**Re: Capital Advantage Assurance Company
Small Group Rates
Filing No 18-19
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate**

Dear Ms. Gray:

By this filing Capital BlueCross, on behalf of its wholly owned subsidiary Capital Advantage Assurance Company, submits to the Department Small Group Rates effective January 1, 2019.

The following is a summary of the rate filing:

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2019
- Average Rate Change: 0.7%
- Range of Requested Rate Change: -5.1% to 3.7%
- Total additional annual revenue generated from the proposed rate change: \$3,401,586
- Product: PPO and EPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 70,937/41,340
- 2019 Number of Plans: 38
- 2018 Number of Plans and Percent Change: 32/18.8%
- Contract Form #: C19-CAAC-SPG
- Form Filing SERFF #: CABC-131454921 & CABC-131455046
- Binder SERFF #: CABC-PA19-125079480
- HIOS Issuer ID: 45127
- HIOS Submission Tracking Number: 45127-1217396464200771587

[Harrisburg, PA 17177](#) | capbluecross.com

In support of this filing, I have included an Actuarial Memorandum with supporting exhibits, URRT, Consumer Friendly Justification, Rates Table Template, Rate Change Request Summary, and PA Plan Design Summary and Rate Tables.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

Rate Change Summary

Capital Advantage Assurance Company (CAAC) – Small Group Plans

Rate request filing ID # CABC-131455101 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at

<http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	0.7% ¹
Revised requested average rate change:	0.7% ¹
Range of requested rate change:	-5.1% to 3.7%
Effective date:	1/1/2019
People impacted:	70,937
Available in:	Rating Area 6, Rating Area 7, and Rating Area 9

Key information

Jan. 2017-Dec. 2017 financial experience

Premiums	\$ 458,569,034
Claims	\$ 384,635,878
Administrative expenses	\$ 36,217,466
Taxes & fees	\$ 8,817,177
Company made (after taxes)	\$28,898,514

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

Claims:	84.95%
Administrative:	11.58%
Taxes & fees:	1.47%
Profit:	2%

The company expects its annual medical costs to increase **6.48%**.

Explanation of requested rate change

Suspension of the Health Insurer Fee in 2019
Anticipated increase in facility and physician unit costs
Anticipated changes in prescription drug unit costs
Continuing change in utilization

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

- Primary Contact Email Address: [REDACTED]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital BlueCross (CBC), submits rates for products to be made available to all small groups effective January 1, 2019. CAAC will only offer small group products off the federally-facilitated exchange.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2015	CABC-129635598	5.39%
Small Group	CAAC	1/1/2016	CABC-130076031	-2.40%
Small Group	CAAC	1/1/2017	CABC-130539601	3.40%
Small Group	CAAC	7/1/2017	CABC-130954662	6.20%
Small Group	CAAC	1/1/2018	CABC-131022141	7.90%

Average Rate Change

CAAC is proposing an aggregate annual 0.7% rate change. The rate change does vary by plan. The rate change is calculated in PA Rate Template Part III, Table 10, cell AC15.

Membership

Membership is shown in PA Rate Template Part I, Table 1. The average age is 37.

Benefit Changes 2018-2019

A summary of proposed 2019 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2019. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in the URRT abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered product/plan combination for CAAC in the small group market. The single risk pool includes transitional products/plans for purposes of base rate experience.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2017 and December 31, 2017.

Transitional membership is included in PA Rate Exhibits Table 2, and is broken out in Exhibit G1.

Paid Through Date: Claims in the BEP are paid through March 31, 2018

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments.
- CBC only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from CBC's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a

lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.

5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to those reported by the Department on 5/9/2018.

Loss Ratio in BEP: Loss ratio is 83.88%

Credibility of Data

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from CBC subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.8%

Trend levels reflect CBC's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. CBC uses the following to project future costs:
 - a. Vendor Physician Cost Model and Internal Hospital Contracting Model
 - i. The medical cost models use best estimates of Capital BlueCross (CBC)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the CBC book of business level for all commercial business.
 - b. Internal Prescription Drug Trend Model
 - i. Price Inflation
 - ii. Contract Pricing
 - iii. Member Cost-Sharing
 - iv. Units per Script
 - v. Brand/Generic Mix
 - vi. Therapeutic Mix
 - vii. Cost per Script
2. Utilization Considerations:
 - a. Intensity of medical services rendered
 - b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
 - c. Further migration from brand prescription drugs to generic prescription drugs
 - d. Favorable impacts of value based benefits designs
 - e. Medical utilization estimates reviewed by CBC's Chief Medical Officer
3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles, to the paid trend. Estimated leveraging is calculated in Exhibit E1.
 - o Estimated costs are based on average plan benefit value in the month, calculated using CBC's internal benefit model.
 - o CBC expects the average benefit level in 2019 to be similar to current month, 201803.
 - o As of 201803, on average, small group members pay 20% of costs, while CBC pays 80%. So for example,
 - \$2,000 in annual allowed claims results in member pay = \$400, and CBC pay = \$1,600.
 - \$2,000 trends at 5.5% = \$2,110
 - Member pay is fixed at \$400
 - CBC pay = 2,110 – 400 = \$1,710

- Total CBC trend = $1,710/1,600 - 1 = 6.9\%$
- With an allowed trend of 5.5%, and static cost-share, leveraging will add an additional 1.4% to trend.

Historical Experience: Historical experience was not used to develop trend.

Benefit Categories: Claims in the benefit categories displayed in the URRT come directly from CBC's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Pop'l risk Morbidity", and PA Rate Template Table 5. CAAC projects no change in morbidity.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2017 to 2019. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from CBC's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: Network adjustment is applied for membership projected to move to EPO plans.

Other Adjustments: No other adjustment is applied.

Benefits, Demographics, Network and Other adjustments are found in URRT, Worksheet 1, "Other", and PA Rate Template Table 5.

Index Rate

The experience period index rate is CAAC's allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits*. This number is reflected in Worksheet 1 of the URRT (“Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)”).

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. The URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
 - a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
 - b. BEP Member Months
2. Develop BEP *Paid and Incurred Claims*:

$$BEP \text{ Paid and Incurred Claims} = \frac{BEP \text{ Paid Claims}}{Completion \text{ Factor}}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP \text{ Paid and Incurred Claim PMPM} = \frac{BEP \text{ Paid and Incurred Claims}}{BEP \text{ Member Months}}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

Trended Claim PMPM

$$= [\text{BEP Paid and Incurred Claim PMPM}] \times (1 + [\text{Trend\%}])^{\text{Trend Months}/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

Projected Paid and Incurred Claims PMPM

$$= [\text{Trended Claim PMPM}] \times [\text{Benefit Adjustment}] \\ \times [\text{Morbidity Adjustment}] \times [\text{Other Adjustment}]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Other Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

- a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
- b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$\text{Benefit Level Adjustment} = \frac{\text{Average Manual Cost in Projection Period}}{\text{Manual Cost of Base Plan}}$$

- c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

Base Plan Paid and Incurred Claims PMPM

$$= \frac{\text{Benefit Adjusted Paid and Incurred Claims PMPM}}{\text{Benefit Level Adjustment}}$$

- d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$\text{Benefit Relativity } A = \frac{\text{Manual Cost of Benefit } A}{\text{Manual Cost of Base Plan}}$$

- e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:
- i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than \$1000.
 - ii. Adjustments for plan designs that fall outside of the actuarial cost model.

- a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} \text{Projected Claims PMPM Benefit } A \\ &= \text{Projected Claims PMPM Base Plan} \\ &\times \text{Pricing Relativity } A \end{aligned}$$

- b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in 2019. The *Total Projected Claims PMPM* :

$$\begin{aligned} &= \text{Projected Claims PMPM Benefit } A \times \text{Expected Member Dist of Benefit } A \\ &+ \text{Projected Claims PMPM Benefit } B \\ &\times \text{Expected Member Dis of Benefit } B + \dots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$\text{Paid to Allowed Ratio} = \frac{\text{Total Projected Claims PMPM}}{\text{Projected Allowed Claims at Current Benefits}}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

Risk Adjustment

Projected Risk Adjustments PMPM:

Relevant to 2019 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2019. The pricing impact is:

$$[Net\ Projected\ Risk\ Adjustments\ PMPM] \\ = [Projected\ CRA\ Transfer\ PMPM] - [Risk\ Adjustment\ Fee\ PMPM]$$

The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2016-2017 risk adjustment results
5. Market improvement in coding risk: CBC's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that CBC is disadvantaged in the market. This will drive CBC's relative risk to the market down over time.

