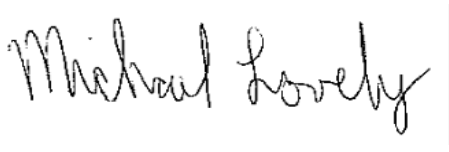
Dear Ms. Gray,

UPMC Health Benefits, Inc. respectfully requests approval of a rate filing for Small Group Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2019 through through 12/31/2019.

Company Name/NAIC #: UPMC Health Benefits, Inc./11018
Market: Small Group
On or Off Exchange: Off Exchange Only
Effective Date of Coverage: 1/1/2019
Average Rate Change Requested: 0% ($0)
Range of Rate Change Requested: 0% to 0% ($0 to $0)
Total additional annual revenue generated from the proposed rate change: $0
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 7, 9 (new filing for 2019)
Metal Levels Offered: Silver, Gold, Platinum
Currently Enrolled Lives: 0
Currently Enrolled Policyholders: 0
Number of Plans Offered in 2019: 35 (new filing for 2019)
Corresponding Contract Form #: EPOF06, EPOF07, PPOF010, PPOF09, PPOF10, PPOF11
Binder ID#: UPMC-PA19-125080377
HIOS Issuer ID #: 67430
Submission Tracking #: UPMC-131496028

If you have any questions or require additional information, please call me at 412-454-7849 or email me at lovelymt@upmc.edu.

Sincerely,



Michael Lovely, FSA, CERA, MAAA

Rate Change Summary

UPMC Health Benefits, Inc. – Small Group Plans

Rate request filing ID # UPMC-131496028 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at http://www.insurance.pa.gov/Consumers/ACARelatedFilings/

Overview

Initial requested average rate change:	0.00%
Revised requested average rate change:	0.00%
Range of requested rate change:	0.00%
Effective date:	1/1/2019
People impacted:	0
Available in:	1, 2, 3, 4, 5, 7, 9

Key information

Jan. 2017-Dec. 2017 financial experience		
Premiums	$	-
Claims	$	-
Administrative expenses	$	-
Taxes & fees	$	-
Company made (after taxes)	**$**	**-**

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

Claims:	87.74%
Administrative:	10.26%
Taxes & fees:	2.00%
Profit:	0.00%

The company expects its annual medical costs to increase by approximately 3.23% for 2019.

Explanation of requested rate change

No rate increase is proposed for UPMC Health Benefits Small Group plans for 2019 since this is the company's first filing in this market.

PA Actuarial Memorandum - Redacted

Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

Company Information

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Benefits, Inc.
NAIC #: 11018
HIOS Issuer ID: 67430
Market: Small Group
Exchange: Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2019

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131496028
Form Filing SERFF Tracking #: UPMC-131492568, UPMC-131492655, UPMC-131492611, UPMC-131492635, UPMC-131492613
Binder SERFF Tracking #: UPMC-PA19-125084678

Rate History and Proposed Variations in Rate Changes

No rate history exists since this is the first rate filing by the captioned company in this market.

Average Rate Change

The average rate change displayed in Table 10, column AC, of the PA Actuarial Memorandum Exhibits is 0%. The change in 21-year-old non-tobacco premium PMPM calculated in table 11, cell AN13, of the PA Actuarial Memorandum Exhibits is 0.0%. The percent increase over Experience Period calculated in cell V45 on worksheet 1 of the URRT is 0%. The annualized percent increase calculated in cell V46 on worksheet 1 of the URRT is 0%.

Membership Count

Various breakdowns of the membership count for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits. Please see Exhibit 7 of the Supporting Exhibits for various enrollment projections by plan.

Benefit Changes

A table with these changes has been included in Appendix I. No plans have actuarial values that fall in the expanded de minimis range.

Experience Period Claims and Premium

Tables 1, 2, 3, and 4 of the PA Actuarial Memorandum Exhibits and section I, worksheet 1 of the URRT are not populated with claims and premium data in the single risk pool from the experience period (January 2017 - December 2017) since the captioned company did not have any experience for ACA-related or transitional products in this market over this time period. Rate development relies completely upon data from the rate manual, which has its experience displayed in tables 2b, 3b, and 4b and section II, worksheet 1 of the URRT. Please note that we enter $1 into the experience period claims cells in the URRT in order to get the template to validate/finalize despite not having experience for this company in 2017.

Credibility of Data

No experience period data is available for the captioned company in this market. Therefore, 0% credibility is used. The rate manual was developed using experience period data for groups enrolled in a ACA-compliant plan, which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The rate manual consists of 930,100 member months of experience. Adjustments include the trend, morbidity, and network adjustments discussed in the "Index Rate" section below.

Trend Identification

The overall annual trend used in rate development is 3.23%. The entire block of commercial business was included in Table 3b of the PA Actuarial Memorandum Exhibits for trend development since no historical claims are available for the captioned company in this market. Service categories were defined to be consistent with the URRT instructions. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and

3b. Please see Exhibit 10 of the Supporting Exhibits for trend development. In addition, quarterly rates effective on the first day of each calendar quarter in 2019 are proposed for this filing using 1.78% quarterly trend.

Historical Experience

Historical data from the four most recent calendar years for the captioned company and market are not provided in Table 4 since the captioned company did not have any experience for ACA-related or transitional products in this market over this time period. The historical data listed in Table 4b belongs to our entire block of commerical business and was used to develop trend.

Rate Development & Change

Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below. Table 5a is populated with the number of member months renewing by quarter since quarterly trended rates will be generated for this filing.

Index Rate:
For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to the lack of experience. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 3.23% annual trend to the manual rate.

Adjustments to account for changes in morbidity and network costs are then applied to get from the single risk pool population to the plan offerings of this specific segment. We expect a morbidity trend of -6% when comparing our experience period population for the manual to our projected population. When ACA-compliant plans were first introduced into the small group market, the population that enrolled consisted of unhealthier members. Over the last few years, healthier members have enrolled in ACA-complant plans more frequently, decreasing the morbidity of the insured population on an annual basis. This adjustment will account for this trend in morbidity from the experience period to the projection period.

