Ms. Tracie Gray – Director  
Bureau of Life, Accident and Health Insurance  
Pennsylvania Insurance Department  
1311 Strawberry Square  
Harrisburg, PA 17120

Dear Ms. Gray,

The following is in response to the Department's guidance as of March 13, 2018:

1. Company Name & NAIC#: Geisinger Quality Options' – NAIC# 12743
2. Market: Individual
3. On and Off Exchange
4. Effective date of coverage: January 1, 2019
5. Average rate change: 13.2%
6. Range of rate change requested: 13.2% to 13.2%
7. Total additional annual revenue generated from the proposed rate change: \$305,031
8. Product: PPO
9. Rating areas: 2, 3, 5, 6, 7, 8 and 9 (7, 8 and 9 are new rating areas)
10. Metal Levels & Catastrophic Plans: Bronze, Silver, and Gold
11. Current number of covered lives and of policyholders as of 2/1/18: 277 covered lives and 171 policyholders
12. Number of plans offered in 2019: 18 gold plans, 36 silver plans, and 18 bronze plans (for a total of 72 plans); Number of plans offered in 2018: 1 silver plan
13. Contract form #: M-152-115-F Rev. 1/19; SERFF #: GSHP-131501975; Binder ID #: GSHP-PA19-125083295
14. HIOS issuer ID: 75729; HIOS submission tracking#:

For a detailed explanation of our rate development, please refer to the "actuarial memorandum and attestation" uploaded in SERFF under the "supporting documentation" tab.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Kurt J. Wrobel".

# Attachment I

# Rate Change Summary

## Geisinger Quality Options – Individual Plans

Rate request filing ID # GSHP-131501975 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at

<http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

### Overview

Initial requested average rate change:	13.2% <sup>1</sup>
Revised requested average rate change:	13.2% <sup>1</sup>
Range of requested rate change:	13.2-13.2%
Effective date:	1/1/2019
People impacted:	277
Available in:	Rating areas 2, 3, 5, 6, 7, 8, and 9

### Key information

#### Jan. 2017-Dec. 2017 financial experience

Premiums	\$9,528,452
Claims	\$6,526,336
Administrative expenses	\$1,027,183
Taxes & fees	\$469,417
Company made (after taxes)	<b>\$1,505,516</b>

#### How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

Claims:	92.23%
Administrative:	4.87%
Taxes & fees:	4.20%
Profit:	2.00%

The company expects its annual medical costs to increase **8.2%**.

### Explanation of requested rate change

Geisinger Quality Options has proposed an overall base rate increase of 13.2% for Individual PPO members renewing in the Marketplace effective January 1, 2019 through December 1, 2019. The proposed overall rate increase is uniform by plan due to only one plan being offered in 2018. The key drivers of this increase are the change in morbidity of the ACA population, the potential changes to the cost-sharing reduction program and the enforcement of the individual mandate. The total projected 2019 administrative costs are slightly less than those used for the current 2018 rates. As required by federal regulations and using the Federally prescribed MLR methodology, the projected loss ratio exceeds 80%. There were minimal benefit changes proposed for 2019.

<sup>1</sup> Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

July 17, 2018

Ms. Tracie Gray – Director  
Bureau of Life, Accident and Health Insurance  
Pennsylvania Insurance Department  
1311 Strawberry Square  
Harrisburg, PA 17120

Dear Ms. Gray,

The following is in response to the Department's guidance as of July 3, 2018:

1. Company Name & NAIC#: Geisinger Quality Options' – NAIC# 12743
2. Market: Individual
3. On and Off Exchange
4. Effective date of coverage: January 1, 2019
5. Average rate change: 13.2%
6. Range of rate change requested: 13.2% to 13.2%
7. Total additional annual revenue generated from the proposed rate change: \$305,031
8. Product: PPO
9. Rating areas: 2, 3, 5, 6, 7, 8 and 9 (7, 8 and 9 are new rating areas)
10. Metal Levels & Catastrophic Plans: Bronze, Silver, and Gold
11. Current number of covered lives and of policyholders as of 2/1/18: 277 covered lives and 171 policyholders
12. Number of plans offered in 2019: 18 gold plans, 36 silver plans, and 18 bronze plans (for a total of 72 plans); Number of plans offered in 2018: 1 silver plan
13. Contract form #: M-152-115-F Rev. 1/19; SERFF #: GSHP-131501975; Binder ID #: GSHP-PA19-125083295
14. HIOS issuer ID: 75729; HIOS submission tracking#: 75729-1224427533534017544
15. Summary of changes in response to the Department's guidance on July 3, 2018
  - a. Revised the CSR Defunding Adjustment Factor to 1.20

For a detailed explanation of our rate development, please refer to the "actuarial memorandum and attestation" uploaded in SERFF under the "supporting documentation" tab.