To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of \$0.13 PMPM. The Risk Adjustment Fee PMPM is included in the URRT Worksheet 1, "Projected Risk Adjustments PMPM", and is found on Exhibit K.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$[Market\ Adjusted\ Index\ Rate] \\ = ([Index\ Rate] \times [Paid\ to\ Allowed\ Ratio] \\ - [Net\ Projected\ ACA\ Reinsurance\ Recoveries] \\ - [Net\ Projected\ Risk\ Adjustments\ PMPM] + [Exchange\ Fees\ PMPM]) \\ \div [Paid\ to\ Allowed\ Ratio]$$

See Exhibit K for the development of the Market Adjusted Index Rate.

Retention Items

Administrative Expense Load:

1. Administrative Expense: Calculated using an allocation method from CBC's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large

group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to CAAC small group products. Administrative expenses are included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.

2. Broker Expense: Calculated based on CAAC’s explicit per contract broker fee. Broker Expense is included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. The 2019 broker commission schedule is yet to be finalized. Attached please find the 1/1/2018 copy of the broker agreement – redacted version. Files are as follows:
 - a. Redacted Agent Agreement: “SG_18-19_Initial_CAAC_PPO_WBEBrokerSGRedacted_Supporting_20180518.pdf”
 - b. Redacted Preferred Producer Master Agreement: “Ind_18-19_Initial_CAAC_PPO_PPMABrokerSGRedacted_Supporting_20180518.pdf”
3. Member Out-Of-Pocket (OOP) and Ways to Save:
 - a. Description: These products offer enhanced transparency to cost savings potential both prospectively and retrospectively. These are new services included in each of CAAC’s plans that work to decrease costs by engaging members in their health care decisions. The Member OOP program will show a member, prospectively, the value of a service and the impact of member cost-sharing when that service is incurred. It allows a member to shop for the best price while introducing transparency related to the member’s expected cost share at the time of service. The “Ways to Save” program allows members to receive alerts, retrospectively, informing them of cost savings that could have been incurred had they have known about competing medical providers in the area. The alerts are retrospective and offer transparency around member’s healthcare options.
 - b. Costs: Costs are aggregated into CBC’s total administrative expense above. No additional fee is charged. The cost is approximately \$0.25 PMPM. Included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6.
4. Value-Based Benefits (VBB): Standard with each plan, Capital BlueCross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
 - a. Complete biometric screening and receive a gift card.
 - b. Meeting biometric measure or finish online coaching program and receive a gift card reward.
 - c. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
 - d. Included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6.
5. Identity Theft Coverage: Identity protection offering will include the following components:
 - a. Credit monitoring – Monitors activity that may affect credit

- b. Fraud detection – Identifies potentially fraudulent use of identity or credit
 - c. Fraud resolution support – Assists members in addressing issues that arise in relation to credit monitoring and fraud detection
 - d. Included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6.
6. Additional Quality Improvement: The Final Notice of Benefit and Payment Parameters (NBPP) for 2019 finalized the rule to allow issuers to apply a standard 0.8% of premium for quality improvement (QI) measures in the MLR calculation. Total QI amounts applied in rating equal 0.8%.

Profit (or Contribution to Surplus) & Risk Margin:

- 7. Contingency: Contingency is included in the URRT Worksheet 1, “Profit and Risk”, and PA Rate Template Table 6.

Taxes and Fees:

- 1. Health Insurer Fee (HIF) – Section 9010 of PPACA and Section 1406 of the Reconciliation Act (which modified PPACA) refers to HIF. The fee is a fixed-dollar amount distributed across health insurance providers. This fee has been suspended for 2019, but is projected to be re-implemented in 2020. So the fee applied is the average fee across all renewals in 2019. This is calculated in Exhibit H.
- 2. Exchange Fee – All issuers participating in a federally-facilitated exchange will remit 3.5% of premium to HHS. CAAC Small Group plans are offered off-exchange only, therefore no exchange fee is applied.
- 3. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in the URRT Worksheet 1, “Taxes and Fees”, and PA Rate Template, Table 6.

See Exhibit H for all retention values.

Plan Rate Development

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of the URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

- 1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC’s actuarial cost model. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied

together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

2. Induced Demand: Please see Table 8
3. Provider Network: The Provider network is the same across all PPO plans. A network factor is applied to the EPO plan.
 - a. The Valley Advantage EPO plan is built around St. Luke's delivery system and is available in Lehigh and Northampton counties.
 - b. See Exhibit O1 for the development of the network factor.
4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Non-Benefit Expenses and Profit & Risk section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in CAAC. Age factors are applied in accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_18-19_Initial_CAAC_PPO_List-Billed_Supporting_20180518 for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the CAAC member-weighted average by region.

Geographic Factors: CAAC performed regional analysis to quantify the cost difference between the three regions in our service area. The analysis gathered allowed claims in a 12-month period by region, normalized for demographics. We then compared the claim cost for each of the three regions, and found cost differentials between the regions, mostly due to differences in hospital contracting between regions. The data from the analysis is found in Exhibit Q.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[\text{Calibrated Plan Adjusted Index Rate}] = [\text{Plan Adjusted Index Rate}] \div ([\text{Age Curve Calibration}] \times [\text{Geographic Factor Calibration}] \times [\text{Tobacco Factor}])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Template Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$\begin{aligned} & [\textit{Member – Level Consumer Adjusted Premium Rate}] \\ & = [\textit{Calibrated Plan Adjusted Index Rate}] \times [\textit{Age Factor}] \\ & \times [\textit{Geographic Factor}] \times [\textit{Tobacco Factor}] \end{aligned}$$

2. $[\textit{Family Consumer Adjusted Premium Rate}] = \sum [\textit{Member – Level Consumer Adjusted Premium Rate}]$
With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

The AV Metal Values included in Worksheet 2 of the URRT were based on the federally issued AV Calculator, with the exception of one plan. This plan is noted PA Rate Tables Table 10. Unique plan justification is included with this filing.

AV Pricing Values

All AV Pricing values were developed using CAAC's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of the URRT were developed by assuming that moderate decline in enrollment and similar distribution to current.

Attachments and Examples

The following is a list of Exhibits and Data to support this filing:

List-Billed Data

Actuarial Statement

I, [REDACTED], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [REDACTED], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
 - a. Actuarial Standard of Practice No. 5, “Health and Disability Claims”
 - b. Actuarial Standard of Practice No. 8, “Regulatory Filings for Rates and Financial Projections for Health Plans”
 - c. Actuarial Standard of Practice No. 12, “Risk Classification”

- d. Actuarial Standard of Practice No. 23, “Data Quality”
 - e. Actuarial Standard of Practice No. 25, “Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage”
 - f. Actuarial Standard of Practice No. 26, “Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans”
 - g. Actuarial Standard of Practice No. 41, “Actuarial Communications”.
2. The index rate is:
- a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
 - b. Developed in compliance with the applicable Actuarial Standards of Practice.
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
 - d. Neither excessive nor deficient.
 - e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.
3. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.
- a. The analysis was
 - i. conducted by a member of the American Academy of Actuaries, and
 - ii. performed in accordance with generally accepted actuarial principles and methods.
5. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
6. New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
7. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

January 1, 2019

Ending date of Rates:

March 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

January 1, 2019

Ending date of Rates:

March 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

January 1, 2019

Ending date of Rates:

March 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

January 1, 2019

Ending date of Rates:

March 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

April 1, 2019

Ending date of Rates:

June 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

April 1, 2019

Ending date of Rates:

June 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

April 1, 2019

Ending date of Rates:

June 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

April 1, 2019

Ending date of Rates:

June 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

July 1, 2019

Ending date of Rates:

September 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

July 1, 2019

Ending date of Rates:

September 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

July 1, 2019

Ending date of Rates:

September 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

July 1, 2019

Ending date of Rates:

September 30, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

October 1, 2019

Ending date of Rates:

December 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

October 1, 2019

Ending date of Rates:

December 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

October 1, 2019

Ending date of Rates:

December 31, 2019

Company Name:

Capital Advantage Assurance
Company

Market:

Small Group

Product:

PPO and EPO

Effective Date of Rates:

October 1, 2019

Ending date of Rates:

December 31, 2019

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.