Additionally, an adjustment factor to account for change in network of 0.980 has been applied as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. This factor is the product of the geographic calibration factor calculated in Exhibit 5 of the Supporting Exhibits and an additional factor (0.916) that accounts for the fact that a PPO product with tiered in-network cost-sharing is offered by this company. The manual data consists of a blend of UPMC's Standard Network along with the Premium Network, which are included in UPMC's Health Coverage and Health Options rate filings for this market, respectively. Since the networks included in this company's filing do not mirror either of the rate manual networks, the adjustment to account for the cost differential between these different sets of networks has been set equal to the geographic calibration factor applied in Table 10. This was done because the differences in geographic characteristics between each of these networks are the driving force behind differences in cost. In addition to this, since the

manual data is based on a blend of data from PPO, EPO, and HMO products, the latter factor mentioned above adjusts for the lower projected costs for the projection period under the tiered PPO product for this specific segment. This factor has been applied in Table 5 and also to each benefit category in the Other adjustment column in section II, worksheet 1 of the URRT.

No other adjustments have been applied to the index rate. The average age for our 2017 experience period small group risk pool was 37.0 with an average premium factor of 1.52. This is identical to our 2018 experience so far with age 37.0 and premium factor 1.52. Due to the stability of the population, no demographic adjustment has been made to the rates. In addition to this, no adjustment was applied to account for the regulation that prohibits charging for more than three children per family since this would have minimal cost impact. Please note that the Index Rate of Projection Period of $443.64 shown in Table 5 matches the corresponding value shown in section III, worksheet 1 of the URRT.

Market-Adjusted Index Rate:

The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a receivable of $14.51, which is displayed in section III, worksheet 1 of the URRT and Table 5. Please see Exhibit 2 of the Supporting Exhibits for the derivation of the risk adjustment PMPM amounts for both the experience and projection period. $1.80 PMPY has been subtracted as a projected amount for the Risk Adjustment Administration Fee since this was the value published by HHS. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The effect for this adjustment is a decrease in premium since less revenue will be required due to the anticipated receivable. No adjustment was made for the Marketplace User Fee since all plans included in this filing are only offered off exchange.

Total Allowed Claims:

The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.04 PMPM.

Retention Items

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

Administrative Expenses:

Administrative costs of 10.26% of premium have been displayed in Table 6 and the URRT. These expenses are taken from the Health Options 2017 Supplemental Health Care Exhibit (SHCE) since Health Benefits does not have any data in the Small Group section of the 2017 SHCE. These costs are broken out by lines of business and market segments matching this filing and thus are appropriate for use. Differences between the SHCE and section I, worksheet 1 of the URRT stem from the fact that the SHCE include restatements of estimates from the prior year, while the URRT only contains actual experience from 2017 (experience period). We are unable to provide a breakdown between ACA and non-ACA business in Part 1 of the SHCE as we do not have the base data for these fields split between ACA and non-ACA categorization.

[This information redacted for publication.]

Taxes and Fees:
The load for Taxes and Fees will be 2% in 2019 to account for the Pennsylvania Premium Tax. No value is entered for the PCORI Fee to account for its expiration. The field for the Health Insurance Tax is also has no value to account for it moratorium in 2019. Please note that the Risk Adjustment Administration Fee was not included in the Taxes and Fees field. The value in Table 6 matches the corresponding value in the URRT since there is no Marketplace user fee applied in this filing.

Profit/Contingency:
The projected profit margin for this company will be 0% for 2019. The same level of profit margin is expected for each plan included in this filing.

Projected Loss Ratio
The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 90.4%, as shown in Exhibit 9 of the Supporting Exhibits.

Normalized Market-Adjusted Projected Allowed Total Claims

Normalization factors for 2019 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2018 factors have not been added since this is the first filing for the captioned company and market. Detailed discussion on each of the 2019 factors are provided below.

Average Age Factor:
The average age factor was calculated using our projected ACA-related Small Group population with the prescribed HHS Age Factors for 2019. We pulled them in summary alongside network and area data in order to back out age factor differences when determining network/area factors. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. The average age factor is 1.52 and average age was 37.0 during the experience period. Please see Exhibit 4 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:
The calibration factor of 1.069 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 5 of the Supporting Exhibits. Please see the Geographic Factors section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:
No tobacco load is applied in the Small Group market, so the average tobacco factor is 1.0.

Average Benefit Richness:
Benefit richness factors were calculated so that the average value is 1.0 when weighted with projected membership. This normalization is demonstrated in Exhibit 4b of the Supporting Exhibits. These factors do not normalize to 1.0 in Table 10 of the PA Actuarial Memorandum Exhibits because this table uses current enrollment for normalization. Projected enrollment is more appropriate for this purpose due to recent changes in network and plan offerings under this company.

Average Network Factor:
The network factor applied for all networks included in this filing is 1.0.

Components of Rate Change

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented have not been entered in the 2018 columns since this is the company's first rate filing in this market.

Plan Rate Development

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2019 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described below. Please see Exhibit 6 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values. The AV Pricing Values for each metal level are similar for 2019. Please note that the Inside Advantage and MyCare Advantage products offered with a mixture of tiered and non-tiered in-network benefits do not fit the format of the AV Calculator. Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final metal-level AVs for these tiered plans. The Health Incentive Account (HIA) plans also do not fit the format of the AV Calculator due to varying amounts of HIA dollars earned by each member. To account for this, we assume 30% utilization of this incentive based on historical data and used this when generating the metal level AVs.

Plan Actuarial Value:
The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business.

Benefit Richness (induced demand)
Please see Exhibit 3a in the Supporting Exhibits for the induced utilization exhibit. The benefit richness adjustment was used to account for differences in induced demand between plans with different metal levels.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.04 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived

by adding the aforementioned PMPM to the projected index rate for 2019 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans.