Thank you for your consideration. Please contact me if you have any additional questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Kurt J. Wrobel".

# **Actuarial Memorandum – Individual GQO**

## **1. Basic Information and Data**

### **General Information**

#### **Company Identifying Information (as included in Table 0)**

Company Legal Name: Geisinger Quality Options

State: Pennsylvania

HIOS Issuer ID: 75729

NAIC Number: 12743

Market: Individual

Effective Date: 1/1/2019

#### **Company Contact Information**

Primary Contact Name: Sarah MacDerment

Primary Contact Phone: 570-214-2348

Primary Contact email address: [smmacderment@thehealthplan.com](mailto:smmacderment@thehealthplan.com)

#### **Filing Information**

HIOS Submission Tracking Number: 75729-1224427533534017544

Contract Form Number: M-152-115-F Rev. 1/19

SERFF Number: GSHP-131501975

Binder ID Number: GSHP-PA19-125083295

## **Rate History and Proposed Variations in Rate Changes**

### **Rate History**

The recent historical rate increases are summarized in the table below.

<u>Year</u>	<u>SERFF ID</u>	<u>Average Increase</u>	<u>Minimum Increase</u>	<u>Maximum Increase</u>
2015	GSHP-129625425	13.7%	7.8%	19.4%
2016	GSHP-130072442	20.0%	15.2%	21.1%
2017	GSHP-130558343	0.0%	0.0%	0.0%
2018	GSHP-131024096	-20.1%	-20.1%	-20.1%

For 2015 and 2016, the increase was not uniform, but varied by plan, as displayed above. For 2017 and 2018, the increase was uniform by plan since there was only one plan.

### **Proposed Rate Increase**

This filing applies to PPO products, sold on and off exchange in rating areas 2, 3, 5, 6, 7, 8 and 9. There will be 18 gold plans, 36 silver plans, and 18 bronze plans, for a total of 72 plans offered in 2019. For every county in our service area, we will continue to have one silver plan offered Off-Exchange only. These plans do not include the adjustment of the defunding of CSR and therefore are lower priced than a similar plan offered On-Exchange. For 2019, we are introducing plans in rating area 8, and reintroducing plans into rating areas 7 and 9.

As of February 2018, 277 covered lives and 171 policyholders will be impacted by this filing. The proposed overall rate increase is 13.2% and is uniform by plan due to only 1 plan being offered in 2018.

Devised 5/18/18

Revised 7/13/18

### **Average Rate Change**

The average rate change entered as the “percent rate change requested” in the SERFF Rate Review Detail Screen is the same as listed in Table 10, cell AC15. It is the change in the Calibrated Plan-adjusted Index rate (as instructed by the Department). In addition, the change in 21-year-old non-tobacco premium PMPM, as calculated in Table 11, cell AN13, is 13.2%. Finally, the URRT Worksheet 1 “percent increase over Experience Period” (in cell V45) is 147.45% and the “percent increase annualized” (in cell V46) is 57.30%.

### **Membership Count**

Table 1 shows the average age and the member months in the experience period of calendar year 2017, as well as the average age and the current members as of February 1, 2018 by age range. The projected member months for the rating period are also included. The experience period and current period data includes all non-grandfathered business while the projected rating period only includes the projected ACA enrollment.

### **Benefit Changes**

There was only one plan offered in 2018 and the benefits for that plan have not changed.

### **Reason for Rate Increase**

The components of this rate increase are:

- Single Risk Pool experience (i.e. the “Base period allowed claims before normalization” on Table 8) which is more adverse than assumed in current rates;
- Medical Inflation;
- Utilization trend;
- Changes in administrative expenses;
- Changes in ACA fees;
- Changes in Risk Adjustment;
- Changes in the Adjustment for CSR defunding
- Changes in Morbidity

Each of these components are discussed later in this document and are displayed in Table 8 of the exhibits.

### **Experience Period Premium and Claims**

#### **Paid Through Date**

The Experience Period data provided in the URRT Worksheet 1, Section I and in Table 2 is incurred in calendar year 2017 and paid through February 2018. As discussed below, the data in Table 2 of the exhibits is consistent with the data provided in the URRT in Worksheet 1, Section 1 (except for the incurred claims and the allowed claims).