ACTUARIAL MEMORANDUM

Small Group Rates

Effective January 1, 2019

General Information

Company Information

- Company Legal Name: Capital Advantage Assurance Company – CAAC
- State: PA
- HIOS Issuer ID: 45127
- Market: Small Group
- Effective Date: 1/1/2019

PID Company Information

- Company Name: Capital Advantage Assurance Company (CAAC)
- NAIC: 14411
- Market: Small Group
- On/Off Exchange: Off Exchange
- Effective Date: 1/1/2019
- Average Rate Change: 0.7%
- Range of Requested Rate Change: -5.1% to 3.7%
- Total additional annual revenue generated from the proposed rate change: \$3,410,268
- Product: PPO and EPO
- Rating Areas: 6,7,9
- Metal Levels: Platinum, Gold, Silver, Bronze
- Current Covered Lives and Policyholders: 70,937/41,340
- 2019 Number of Plans: 34
- 2018 Number of Plans and Percent Change: 32/18.8%
- Contract Form #: C19-CAAC-SPG
- Form Filing SERFF #: CABC-131454921 & CABC-131455046
- Binder SERFF #: CABC-PA19-125079480
- HIOS Issuer ID: 45127
- HIOS Submission Tracking Number: 45127-1217396464200771587

Company Contact Information

- Primary Contact Name: [REDACTED]
- Primary Contact Telephone Number: [REDACTED]
- Primary Contact Email Address: [REDACTED]

Scope and Purpose

By this filing, Capital Advantage Assurance Company (CAAC), a subsidiary of Capital BlueCross (CBC), submits rates for products to be made available to all small groups effective January 1, 2019. CAAC will only offer small group products off the federally-facilitated exchange.

Rate History and Proposed Variations in Rate Changes

Market	Company	Effective Date	SERFF #	Annual Increase
Small Group	CAAC	1/1/2015	CABC-129635598	5.39%
Small Group	CAAC	1/1/2016	CABC-130076031	-2.40%
Small Group	CAAC	1/1/2017	CABC-130539601	3.40%
Small Group	CAAC	7/1/2017	CABC-130954662	6.20%
Small Group	CAAC	1/1/2018	CABC-131022141	7.90%

Average Rate Change

CAAC is proposing an aggregate annual 0.7% rate change. The rate change does vary by plan. The rate change is calculated in PA Rate Template Part III, Table 10, cell AC15.

Membership

Membership is shown in PA Rate Template Part I, Table 1. The average age is 37.

Benefit Changes 2018-2019

A summary of proposed 2019 benefits is included in Exhibit A.

There are several benefit changes being implemented in 2019. All benefit changes comply with the uniform modification of coverage standards described in 45 CFR 147.106(e). Any plan with a benefit change that did not meet the uniform modification of coverage standard was terminated, and a new plan was created in its place. Benefit changes by plan are listed in Exhibit B, highlighted in yellow.

Experience Period Premium and Claims

Single Risk Pool: The data used to develop rates and shown in the URRT abides by 45 CFR part 156.80(d) single risk pool requirements. The single risk pool reflects all covered lives for every non-grandfathered product/plan combination for CAAC in the small group market. The single risk pool includes transitional products/plans for purposes of base rate experience.

Base Experience Period: The base experience period (BEP) includes completed fee-for-service paid and incurred claims for dates of service between January 1, 2017 and December 31, 2017.

Transitional membership is included in PA Rate Exhibits Table 2, and is broken out in Exhibit G1.

Paid Through Date: Claims in the BEP are paid through March 31, 2018

Premiums (net of MLR Rebate) in BEP: Premiums are calculated on an earned basis in the BEP. MLR rebate adjustments are equal to zero as CAAC does not expect to refund any MLR rebates in the BEP.

Allowed and Incurred Claims in BEP:

- Allowed claims are developed by combining paid claims with member cost-sharing. Allowed claims meet the definition in the URR instructions. They do not include provider quality incentive payments.
- Incurred claims are net of HHS CSR payments.
- CBC only covers Essential Health benefits (EHBs).
- CAAC does not include capitated services.
- Allowed and Incurred claims are net of pharmacy rebates. BEP rebates are completed based on actual utilization of rebate-eligible drugs and rebate amounts.

Estimated Incurred but Not Paid Claims: Paid claims by date of service come directly from CBC's data warehouse. The method for calculating incurred claims in the BEP is as follows:

1. Historical fee-for-service claims are viewed by date of service and date of payment in a claims triangle.
2. The claims triangle payments are then accumulated by date of service to develop factors that represent the rate of accumulation or rate of "completion".
3. Historical rates of completion by duration are used to derive projected rates of completion. Some of the methods used to develop projected completion factors are averages (e.g. harmonic averages, time weighted averages, geometric averages) and regression methods. Numerous items are considered when viewing these averages or regression statistics, such as the impact of high claims on perceived completion patterns.
4. For durations that exhibit a projected completion factor greater than the Valuation Actuary's chosen threshold (e.g. 80% complete), cumulative paid and incurred claims are divided by the projected completion factor to arrive at ultimate incurred claims. For durations that are less than the chosen threshold, a projection methodology is used. Similar to completion factor development, projection methodologies are worthy of a

lengthy discussion. In general, an ultimate incurred claims PMPM is derived by projecting a recent 12-month period to the current month(s) and seasonally adjusting.

5. With all months having both a cumulative paid amount and an estimated ultimate incurred amount, the completion factors used in pricing are calculated by taking the quotient of the two. Allowed completion and incurred completion are assumed to be identical.
6. Both allowed and paid claims in the BEP are completed by applying completion factors by incurred month developed in Step 6.

$$BEP\ Incurred\ Claims = \sum \frac{BEP\ Paid\ Claims\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

$$BEP\ Allowed\ Claims = \sum \frac{BEP\ Paid\ Claims + BEP\ Member\ Cost\ Share\ by\ Incurred\ Month}{Completion\ by\ Incurred\ Month}$$

Risk Adjustment in BEP: Risk adjustment amounts in the BEP are equal to those reported by the Department on 5/9/2018.

Loss Ratio in BEP: Loss ratio is 83.88%

Credibility of Data

For the purpose of rate development, CAAC small group products are combined with other product offerings (HMO, PPO) from CBC subsidiaries. Combining the experience is actuarially justifiable for several reasons:

1. The demographics of members buying PPO and other products are similar.
2. Cost and utilization between PPO and other products are similar.
3. Medical policy between PPO and other products are almost identical, with the exception of referrals and no out-of-network benefit on HMO.

The credibility manual PMPMs are the combination of CAAC, Capital Advantage Insurance Company (CAIC), and Keystone Health Plan Central (KHPC) HMO data. All data is trended and benefit-adjusted in the same manner as the experience data (same projection factors and trend).

Trend Identification

Trend: 6.8%

Trend levels reflect CBC's best estimate of changes in utilization, provider reimbursement contracts, the network of facilities and providers, disease management initiatives and the impact of utilization management.

The following is a description of considerations used to determine trend.

1. Base Cost/ Change in hospital and physician contracting: The contracted increase in reimbursements to hospitals and physicians is the basis of cost trends. CBC uses the following to project future costs:
 - a. Vendor Physician Cost Model and Internal Hospital Contracting Model
 - i. The medical cost models use best estimates of Capital BlueCross (CBC)'s future contracting increases with physicians and hospitals. The models use cost estimates based on varying contract effective dates by physician and hospital. All facilities and providers are considered in this modeling effort (i.e. acute and non-acute, network and non-network, inpatient and outpatient, in- area and out-of-area). From there, a monthly anticipated cost (assuming static utilization) summary is produced which can be used in projecting future claims costs. Cost trends are determined at the CBC book of business level for all commercial business.
 - b. Internal Prescription Drug Trend Model
 - i. Price Inflation
 - ii. Contract Pricing
 - iii. Member Cost-Sharing
 - iv. Units per Script
 - v. Brand/Generic Mix
 - vi. Therapeutic Mix
 - vii. Cost per Script
2. Utilization Considerations:
 - a. Intensity of medical services rendered
 - b. Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
 - c. Further migration from brand prescription drugs to generic prescription drugs
 - d. Favorable impacts of value based benefits designs
 - e. Medical utilization estimates reviewed by CBC's Chief Medical Officer
3. Leveraging: The trend model is based on allowed cost increases. Paid claims trend at a higher rate than allowed due to leveraging. Leveraging is the impact of static cost-share, such as deductibles, to the paid trend. Estimated leveraging is calculated in Exhibit E1.
 - o Estimated costs are based on average plan benefit value in the month, calculated using CBC's internal benefit model.
 - o CBC expects the average benefit level in 2019 to be similar to current month, 201803.
 - o As of 201803, on average, small group members pay 20% of costs, while CBC pays 80%. So for example,
 - \$2,000 in annual allowed claims results in member pay = \$400, and CBC pay = \$1,600.
 - \$2,000 trends at 5.5% = \$2,110
 - Member pay is fixed at \$400
 - CBC pay = 2,110 – 400 = \$1,710

- Total CBC trend = $1,710/1,600 - 1 = 6.9\%$
- With an allowed trend of 5.5%, and static cost-share, leveraging will add an additional 1.4% to trend.

