

# Rate Change Summary

## Aetna Life Insurance Company – Small Group Plans

Rate request filing ID # AETN-131455780 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at

<http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

### Overview

Initial requested average rate change:	12.7% <sup>1</sup>
Revised requested average rate change:	N/A <sup>1</sup>
Range of requested rate change:	12.7% -12.7%
Effective date:	January 1, 2019
People impacted:	277
Available in:	Rating Areas 1-3 and 5-9, certain counties excluded

### Key information

#### Jan. 2017-Dec. 2017 financial experience

Premiums	\$8.4M
Claims	\$8.1M
Administrative expenses	\$1.7M
Taxes & fees	-\$0.4M
Company made (after taxes)	<b>-\$0.9M</b>

#### How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

Claims:	83.9%
Administrative:	9.1%
Taxes & fees:	2.3%
Profit:	4.7%

The company expects its annual medical costs to increase **13%**.

### Explanation of requested rate change

Medical costs are going up, and we are changing our rates to reflect this increase. Medical costs go up for two reasons – providers raise their prices and members get more medical care. Rate increases differ by plan. The exact rate change depends on what benefit plan the group chooses, where the group is located, when the group's contract renews, and the ages and family sizes of enrolling employees. Rates charged to employees also depend upon any change in the amount of premium paid by the employer.

<sup>1</sup> Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

July 13, 2018

Ms. Jessica Altman  
Insurance Commissioner  
Bureau of Life, Accident & Health Insurance

Form Filing Tracking Number:	AETN-131441509

Dear Ms. Altman:

The purpose of this filing revision is to provide details of the premium rate development and resulting proposed monthly premium rates for Small Group policies which will be offered off-Exchange in the State of PA for effective dates of January 1, 2019 and later. This filing is being provided to comply with regulatory rate filing requirements, and is not intended to be used for other purposes.

The health benefit plans proposed in this filing are in compliance with all state-specific benefit requirements and rating regulations, as well as the benefit plan requirements of the Patient Protection and Affordability Act (P.L. 111-148). This rate filing is intended for new business issued through the State of PA off-Exchange marketplace effective January 1, 2019.

All products and associated proposed monthly premium rates contained within this rate filing will be available to existing business upon their request. Existing business that is

not considered grandfathered under PPACA regulation will be converted to the plans and rates in this filing upon renewal.

We have tried to present this information in a manner that will facilitate your Department's review. If there are changes we can make to improve the process or you would like us to present the information differently in the future, please let us know.

Please feel free to contact me at the above listed telephone number and/or e-mail address if you have any additional questions.

Sincerely,

, ASA, MAAA  
Aetna

## 2019 Pennsylvania Actuarial Memorandum

### 1. Basic Information and Data

#### A. Company Information

Company Legal Name:	Aetna Life Insurance Co
NAIC #:	60054
Market:	Small Group Off-Exchange
Effective Date:	01/01/2019
Avg rate change requested:	12.7%
Range of rate change requested:	12.7% - 12.7%
Products:	EPO
Rating Areas:	Rating Areas 1-3 and 5-9, certain counties excluded
Metal Levels:	Silver
Current # covered lives:	279
Current # policyholders:	153
Number of plans offered:	1
HIOS Issuer ID / Binder #:	33906
Rate Filing Tracking Number:	AETN-131455780
Policy Form(s):	AL SG HCOC-2019-EPO 03
Form Filing Tracking Number:	AETN-131441509

#### B. Rate History and Proposed Variations in Rate Changes

- January 1, 2014
  - Introduction of ACA
  - AETN-129037905
- July 1, 2014
  - Lowered previously filed 3Q14-4Q14 rates by 17%
  - AETN-129418260
- January 1, 2015
  - Filed a 4% increase
  - AETN-129621162
- July 1, 2015
  - Lowered previously filed 3Q15-4Q15 rates by 4% by removing commissions and tobacco surcharge load
  - AETN-129920145
- January 1, 2016
  - Filed a 5% rate increase
  - AETN-130046894
- April 1, 2016
  - Increased previously filed 2Q16-4Q16 rates by 4% to add commissions
  - AETN-130242358
- October 1, 2016
  - Increased previously filed 4Q16 rates by 7.4%
  - AETN-130565105

- January 1, 2017
  - Filed a 26.6% rate increase
  - AETN-130533503
- January 1, 2018
  - Filed a 2.1% rate decrease
  - AETN-131033620

### C. Average Rate Change

The average rate change, as noted in cell AC15 of Table 10 and the percent change rate requested on the SERFF Rate Review Detail screen, is 12.7%. The change in the 21 year old non-tobacco premium pmpm as stated in cell AN13 on Table 11 is 9.5%.

### D. Membership Count

Total current membership by age bucket is shown on Table 1.

### E. Benefit Changes

We are continuing to offer one silver plan but the deductible has increased from \$5,000 to 6,000. The HIOS IDs are as follows:

2018 HIOS Plan ID	2018 Plan Name	2019 HIOS Plan ID	2019 Plan Name
33906PA0090128	PA Silver PPO 5000 80/50 OOS	33906PA0160001	PA Silver OAEPO 6000 80% \$30/75

### F. Experience Period Claims and Premium

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2017 through December 31, 2017 and paid through February 28, 2018, for ALIC.

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

Experience period premiums are date-of-service premiums from our actuarial experience databases for Small Group business in Pennsylvania. Our internal projections indicate that no MLR rebate is expected

to be paid in 2018 (for 2017 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB).

No adjustments to the experience period data have been made for capitation arrangements because we expect little to no capitation services to be provided in 2019.

Transitional Reinsurance recoveries do not apply to Small Group business. Risk Adjustment transfer is accrued at the issuer and market level based on 2017 Wakely data and our internal projections of how our risk relative to market has changed since that report was issued. The transfer is allocated to the member-level by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2017 Risk Adjustment fees of \$0.15 PMPM in Worksheet 2.

Pharmacy rebates have been subtracted out of the experience period data. The loss ratio for the experience period is 96.1%.

#### **G. Credibility of Data**

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

The source data for our manual rate is the experience incurred from January 1, 2017 to December 31, 2017 and paid through February, 2018 for Aetna community-rated policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate.

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

#### **H. Trend Identification**

The trend values are:

<b>Service Type</b>	<b>Unit Cost</b>	<b>Utilization</b>
Facility Inpatient	6.1%	1.9%
Facility Outpatient	4.5%	5.9%
Physician	1.9%	5.4%
Capitation	0.0%	-0.6%
<b>Medical</b>	4.2%	4.7%
Pharmacy	10.3%	2.0%
<b>Total (Med + Rx)</b>	6.1%	3.9%

The quarterly trend factors for this filing are:

Effective Quarter	Trend Factor	HIF Factor	Med Trend + HIF
1Q 2019	1.000	1.000	1.000
2Q 2019	1.031	1.007	1.038
3Q 2019	1.062	1.013	1.076
4Q 2019	1.095	1.020	1.117
Total	1.048	1.010	1.059

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in March, 2018. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2019.