Provider Network
No adjustments were made to account for provider network since the projected costs for each network included in this filing do not exhibit any significant differences.

Catastrophic Eligibility
Catastrophic plans will not be offered under this company and market in 2019, so no adjustment is necessary.

Non-Funding of CSR Adjustment
No On Exchange silver plans are included in this filing, so no adjustment is necessary.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance.

Plan Factors

Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2019 is used in the development of the Consumer Adjusted Premium Rates. No tobacco load will be applied for the small group market in 2019.

Geographic Factors

Geographical factors for each region in Pennsylvania were developed to reflect the varying costs of delivery between each geographical region in which coverage is offered.

Network Factors

No network adjustments were deemed necessary for 2019, since we do not anticipate significant variations in cost by network for the networks including in the small group market for this company.

Service Area Composition

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2019. Service area maps for 2018 and 2019 have been uploaded in the Supporting Documentation section in SERFF.

Composite Rating

No composite rating is used with these plans.

Warning Alerts

Cell A83 on worksheet 2 of the URRT displays warning alert. This occurs because the total projected premium calculated on worksheet 1 is done at the market level, while the value caluclated on worksheet 2 is done at the plan level. The plan-level calculation includes adjustments to the projected premium for factors such as the CSR Defunding Adjustment, non-EHB benefits, provider network, and induced demand, while the market-level calculation does not include these adjustments.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Projection Period
- Exhibit 2: Derivation of Broker Fee
- Exhibit 3a: Induced Utilization Derivation
- Exhibit 3b: Induced Utilization Normalization
- Exhibit 4: Derivation of Age Calibration Factor
- Exhibit 5: Derivation of Geographical Calibration Factor
- Exhibit 6: Proportion of Plan Adjusted Index Rates and AV Pricing Values
- Exhibit 7a: Development of Projected Enrollment by Network and Metal Level
- Exhibit 7b: Development of Projected Enrollment by Plan
- Exhibit 7c: Projected Enrollment by Rating Area
- Exhibit 8: Derivation of Annual Trend
- Exhibit 9: Derivation of Projection Period MLR

Actuarial Certification

I [redacted] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

Table 5. Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims

Development of the Projected Index Rate	Actual Experience Data	Manual Data	
Total Allowed EHB Claims + EHB Capitation PMPM (net of prescription drug rebates) PMPM	$ -	$ 451.99	<- Actual Experience PMPM should be consistent with the Index Rate for Experience Period on URRT
Two year trend projection Factor	1.000	1.066	
Unadjusted Projected Allowed EHB Claims PMPM	$ -	$ 481.69	
Single Risk Pool Adjustment Factors			
Change in Morbidity		0.940	<- See URRT Instructions
Change in Other	0.000	0.980	
Change in Demographics		1.000	<- See URRT Instructions
Change in Network		0.980	<- See URRT Instructions
Change in Benefits		1.000	<- See URRT Instructions
Change in Other		1.000	<- See URRT Instructions
Total Adjusted Projected Allowed EHB Claims PMPM	$ -	$ 443.64	
Credibidility Factors	0%	100%	<- See Instructions
Blended Projected EHB Claims PMPM		$ 443.64	<- Projected Index Rate
Development of the Market-Adjusted Index Rate and Total Allowed Claims			
Adjusted Projected Allowed EHB Claims PMPM	$ 443.64		<- Index Rate for Projection Period on URRT - Individual or First Quarter Small Group
Adjusted Projected Allowed EHB Claims PMPM [will only populate for small group filings]	$ 455.66		
Projected Paid to Allowed Ratio	0.779		<- Paid to Allowed Average Factor in Projection Period on URRT
Projected Paid EHB Claims PMPM	$ 354.74		
Market-wide Adjustments			
Projected Risk Adjustment PMPM	$ 14.51		
Projected Paid Exchange User Fees PMPM	$ -		
Market-Adjusted Projected Paid EHB Claims PMPM	$ 340.23		
Market-Adjusted Projected Allowed EHB Claims PMPM	$ 437.02		<- Market-Adjusted Index Rate
Projected Allowed Non-EHB Claims PMPM	$ 1.04		
Market-Adjusted Projected Paid Total Claims PMPM	$ 341.04		
Market-Adjusted Projected Allowed Total Claims PMPM	$ 438.06

RFJ Part II – Consumer Friendly Justification

Small Group Exchange EPO/PPO Rate Filing

No rate increase is proposed for UPMC Health Benefits Small Group plans for 2019 since this is the company's first filing in this market.

Scope and Range of the Rate Increase

The number of individuals affected by this rate increase is 0.

Financial Experience of the Product

Premiums	$	-
Claims	$	-
Administrative expenses	$	-
Taxes & fees	$	-
Company made (after taxes)	**$**	**-**

Changes in Medical Service Costs

Cost and utilization increases are expected to increase by approximately 3.23% for 2019.

Changes in Benefits

No changes in benefits contributed significantly to the increase.

Administrative Costs and Anticipated Profits

No major changes in administrative costs or profits are anticipated and thus did not affect the increase.

RFJ Part III: Actuarial Memorandum - Redacted

General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Identifying Information:
Company Legal Name: UPMC Health Benefits, Inc.
NAIC #: 11018
State: PA
HIOS Issuer ID: 67430
Market: Small Group
Exchange: Off Exchange
Products: PPO, EPO
Effective Date: 1/1/2019

Company Contact Information:
[This information redacted for publication.]

Filing Information:
Rate Filing SERFF Tracking #: UPMC-131496028
Form Filing SERFF Tracking #: UPMC-131492568, UPMC-131492655, UPMC-131492611, UPMC-131492635, UPMC-131492613
Binder SERFF Tracking #: UPMC-PA19-125084678

Rate History:
No rate history exists since this is the first rate filing by the captioned company in this market.

Proposed Rate Increase(s)

Reasons for Rate Increase(s):
No rate increase is proposed for 2019 since this is the company's first rate filing in this market.