Historical Experience: Historical experience was not used to the develop trend.

Benefit Categories: Claims in the benefit categories displayed in the URRT come directly from CBC's data warehouse. These same categories are used to develop category-level trend. See Exhibit C for a description of benefits by benefit category.

See Exhibit E for CAAC's pricing trend, as well as cost and utilization components of the pricing trend.

Rate Development & Change

Projection Factors

Changes in Morbidity: Found in URRT Worksheet 1, "Pop'l risk Morbidity", and PA Rate Template Table 5. CAAC projects no change in morbidity.

Changes in Benefits: Benefit changes are not applied to allowed claims as allowed should stay consistent from 2017 to 2019. Benefit changes are applied in the development of future incurred claims, due to changes in member cost-share. This calculation is shown in Exhibit D, and applied in Exhibit G. The manual cost PMPMs are developed from CBC's internal benefit relativity model, discussed in the Plan Adjusted Index Rate section below. The benefit change is equal to member-month weighted average projected manual PMPM divided by member-month weighted average manual PMPM in the BEP. This process is further discussed in the Paid-to-Allowed section below.

Changes in Demographics: CAAC does not expect changes in demographics in its small group population.

Changes in Network: Network adjustment is applied for membership projected to move to EPO plans.

Other Adjustments: No other adjustment is applied.

Benefits, Demographics, Network and Other adjustments are found in URRT, Worksheet 1, "Other", and PA Rate Template Table 5.

Index Rate

The experience period index rate is CAAC's allowed claims PMPM, set in accordance with the single risk pool provision. All CAAC covered benefits are categorized as Essential Health Benefits (EHBs), therefore no adjustment was made to the experience period index.

Projected Allowed Claims: The CAAC experience period allowed claims, benefit-adjusted, trended to the projection period (See Projection Factors section above), and credibility adjusted, is the *Projected Allowed Claims at Current Benefits*. This number is reflected in Worksheet 1 of the URRT (“Projected Allowed Experience Claims PMPM (w/ applied credibility if applicable)”).

To calculate the projected index rate:

1. Start with *Projected Allowed Claims at Current Benefits*
2. The *Projected Allowed Claims at Current Benefits* reflect EHBs 100 percent, so no adjustment needs to be made to add EHBs and remove non-EHB claim cost. This is the index rate for individuals renewing January – December.

See Exhibit J for the Index Rate.

Paid to Allowed Ratio

CAAC used the prescribed URRT allowed claim rate development methodology in conjunction with a paid and incurred rate development methodology to determine final premium rates. The URRT projects allowed claims, and uses a paid-to-allowed ratio in order to adjust allowed claims to paid levels. This value is then used to develop premiums. In order to determine the paid-to-allowed ratio, CAAC projected paid and incurred claims, adjusted for benefits, to the experience period.

Projected Paid and Incurred Claims are calculated as follows:

1. Gather claims experience as described in the Data section above.
 - a. Base Experience Period (BEP) Paid Claims, Capitation, and Rx Rebates
 - b. BEP Member Months
2. Develop BEP *Paid and Incurred Claims*:

$$BEP \text{ Paid and Incurred Claims} = \frac{BEP \text{ Paid Claims}}{Completion \text{ Factor}}$$

The development of completion factors is described in Experience Period Premium and Claims above.

3. Develop the *BEP Paid and Incurred Claim PMPM*:

$$BEP \text{ Paid and Incurred Claim PMPM} = \frac{BEP \text{ Paid and Incurred Claims}}{BEP \text{ Member Months}}$$

4. Develop *Trended Claim PMPM*: Using the aggregate trend described in the Projection Factors section above, trend the BEP Paid and Incurred Claim PMPM from the midpoint of the experience period to the midpoint of the rating period.

Trended Claim PMPM

$$= [\text{BEP Paid and Incurred Claim PMPM}] \times (1 + [\text{Trend\%}])^{\text{Trend Months}/12}$$

5. Develop *Projected Paid and Incurred Claim PMPM*:

Projected Paid and Incurred Claims PMPM

$$= [\text{Trended Claim PMPM}] \times [\text{Benefit Adjustment}] \\ \times [\text{Morbidity Adjustment}] \times [\text{Other Adjustment}]$$

The *Benefit Adjustment*, *Morbidity Adjustment*, and *Other Adjustment* are discussed in the Projections Factors section above.

6. Develop *Projected Claims PMPM by Benefit* as follows:

- a. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on cumulative probability distributions (CPDs), where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.
- b. This actuarial cost model derives a Manual Cost for each benefit design in the experience period, as well as plans being offered in the projection period. The average Manual Cost of the experience is compared to the Manual Cost of the base plan. The projected experience period data is then adjusted to the base plan:

$$\text{Benefit Level Adjustment} = \frac{\text{Average Manual Cost in Projection Period}}{\text{Manual Cost of Base Plan}}$$

- c. The *Projected Paid and Incurred Claim PMPM* (Step 5) is then adjusted to the Base Plan as follows:

Base Plan Paid and Incurred Claims PMPM

$$= \frac{\text{Benefit Adjusted Paid and Incurred Claims PMPM}}{\text{Benefit Level Adjustment}}$$

- d. Each additional benefit design has its own unique Manual Cost, which can then be compared to the Base Plan to develop a Benefit Relativity:

$$\text{Benefit Relativity } A = \frac{\text{Manual Cost of Benefit } A}{\text{Manual Cost of Base Plan}}$$

- e. The Benefit Relativity developed in d. above is then used as a gauge to develop a final *Pricing Relativity*. This pricing relativity is developed using actuarial judgment including the following considerations:
- i. Final premium relativities must make sense based on benefits. For example, the annual cost difference between a PPO 2000 and PPO 1000 must be less than \$1000.
 - ii. Adjustments for plan designs that fall outside of the actuarial cost model.

- a. So the *Projected Claims PMPM by Benefit* is:

$$\begin{aligned} \text{Projected Claims PMPM Benefit } A \\ &= \text{Projected Claims PMPM Base Plan} \\ &\times \text{Pricing Relativity } A \end{aligned}$$

- b. And to arrive at the *Total Projected Claims PMPM*, CAAC assumes a distribution of members across the benefit plans being offered in 2019. The *Total Projected Claims PMPM* :

$$\begin{aligned} &= \text{Projected Claims PMPM Benefit } A \times \text{Expected Member Dist of Benefit } A \\ &+ \text{Projected Claims PMPM Benefit } B \\ &\times \text{Expected Member Dis of Benefit } B + \dots \end{aligned}$$

7. The Paid-To-Allowed Ratio is then:

$$\text{Paid to Allowed Ratio} = \frac{\text{Total Projected Claims PMPM}}{\text{Projected Allowed Claims at Current Benefits}}$$

See Exhibit G for the development of the *Paid-to-Allowed Ratio*. And see Exhibit L for the plan-level projected incurred amount development.

Risk Adjustment

Projected Risk Adjustments PMPM:

Relevant to 2019 pricing is the impact of Commercial Risk Adjustment (CRA) payment transfers that are expected to be earned in 2019. The pricing impact is:

$$[Net\ Projected\ Risk\ Adjustments\ PMPM] \\ = [Projected\ CRA\ Transfer\ PMPM] - [Risk\ Adjustment\ Fee\ PMPM]$$

The following items are those that we deem important in generating a CRA payment transfer adjustment:

1. Risk profile of the those enrolled in CRA eligible plans for the market or state (i.e. competitors) relative to risk profile of CRA eligible membership enrolled in our plans
2. Statewide average premiums
3. Current market penetration of this company and competitors in the market and in the state
4. 2016-2017 risk adjustment results
5. Market improvement in coding risk: CBC's ACA book of business has had a churn rate that makes a multi-year perspective of member diagnosis and risk very challenging. Because closing gaps in care and coding, and a myriad of other risk adjustment functions require more than a single year of data to facilitate an accurate depiction of risk, it is believed that CBC is disadvantaged in the market. This will drive CBC's relative risk to the market down over time.

To fund the HHS-risk adjustment program, issuers will remit to HHS a fee of \$0.13 PMPM. The Risk Adjustment Fee PMPM is included in the URRT Worksheet 1, "Projected Risk Adjustments PMPM", and is found on Exhibit K.

Market Adjusted Index Rate

The Market Adjusted Index Rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules, 45 CFR Part 156.80(d)(1). So,

$$[Market\ Adjusted\ Index\ Rate] \\ = ([Index\ Rate] \times [Paid\ to\ Allowed\ Ratio] \\ - [Net\ Projected\ ACA\ Reinsurance\ Recoveries] \\ - [Net\ Projected\ Risk\ Adjustments\ PMPM] + [Exchange\ Fees\ PMPM]) \\ \div [Paid\ to\ Allowed\ Ratio]$$

See Exhibit K for the development of the Market Adjusted Index Rate.