### **I. Historical Experience**

As described above, medical trend factors are based on our Medical Economics Unit's local trend and network experience, and pharmacy trends are based on national commercial group Rx trend analysis.

## **2. Rate Development & Change**

Please refer to the file titled *PA\_SG\_33906\_Off\_1Q2019\_Exhibits\_v1.pdf* for any exhibits referenced in the sections below.

### **A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims**

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs and catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

Exhibit 12 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2019. The annual trend for this filing, applied quarterly, is 12.9%. In addition to the trend factor, a factor is applied to the premium in each quarter to account for the expectation that the Health Insurer Fee will resume in 2020, and will apply to policies sold in 2019 for which the policy year carries into 2020. The application of these two factors is shown in Table 5A.

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment was discussed, previously. The risk adjustment is displayed on a paid-basis and the exchange user fee is estimated as a PMPM based on the target premium rate on Worksheet 1 of the URRT. These values have each been converted to percent of allowed claims in this Exhibit.

#### Single Risk Pool Adjustment Factors:

Change in Morbidity => The experience period data includes experience for community-rated policies issued to small employers in 2017 and medically underwritten policies renewed under the Transitional Policy. We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2019. The factor used is 1.101, which represents two years of morbidity change, from the 2017 experience period to the 2019 projection period

Change in Demographics => Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts. The change in demographic factor is 1.038. The increase is due to the changes in geographic factors, which is discussed in section 5B of this memorandum.

Change in Network => Included in 'Change in Other' below.

Change in Benefits => Discussed in Section 1E above.

Change in Other => The 'Other' adjustment includes, but is not limited to, the projected impact of changes in network composition, provider contracts, deductible suppression, and pooling.

Paid-to-Allowed Ratio => The projected paid to allowed ratio is 72.9%. Paid to allowed ratios are based on 2017 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

Risk Adjustment – Projection Period => We used the projected Risk Adjustment Transfer amounts provided by the Pennsylvania Insurance Department on May 9, 2018, which incorporated carrier data as of May 1, 2018, to develop our initial projected risk adjustment transfer assumption. This information

indicated a risk adjustment receivable for 2017 of \$8.19 PMPM for the manual data that was used to develop the 2019 rates.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2019 Notice of Benefit and Payment Parameters. The 2019 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost. We subtracted from that Risk Adjustment transfer 0.5% of premiums for National High Risk pool funding, and added our anticipated High Risk Pool recoveries. High Risk Pool recoveries were estimated based on the average of member-level recoveries that we would have received under this program for 2014-2016 claims as a percent of premium, for Silver Off-Exchange plans.

As a result, we project a risk adjustment receivable of [REDACTED], net of the 2019 user fee of \$0.15 PMPM. This value is shown in Worksheet 1, Section III of the URRT. Note that the risk adjustment value in Table 5 reflects the impact of quarterly premium trend, as the incurred premium over the full year is used as the basis for risk transfer payments.

Reinsurance – Projection Period => There will be no reinsurance recoveries in 2019.

Exchange User Fee => The EUF is not applicable for this filing.

Projected Allowed non-EHB Claims PMPM => The products discussed in this filing provides coverage for only those benefits defined as Essential Health Benefits (EHB).

## **B. Retention Items**

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2018 projections, and projected changes in expenses, inflation, and membership for 2019 for our National book of Small Group business. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2019, as well as Federal income tax and State Premium taxes. The risk adjustment user fee is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

## **C. Normalized Market-Adjusted Projected Allowed Total Claims**

The age factors are based on the HHS Default Standard Age curve. The factors are shown in Exhibit C-2. Exhibit C-2 demonstrates the determination of the Plan-Level Average Age Factor. Plan membership is based on issuer's similar January 2018 plan membership and projected changes in the market.

To Age-Calibrate the Plan-Adjusted Index Rates, We project a premium-weighted average age factor for the 2019 membership using the prescribed age curve and the projected age for each plan, as illustrated on Exhibit C-2. The overall Age Calibration factor is developed in Column B of Exhibit C-1. This factor is based on the weighting of plan-adjusted index rate and membership weighted by each plan's average age factor membership. The Age-Calibrated Plan Adjusted Index Rate is determined multiplying each Plan Adjusted Index Rate by the Plan-Level Average Age Factor and then dividing by the weighted over-all average age factor.

The average age for the single risk pool is the age that most closely corresponds to the premium weighted overall average age factor.

Exhibit C-2 summarizes the rating area definitions and factors, and displays the projected premium by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor, and is applied in column F of Exhibit C-1. Projected area factors are shown in Exhibits 6 and C-2. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

#### **D. Components of Rate Change**

The overall change in the weighted average Calibrated Plan Adjusted Index Rate is 12.7%, as indicated in Table 8 row A. The components of this rate change are as follows:

- The change in normalized allowed claims is worth 26.8%
- The change in allowable plan adjusted level components is worth -18.5%
- The change in retention components is worth 0.5%
- The remainder is driven primarily by the 2017 covered lives that are not being mapped to 2018 plans.

### **3. Plan Rate Development**

The following briefly describes how each set of adjustments was determined.

#### *Pricing AV / Benefit Richness:*

These adjustments are discussed in Section 2C above.

#### *Benefits in addition to EHBs:*

The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). The factor for the impact of benefits in addition to EHBs is a 1.00.

#### *Provider Network:*

This adjustment reflects the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

#### *Catastrophic Eligibility:*

This filing does not include catastrophic plans.

#### *Tobacco Surcharge Adjustment:*

The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed to remove the impact of rating for tobacco.

*Admin Costs / Taxes & Fees / Profit or Contingency:*

These factors reflect the adjustment for projected administrative costs, including sales, marketing, and any commission expense, and profit & risk. These are discussed above in the Retention section.

An AV Certification is included in this filing, titled *2019Aetna AVCCert Template\_33906.pdf*.

#### **4. Plan Premium Development for 21-Year-Old Non-Tobacco User**

The Calibrated Plan Adjusted Index Rates for 2018 and 2019 are shown in Columns Z and AA. The 2019 rates in Column AA differ from the Calibrated Plan Adjusted Index Rates on Exhibit E-2 for two reasons: (1) The CPAIR on Exhibit E-2 are 1/1/2019 rates while the rates in Column AA are average 2019 rates, and (2) our internal modeling incorporates the average trend to develop a Net Risk Adjustment factor as indicated on Exhibit E-1 to go from the Projected Index Rate to the Market Adjusted Index Rate. This is not accounted for in Table 5. In addition, age and geographic calibration factors have been used in the rate development as follows:

- Age Calibration: The age calibration factor estimates the average age factor that will be used in the premium calculation for the expected enrollment population. The age calibration factor used to develop the 2019 CPAIR is 1.464. This is based on the assumption that the projected enrollment will mirror the interim enrollment as of February 2018.
- Geographic calibration: The geographic calibration factor estimates the average geographic factor of the expected enrollment population. The geographic calibration factor used to develop the 2019 CPAIR is 1.006. This is based on the assumption that the projected enrollment will mirror the interim enrollment as of February 2018.