Market Experience

Experience Period Premium and Claims

Tables 1, 2, 3, and 4 of the PA Actuarial Memorandum Exhibits and section I, worksheet 1 of the URRT are not populated with claims and premium data in the single risk pool from the experience period (January 2017 - December 2017) since the captioned company did not have any experience for ACA-related or transitional products in this market over this time period. Rate development relies completely upon data from the rate manual, which has its experience displayed in tables 2b, 3b, and 4b and section II, worksheet 1 of the URRT. Please note that we enter $1 into the experience period claims cells in the URRT in order to get the template to validate/finalize despite not having experience for this company in 2017.

Benefit Categories

Medical claims are split into nine categories in our data warehouse. They are mapped into the categories in the URRT as follows:

UPMC Benefit Category	URRT Benefit Category
Inpatient	Inpatient Hospital
Catastrophic	Inpatient Hospital
Outpatient	Outpatient Hospital
Behavioral	Outpatient Hospital
PCP	Professional
Specialist	Professional
Diagnostic	Other Medical
ER	Other Medical
Other	Other Medical
Pediatric Dental	Other Medical
Pediatric Vision	Other Medical

Drug claims are on separate tables and directly mapped into the Prescription Drugs category. The Other Medical category uses visits as units for utilization calculations.

Projection Factors

Changes in the Morbidity of the Population Insured:
We expect a morbidity trend of -6% when comparing our experience period population for the manual to our projected population. When ACA-compliant plans were first introduced into the small group market, the population that enrolled consisted of unhealthier members. Over the last few years, healthier members have enrolled in ACA-complant plans more frequently, decreasing the morbidity of the insured population on an

annual basis. This adjustment will account for this trend in morbidity from the experience period to the projection period.

Changes in Benefits:
No changes were made to the PA EHB Benchmark plan for 2019, so no adjustments were necessary.

Changes in Demographics:
The average age for our 2017 experience period small group risk pool was 37.0 with an average premium factor of 1.52. This is identical to our 2018 experience so far with age 37.0 and premium factor 1.52. Due to the stability of the population, no demographic adjustment has been made to the rates. In addition to this, no adjustment was applied to account for the regulation that prohibits charging for more than three children per family since this would have minimal cost impact.

Other Adjustments:
Additionally, an adjustment factor to account for change in network of 0.980 has been applied as can be seen in Table 5 of the PA Actuarial Memorandum Exhibits. This factor is the product of the geographic calibration factor calculated in Exhibit 5 of the Supporting Exhibits and an additional factor (0.916) that accounts for the fact that a PPO product with tiered in-network cost-sharing is offered by this company. The manual data consists of a blend of UPMC's Standard Network along with the Premium Network, which are included in UPMC's Health Coverage and Health Options rate filings for this market, respectively. Since the networks included in this company's filing do not mirror either of the rate manual networks, the adjustment to account for the cost differential between these different sets of networks has been set equal to the geographic calibration factor applied in Table 10. This was done because the differences in geographic characteristics between each of these networks are the driving force behind differences in cost. In addition to this, since the manual data is based on a blend of data from PPO, EPO, and HMO products, the latter factor mentioned above adjusts for the lower projected costs for the projection period under the tiered PPO product for this specific segment. This factor has been applied in Table 5 and also to each benefit category in the Other adjustment column in section II, worksheet 1 of the URRT.

Trend Factors (cost/utilization):
The overall annual trend used in rate development is 3.23%. Historical allowed claims were used to develop year over year trend factors for use in the projected rates. Because of the large change in membership year over year, the data specific to the block of business associated with this filing was deemed too volatile to use for trend development. The entire block of commercial business was included in Table 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development. Service categories were defined to be consistent with the URRT instructions. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and 3b. Please see Exhibit 8 of the Supporting Exhibits for trend development. Quarterly rates effective on the first day of each calendar quarter in 2019 are proposed for this filing using 1.78% quarterly trend.

Credibility Manual Rate Development

Source and Appropriateness of Manual Rate Used:
The rate manual was developed using experience period data for groups enrolled in an ACA-compliant plan,

which is displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits. The rate manual consists of 930,100 member months of experience. The data for the entire block would not be appropriate as the majority of groups enrolled in grandmothered plans would not join the ACA-compliant portion of the single risk pool until 2020.

Adjustments Made to the Data:
The same adjustments discussed in the "Projection Factors" section above are applied to the manual rate.

Inclusion of Capitation Payments:
No benefits are projected to be paid for via capitation.

Credibility of Experience

No experience period data is available for the captioned company in this market. Therefore, 0% credibility is used.

Paid to Allowed Ratio

The Paid to Allowed Average Factor was calculated by taking the weighted average of the company-determined Actuarial Values for all plans using projected membership.

Risk Adjustment and Reinsurance

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:
No experience period Risk Adjustment data is available for the captioned company in this market.

Projected Risk Adjustments PMPM:
Projection period Risk Adjustment PMPM has been estimated to be a receivable of $14.51, which is displayed in section III, worksheet 1 of the URRT and Table 5. Please see Exhibit 1 of the Supporting Exhibits for the derivation of the risk adjustment PMPM amounts for the projection period. $1.80 PMPY has been subtracted as a projected amount for the Risk Adjustment Administration Fee since this was the value published by HHS. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a positive number because the calculation subtracts this value. The effect for this adjustment is a decrease in premium since less revenue will be required due to the anticipated receivable.

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:
Administrative costs of 10.26% of premium have been displayed in Table 6 and the URRT. These expenses are taken from the Health Options 2017 Supplemental Health Care Exhibit (SHCE) since Health Benefits does not have any data in the Small Group section of the 2017 SHCE. These costs are broken out by lines of business and

market segments matching this filing and thus are appropriate for use. Differences between the SHCE and section I, worksheet 1 of the URRT stem from the fact that the SHCE include restatements of estimates from the prior year, while the URRT only contains actual experience from 2017 (experience period). We are unable to provide a breakdown between ACA and non-ACA business in Part 1 of the SHCE as we do not have the base data for these fields split between ACA and non-ACA categorization. Please see Exhibit 3 of the Supporting Exhibits for the derivation of the broker fee applied for the projection period.