Retention Items

Administrative Expense Load:

1. Administrative Expense: Calculated using an allocation method from CBC's Finance department, and trended to the rating period. Costs are allocated according to results reported through a company-wide questionnaire. On an annual basis, each cost center within the company completes a questionnaire listing the distribution of costs (in percentage terms) by product as well as by market segment. For example, the questionnaire will ask what percentage of time is spent on PPO versus HMO versus Drug versus Medicare. And separately will ask what percentage of time is spent on large

group, small group, individual, and government programs. Using those distributions, all costs needed to perform the business are allocated to the proper market segments and lines of business. The administrative expense applied in the rate development is the total expense allocated to CAAC small group products. Administrative expenses are included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6. Expense as a percentage of premium vary by plan because a fixed dollar admin PMPM is applied to each plan.

2. Broker Expense: Calculated based on CAAC’s explicit per contract broker fee. Broker Expense is included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6. Brokers are paid on new business and renewals the same commission rate for all geographic locations, enrollment dates, and metal levels. The 2019 broker commission schedule is yet to be finalized. Attached please find the 1/1/2018 copy of the broker agreement – redacted version. Files are as follows:
 - a. Redacted Agent Agreement: “SG_18-19_Initial_CAAC_PPO_WBEBrokerSGRedacted_Supporting_20180518.pdf”
 - b. Redacted Preferred Producer Master Agreement: “Ind_18-19_Initial_CAAC_PPO_PPMABrokerSGRedacted_Supporting_20180518.pdf”
3. Member Out-Of-Pocket (OOP) and Ways to Save:
 - a. Description: These products offer enhanced transparency to cost savings potential both prospectively and retrospectively. These are new services included in each of CAAC’s plans that work to decrease costs by engaging members in their health care decisions. The Member OOP program will show a member, prospectively, the value of a service and the impact of member cost-sharing when that service is incurred. It allows a member to shop for the best price while introducing transparency related to the member’s expected cost share at the time of service. The “Ways to Save” program allows members to receive alerts, retrospectively, informing them of cost savings that could have been incurred had they have known about competing medical providers in the area. The alerts are retrospective and offer transparency around member’s healthcare options.
 - b. Costs: Costs are aggregated into CBC’s total administrative expense above. No additional fee is charged. The cost is approximately \$0.25 PMPM. Included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6.
4. Value-Based Benefits (VBB): Standard with each plan, Capital BlueCross includes wellness incentives to maximize the likelihood that consumers make positive behavioral changes, which lead to better health, and curbed health care costs for employers and employees alike. The incentive is as follows:
 - a. Complete biometric screening and receive a gift card.
 - b. Meeting biometric measure or finish online coaching program and receive a gift card reward.
 - c. The wellness program is administered through a vendor and costs are based on vendor fees, anticipated participation, and reward card amounts.
 - d. Included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6.
5. Identity Theft Coverage: Identity protection offering will include the following components:
 - a. Credit monitoring – Monitors activity that may affect credit

- b. Fraud detection – Identifies potentially fraudulent use of identity or credit
 - c. Fraud resolution support – Assists members in addressing issues that arise in relation to credit monitoring and fraud detection
 - d. Included in the URRT Worksheet 1, “Administrative Load”, and PA Rate Template Table 6.
6. Additional Quality Improvement: The Final Notice of Benefit and Payment Parameters (NBPP) for 2019 finalized the rule to allow issuers to apply a standard 0.8% of premium for quality improvement (QI) measures in the MLR calculation. Total QI amounts applied in rating equal 0.8%.

Profit (or Contribution to Surplus) & Risk Margin:

- 7. Contingency: Contingency is included in the URRT Worksheet 1, “Profit and Risk”, and PA Rate Template Table 6.

Taxes and Fees:

- 1. Health Insurer Fee (HIF) – Section 9010 of PPACA and Section 1406 of the Reconciliation Act (which modified PPACA) refers to HIF. The fee is a fixed-dollar amount distributed across health insurance providers. This fee has been suspended for 2019, but is projected to be re-implemented in 2020. So the fee applied is the average fee across all renewals in 2019. This is calculated in Exhibit H.
- 2. Exchange Fee – All issuers participating in a federally-facilitated exchange will remit 3.5% of premium to HHS. CAAC Small Group plans are offered off-exchange only, therefore no exchange fee is applied.
- 3. Federal Income Tax: Federal Income Tax will be collected on the 2% contingency built into the premium. The projected Federal Income Tax is included in the URRT Worksheet 1, “Taxes and Fees”, and PA Rate Template, Table 6.

See Exhibit H for all retention values.

Plan Rate Development

The Plan Adjusted Index Rates are included in Worksheet 2, Section IV of the URRT.

The following adjustments were used to derive the Plan Adjusted Index Rate:

- 1. Actuarial Value and Cost Sharing adjustment: The Actuarial Value and Cost Sharing Adjustment is determined using CAAC’s actuarial cost model. CAAC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied

together to derive a claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

2. Induced Demand: Please see Table 8
3. Provider Network: The Provider network is the same across all PPO plans. A network factor is applied to the EPO plan.
 - a. The Valley Advantage EPO plan is built around St. Luke's delivery system and is available in Lehigh and Northampton counties.
 - b. See Exhibit O1 for the development of the network factor.
4. Adjustment for benefits in addition to EHBs: No benefits other than EHBs are included in the plans, so no adjustment is necessary.
5. Adjustment for distribution and administrative costs: Described in Non-Benefit Expenses and Profit & Risk section above.
6. Tobacco Adjustment: Not applied to Small Group plans.

The development of the Plan Adjusted Index rate is found in Exhibit L, and summarized in Exhibit M.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Age Curve Calibration: The average age factor is calculated by taking the member-weighted average of current small group enrollment by age in CAAC. Age factors are applied in accordance with CMS's Standard Age Curve. The age calibration factor is adjusted for contracts with greater than three children under the age of 21. Please see file SG_18-19_Initial_CAAC_PPO_List-Billed_Supporting_20180518 for the calculation.

Geographic Factor Calibration: The average geographic rating factor is calculated by taking the CAAC member-weighted average by region.

Geographic Factors: CAAC performed regional analysis to quantify the cost difference between the three regions in our service area. The analysis gathered allowed claims in a 12-month period by region, normalized for demographics. We then compared the claim cost for each of the three regions, and found cost differentials between the regions, mostly due to differences in hospital contracting between regions. The data from the analysis is found in Exhibit Q.

Tobacco Factor Calibration: Tobacco factor not applied.

The calibration is:

$$[\text{Calibrated Plan Adjusted Index Rate}] = [\text{Plan Adjusted Index Rate}] \div ([\text{Age Curve Calibration}] \times [\text{Geographic Factor Calibration}] \times [\text{Tobacco Factor}])$$

Calibrated Plan Adjusted Index Rates are found on PA Rate Template Table 10.

The calibration factors and development are found on Exhibit N.

Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium Rate is developed as follows:

1. Member-Level Consumer Adjusted Premium Rate:

$$\begin{aligned} & [\textit{Member – Level Consumer Adjusted Premium Rate}] \\ & = [\textit{Calibrated Plan Adjusted Index Rate}] \times [\textit{Age Factor}] \\ & \times [\textit{Geographic Factor}] \times [\textit{Tobacco Factor}] \end{aligned}$$

2. $[\textit{Family Consumer Adjusted Premium Rate}] = \sum [\textit{Member – Level Consumer Adjusted Premium Rate}]$
With no more than three child dependents under age 21 taken into account

All consumer-level adjustments are applied uniformly to all plans in the Single Risk Pool. These adjustments do not vary by plan. Age and Geographic factors are displayed in Exhibits O.

Base Rates, i.e. Calibrated Plan Adjusted Index Rates, are found on Exhibit P.

AV Metal Values

The AV Metal Values included in Worksheet 2 of the URRT were based on the federally issued AV Calculator, with the exception of one plan. This plan is noted PA Rate Tables Table 10. Unique plan justification is included with this filing.

AV Pricing Values

All AV Pricing values were developed using CAAC's actuarial cost model and actuarial judgment as described in section Paid to Allowed above. Differences in health status are not included.

Projected Loss Ratio

See Exhibit I for the projected loss ratio calculation. The projected loss ratio is calculated using the federally prescribed MLR methodology.

Membership Projection

The membership projections found in Worksheet 2 of the URRT were developed by assuming that moderate decline in enrollment and similar distribution to current.