#### **5. Plan Factors**

##### **A. Age and Tobacco Factors**

The age factors are based on the HHS Default Standard Age curve. The rates in this filing do not differ based on tobacco usage. As such, no adjustment is needed for tobacco rating and factors of 1.0 have been entered.

##### **B. Geographic Factors**

The proposed geographic factors are different than the current approved factors. We compared the relative unit costs by rating area in order to develop the proposed geographic factors.

##### **C. Network Factors**

There is only one network included in this filing.

##### **D. Service Area Composition**

The Service Area composition for this rate filing is the same as the current approved 2018 rate filing.

##### **E. Composite Rating**

While PA allows composite rating, we are not offering this option at this time. However, the member level rates in this filing would not be impacted if we allow the composite rating option at a later time.

## 6. Actuarial Certifications

### Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- Experience Period Data – Small Group

### Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [REDACTED], am an Associate of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:
  - a. ASOP No. 5, Incurred Health and Disability Claims
  - b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
  - c. ASOP No. 12, Risk Classification
  - d. ASOP No. 23, Data Quality
  - e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
  - f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
  - g. ASOP No. 41, Actuarial Communications
  - h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act
2. The Projected Index Rate is:

- a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
  - b. Developed in compliance with the applicable Actuarial Standards of Practice,
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
  - d. Neither excessive, deficient, nor unfairly discriminatory.
3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

**Telephone Number:**  
**Email Address:**

### **1. Purpose, Scope, and Effective Date**

The purpose of this filing is to:

- 1) Provide support for the development of the Part I Unified Rate Review Template;
- 2) Provide support for the assumptions and premium rate development for the products supported by the policy forms referenced above;
- 3) Request approval of the proposed monthly premium rates; and
- 4) Provide benefit plan design summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation. These rates are for plans issued in conjunction with our Qualified Health Plan (QHP) application in Pennsylvania beginning January 1, 2019. The rates comply with all rating guidelines under federal and state regulations. This memorandum covers plans that will be available on and off the public Marketplace in Pennsylvania.

### **2. Proposed Rate Increase**

Monthly premium rates for Small Group Market products in Pennsylvania are being revised for effective dates January 1, 2019 through December 31, 2019.

#### **A. Reason for Rate Increase(s):**

Revised rates for these products reflect the following:

- Impact of medical claim trend (including changes in provider unit costs and increased utilization of medical cost services) and pharmacy trend;
- Revisions to our assumptions about market-wide population morbidity and the projected population distribution;
- A 1-year hiatus of the Health Insurers Fee in 2019;
- Revisions to administrative expense projections;
- Modifications in cost sharing to ensure that plans comply with Actuarial Value requirements;

- Updates to our pricing models used to determine the impact of cost sharing designs; and
- Changes in provider networks and contracts.

### 3. Experience Period Premium and Claims

#### A. Paid Through Date:

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2017 through December 31, 2017 and paid through February 28, 2018.

#### B. Premiums (Net of MLR Rebate) in Experience Period:

Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered small group business in Pennsylvania. Our internal projections indicate that no MLR rebate is expected to be paid in 2018 (for 2017 experience) for the Small Group MLR Pool in Pennsylvania. As such, no adjustment was made to premiums to account for expected rebates.

#### C. Allowed and Incurred Claims Incurred During the Experience Period:

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not paid (IBNP) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNP completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNP is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNP estimates for allowed claims.

In addition to the fee-for-service and capitation payments discussed above, some of our provider contracts include provisions under which we share claim cost differences with the provider relative to a pre-determined target amount. These adjustments serve to increase our claims cost when results are favorable to the target and decrease our claims costs when results are unfavorable. We adjust both allowed and incurred claims by our current estimate of the impact of provider risk sharing provisions.

### 4. Benefit Categories

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in April 2018. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type, and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

## 5. Projection Factors

### A. Changes in the Morbidity of the Population Insured:

The experience period data includes experience for:

- Community-rated policies issued to small employers in 2017
- Medically underwritten policies renewed under the Transitional Policy.

We considered the expected relationships between the morbidity of each of these populations and the likely population that will be covered by Small Group Single Risk Pool policies in 2019.

### B. Changes in Benefits:

The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for both Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2018 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

### C. Changes in Demographics:

Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 5 and 6 contain detail on the calculations of the impact of demographic mix shifts.

### D. Other Adjustments:

The 'Other' adjustment includes the projected impact of changes in network composition and provider contracts. Exhibit 7 contains detail on these calculations.

### E. Trend Factors (Cost/Utilization):

Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.

Exhibit 8 shows the anticipated annual trend from the experience period to the rating period.

## 6. Credibility Manual Rate Development

### A. Source and Appropriateness of Experience Data Used:

The source data for our manual rate is the experience incurred from January 1, 2017 to December 31, 2017 and paid through February 2018 for Aetna community-rated policies in the Pennsylvania Small Group (HMO / PPO) market. The Small Group market experience is considered an appropriate source for the manual rate due to similarities in covered benefits and market dynamics to the current ACA Small Group market. The similar dynamics include: no individual medical underwriting and rating by gender, limits on age-rating, and caps for rating on the number of dependents, as well as plans benefits and cost-sharing.

### B. Adjustments Made to the Data:

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend, as discussed in Exhibits 3-8.

### C. Inclusion of Capitation Payments:

No adjustments to the experience period data have been made for capitation arrangements because we expect little to no capitation services to be provided in 2019.

## 7. Credibility of Experience

No credibility is assigned to the experience data. This is due to the use of alternate experience data that more accurately captures the essential characteristics of the market for which we are developing rates.

## 8. Paid-to-Allowed Ratio

The projected paid to allowed ratio is 72.9%. Paid to allowed ratios are based on 2017 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trend deductible-leveraging.

## 9. Risk Adjustment

### A. Risk Adjustment – Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2017 Wakely data and our internal projections of how our risk relative to market has changed. The transfer is allocated to the member-level by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfer scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2017 Risk Adjustment fees of \$0.13 PMPM in Worksheet 2.

