and WPA factors by membership as shown in Excel support file.

e. Please provide an exhibit displaying the development of the "Site Specific Cat Claim Level" and "Expected Cat Claims, PMPM" PMPMs used when developing the catastrophic claim adjustment applied to the manual rate experience. In providing your response, please specify the pooling threshold used in the calculations.

Please reference Excel support file tab "3e". The pooling threshold used in the calculations is $200,000.

4. The following questions relate to the risk transfer assumption:

a. Please provide the 2020 RATEE file used to develop the 2022 risk adjustment transfer assumption. To the extent that the average factors used in the risk adjustment calculation are different than what are shown in the 2020 RATEE file, please explain why.

We have included the UHIC RATEE file in our response submission. This is the same RATEE file that was sent to the PID on 5/5/21.
Factors that we may calculate based on the RATEE files are the following (with letter references from Exhibit 14):

a. Billable Member Months

b. Plan Liability Risk Score

c. Allowable Rating Factor

e. Induced Demand Factor

f. Actuarial Value

n. Average Premium

All of the above average factors in Exhibit 14 match the RATEE average values. The remaining factors were calculated from other sources to get us to our known risk adjustment transfer provided to us by the PID.

b. Section 10 of the Part III Actuarial Memorandum indicates that the Company is assuming that the risk level of the Company's small group population relative to the rest of the market will be similar in 2022 as it was in 2020. This implies that the Company's 2022 risk adjustment transfer as a percent of premium in 2022 should equal -8.5% of premium (i.e., $45.67/$537.59, as shown in the URRT). However, the '14 – Risk Adj' tab of the "PA Rate Filing SB_1Q2022 - UHIC.xlsx" excel file indicates that the Company's 2022 risk adjustment transfer as a percent of premium is estimated to equal -9.1% of premium. Please reconcile the difference. Additionally, please provide a detailed quantitative exhibit displaying the development of the -9.1% of premium risk adjustment transfer assumption.

Please reference Excel support file tab "4b". The -9.1% is calculated by blending risk adjustment of UHIC (-8.5%) and UHCPA (-23.3%). Since we are using our total UHIC + UHCPA experience as basis of our filing, we weighted the entity risk adjustment factors for our projected risk adjustment by their credibility weights.

c. Please explain why the Company believes it is appropriate to exclude the high cost risk pool receipt and charge amounts from the risk transfer calculation. Additionally, please provide an exhibit displaying total paid claims by member for members that incurred more than $1 million in paid claims in 2020, if any.

As noted above in response to question 3e our pooling threshold used in our rate development is $200,000 so we are applying pooling at a lower level than HCRP. For the members that incurred more than $1 million in paid claims in 2020 please reference Excel support file tab "4c". In 2020 we had four members with total paid claims incurred greater than $1 million. (Please note we have removed the unique internal identifying member ID and replaced with arbitrary values of A, B, C and D as their member IDs).

5. Please remove the 0.53% of premium ACA Insurer Fee input populated in Table 6 of the PA Rate Template file.

We mistakenly entered the Federal Income Tax amount from row above into the Health Insurance Providers Fee row. We have updated Table 6 of the PA Rate Template file to remove the 0.53% from this row.

6. Please explain whether the Company believes the provisions in the American Rescue Plan Act will impact the morbidity of the Company's book of business in the projection period (e.g., groups terminate Small Group ACA coverage and enroll in the Individual ACA market). If so, please provide a detailed quantitative exhibit demonstrating the estimated impact on morbidity.

No, we don't think the American Rescue Plan Act will have a material impact on our small group business in the projection period.

7. The following questions relate to plan factors:

a. Section 1E of the PA Actuarial Memorandum states that benefit plan changes were made in order for all of the 2022 plan designs to produce compliant metal AVs. Please explain what benefit changes were required to be made given that the 2022 Final AV Calculator did not change relative to the 2021 Final AV Calculator.

The statement in question from the PA Actuarial Memorandum is a general statement that we make benefit plan changes where needed to get plans to fall into metal level compliance. Additionally, the issuance of guidance from IRS shortly before our rate filing submission regarding limits on out of pocket maximums resulted in needed changes, as in certain cases, these required reductions to OOPMs pushed plan AVs out of the allowable range, so counterbalancing changes were made to get back within the AV range.

---

b. Section 1E of the PA Actuarial Memorandum states that the Company refined the medical and pharmacy plan price relativities to reflect the most recent pricing methodology and pricing models. Please describe what refinements were made to the pricing model and quantify the impact of the changes.

The following refinements were made to the pricing model:

- Underlying claim experience for Medical and Rx are updated to CY2019 experience (all average util/unit costs, underlying claim distribution tables, etc.)
- Trend assumptions are updated to project costs to a 1/1/2022 effective date

Exhibit 13 – Rev Neutrality quantifies the impact of the model changes. Column H (Current Combined Med + Rx Plan Rel) are the plan ratios in the 2021 pricing model. Column I (Resloped Combined Med+Rx Plan Rel) are the plan ratios for the same plan designs run through our 2022 pricing model. Column J (New Model Difference) calculates the change from 2021 pricing model to 2022 pricing model.

c. Please explain whether the Company's internal pricing model used to calculate plan factors was updated to include 2020 experience. If 2020 experience was included, please explain what adjustments were applied to account for the impact of COVID-19.