Attachments and Examples

List-Billed Data

Actuarial Statement

I, [REDACTED], ASA, MAAA, am of the opinion that this filing is in compliance with the applicable Federal and State Laws and Regulations concerning the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010.

I, [REDACTED], ASA, MAAA, do hereby certify that:

1. This filing has been prepared in accordance with the following:
 - a. Actuarial Standard of Practice No. 5, “Health and Disability Claims”
 - b. Actuarial Standard of Practice No. 8, “Regulatory Filings for Rates and Financial Projections for Health Plans”
 - c. Actuarial Standard of Practice No. 12, “Risk Classification”

- d. Actuarial Standard of Practice No. 23, “Data Quality”
 - e. Actuarial Standard of Practice No. 25, “Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverage”
 - f. Actuarial Standard of Practice No. 26, “Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans”
 - g. Actuarial Standard of Practice No. 41, “Actuarial Communications”.
2. The index rate is:
- a. Projected in compliance with all applicable state and federal statutes and regulations (45 CFR 156.80(d) (1)).
 - b. Developed in compliance with the applicable Actuarial Standards of Practice.
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered.
 - d. Neither excessive nor deficient.
 - e. Adjusted by only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) to generate plan level rates.
3. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
4. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, and in accordance with CFR 156.135(b)(2) as necessary. For any plan requiring an alternative method, the development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for benefits that deviate substantially from the parameters of the AVC and have a material impact on the actuarial value.
- a. The analysis was
 - i. conducted by a member of the American Academy of Actuaries, and
 - ii. performed in accordance with generally accepted actuarial principles and methods.
5. All factor, benefit and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
6. New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
7. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.

Actuarial Associate
Capital BlueCross

CAPITAL ADVANTAGE ASSURANCE COMPANY, INC.
RFJ Part II – Consumer Friendly Justification

Rate Increase Considerations: Changes being requested are based upon consideration of the factors that influence future period cost structures. The primary drivers of change in future costs are:

- Anticipated increase in facility and physician unit costs
- Anticipated changes in prescription drug unit costs
- Continuing change in utilization such as
 - Intensity of medical services rendered
 - Changes in place of service (e.g. continued migration of inpatient stays to outpatient setting)
 - Further migration from brand prescription drugs to generic prescription drugs
 - Favorable impacts of value based benefits designs
- Prescription drug patent expirations and new to market brand drugs
- Leveraging associated with unchanged cost share components such as deductible and copays
- Inflation adjustment to administrative expenses
- Suspension of the Health Insurer Fee in 2019

2019 Rates Table Template v8.1		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.		
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.		
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.		
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.		
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2019 Rates Table Template v8.1		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.		
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.		
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.		
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.		
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2019 Rates Table Template v8.1		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.		
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.		
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.		
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.		
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2019 Rates Table Template v8.1		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.		
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.		
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.		
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.		
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

**Re: Capital Advantage Assurance Company
Small Group Rates
Filing No 18-19
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate**

Dear Ms. Gray:

CAAC received an objection letter from the Department dated June 15, 2018. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Correction to List-Billed data file
- Correction to Actuarial Memo – correction to 2017 rate SERFF filing number
- Correction to Memo Exhibits, Exhibit E – Trend

These changes do not impact rates.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

[REDACTED], ASA, MAAA
Manager, Actuarial Services
Capital BlueCross

Question and Answer Small Group Rates Effective January 1, 2019

With this response, please find corresponding Q&A Exhibits in SG_18-19_Initial_CAAC_PPO_Q&AExhibits1_Supporting_20180622.xlsx

Question 1. Please answer the following questions regarding the trend factors used (tab “Exhibit E_Trend”):

- a. The leveraging calculation assumes all member cost sharing is static (“Fixed Cost Share” column on tab “Exhibit E1_Lever”), but all plans have benefits which are subject to the deductible and/or coinsurance which would increase, to some extent, with allowed costs. Please explain why you think it is appropriate to assume all cost sharing is static.
- b. The leveraging calculation in “ExhibitE1_Lever” assumes allowed cost sharing is 5.5%. However, in the Raw Trends shown in “Exhibit E_Trend” none of the service categories have trends that high, and the weighted average, including drug but not dental/vision, appears to be closer to 5.4%. Please provide an explanation for why you used 5.5% in the calculation and a quantitative build-up of the 5.5% if it is not changing.
- c. The leveraging calculation in “ExhibitE1_Lever” compares projected paid costs by month to a plan with zero cost sharing (essentially an allowed amount since there is no cost sharing). However, it does not appear as if induced utilization is accounted for in the calculation. Based on the HHS curve, a zero cost sharing plan (1.00 AV) would have 24% higher utilization and, as a result, 24% higher allowed costs than a bronze plan (0.60 AV). Please provide an explanation for why induced utilization is not accounted for in the calculation.
- d. Please provide a quantitative buildup of the “leveraging adjustment” for the drug trend.
- e. Please provide a quantitative buildup of the “pipeline adjustment” for the drug trend and describe the adjustment and why it is necessary.
- f. Please explain the following regarding the dental and vision trends:
 - i. Please provide an explanation on the development of the final cost and utilization trends shown in cells B14 and C14 of the “Exhibit E_Trend” tab.
 - ii. Please provide an explanation on how the composite factor shown in cell C31 relates to the raw trends in cells B31 and C31.
- g. The final trends shown in cells B8:C14 tie to the trends on WS1 of the URRT as well as the rate development on tab “II Rate Development & Change.” These trends are applied to allowed claims. Please explain why you think it is necessary to make an adjustment to account for paid claim trend leveraging when trending allowed claims forward.

Answer 1.

- a. While, in some cases, the amount the consumer pays out of pocket increases as allowed claims increase, the consumer-paid percentage-of-total decreases due to fixed dollar cost-sharing such as deductible and copayments. For a member with a \$2,000

- deductible, incurring \$1000 in allowed claims year 1 and \$1100 in year 2 (10% allowed trend, for example), their cost-sharing increased, and they paid 100% of allowed claims in both years. But if that same member incurred \$5,000 in allowed claims year 1 (paid \$2,000 in deductible), and \$5,500 year 2, the insurer's paid trend is $3,500/3,000 - 1 = 17\%$, and the member's out-of-pocket trend is 0%. This is because the member's percentage-of-total out-of-pocket expenses decrease when fixed deductibles and copays apply. The leveraging calculation factors in all scenarios, showing the average impact of cost-sharing on a large population, measuring in aggregate how paid claims rise faster than allowed as the insurer percentage-of-total claims rises over time.
- b. For this example, 5.5% allowed trend is used because it falls within the range of reasonable allowed trends. This small group filing is requesting a lower than average trend due to competitive pressures. While the raw trend shows 5.4%, CBC is aggressive in its low utilization assumptions. Utilization could easily inflate the trend upward another 1 to 2 points.
 - c. This calculation uses CBC's internal manual cost model to determine benefit relativities. While this model accounts for induced utilization as cost-sharing decreases, it does not use the same assumptions as the AV calculator. But one can infer that the calculation is reasonable since CAAC continues to see membership with an average AV level in the Gold range. The exhibit shows AVs between 80% and 84%.
 - d. Please see Q&A Exhibit 1 for a comparison of paid and allowed trends by market segment. The difference between paid and allowed is 2%, attributable to leveraging.
 - e. The pipeline adjustment is used to account for new drugs expected to enter the market in 2019. Since these drugs are new, their cost is not accounted for in the BEP. CBC has compiled pipeline reports from our PBM and Specialty Rx vendor to quantify which drugs could potentially be entering the market in 2019. While there are many unknowns as to which drugs will become available and utilization of those drugs, through this process, the group decided to apply 1% pipeline to the group market. For the individual market, it is reasonable to assume a higher pipeline adjustment due to higher specialty trend (the vast majority of pipeline drugs are specialty – low incidence, high cost). Please see Q&A Exhibit 2 for specialty trend by market segment.
 - f.
 - i. We applied standard pricing trend to dental and vision. Because Individual and Small Group enrollment has fluctuated, and embedded pediatric dental and vision coverage is fairly new to the market, it is difficult to estimate changes in utilization and mix of services. Due to these factors, 3% pricing trend is applied to these components.
 - ii. The composite dental and vision trend is not correct. It is being corrected with this submission.
 - g. While it is not necessary to apply paid trends to allowed claims, the format of the exhibits makes it preferable to do so. If I apply allowed trends to allowed claims, and paid trends to paid claims, the final proposed rates do not change, only the paid-to-allowed ratio changes.