### B. Risk Adjustment – Projection Period

We used the projected Risk Adjustment Transfer amounts provided by the Pennsylvania Insurance Department on May 9, 2018, which incorporated carrier data as of May 1, 2018, to develop our initial projected risk adjustment transfer assumption. This information indicated a risk adjustment receivable for 2017 of \$8.19 PMPM for the manual data that was used to develop the 2019 rates.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2019 Notice of Benefit and Payment Parameters. The 2019 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost. We subtracted from that Risk

Adjustment transfer 0.5% of premiums for National High Risk pool funding, and added our anticipated High Risk Pool recoveries. High Risk Pool recoveries were estimated based on the average of member-level recoveries that we would have received under this program for 2014-2016 claims as a percent of premium, for Silver Off-Exchange plans.

As a result, we project a risk adjustment receivable of [REDACTED], net of the 2019 user fee of \$0.15 PMPM.

#### 10. Non-Benefit Expenses and Profit & Risk

The retention portion of the projected premium is illustrated in Exhibit 10.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2018 projections, and projected changes in expenses, inflation, and membership for 2019 for our National book of Small Group business.

The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2019 as well as Federal income tax and State Premium taxes. The risk adjustment user fee, as previously mentioned in Section 9, is applied to the projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under non-benefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

#### 11. Projected Loss Ratio

The expected 2019 MLR for this filing, as defined by PPACA and before any credibility adjustment, is shown in Exhibit 11.

#### 12. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in Pennsylvania through Aetna Health Assurance of PA. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d). Rates for plans that may be renewed outside the Single Risk Pool (due to either being grandfathered or permissible transitional offerings) are not covered in this filing.

#### 13. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs and catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

**Small Group Market Trend Adjustments:** Exhibit 12 illustrates the quarterly trend factors, the adjustment for changes in the Health Insurer Fee, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend, leveraging, and also account for changes in the Health Insurers Fee. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2019.

#### 14. Market-Adjusted Index Rate

Exhibit E-1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment was discussed, previously. The risk adjustment is displayed on a paid-basis and the exchange user fee is estimated as a PMPM based on the target premium rate on Worksheet 1 of the URRT. These values have been converted to percent of allowed claims in this Exhibit.

#### 15. Plan-Adjusted Index Rates

Exhibit E-2 illustrates the development of the Plan Adjusted Index Rates, and displays each plan-specific adjustment made to the Market Adjusted Index Rate. The 2019 Plan Adjusted Index Rates are displayed in Column 7. The following briefly describes how each set of adjustments was determined.

##### A. Actuarial Value, Cost Sharing:

The factors in Column 2 are the product of two adjustments:

1. We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage.
2. We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2019 membership.

##### B. Distribution and Administrative Costs:

Exhibit E-2, Column 3, reflects the adjustment for projected administrative costs, including sales, marketing, and profit & risk. These are discussed above in the 'Non-Benefit Expenses and Profit & Risk' section, and exclude the Risk Adjustment User Fee which is reflected in the Market-Adjusted Index Rate. These expense and profit assumptions do not vary by plan.

##### C. Provider Network, Delivery System, and Utilization Management:

The factors in Column 4 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

##### D. Benefits in addition to EHBs:

The factors in Column 5 adjust for the impact of benefits in addition to EHBs. The products discussed in this filing provide coverage for only those benefits defined as Essential Health Benefits (EHB). Hence, all factors in Column 5 are 1.00.

##### E. Catastrophic Plan Eligibility:

This filing does not include catastrophic plans

#### 16. Calibration

Exhibit C-1 shows an example of how calibration is applied to all plan adjusted index rates.

##### A. Age Curve Calibration:

The age factors are based on the HHS Default Standard Age curve. The factors are shown in Exhibit C-2. Exhibit C-2 demonstrates the determination of the Plan-Level Average Age Factor. Plan membership is based on issuer's similar January 2018 plan membership and projected changes in the market.

To Age-Calibrate the Plan-Adjusted Index Rates, We project a premium-weighted average age factor for the 2019 membership using the prescribed age curve and the projected age for each plan, as illustrated on exhibit C-2. The overall Age Calibration factor is developed in Column B of Exhibit C-1. This factor is based on the weighting of plan-adjusted Index rate and membership weighted by each plan's average age factor membership. The Age-Calibrated Plan Adjusted Index Rate is determined multiplying each Plan Adjusted Index Rate by the Plan-Level Average Age Factor and then dividing by the weighted over-all average age factor.

The age that most closely corresponds to the premium weighted overall average age factor is the average age for the single risk pool.

#### B. Geographic Factor Calibration:

Exhibit C-2 summarizes the rating area definitions and factors, and displays the projected premium by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor, and is applied in column F of Exhibit C-1

Projected area factors are shown in Exhibits 6 and C-2. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors.

#### C. Small Group Premium Rates:

The development of the average projected trend factor is discussed above.

### 17. Consumer-Adjusted Premium Rate Development

Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as:

Calibrated Plan Adjusted Index Rate \* Age Factor \* Area Factor \* Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation for a family of six, with more than three dependents under age 21, is shown in Exhibit 14.

### 18. Composite Premiums

Small employers will not be able to elect to have rates set using a composite approach as permitted by Pennsylvania.

### 19. AV Metal Values

The AV Metal Values on Worksheet 2 were based on the 2019 AV Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification

discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

#### 20. AV Pricing Values

The AV Pricing Values are calculated as the ratio of the Plan Adjusted Index Rate to the Market Adjusted Index Rate. The adjustments reflected in the AV Pricing Values are discussed in Section 15. AV Pricing Values do not differ based on morbidity differences or benefit selection anticipated within the Single Risk Pool.

#### 21. Membership Projections

Exhibit 15/C-2 summarizes the membership projections by plan. Membership projections are based on historical experience, enrollment in ACA-compliant plans through January 2018, and our expectations for future sales as additional members move to these plans from grandfathered and transitional plans. (We assume that total enrollment will be similar to our current enrollment.)

#### Terminated Plans and Products

Exhibit 16 provides a plan and product crosswalk from 2017 to 2019. The crosswalk includes the list of products that have experience in the single risk pool experience period, and products that were made available in 2018 and 2019.

#### 22. Plan Type

All plans are consistent with the plan type indicated on Worksheet 2.

#### 23. Warning Alerts

There are no warning alerts on Worksheet 2 of the URRT.

#### 24. Benefit Design

This filing includes one Silver plan.

Please refer to the corresponding policy forms for detailed benefit language. Information on the cost-sharing parameters of the covered benefit plans, including deductibles, copays, and Actuarial Values, is summarized in Exhibits A-1 and A-2. All benefit and cost sharing parameters comply with Pennsylvania benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

#### 25. Marketing

Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including HHS Plan Finder and our own website. Marketing and distribution approaches may change from time to time at management's discretion.

#### 26. Underwriting

Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations

#### 27. Renewability

These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

#### 28. Company Financial Condition

As of December 31, 2017, the capital and surplus held by Aetna Life Insurance Co was approximately \$2.8 billion. This amount is disclosed in page 3, line 33 of the Company's statutory financial statement dated December 31, 2017. The Company issues commercial and Medicare Advantage coverage in

various states for multiple business segments, including to large employer, small employer, and individual purchasers.

### Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Experience Period MLR Rebates
- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Administrative Fees
- Experience Period Data – Small Group

### Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, [REDACTED], am an Associate of the Society of Actuaries, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

1. This rate filing is in compliance with the applicable laws and regulations of Pennsylvania, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:
  - a. ASOP No. 5, Incurred Health and Disability Claims
  - b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
  - c. ASOP No. 12, Risk Classification
  - d. ASOP No. 23, Data Quality
  - e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
  - f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
  - g. ASOP No. 41, Actuarial Communications
  - h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act
2. The Projected Index Rate is:
  - a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),

- b. Developed in compliance with the applicable Actuarial Standards of Practice,
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
  - d. Neither excessive, deficient, nor unfairly discriminatory.
3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
  4. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
  5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
  6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Experience Period Demographic Factor	1.1038
--------------------------------------	--------

**Note:**

Experience Period Demographic Factor computed as the weighted average of gender specific Demographic Factor by current population distribution.

Projected Demographic Factor	1.1079
------------------------------	--------

**Note:**

Projected Demographic Factor computed as the weighted average of gender specific Demographic Factor by projected population distribution.

Demographic Change	1.0037
--------------------	--------

**Note:**

Claim Impact due to Demographic Changes computed as the ratio of the Projected Demographic Factor over the Experience Period Demographic Factor.

<b>Average Experience Period Area Factor</b>	0.9710
--	--------

**Note:**

Average Experience Period Area Factor computed as the weighted average of Experience Period Area Factors by experience period membership distribution.

<b>Average Projected Area Factor</b>	1.0063
--------------------------------------	--------

**Note:**

Projected Area Factor computed as the weighted average of Projection Period Area Factors by projected membership distribution.

<b>Area Shift Factor</b>	0.9971
--------------------------	--------

**Note:**

Area Shift Factor computed as the ratio of the Projected Membership by Area over the Experience Membership by Area Factor represents: The impact due to the shift of the population distribution across areas.

<b>Area Factor Change</b>	1.0394
---------------------------	--------

**Note:**

Area Factor Change computed as the ratio of the Projected Area Factor over the Experience Area Factor both using experience membership Factor represents: The impact due to cost relativity changes, including changes to provider networks and contracts, from the experience period to the rating period.

			<b>Formula</b>
(a)	Premium (pmpm)	\$652.17	
(b)	Medical Cost (pmpm)	\$545.05	
(c)	Medical Benefit Ratio (MBR)	83.6%	= (c) / (b)
(d)	Quality Improvement Action (pmpm)	\$5.22	= (a) x 0.80%
(e)	Taxes and Fees (pmpm)	\$16.84	
(f)	Adjusted Premium (pmpm)	\$635.33	=(a) - (e)
(g)	Adjusted Claims (pmpm)	\$550.27	= (b) + (d)
	<b>Medical Loss Ratio (MLR)</b>	<b>86.6%</b>	=(g) / (f)

Notes:

ACA adjustments for QIA and taxes and fees are estimates based on historical experience and projected expenses.

Values reflect current actuarial projections and will differ from the final reported MLR.

This projection applies to the products included in this filing and is a standalone calculation for the 2019 calendar year. This projection differs from the MLR calculation specified by PPACA which includes three years of experience for all business in the MLR pool.

## Sample Rate Calculation

The following steps outline the mathematical formula used to develop the member level rates for a sample small group. The input assumptions and the census provided below are for illustrative purposes only.

### Sample Small Group Information:

Effective Date: 01/01/2019  
 Rating Area: Rating Area 1  
 Plan: PA Silver OAEPO 6000 80% \$30/75

<u>Group Census</u>	<u>Employee</u> <u>Age</u>	<u>Spouse</u> <u>Age</u>	<u>Child 1</u> <u>Age</u>	<u>Child 2</u> <u>Age</u>	<u>Child 3</u> <u>Age</u>
Employee 1	35	36	5	7	
Employee 2	56	52			
Employee 3	24	21			
Employee 4	52	49	19	17	16
Employee 5	65	65	25		
Employee 6	58	60	24		
Employee 7	56	51			
Employee 8	42	41			
Employee 9	33	34	5	6	7
Employee 10	25	28	2	1	

### Age and Tobacco

<u>Factors</u>	<u>Age Factors</u>				
	<u>Employee</u>	<u>Spouse</u>	<u>Child 1</u>	<u>Child 2</u>	<u>Child 3</u>
Employee 1	1.222	1.230	0.765	0.765	
Employee 2	2.333	1.952			
Employee 3	1.000	1.000			
Employee 4	1.952	1.706	0.941	0.885	0.859
Employee 5	3.000	3.000	1.004		
Employee 6	2.548	2.714	1.000		
Employee 7	2.333	1.865			
Employee 8	1.325	1.302			
Employee 9	1.198	1.214	0.765	0.765	0.765
Employee 10	1.004	1.087	0.765	0.765	

### Calculation of Monthly Premium

Step 1: Multiply Market Base Rate x Rating Area Factor x Plan Factor x Effective Date Factor

Market Base Rate =	\$607.77
x Rating Area Factor (Rating Area 1)	0.7787
x Plan Factor	0.7285
x Effective Date Factor	1.0000
Market Base Rate adjusted for Plan/Area/Effective Date =	\$344.79

Step 2: Multiply Adjusted Market Base Rate in Step 1 by the Member level Age and Tobacco Factors:

<b>Member Monthly Rates</b>	<b>Employee</b>	<b>Spouse</b>	<b>Child 1</b>	<b>Child 2</b>	<b>Child 3</b>	<b>Total</b>
Employee 1	\$421.34	\$424.10	\$263.77	\$263.77		\$1,372.98
Employee 2	\$804.40	\$673.04				\$1,477.44
Employee 3	\$344.79	\$344.79				\$689.58
Employee 4	\$673.04	\$588.22	\$324.45	\$305.14	\$296.18	\$2,187.03
Employee 5	\$1,034.38	\$1,034.38	\$346.17			\$2,414.93
Employee 6	\$878.53	\$935.77	\$344.79			\$2,159.09
Employee 7	\$804.40	\$643.04				\$1,447.44
Employee 8	\$456.85	\$448.92				\$905.77
Employee 9	\$413.06	\$418.58	\$263.77	\$263.77	\$263.77	\$1,622.95
Employee 10	\$346.17	\$374.79	\$263.77	\$263.77		\$1,248.50
<b>Group Total Monthly Premium:</b>						<b>\$15,525.71</b>

Note: Member level monthly rates are rounded to the nearest penny.