[This information redacted for publication.]

Profit & Risk Margin:
The projected profit margin for this company will be 0% for 2019. The same level of profit margin is expected for each plan included in this filing.

Taxes and Fees:
The load for Taxes and Fees will be 2% in 2019 to account for the Pennsylvania Premium Tax. No value is entered for the PCORI Fee to account for its expiration. The field for the Health Insurance Tax is also has no value to account for it moratorium in 2019. Please note that the Risk Adjustment Administration Fee was not included in the Taxes and Fees field. The value in Table 6 matches the corresponding value in the URRT since there is no Marketplace user fee applied in this filing.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 90.4%, as shown in Exhibit 9 of the Supporting Exhibits.

Application of Market Reform Rating Rules

Single Risk Pool

The single risk pool consists of members enrolled in ACA-compliant and transitional policies offered under the captioned market.

Index Rate

For this filing, the Index Rate of the Experience Period is set equal to the manual rate due to the lack of experience. The calculation of the manual rate is shown in Table 2b of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 3.23% annual trend to the manual rate. The adjustments described in the Projection Factors section above were then applied to the trended manual rate to generate the Index Rate of the Projection Period. Claims for routine foot care and acupuncture were not included in the calculation of the index rates despite being covered during the experience period since they are classified as non-EHBs.

Small Group Quarterly Rate Filings

Quarterly rates effective on the first day of each calendar quarter in 2019 are proposed for this filing using 1.78% quarterly trend.

Market Adjusted Index Rate

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment and Marketplace Fees adjustments are described above in the Projected Risk Adjustments PMPM and Taxes and Fees sections, respectively. Since the Market Adjusted Index Rate is calculated on an allowed claims basis, the projected paid Risk Adjustment was divided by the projected paid-to-allowed ratio when performing market-level adjustments.

Plan Adjusted Index Rates

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2019 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described below. Please see Exhibit 6 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values. The AV Pricing Values for each metal level are similar for 2019.

Plan Actuarial Value:
The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. Please see the "AV Metal Values" section below for a discussion on the treatment of plans that did not fit the AV Calculator.

Benefit Richness (induced demand)
Please see Exhibit 3a in the Supporting Exhibits for the induced utilization exhibit. The benefit richness adjustment was used to account for differences in induced demand between plans with different metal levels.

Benefits in addition to EHBs
Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is $1.04 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2019 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans.

Provider Network
No adjustments were made to account for provider network since the projected costs for each network included in this filing do not exhibit any significant differences.

Catastrophic Eligibility
Catasrophic plans will not be offered under this company and market in 2019, so no adjustment is necessary.

Non-Funding of CSR Adjustment
No On Exchange silver plans are included in this filing, so no adjustment is necessary.

Calibration

Age Curve Calibration:
The average age factor was calculated using our projected ACA-related Small Group population with the prescribed HHS Age Factors for 2019. We pulled them in summary alongside network and area data in order to back out age factor differences when determining network/area factors. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. The average age factor is 1.52 and average age was 37.0 during the experience period. Please see Exhibit 4 in the Supporting Exhibits for the calculation of this factor.

Geographic Factor Calibration:
Geographical factors for each region in Pennsylvania were developed to reflect the varying costs of delivery between each geographical region in which coverage is offered by this company using provider fee schedules. The calibration factor of 1.069 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 5 of the Supporting Exhibits. Please see the Geographic Factors section below for a discussion on the development of factors applied for each rating area.

Tobacco Use Rating Factor Calibration:
No tobacco load is applied in the Small Group market, so no adjustment is necessary.

Consumer Adjusted Premium Rate Development

The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates.

Plan Product Info

AV Metal Values

Metal values were determined using the final 2019 HHS AV Calculator. The Inside Advantage and MyCare Advantage products offered with a mixture of tiered and non-tiered in-network benefits do not fit the format of the AV Calculator. Actuarial values were first obtained from the calculator for the tiered and non-tiered benefits separately and then combined as a weighted average using experience period allowed claims for the tiered/non-tiered benefits to calculate the final AV for these tiered plans. The Health Incentive Account (HIA) plans also do not fit the format of the AV Calculator due to varying amounts of HIA dollars earned by each member. To account for this, we assume 30% utilization of this incentive based on historical data and used this when generating the metal level AVs.

AV Pricing Values

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2019 Plan Adjusted Index Rates. The allowable modifiers that make up the AV Pricing Values are described in the "Plan Adjusted Index Rates" section above. The AV Pricing Values displayed in the URRT are the ratio of the Plan Adjusted Index Rates to the Market Adjusted Index Rate Please see Exhibit 6 of the Supporting Exhibits for a demonstration that plan premiums are in proportion to the AV Pricing Values.

Membership Projections

Membership projections were developed based on our anticipated competitive positioning in the market. Please see Exhibit 7 of the Supporting Exhibits for various enrollment projections by plan.

Terminated Plans and Products

No plans were terminated for 2019.

Warning Alerts

Cell A83 on worksheet 2 of the URRT displays warning alert. This occurs because the total projected premium calculated on worksheet 1 is done at the market level, while the value caluclated on worksheet 2 is done at the plan level. The plan-level calculation includes adjustments to the projected premium for factors such as the CSR Defunding Adjustment, non-EHB benefits, provider network, and induced demand, while the market-level calculation does not include these adjustments.

Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conductive effective rate review for all submitted rates.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Development of Risk Adjustment PMPM for Projection Period
- Exhibit 2: Derivation of Broker Fee
- Exhibit 3a: Induced Utilization Derivation
- Exhibit 3b: Induced Utilization Normalization
- Exhibit 4: Derivation of Age Calibration Factor
- Exhibit 5: Derivation of Geographical Calibration Factor
- Exhibit 6: Proportion of Plan Adjusted Index Rates and AV Pricing Values
- Exhibit 7a: Development of Projected Enrollment by Network and Metal Level
- Exhibit 7b: Development of Projected Enrollment by Plan
- Exhibit 7c: Projected Enrollment by Rating Area
- Exhibit 8: Derivation of Annual Trend
- Exhibit 9: Derivation of Projection Period MLR

Actuarial Certification

I [redacted], am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.
- The projected Index Rate is:

a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
b. Developed in compliance with the applicable Actuarial Standards of Practice
c. Reasonable in relation to the benefits provided and the population anticipated to be covered
d. Neither excessive nor deficient

- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

HIOS Issuer ID*	67430

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

HIOS Issuer ID*	67430
Federal TIN*	25-1844144
Rate Effective Date*	7/1/2019
Rate Expiration Date*	9/30/2019
Rating Method*	Age-Based Rates

Plan ID*	**Rating Area ID***	**Tobacco***	**Age***	**Individual Rate***
Required: Enter the 14-character Plan ID	**Required:** Select the Rating Area ID	**Required:** Select if Tobacco use of subscriber is used to determine if a person is eligible for a rate from a plan	**Required:** Select the age of a subscriber eligible for the rate	**Required:** Enter the rate of an Individual Non-Tobacco or No Preference enrollee on a plan

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

HIOS Issuer ID*	67430

Question	Comment/Request	Response
1	This question is in reference to file: “UPMC Health Benefits, Inc. Small Group Supporting Exhibits UPMC-131496028.xlsx”, tab [Exhibit 8]. This shows the derivation of the annual trend which applies a “FACTOR USED TO ADJUST COST/UTIL TRENDS” equal to 0.5802. a) Please explain what this factor is adjusting for and how it was developed. b) Please provide a numerical development of the factor 0.5802. c) Please include the trends based on historical experience for each benefit category for years 2015, 2016, 2017, and 2018 (year to date). We realize 2018 trends will be partially based on estimated claim costs.	a. This factor is used to adjust observed trends based on historical data to the actual trend that is used in 2019 rate development. b. This factor has been developed to account for the fact that a catastrophic claimant was included in the historical data used to develop the observed trend, yet this claimant will not be part of the risk pool in the projection period. This factor also accounts for the fact that we have observed lower historical trends in the large group market relative to the small group market. UPMC's small group block of business has experienced significant growth in recent years, which may lead to skewed results in trend calculations when using this block's underlying data. Because of this, large group data was used as a comparable data source, which shows annual trend in the range of 2-3%. Also, since some large groups renew as a small group throughout the course of a given calendar year due to a shrinking work force, this factor is used to account for the lower historical trends observed for such transitioning groups. We also anticipate improved coordinated clinical care in rating area 1 for the small group market for 2019, which has been incorporated into this adjustment factor. Finally, this factor also accounts for benefit buy-downs that are anticipated to occur between the experience and projection periods. Please note that the 0.5802 factor was developed from qualitative estimates rather than a specific numerical calculation. c. Data pertaining to historical trends is displayed on the "Exhibit 1C" tab of this file.
2	Please provide numerical support and explain the methodology used to determine the morbidity adjustment factor equal to 0.940.	A narrative discussing the rationale behind the morbidity adjustment used in this filing is provided in the "Index Rate" section of the PA Actuarial Memorandum. This factor is intended to account for the fact that healthier members have enrolled in this company's ACA-compliant plans with each passing year. Recent times have seen this change occur more rapidly than in prior years, so we estimated that the morbidity of the insured population would decrease by approximately 6%.
3	Please provide numerical support and explain the methodology used to determine the change in network adjustment factor equal to 0.980 applied to the credibility manual rate.	The change in network adjustment factor of 0.980 is the product of the geographic calibration factor (1.069) and an additional factor that accounts for the fact that a PPO product with tiered in-network cost-sharing is offered by this company (0.916). The second tier of cost-sharing for these plans offers increased cost-sharing for members (relative to the first tier), leading to lower projected costs for the health plan. Since the manual data is based on a blend of data from PPO, EPO, and HMO products, the latter factor adjusts for these lower projected costs for the projection period for this specific segment. A line mentioning the latter of these factors was accidentally omitted from the actuarial memoranda and has since been added.
4	Per Table 2b, it appears that the average paid-to-allowed ratio of the benefit plans underlying the Manual Rate was approximately 86.9% (i.e. “Ultimate Incurred Claims” / “Allowed Claims (Non-Capitated)”). Given the average projected paid-to-allowed ratio for the plans associated with this filing is 77.9%, please describe and demonstrate quantitatively how the Manual Base Period Allowed EHB claims amount equal to $451.99 PMPM was adjusted to reflect the impact of lower induced utilization in the development of the Index Rate. If it was not, please provide justification for not applying this adjustment.	No additional adjustment has been made to account for lower induced utilization due to the difference between the paid-to-allowed ratio calculated from Table 2b and the weighted average of the Pricing AVs. As mentioned in the response to question 1 above, benefit buy-downs are already accounted for in the annual trend. Further decreasing the Manual Base Period Allowed EHB claims PMPM to account for this effect would also require an adjustment to account for less favorable risk adjustment. All of this would have an offsetting effect, making such an adjustment unnecessary.