Question 2. Please provide the quantitative and qualitative development of the projected 2019 risk adjustment payment of \$10.00 shown in Exhibit K.

Answer 2. The \$10 projected 2019 risk adjustment PMPM is an estimate based on PID 2017 projected RA results of \$9.49 PMPM. \$10 is only slightly higher than 2017 despite 2 years of premium increases, which would naturally increase \$9.49 more than \$0.51. This again is an aggressive estimate, driven by competitive pressures.

Question 3. Please provide quantitative and qualitative support for the 0.92 “Capital Advantage EPO” network factor on the “III Plan Rates” tab.

Answer 3. The Provider network is the same across all PPO plans. A network factor is applied to the EPO plan.

- a. The Capital Advantage EPO plan is built around Pinnacle Health’s delivery system and is available in Cumberland, Dauphin, and Perry counties.
 - i. Pinnacle offers an 18% discount on facility claims
 - ii. We assume that 75% of claims will be performed at a Pinnacle facility (EPO plans are offered as multi-options within groups, lowering the overall cost savings as high cost members stay in PPO plans).
 - iii. The rating factor of 0.92 is the aggregate factor applied to the total medical, Rx, Dental and Vision premium given that the discount only impacts facility claims.
- b. The Valley Advantage EPO plan is built around St. Luke’s Hospital delivery system and is available in Lehigh and Northampton counties.
 - i. St. Luke’s offers savings over area hospitals in IP, OP and professional settings.
 - ii. We assume that 75% of claims will be performed at a St. Luke’s facility (EPO plans are offered as multi-options within groups, lowering the overall cost savings as high cost members stay in PPO plans).
 - iii. The rating factor of 0.92 is the aggregate factor applied to the total medical, Rx, Dental and Vision premium given that the discount only impacts medical claims.
- c. See Exhibit O1 for the development of the network factors.

Question 4. Please provide an explanation for the why the “Benefit Richness (induced demand)” information in column L of the “III Plan Rates” tab does not result in a weighted average factor of 1.0 as directed in the Rate Filing Guidance.

Answer 4. The induced demand factor is designed to adjust the AV and Cost-Sharing factors so that, in aggregate, they equate to the Paid-to-Allowed ratio. In this filing, the AV and Cost-Sharing factors aggregate to 0.74. But the Paid-to-Allowed ratio is 0.86. The induced demand factor of 1.16 is applied to 0.74 to bring claims up to 0.86 level. $0.74 \times 1.16 = 0.86$. So projected claims by plan aggregate to equal projected claims calculated in total. Projected claims were not increased by applying induced demand (impact of 1.0), which is demonstrated in the fact that projected claims = [allowed claims] x [average AV and cost-sharing factor] x [average induced demand]. This is demonstrated in Table B.

Question 5. Please review and update your calculation of the “List-Billed Adjustment for Max 3 Children” as the work provided has factors in column N which are different than those in column M even when there are 3 or fewer children (e.g., rows 441 and 584).

Answer 5. The List-Billed Adjustment for Max 3 Children file has been corrected with this response.

Question 6. The Federal Income Tax in “Exhibit H_Ret” is calculated as a subset of the Contingency amount (21% of the 2% Contingency). However, it is included in the rate development as an amount in addition to the 2% Contingency amount. Please provide an explanation as to why this approach is appropriate and does not double-count the impact of Federal Income Tax.

Answer 6. Please see Q&A Exhibit 3 for an example of how federal income tax and contingency are applied to establish a net contingency (net of taxes) that is still less than 2%. The example shows a premium build with and without federal income tax applied. While federal income tax is applied “below the line” or to operating margin, creating a circular calculation, the goal in the premium build is to apply an assumption that accounts for this item. In the first calculation, net contingency falls to 1.58%. The second calculation results in a net contingency of 1.91%, closer to the 2% goal.

Question 7. Please provide a qualitative and quantitative development of the 1.0 factors shown in the “II Rate Development & Change” tab for demographics, morbidity, and benefits. In other words, please provide quantitative evidence that the manual rate and the projected experience are identical in these ways.

Answer 7. We could definitely argue that upward changes in demographics and morbidity in the small group market are likely in 2018 and 2019 due to Association Health Plans and Small Business ASO plans attracting younger and healthier members away from ACA-compliant plans. But due to competitive pressures, no change is applied in rating. There are changes in benefits, but those changes are only applied to paid claims, as they mostly impact changes to cost-sharing (no change to utilization is applied) in the paid-to-allowed ratio development.

Question 8. Please provide an explanation for the large range of “AV and Cost-Sharing Adjustment” factors (row 26 of Exhibit L) for plans within a metal level. As an example, non-HRA gold plans range from 0.68 to 0.86.

Answer 8. The Actuarial Value and Cost Sharing Adjustment is determined using CBC’s actuarial cost model. CBC uses an actuarial cost model to measure the impact of cost-sharing designs on cost and utilization amounts by service category. The cost model shows frequency per 1,000 per year by type of service (IP, OP, Professional), and allowed cost per service for each of the same types of service, normalized to a \$0 office visit copayment and a \$25 ER copayment. Given a particular benefit design (for example, \$20 office visit copayment), utilization is adjusted from the benchmark based on assumed utilization change factors, and cost per service is reduced by the copayment or coinsurance per service. Cost and utilization are multiplied together to derive a

claim PMPM by service, summed for all services. The impact of global deductible, coinsurance, and out-of-pocket max is then measured based on CPDs, where the value of services that apply to the CPDs adjusts the level of the curve, as well as global utilization adjustments.

The wide range is attributable to how CBC's model applies utilization increases to lower deductibles (\$500) versus higher deductibles (\$2,000) compared to assumptions applied in the AV calculator. It also seems to value coinsurance at a higher value than the AV calculator.

Question 9. Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Answer 9. A cover letter is being provided with this response.

Question 10. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Answer 10. I confirm that I have tested to ensure the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Question 11. Page 2 of the actuarial memo list a SERFF number for the rate filing effective 1/1/2017 that is incorrect. The SERFF number references a form filing. Please correct this.

Answer 11. Changes have been made to the actuarial memo.

Small Group Rates
Filing No 18-19
TOI Code: H15G Group Health – Hospital/Surgical/Medical Expense
Sub-TOI Code: H15G.003 Small Group Only
Filing Type: Rate**

Dear Ms. Gray:

CAAC received an objection letter from the Department dated July 6, 2018. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Correction to list-billed portion of the age calibration, Memo Exhibits, Exhibit N Calibration
- Correction and modification to Memo Exhibits, Exhibit E – Trend
 - Correction to displayed dental and vision trend
 - Modification to leveraging adjustment, which impacts overall trend
- Updated rates based on trend and list-billed changes

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

[REDACTED], ASA, MAAA
Manager, Actuarial Services

Question and Answer Small Group Rates Effective January 1, 2019

With this response, please find corresponding Q&A Exhibits in SG_18-19_Initial_CAAC_PPO_Q&AExhibits2_Supporting_20180716.xlsx

Questions from Actuarial Consultant:

Question 1. In response to Question 1a you state the leveraging calculation represents the “average impact of cost sharing on a large population.” This calculation assumes zero increase to member cost sharing from year to year. Your explanation indicates some members may see no change to their cost sharing (members with allowed claims over the deductible in your example) and some members would see increases to their cost sharing (members with allowed claims under the deductible in your example). Please provide quantitative support for the assumption that there is no change to the average member cost sharing percentage as that would assume all members had allowed claims above their deductible amount.

Answer 1. In reviewing the calculation, I see how the fixed cost sharing column did not account for member cost share increases as allowed claims increase. Exhibit E1_Lever has been updated to account for trend in member cost share. The assumption is that 20% of members see increase in their cost sharing due to allowed trend, or $5.5\% \times 0.2 = 1.1\%$ annual trend. With this change, leveraging is reduced from 1.4% to 1.1%.

Question 2. In response to Question 1b you state induced demand could drive raw trend up by one to two points. In the “Exhibit E_Trend” tab induced demand is shown to have no impact (0%). Please explain this discrepancy.

Answer 2. For Question 1b, my intent is not to refer to induced utilization, but the utilization component of trend. My goal was to explain that while we included 1% utilization for professional, 0.8% for Rx, and 0% for IP and OP, those assumptions are rather aggressive, resulting in a low filed trend of 5.4%. Utilization assumptions could easily change that trend 1-2%, and more so, very easily change the trend from 5.4% to 5.5% (used in the leveraging exhibit). So 5.5% used in the leveraging exhibit is well within the reasonable range.