Mr. Michael Gurgiolo  
Actuarial Review Division  
Bureau of Accident & Health Insurance  
1311 Strawberry Square  
Harrisburg, PA 17120

Subject: Aetna Life Insurance Company  
Small Group Rate Filing  
SERFF # AETN-131455780

Dear Mr. Michael Gurgiolo:

1. The "Rate Information" sheet included in the filing indicates an overall rate change of 6.8%, a minimum change of 3.8%, and a maximum change of 14.8%. However, the PA Actuarial Memorandum indicates that the range of rate change is constant at 6.8% and only one plan will be offered in 2019. Please provide examples showing the calculation for the minimum and maximum rate changes.

*6.8% represents the change in the plan rate, as shown in column AC of the III Plan Rates tab of the PAAM (Table 10). 3.8%-14.8% represents the range of changes when the area factor changes are considered, as shown in the IV tab of the PAAM (Table 11).*

2. Please explain how the 6.8% rate increase reconciles to the rate increases shown in Worksheet II Section I of the URRT.

*The 6.8% shown in the PAAM represents the change in the rate from the first quarter of 2018 to the first quarter of 2019. The changes in Worksheet II represent the average rate change over the course of all policies effective in 2019 (Q1-Q4).*

3. Please provide numerical support for the change in morbidity, change in demographics, change in networks, and change in other assumptions for both the Actual Experience Data and Manual Data shown in Table 5 of the PA Rate Template.

*Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #3', for the requested numerical support.*

4. Page 1 of the Federal Actuarial Memorandum indicates that this filing includes new benefit plans effective January 1, 2019. However, Worksheet II Section I of the URRT shows only one renewing plan and no new plans effective January 1, 2019. Please confirm that only Plan 33906PA0160001 will be offered in 2019 and it is considered a renewing plan.

*We confirm that only plan 33906PA016001 will be offered in 2019 and it is considered a renewing plan. The actuarial memorandum wording has been updated to reflect this.*

5. The "Rate Change Summary" included in the filing indicates that Taxes & Fees will account for 2.3% of premium, while Worksheet I Section III of the URRT indicates that Taxes & Fees will account for 2.06% of premium. Please explain this discrepancy.

*The 2.3% taxes and fees in the Rate Change Summary includes 0.21% for high risk pool premium less recoveries and 0.02% for risk adjustment fees. It is otherwise equivalent to the taxes and fees displayed in Worksheet I Section III of the URRT.*

6. The PA Actuarial Memorandum indicates that the rating areas included in this filing are Rating Areas 1-3 and 5-9, with certain counties excluded. However, the file titled "PA\_SG\_33906\_Rates\_OFF\_1Q2019\_v1.xls" includes Rating Area 4. Please confirm that Rating Area 4 is not included in the service area and remove it from the rate tables as necessary.

*We confirm that rating area 4 is not included in the service area. We will submit a revised rate table.*

7. Please provide an explanation for how the AV Calculator (AVC) inputs for the Specialty Drug benefit were determined when there is different cost sharing between preferred and non-preferred drugs, as shown in Exhibit A-2.

*When calculating the AV, we entered the preferred tier cost sharing. Weighting between the preferred and non-preferred tiers is not material to the Actuarial Value.*

8. Please provide an illustration of the calculation of the 0.728 paid-to-allowed ratio.

*Paid to allowed ratios are based on 2017 experience that is adjusted for the impact of any plan benefit changes based on our internal pricing models and trending deductible-leveraging.*

9. Please provide numerical support for the changes in the rating area factors from the prior filing and describe how morbidity differences were removed in the calculation.

*The newly requested area factors were developed based on large group claim experience over a 12 month period from July 2016 to June 2017, normalized for morbidity. This data was used due to credibility concerns with our SG ACA population. Please see the 'Response 9' tab of the file 'ALIC Objection Response Tables 20180615.xlsx'*

10. We have several questions related to trend.

a. The unit cost trends tie between Worksheet 1 Section II of the URRT, Exhibit 8, and the "SG Quarterly Trend\_ALIC.xlsx" file. The utilization trends tie between the URRT and Exhibit 8. However, the utilization trends differ between the URRT/Exhibit 8 and the "SG Quarterly Trend\_ALIC.xlsx" file. Please explain why the utilization trends differ.

*The utilization trend shown in the "SG Quarterly Trend\_ALIC.xlsx" file includes the impact of deductible leveraging. The utilization trend shown in Exhibit 8 includes induced utilization. The utilization trend shown on the revised URRT matches Exhibit 8. Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #10', for the illustration of how the utilization trends differ between the files.*

b. The weights applied to each service category in the development of total trend differ between the file "SG Quarterly Trend\_ALIC.xlsx" and Table 3 of the file PA Rate Template, resulting in differing total trends. Please reconcile, and explain why these weights differ.

*Aetna trend is developed using service category weights from actual experience which is rolled up to a total annual trend. The method for combining the service categories in the file '2019\_SmGrp\_AetnaLifeInsuranceCo\_PAAMExhibits\_062618.xlsm' differs in that each component is trended for two years and then rolled up to a total trend factor. Due to the difference in methods, PA incurred pmpm's for each service category were used as the weights. The method Aetna uses is demonstrated in the first table in the attachment 'SG Quarterly Trend\_ALIC.xlsx'.*

c. Please provide numerical support for the trend assumptions utilized in the development of the rates.

*The numerical trend buildup is shown in the responses to parts a and b of this objection. Additional discussion on the development of medical and pharmacy trend can be found below.*

*Medical trend factors are based on our Medical Economics Unit's local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.*

*Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates.*

d. Page 5 of the Federal Act Memo indicates that trend factors are developed from annual forward trend, leveraging, and changes in the Health Insurers Fee. Please demonstrate how leveraging is applied in the development of trend and provide numerical support for this adjustment.

*Leveraging for medical and pharmacy is developed using the Milliman Health Cost Guidelines Deductible Leveraging table. Based on the average deductible, a load factor is applied to the allowed trend to calculate the paid trend. An example is below.*

*Allowed Trend = 10.0%*

*Average Deductible = \$2,000*

*Lookup From Deductible Leveraging Table for \$2,000 = 1.15*

*Leveraging Trend =  $(1 + \text{Allowed Trend} * \text{Deductible Lookup}) / (1 + \text{Allowed Trend}) - 1$*

*Leveraging Trend =  $(1 + 0.1 * 1.15) / (1 + 0.1) - 1 = 1.3\%$*

*Paid Trend =  $(1 + \text{Allowed Trend}) * (1 + \text{Leveraging Trend}) - 1$*

*Paid Trend =  $(1 + 10\%) * (1 + 1.3\%) - 1 = 11.5\%$*

11. Please provide numerical support for the development of the assumed 2.60% 2020 Health Insurer Fee.

*We are estimating the Health Insurer Fee to be 2.60% of premium for 2020. The Health Insurer Fee was calculated for Aetna by taking the total dollar value due to the HIF and by estimating our national market share. To calculate this, we used growth assumptions for Aetna by market and compared to industry wide growth assumptions.*

12. Please provide numerical support for the development of the Risk Adjustment amount of \$9.65 as documented in the PA Rate Template.