5	Please demonstrate quantitatively how the 2.0% quarterly trend factor being utilized in Table 5a was developed.	The 2.0% quarterly trend was developed to account for the pro-rated Health Insurance Provider Fee over the 2019-2020 timeframe. As demonstrated on the Exhibit 5 tab of this file, the fee of 2.8% was combined with the 3.2% annual trend to generate a new overall value for trend. This value was converted to quarterly trend and rounded, resulting in the 2.0% quarterly trend implemented in Table 5A. A large portion of groups renew later in the calendar year and will be subject to 75% (or more) of the fee. Since the trend applied in Table 5A can only be applied on a quarterly basis (rather than monthly), the amount of pro-rated HIT applied in Table 5A will be an underestimate since many groups renew in the latter months of a given calendar quarter (specifically in December). In addition to this, the possibility of transitional products leaving the small group market on 1/1/2020 will increase uncertainty in the market at this time. The elimination of transitional products will increase the overall appeal of association health plans and level-funded products to small group members, which could potentially erode the ACA-compliant risk pool. Therefore, using the full fee and rounding the adjusted quarterly trend was deemed to be an appropriate estimate for Table 5A trend development.
6	Please explain the methodology used to develop the Plan Actuarial Values (Pricing AV's) utilized in Table 10.	The Pricing AV for each plan was determined by the issuer's own pricing model based on 2017 claims experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims.
7	The following questions are in regards to the induced demand factors: a) Please provide numerical support and explain the methodology used to determine the induced utilization factors shown in Exhibit 3b and why they are different than those derived in Exhibit 3a in the Supporting Exhibits File. b) Please explain why the induced demand factors would change between plans with the same metal levels as shown in the table below? The table below is the range of values for induced demand factors by metal level based on the values entered in Table 10 of the PA Actuarial Memorandum Exhibits. Please be sure to explain how these varying factors by metal level are not double counting for any plan level factor that is applied separately (e.g., Pricing AV, Non-EHBs).	a. There was an error in Exhibit 3a, which led to incorrect induced utilization values being calculated in column I. This error has been corrected in the Supporting Exhibits file that has been re-uploaded in SERFF, and the induced utilization factors in Exhibits 3a and 3b now match. b. The induced demand factors vary by product type as opposed to solely metal level, although the range of factors within a given metal level has been kept rather small. Variations in induced demand by product type are not reflected in any of the other plan-level factors included in Table 10.
8	Please explain the methodology used and show numerical support for the area factors shown in Exhibit 5 of the Supporting Exhibits File.	Please see the "Exhibit 8" tab of this file for a derivation of the proposed geographic factors for 2019. These factors are developed by first mapping each county to the hospital system most likely to be used by enrolled members. The price differentials relative to our 2017 service area for each of these hospital systems are then estimated using a variety of methods, such as fee schedules and claims data. Finally, projected enrollment for each county is used to blend these price differentials for each region as defined by the state.
9	Please confirm whether change in the statewide average premium between 2017 and 2019 as well as the 0.86 adjustment factor were accounted for in the development of the Projected Risk Adjustment PMPM amount equal to $14.51. If so, please demonstrate quantitatively how these adjustments were taken into account. If not, please describe why it is reasonable not to do so.	The Projected Risk Adjustment PMPM value of $14.51 was set equal to the Experience Period Risk Adjustment PMPM, which was calculated based on the transfer payment estimate received from PID based on data from RATEE files accrued as of May 1, 2018. Since the estimate received from PID was labeled as an "estimated risk adjustment transfer amount," this value was assumed to account for all factors that contribute to a given transfer amount, and no additional adjustments were made to account for changes in statewide average premium or the 0.86 factor. Enrollment changes between the experience and projection periods are assumed to involve members of average risk. Thus, these membership fluctuations were estimated to have no impact on the transfer payment PMPM. No additional adjustment was made to account for the change in statewide average premium since we anticipate minimal change in the rates for 2019 as well as member buy-downs, which will lead to a negligible effect for this particular field.
10	Please clarify why the Projected Risk Adjustment PMPM value included in cell C31 of Table 5 is $14.66 rather than $14.51. If the value included in Table 5 is incorrect, please update as appropriate. If the value included in Table 5 is correct, please explain.	This has been corrected in both Table 5 and worksheet 1, section III of the URRT.
11	Please explain the discrepancy between the projected index rate of $443.39 in Table 5 and the projected allowed claims PMPM of $444.49 on the URRT.	This disparity arises from the fact that the explicit weights used for trend development in Table 3b are different from the implicit weights implemented in worksheet 1, section II of the URRT.

12	Please document and support the calculation of the quarterly trend of 2% used in Table 5a. What are its components since the annual trend is only 3.2%.?	The 2.0% quarterly trend was developed to account for the pro-rated Health Insurance Provider Fee over the 2019-2020 timeframe. As demonstrated on the Exhibit 5 tab of this file, the fee of 2.8% was combined with the 3.2% annual trend to generate a new overall value for trend. This value was converted to quarterly trend and rounded, resulting in the 2.0% quarterly trend implemented in Table 5A. A large portion of groups renew later in the calendar year and will be subject to 75% (or more) of the fee. Since the trend applied in Table 5A can only be applied on a quarterly basis (rather than monthly), the amount of pro-rated HIT applied in Table 5A will be an underestimate since many groups renew in the latter months of a given calendar quarter (specifically in December). In addition to this, the possibility of transitional products leaving the small group market on 1/1/2020 will increase uncertainty in the market at this time. The elimination of transitional products will increase the overall appeal of association health plans and level-funded products to small group members, which could potentially erode the ACA-compliant risk pool. Therefore, using the full fee and rounding the adjusted quarterly trend was deemed to be an appropriate estimate for Table 5A trend development.
13	Please document and support the calculation of the Change in Network factor of 0.98.	The change in network adjustment factor of 0.980 is the product of the geographic calibration factor (1.069) and an additional factor that accounts for the fact that a PPO product with tiered in-network cost-sharing is offered by this company (0.916). The second tier of cost-sharing for these plans offers increased cost-sharing for members (relative to the first tier), leading to lower projected costs for the health plan. Since the manual data is based on a blend of data from PPO, EPO, and HMO products, the latter factor adjusts for these lower projected costs for the projection period for this specific segment. A line mentioning the latter of these factors was accidentally omitted from the actuarial memoranda and has since been added.
14	As per UPMC's Exhibit 1 of Supporting Exhibits, the Risk Adjustment PMPM should be: $14.66 - 0.15 = $14.51. Please correct URRT and Table 5 of PAAM exhibits since these do not include the RA admin fee.	This has been corrected in both Table 5 and worksheet 1, section III of the URRT.
15	The Moratorium on Health Insurance Tax is for 2019 year only. But Quarters 2, 3 and 4 continue in year 2020. Please explain why the pro-rated amounts of HIT were not included as per PID Rate Filing Guidance.	As discussed in the responses to questions 5 and 12 above, the pro-rated Health Insurance Provider Fee was accounted for in the 2.0% quarterly trend developed in Table 5A.
16	On page 5 of the PA Actuarial Memorandum after the discussion the projected loss ratio, there is a discussion of the difference between the way that Table 3 uses weights versus how the URRT uses weights to determine trend. Please note that the Department has changed the way that Table 3 calculates aggregate trend to mimic the method used by the URRT. Hence please remove this discussion from the Actuarial Memorandum..	This discussion has been removed from the actuarial memoranda.
17	Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.	We can confirm that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