Question 3. In response to Question 1c you state your “model accounts for induced utilization as cost-sharing decreases.” However, in your calculation of the “Implied AV” on the “Exhibit E1_Lever” tab, the paid PMPM amount is always divided by the allowed amount for a plan with no cost sharing. This calculation does not appear to account for the lower allowed amount which would occur for leaner plans because of induced utilization. Please provide quantitative support for how the “Implied AV” amounts account for induced utilization when compared to a plan with no cost sharing or update the calculation accordingly if they currently do not.

Answer 3. In reviewing the calculation, induced utilization is not explicitly shown, as the allowed amount is static for all months. While Exhibit E1_Lever originally showed several months of data, the calculation only uses the most current month (201803). So to simplify the exhibit, I've removed the months prior to 201803. The implied AVs (developed in conjunction with the Zero Cost Share Manual rate) for that month are correct. The new exhibit also incorporates an annual increase in member cost share, as noted above.

Question 4. In response to Question 1 if you updated the total composite trend for Dental and Vision to be 3%. It appears cost trend and utilization trend are still not consistent between rows 31 and 14 of the 'Exhibit E_Trend' tab. Please provide an explanation for which is the correct assumption and please ensure all other pricing and documentation files match, as this could have a slight impact on final rates.

Answer 4. With this submission, Exhibit E_Trend has been corrected to be consistent between rows 31 and 14.

Question 5. As a follow up to Question 3, please provide a quantitative buildup of the 0.920 factor in Excel, with formulas based on the discounts and utilization patterns described in your initial response.

Answer 5. The quantitative buildup of the network factor is found in SG_18-19_Revised_CAAC_PPO_PARateandMemoExhibits_Supporting_20180716.xlsm, Exhibit 01_EPONetwork.

Question 6. As a follow up to Question 7, please provide a quantitative buildup of the 1.0 factors in Excel, with formulas based on the assumptions described in your initial response. Please include experience period and projection period demographic, morbidity, and benefits information supporting the 1.0 factors.

Answer 6. Please see Q&A Exhibit 1 for the experience and projection period demographic, morbidity and benefit information, as well as explanation of the 1.0 factors applied in rating. While the calculation shows a decrease in demo, and increase in morbidity, together totaling +3.6%, CBC is investing in this market segment to protect against future enrollment losses. Therefore, 1.0 was applied in rating.

Question 7. Thank you for correcting the List-Billed Adjustment file. Please explain why this change did not have a resulting impact on rates.

Answer 7. With this submission, the filing has been updated to include the impact of the List-Billed factor change.

Questions from PID:

Question 1. Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Answer 1. A cover letter is being provided with this response.

Question 2. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Answer 2. I confirm that I have tested to ensure the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Question 3. Responses to the second round of questions are due July 13, 2018. No modifications other than risk adjustment due to the Federal Risk Adjustment Report and Department requested changes will be accepted.

Answer 3. I confirm that no additional changes have been made.

Capital Advantage Assurance Company
Small Group Rates
Q&A Exhibit 1
BEP and Projected Demo, Morbidity and Paid Benefits

<u>Period</u>	<u>Average Demo Score</u>	<u>Average Morbidity</u>	<u>Combined Demo and Morbidity*</u>	<u>Paid Benefit PMPM**</u>
BEP	1.137	1.158	1.317	348.74
Projection	1.121	1.217	1.365	342.59
Change	0.986	1.051	1.036	0.982

*1.0 was applied in rating in total

While morbidity changes are often accounted for in risk adjustment transfer, CBC is seeing a shift of healthier member from Small Group ACA into the Small Business ASO (level-premium) market. CBC has to assume this shift is happening throughout the entire state given that CBC is in competition with other statewide carriers that are aggressively pursuing SB ASO enrollment by targeting low-risk ACA customers. Therefore CBC expects the statewide average risk score to increase similarly to CBC's own experience, keeping risk adjustment relatively static

** Paid Benefit PMPM is from Exhibit D - Benefit Mix Changes

This factor is applied to projected paid claims in Exhibit G - Paid to Allowed Development
While this is the adjustment to paid claims due to cost-sharing differences, CBC does not expect any difference in allowed claims from the BEP to the projection period, so the benefit factor applied to allowed claims in the URRT is 1.0
Note that a change to the allowed benefit change factor would not impact rates, as paid claims are already adjusted for benefits
Changes would only impact the paid-to-allowed ratio

Dear Ms. Gray:

CAAC received an objection letter from the Department dated July 17, 2018. CAAC is providing the following in response to the objection letter:

- Q&A written response
- Q&A exhibits
- Modification to Memo Exhibits, Exhibit E – Trend and Exhibit E1 - Leveraging
 - Modification to leveraging adjustment, which impacts overall trend
 - In response to consultant question 1
- Modification to requested morbidity factor
 - In response to Q&A submission from 7/16/2018, consultant question 6.
 - CBC's reasoning for this modification is further explained in the current response, PID question 1.

If you have any questions regarding this filing, please call me at [REDACTED] (or via email at [REDACTED]) or [REDACTED] at [REDACTED] ([REDACTED]). Thank you for your assistance in this matter.

Sincerely,

[REDACTED]

Question and Answer Small Group Rates Effective January 1, 2019

With this response, please find corresponding Q&A Exhibits in SG_18-19_Initial_CAAC_PPO_Q&AExhibits3_Supporting_20180719.xlsx

Questions from Actuarial Consultant:

Question 1. In response to Question 1, you applied an adjustment to the calculation in the “Exhibit E1_Lever” tab to increase member cost sharing only 0.2% for every 1.0% increase in allowed costs. Please provide quantitative support for this assumption.

Answer 1. Please see Q&A Exhibit 1 for a new calculation of leveraging. In order to determine the future impact of leveraging, including the impact of increasing cost sharing due to allowed costs rising, I’m showing a claim probability distribution with allowed amounts by range. The data is for 2017 CBC ACA single risk pool population. Given, the small group average AV displayed in Exhibit E1 – Leveraging of 80%, I can infer that a deductible (applying to all services) of \$2,822 is equal to 80% AV for this population. Using that deductible amount, I can measure incurred claims and member cost-sharing trend, given an allowed trend of 5.5%. Claims are trended in a database in order to move claims into the correct buckets as they trend. You can see that the total allowed amounts are increasing at 5.5% annually (columns O and X). Given the deductible and allowed trend, incurred claims trend at 6.4%, member cost-share at 1.9% and leveraging is $6.4\% - 5.5\% = 0.9\%$. Exhibit E1 – Leveraging and Exhibit E – Trend are being updated to reflect this revised amount.

Question 2. In response to Question 3 you state that “induced utilization is not explicitly shown, as the allowed amount is static for all months” in the calculation on the “Exhibit E1_Lever” tab. Our understanding with this calculation is that the paid amounts (\$264.53 in 201803) is reflective of the average manual rate paid costs based on Capital’s internal model and the allowed amount (\$479.20) is reflective of a plan with no cost sharing (1.000 AV). The member cost sharing amount is then calculated by subtracting the paid amount from the allowed amount ($\$479.20 - \$264.53 = \$214.67$). This subtraction assumes that the allowed amount for the mix of plans underlying each month is the same as the allowed amount for a plan with no cost sharing and does not account for induced utilization differences. As an example, a silver plan (0.700 AV) would have 17% lower utilization and allowed costs than a plan with no cost sharing (1.000 AV) if using the HHS induced demand factors. By not accounting for induced utilization in the allowed amounts, the member cost sharing amounts are being overstated, which then increases the calculated impact of leveraging. Please update the “Exhibit E1_Lever” to calculate member cost sharing based on allowed amounts reflective of the plan mix underlying each month instead of allowed amounts reflective of a plan with no cost sharing or provide support for how induced utilization is accurately being accounted for in the current calculation.

Answer 2. I apologize for misunderstanding the question during the first round. I have updated Exhibit E1 – Leveraging to show that \$479.20 is the allowed amount for the 201803 mix of benefits.

Questions from PID:

Question 1. Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Answer 1. A cover letter is being provided with this response, with details around the changes. Please note that with this submission, CBC is requesting a change to the morbidity factor. With changes to trend throughout the review process, CBC will lose 0.4% of initial proposed premium. CBC has also indicated that we are investing in this market segment in order to prevent future losses in membership. In order to invest, we have not implemented full factors as calculated. One example is morbidity. As explained in the response sent on 7/16/18, changes in morbidity and demographics equate to approximately 3.6%. CBC is requesting to incorporate a morbidity change of 0.5% to account for the changes in trend.

Question 2. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Answer 2. As discussed, Table 11 of the Actuarial Memorandum Exhibits are being updated with this submission. PA Plan Design Summary and Rate Tables and the Federal Rates Template will be updated at a future date. At that time, we will ensure that all templates are identical.