Our internal pricing model does not contain 2020 experience. The pricing model contains complete calendar year 2019 experience with 4 months of runout. Thus no adjustments were applied for COVID-19.

The following are additional questions or comments from the PID:

1. Please confirm that you have tested to ensure that the rates in Table 11 of the PA AM Exhibits, PA Plan Design Summary and Rate Table, Federal Rates Template, and binder are identical.

We confirm we have tested to ensure that the rates between the noted files are identical with the exception of instances where there are immaterial differences of a penny or so due to rounding.

2. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost PMPMs for calendar years 2017-2020, as applicable.

Please reference Excel support file tab "2 PID".

3. Please provide an exhibit which demonstrates that the criteria for the expanded bronze plans have been met.

Our three filed bronze plans for 2022 [2 UHIC Plans (COCO & COCP) & 1 UHCPA Plan (CD3Z)] are all HSA plans so they all qualify as High Deductible Health Plans (HDHPs).

4. The requested rate increase for this filing was above average among PA small group issuers. Please provide a short list of bullet points that explain the main issues causing this higher-than-average rate increase request.

After receiving this question we realized for the bronze plan 2022 mappings from a Platinum, Siver or Gold plan in PAAM Table 10 that we mistakenly entered the 2021 Calibrated rate for the bronze plan in column Z. We should have entered the 2021 calibrated plan rate in column Z for the 2021 Platinum, Gold or Silver plan the respective members are getting mapped from. We have updated PAAM table 10. PAAM table 11 is also updated. UHCPA filing was also updated as same mistake was made in that PAAM file.

Please be advised that there may be additional questions based on the responses to the above. However, it is our hope to avoid 3rd round data calls. Towards this end, please provide complete detailed and thorough responses including supporting data and narrative.

Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets. Please retain all formulas.

Upon receipt of your responses to the above requested data, the Department will continue to review your filing. Please note that there may be additional questions and/or requirements as the Department conducts a more in-depth review.

Should you have any questions regarding this correspondence, please contact me at (717) 783-2117 or e-mail at jlaverty@pa.gov.

Sincerely,

James Laverty, FSA, MAAA

Federal Rate Filing Justification Part II
Written Description Justifying the Rate Increase

UnitedHealthcare Insurance Company
NAIC: 79413
FEIN: 36-2739571

State of Pennsylvania Rate Review

Scope and Range of the Rate Increase

The requested rate change for small group health benefit plans sold in the state of Pennsylvania will be effective January 1, 2022 and impact 23,474 covered lives. The rate change experienced by members will vary depending on plan selection and geographic area. Additional premium changes may occur upon renewal due to changes in member age, changes in plan selection, and changes in geographic location.

Financial Experience of the Product

The benefit care ratio for these products during the 2020 calendar year is 73.8%. This ratio is the portion of premium that is needed to pay medical claims. The complement of the benefit care ratio is the portion of premium needed for taxes and fees, administrative expenses, and margin.

Changes in Medical Service Costs

There are many different healthcare cost trends that contribute to increases in the overall U.S. healthcare spending each year. These trend factors affect health insurance premiums, which can mean a premium rate increase to cover costs. Some of the key healthcare cost trends that have affected this year's rate actions include:

- Increasing cost of medical services: Annual increases in reimbursement rates to healthcare providers, such as hospitals, doctors, and pharmaceutical companies.
- Increased utilization: The number of office visits and other services continues to grow. In addition, total healthcare spending will vary by the intensity of care and use of different types of health services. The price of care can be affected by the use of expensive procedures such as surgery versus simply monitoring or providing medications.
- Higher costs from deductible leveraging: Healthcare costs continue to rise every year. If deductibles and copayments remain the same, a higher percentage of healthcare costs need to be covered by health insurance premiums each year.
- Cost shifting from the public to the private sector: Reimbursements from the Centers for Medicare and Medicaid Services (CMS) to hospitals do not generally cover the cost of providing care to these patients. Hospitals typically make up this reimbursement shortfall by charging private health plans more.
- Impact of new technology: Improvements to medical technology and clinical practice often result in the use of more expensive services, leading to increased healthcare spending and utilization.

Changes in Benefits

Changes in covered benefits impact costs and therefore affect premium changes. Benefit plans are typically changed for one of three reasons: to comply with the requirements of the Affordable Care Act or state law, to respond to consumer feedback, or to address a particular medical cost issue to provide greater long-term affordability of the product.

Administrative Costs and Anticipated Margins

UnitedHealthcare Insurance Company works to directly control administrative expenses by adopting better processes and technology and developing programs and innovations that make healthcare more affordable. We have led the marketplace by introducing key innovations that make healthcare services more accessible

and affordable for customers, improve the quality and coordination of healthcare services, and help individuals and their physicians make more informed healthcare decisions. Taxes and fees imposed by the State and Federal government are significant factors that impact healthcare spending and have to be included in the administrative costs associated with the plans. These fees include Affordable Care Act taxes and fees which impact health insurance costs and need to be reflected in premium. Another component of premium is margin, which is set to address expected volatility and risk in the market.

The requested rate change is anticipated to be sufficient to cover the projected benefit and administrative costs for the 2022 plan year.