Exhibit 1c: Historical Data for Trend Development

***2018 data has been extrapolated to cover 12 months*

Service Category	Year	Member_Months	Allowed Amt	Service Cnt	Unit Cost	Utilization PTPM	Cost	Utilization	Overall

Question	Comment/Request	Response
1	The following questions refer to your response to question 1 (of Round 1) regarding the “FACTOR USED TO ADJUST COST/UTIL TRENDS” equal to 0.5802. a. Please provide the specific impact to the observed trend rate of removing the catastrophic claimant referenced in your response (i.e., what would the observed trend rate equal to 5.58% had been if that claimant was removed from this historical analysis).	a. Removing the catastrophic claimant from the data used to develop the observed trend rate results in a 0.8% decrease in the observed annual trend.
2	In reference to your response to question 3 (of Round 1), it appears that the Actuarial Memorandum may not have been updated to include the additional description for the network adjustment factor of 0.980 as described in your response. Please clarify where the additional description has been added or update the filing as appropriate.	The addition of text addressing the 0.980 factor was accidentally omitted during updates made as part of the first round of correspondence. This text has been added to the updated Actuarial Memoranda that were uploaded in SERFF as part the amendment submitted on 7/3/18.
3	Regarding your response to question 4 (of Round 1): a. It is noted in your response that “no additional adjustment has been made to account for lower induced utilization” and that doing so would also require an “offsetting” adjustment to account for less favorable risk adjustment. Please clarify why it is believed that lower induced utilization would result in a less favorable risk adjustment transfer amount and provide any quantitative analysis that has been performed to justify that assertion. b. Please provide the estimated impact of benefit buy-downs on the proposed annual trend rate as discussed in your response to questions 1 and 4	a. Over the past several years, the portion of our ACA-compliant small group membership enrolled in platinum products has steadily decreased, while the portion of membership enrolled in products corresponding to cheaper metal levels has steadily increased. Since the demographic and some diagnostic coefficients involved in the derivation of risk scores used to calculate annual risk adjustment transfer payments vary significantly between metal levels, the observed shift in enrollment mentioned above leads to a less favorable risk adjustment transfer payment. This shift in enrollment also leads to an implicit decrease in induced utilization. These two adjustments do not offset (inappropriate word choice in our Round 1 response). Further decreasing the Manual Base Period Allowed EHB claims PMPM would double-count the induced utilization adjustment, which is what we meant to convey in our response to question 4 of Round 1. b. We estimate that benefit buy-downs have a 1.5% impact on the observed annual trend.
4	Regarding your response to question 9 (of Round 1), it should be noted that the estimate provided by the PID labeled “estimated risk adjustment transfer amount” was not adjusted to reflect either changes in the statewide average premium between 2017 and 2019 or the 0.86 adjustment factor. Given that, please provide an estimate of what the projected 2019 risk adjustment transfer amount would be if these items were taken into account.	Incorporating the 0.86 adjustment factor and an adjustment for the statewide average premium decreases the projected risk adjustment transfer amount by 9.4%.
5	The following question refers to your response to question 11) (of round 1) – Please use identical weights for trend development and URRT so that there is no discrepancy between the projected index rate in Table 5 and the projected allowed claims PMPM on the URRT.	The weights implemented in Table 3b have been revised to match the implicit weights in the URRT. Some of the disparity that has been observed between the projected required revenue PMPM in Table 6 and the corresponding value in the URRT in prior iterations of this filing was due to an error in the calculation of the projected non-EHB claims PMPM value. This particular value had not been adjusted to account for changes in morbidity and network between the experience and projection periods and also had not been adjusted to account for the pro-rated HIT for small groups renewing throughout 2019. This has been corrected in the revised filing, resulting in a projected non-EHB claims value of $1.04 PMPM. The slight difference that now exists between the projected index rate in Table 5 and the projected allowed claims PMPM in the URRT can be attributed to the fact that the latter includes allowed non-EHB claims while the former does not.
6	Response to Question 12) (Round 1) - Please provide details of your calculation of the quarterly trend of 2% as discussed on telephone on July 6, 2018.	Please see the "Exhibit 6" tab for more details on the calculation of the quarterly trend for small groups renewing in 2019. Limiting trend to only a quarterly basis as required in the instructions results in an insufficient rate for each renewal month that does not fall at the beginning of a quarter. For example, February groups should have one month of trend added when compared to January. But instead the rates are the same under the filed methodology. So we developed this calculation to accurately account for trend on a monthly basis using an equivalent quarterly trend. The Original Method in this exhibit shows the calculation of HIT and additional claims trend by renewal month. The value in cell F6 represents the blended amount across all renewal months that should be added to 2019 premium. The Table 5A Method also calculates a blended amount (cell I6) but only with a quarterly trend change. Cell I6 was goal seeked to equal cell F6 by changing cell H9. The resulting value in cell H9 represents the quarterly trend needed to obtain the additional revenue required to cover HIT and additional claims trend. Rates in all corresponding templates have been updated to account for 1.78% quarterly trend.

7	Responses for the second-round questions are due on July 13, 2018. No modifications other than Risk adjustment updates based on Federal Risk Adjustment Report and the Department requested changes will be accepted.	No changes were made to the projected risk adjustment transfer payment.