Please see the table below for the calculation of the Projected Risk Adjustment PMPM

Risk Transfer Estimate from PA DOI	\$ 9.25
Adjustment for Admin components of Premium	\$ 1.51
2018 Risk Adjustment Fee	\$ (0.15)
2018 Net High Risk Pool Prem less Recoveries	\$ (1.35)
<b>Projected Risk Adjustment PMPM (1st Quarter)</b>	<b>\$ 9.24</b>
Trend Factor to midpoint of projection period	1.043
<b>Full Year Projected Risk Adj PMPM</b>	<b>\$ 9.65</b>

13. Please reconcile the discrepancy between Exhibit 11's 'Medical Cost (PMPM)' of \$522.56 compared to Worksheet I Section III of the URRT which shows \$525.85.

*We believe you are referencing the medical cost before Risk Adjustment, which is \$535.11 in Worksheet I Section III. The reconciliation is shown below.*

*The Exhibit 11 'Medical Cost (PMPM)' was calculated as follows:*

Incurring before RA	\$535.11
Risk Adj (no fees)	(\$10.76)
High Risk Pool Recoveries	(\$1.79)
Total Claims	\$522.56

14. Please reconcile the discrepancy between Exhibit 11's 'Taxes and Fees' of \$16.22 compared to Worksheet I Section III of the URRT which shows \$12.93. We would expect this to differ by only the Risk Adjustment User Fee amount.

*In Exhibit 11's 'Taxes and Fees' we included a high risk pool premium of \$3.14. The remaining \$0.15 difference is due to the Risk Adjustment User Fee.*

15. The projected member months included in Table 1 of the file PA Rate Template total 3,447, while the projected member months included in Worksheet I Section III of the URRT total 3,348. Please explain why these projected member months differ.

*When rolling up the member months by age in Table 1, some of the ages were inadvertently double-counted. 3,348 is the correct total, as shown in the URRT. We have corrected the member months total in Table 1.*

16. The Projected Required Revenue PMPM of \$654.59 included in Table 6 of the file PA Rate Template does not reconcile to Worksheet I Section III of the URRT. Please explain this discrepancy.

*The Projected Required Revenue PMPM in Table 6 uses the average of all policies offered throughout the year, while the URRT Worksheet I Section III only represents the first quarter policies.*

17. Please explain the discrepancy between the Projected Risk Adjustment PMPM included in Table 5 of the PA Rate Template and Worksheet I Section III of the URRT.

*The Projected Risk Adjustment PMPM in the URRT is only trended to the first quarter of the projection period while the Projected Risk Adjustment PMPM in PA Rate Template Table 5 is trended to the midpoint of the projection period (accounting for all policies with an effective date in 2019).*

18. Please discuss the impact on the filing in the change in coverage from a PPO in 2018 to a OAEPO in 2019.

*The in-network coverage parameters are the same on the PPO and OAEPO platforms; the primary difference is that the OAEPO platform does not include out-of-network benefits.*

19. Please revise the table in Section 1 (H) of the actuarial memorandum to show the correct year and correct the factors, if necessary.

*We have submitted a revised actuarial memorandum and corrected the dates, and apologize for this oversight. There are no changes to the factors, as the factors shown are what was intended and the dates were a typographical error.*

20. The company supporting exhibits were provided only in pdf format; please provide these exhibits as Excel workbooks for the Department's consideration.

*We have submitted the supporting exhibits in Excel workbooks. We apologize for the oversight.*

21. In Table 6 of the PA Actuarial Memorandum exhibits, please include the formulas used to calculate the information shown in all cells which utilized such formulas.

*Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #21' for the requested calculations.*

22. Consistent with the information shown in Table 5a, please provide the current distribution of members by renewal quarter.

*Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #22', for the current distribution of members by renewal quarter.*

23. Please reconcile the trend shown in PAAM Table 3b with the quarterly trends shown in Table 5a of the PAAM.

*The trends shown in PAAM Table 5a include HIF (2.6%) and medical trend (12.9%). The trend shown in PAAM Table 3b is only medical (12.6%). The difference in medical trend between tables 5a and 3b is based on the weightings of the benefit categories. 5a applies weight based on the percentage of our 2017 paid claim experience, for all segments. 3b applies weight based on the percentage of our projected 2019 paid claims, for the small group segment only.*

24. Please provide an Excel exhibit, similar in structure to the URRT, that starts with the manual experience period data and ends shows the development of the projected index rate \$760.13.

*Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #24', for the requested development.*

25. Please reconcile the following data:

- a. Data in Table 2 with the small group market data in Supplemental Health Care Exhibit.
- b. Administrative expenses in Table 6 with SHCE.
- c. QIS in Table 6 with SHCE

*The claims data reported in the Supplemental Health Care Exhibit (SHCE) is on a different basis than the data used for pricing, and thus they will not reconcile. The following differences exist between the two data sources:*

- Claims in the SHCE are on a financial basis. "Incurred claims" in this report represent paid claims plus the change in the reserve. The data used for pricing, on the other hand, is truly on an incurred basis.
- The claims in the SHCE are only paid through December 2017, whereas the claims used in pricing are paid through February 2018.

26. To support the development of the calibration factors, please provide the age and geographic distribution of members for the experience period and the current period, and provide an explanation if the current distribution differs significantly in relation to the projected distribution.

*Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #26', for the requested distributions. The current distribution does not differ significantly in relation to the projected distribution.*

27. Please provide the data and analysis that underlies the change in area factors as shown in Table 13 of the PAAM.

*Please see the response to objection number 9.*

28. Please show the development of the average commission as shown in Table 6. Additionally, the current and 2019 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm cost.

*As noted in our actuarial memorandum, the commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.*

*Please see attachment 'ALIC Objection Response Tables 20180615.xlsx', tab 'Response #28' for the average commission development.*

29. Please certify that the rates generated from Table 11 are consistent with the rates included in the PA Plan Design Summary and the Federal Rates Template and are developed in accordance with Department guidance.

*We certify that the rates in table 11 are consistent with the rates in the PA Plan Design Summary and Federal Rates Template, and have been developed in accordance with Department guidance, as outlined in the actuarial memorandum.*

Please let us know if you need any additional information to complete your review of this filing.

Sincerely,

, ASA, MAAA  
Actuary I, Aetna

Mr. Michael Gurgiolo  
Actuarial Review Division  
Bureau of Accident & Health Insurance  
1311 Strawberry Square  
Harrisburg, PA 17120

Subject: Aetna Life Insurance Company  
Small Group Rate Filing  
SERFF # AETN-131455780

Dear Mr. Michael Gurgiolo:

Please see our responses below in regard to your letter dated July 6, 2018.

1. The exhibit provided in response to Question 3 shows a development of the change in morbidity for the experience and manual rates as presented below. Please provide additional quantitative support for the development of these factors as there is a significant increase in the morbidity factors associated with the projection period in comparison to the experience period.

Experience Manual  
Experience Period 0.973 1.048  
Projection Period 1.154 1.154  
Change in Morbidity 1.186 1.101

*Please see the 'Response #1' tab in the ALIC Objection Response Tables 20180706.xlsx attachment for the development of the change in morbidity.*

2. The exhibit provided in response to Question 3 shows a different "Projection Network Factor" for the experience (0.995) compared to the manual (0.988). Please provide an explanation for why these values are different when they are both reflecting the projection period.

*The Projection Network Factor for the base experience of .995 is the average projected network factor for the membership included in the base experience which includes ACA and transitional policies for ALIC. The Projection Network Factor for the manual experience of .988 is the average projected network factor for the membership included in the manual experience which does not include transitional policies and includes all ACA policies for PA legal entities.*

3. Please provide additional numerical support for the change in area factors described in response to Question 9. Please provide the detailed calculation of the proposed area factors and quantitatively demonstrate how the factors were normalized for morbidity differences.

*Please see the 'Response #3' tab in the ALIC Objection Response Tables 20180706.xlsx attachment. The area factors were developed by reviewing experience claims cost by region, and then normalizing for morbidity with the retrospective risk score of the population. Judgement was then applied to mitigate the disruption by region, account for the credibility of costs within each region, and account for areas where*

*there will not be an ACA offering (rating area 4 and certain counties in other rating areas). External benchmarks were also examined when determining the area factors.*

4. It was stated in the response to Question 9 that large group data was used in the area factor calculation for credibility purposes. Are there any contract differences between the large group and small group products? If so, please provide a quantitative exhibit showing how these differences were accounted for in the area factor development

*We confirm that there are no material differences between the contracts for the large group and small group products.*

5. The calculated trend is applied to allowed claims and includes a leveraging component. However, in your response to Question 10c you state that “the impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.” Please provide support showing the leveraging component is not being included in both the trend calculation and the projected paid to allowed ratio.

*Please see the ‘Response #5’ tab in the ALIC Objection Response Tables 20180706.xlsx attachment. The leveraging component of trend is not included in the allowed rate development, only in the paid to allowed ratio. The utilization trend used in the URRT matches the expected utilization trend with leveraging removed, but including induced utilization.*

6. Your response to Question 10d shows the leveraging impact on a paid trend value even though an allowed trend is used in the rate development. Please provide support for why a leveraging impact based on an analysis of paid trends is appropriate to apply to an allowed trend amount.

*Please see response #5. Leveraging is not used in the development of allowed trend. We apologize for the confusion.*

7. The response to Question 12 includes the calculation of the projected risk adjustment receivable PMPM. However, this calculation doesn’t reflect the information included in Section 2a of the Pennsylvania Actuarial Memorandum. Please provide a development of the projected risk adjustment receivable PMPM beginning with the \$8.19 PMPM 2017 risk adjustment receivable, as stated in the Pennsylvania Actuarial Memorandum. Please note that as Aetna anticipates a risk adjustment receivable, any adjustment for the inclusion of the administrative expense factor of 0.86 should reduce the receipt. Additionally, the projected risk adjustment PMPM included in the exhibit provided in response to Question 12 is \$9.24, while the URRT demonstrates an amount of \$9.26. Please indicate which value is accurate and update any documentation as necessary.

*The projected risk adjustment PMPM of \$9.26 was the correct amount and the \$9.24 was entered in error. You are correct that we have calculated the administrative adjustment in error, and we will be revising our filing to reflect the corrected risk adjustment development. Please see the ‘Response #7’ tab in the ALIC Objection Response Tables 20180706.xlsx attachment for the development of projected risk adjustment, both before and after the administrative expense correction. We have updated all of our filing documents and exhibits to reflect the impact of this change.*

8. The response to Question 13 includes the calculation of the Medical Cost PMPM used in the development of the MLR. This calculation includes a risk adjustment receivable of \$10.76. Additionally,

the exhibit provided in response to Question 21 indicates a risk adjustment transfer PMPM of \$10.76. Please explain how this amount reconciles to the risk adjustment included in the URRT (\$9.26).

*Please see the 'Response #8' tab in the ALIC Objection Response Tables 20180706.xlsx attachment for the reconciliation of \$10.76 to \$9.26. The risk adjustment included in the URRT is negative because the effect of a risk adjustment receivable is a reduction in claims. Please also note we have made an adjustment to the Rx other trend factor which was an error in our initial filing.*

9. Please explain why the Rx Other Trend in Cell M25 of the exhibit provided in response to Question 24 (0.969) does not tie to the Rx Other Trend in Cell D30 of the exhibit provided in response to Question 3 (0.991).

*The Rx Other Trend in cell M25 on the 'Response #24' tab only applies to the pharmacy cost category. The Rx Other trend in Cell D30 on the 'Response #3' tab is the factor for all medical cost categories, weighted by category, using .969 for Rx and 1.0 for all other medical cost categories.*

10. The response to Question 25 does not address the differences in administrative expenses in Table 6 and the SHCE or the differences in QIS in Table 6 and the SHCE. Please reconcile this data.

*Please see the 'Response #10' tab for a comparison of the administrative costs between Table 6 and the SHCE. Please note that the SHCE covers the experience period of 2017, while Table 6 is representative of the projection period of 2019, so the two will not be exactly equal. Aetna's administrative cost and QIS assumptions are set nationally and allocated to a local level, so there will be some variation from year to year. Also, Aetna's cost and QIS assumptions are set across legal entities and the allocation of experience can vary by entity. In addition, there can be discrepancies on which members and groups are considered large or small, and on timing of expenses.*

11. Please reconcile the PMPM commission and other amounts provided in the "Exhibit 21" worksheet with the commission and other amounts shown in Table 6 of the PAAM Exhibits.

*The PMPM commission of \$14.29 shown in 'Response #21' is the average commission we expect to pay based on the distribution of membership. We convert \$14.29 to a percent of premium as we are required to enter commission in Table 6 of PAAM Exhibits as such. When the average small group premium trend is applied to \$14.29, the resulting value is the \$14.90 shown in Table 6 of the PAAM Exhibits.*

*The formula can be seen in cell H23 and I23 on the 'Response #21' tab of the previously submitted attachment ALIC Objection Response Tables 20180615.xlsx.*

Please let us know if you need any additional information to complete your review of this filing.

Sincerely,

, ASA, MAAA  
Actuary I, Aetna