#### **Premiums (net of MLR Rebate) in Experience Period**

Premiums include earned premiums for calendar year 2017 for the Single Risk Pool. Premiums are not reduced by taxes and/or assessments. MLR rebates are not expected to be paid for this block of business. Initial estimates of rebates have been completed utilizing the methodology required for the CY

2017 rebate filing. Estimates suggest that the individual market MLR will be above the minimum MLR target of 80%.

### **Allowed and Incurred Claims Incurred During the Experience Period**

The Experience Period Claims are based on all individual non-grandfathered business incurred and paid claims with IBNR added for the tail of claims incurred but not paid. Allowed claims are directly from claim records. The same IBNR factors were used for both paid and allowed claims. The IBNR factors were based on legal-entity level claims completion tables which include individual and group commercial experience. This method is appropriate to assure proper credibility and because timing of claims payment to providers does not vary by market or product.

There were no non-EHB benefits in the experience period.

Geisinger outsources several benefits and therefore has capitation expenses. The capitated expenses cover chiropractic services, nurse line, mental health services and quality fund/ PQS. The capitation amount for the experience period is displayed on Table 2 and is included in both the Incurred Claims and Allowed Claims on Worksheet 1 of the URRT. The capitation charges are uniform and do not vary by age. The historical capitation amounts are on the “Capitation” tab of the file “PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx”.

Pharmacy rebates are listed on Table 2. These rebate dollars would be removed from the Ultimate Incurred Claim liability to the insurer and are removed from the Incurred Claims and the Allowed Claims on Worksheet 1 of the URRT.

The estimated risk adjustment for the experience period is based on an external analysis performed by the Pennsylvania Insurance Department. They estimated the Risk Adjustment transfer payment based on the population risk scores relative to an assumed market average risk score and market average premium.

The calendar 2017 loss ratio, as displayed on Table 2 is 68.79%.

### **Benefit Categories**

<b><u>Benefit Category</u></b>	<b><u>Description</u></b>
Inpatient Hospital	Determined by place of service (Hospital—IP)
Outpatient Hospital	Determined by place of service (Hospital—OP)
Professional	Determined by place of service (Physician’s office)
Other Medical	N/A
Capitation	Claims per Financial Department
Prescription Drug	Claims per contracted PBM

### **Credibility of Data**

The existing non-grandfathered business shown in the Experience Period data in Table 2 does not reflect the anticipated risk and composition of the Projection Period. The Credibility Manual Rate is developed using population segments that are in the Experience Period blended with population segments (HMO business) that are not in the Experience Period. The Credibility Manual Rate is a combination of our

HMO and PPO experience, giving us an even more credible manual rate. Combining the HMO and PPO Single Risk Pools also aids in consistency between the products. Historically, we have seen enrollment move between our HMO and PPO products so it is very important that our premium rates are consistent. To avoid double counting the Experience Period and avoid complicated adjustments to reflect the expected distribution of enrollment in each segment, the credibility of the Experience Period is set to 0.0%. This approach is consistent with the Actuarial Standard of Practice #25. The Credibility Manual Rate is developed based on the expected enrollment in each of these segments, as summarized in the table below. Each segment is described in more detail in the “Adjustments Made to Data” section below.

<b>Segment</b>	<b>% of population Assumed in Projection Period</b>
ACA Compliant - PPO	100%
ACA Compliant – HMO/POS	100%
Non-ACA Non-GF – PPO	0%

The credibility manual data is shown in Table 2b. Since the credibility manual data is given a weight of 100%, the “blended” data would be the same as the data in Table 2b.

As requested by the Department, the experience period data for our transitional (non-ACA non-GF) Individual PPO block is:

Premium = \$6,830,871

Incurred Claims = \$4,819,262

Member Months = 24,729.

### **Adjustments Made to the Data**

The following segments are included in the development of the Credibility Manual Rate and adjusted when appropriate.

*ACA Compliant Experience HMO/POS and PPO* – This population is represented in the Experience Period and is expected to continue into the Projection Period. The Projected Allowed Experience Claims are adjusted for benefits changes as described in the section below.

*Non-ACA Individual Non-Grandfathered Experience PPO* – This population is represented in the Experience Period and is not expected to continue into the Projection Period.

### **Morbidity Adjustments**

We look forward to working with the department to refine our morbidity adjustment. Last year, we worked with the department to determine an appropriate morbidity factor. This factor was 1.191, which included 1.06 for the impact around the uncertainty of the individual mandate. For 2019, the morbidity is expected to be 20% higher in the projection period as it was in the base experience period. This adjustment includes the 1.06 factor to reflect the removal of the Individual Mandate.

### **Changes in Benefits**

Pediatric Dental was not a covered benefit for plans sold On-Exchange in 2017. It was a covered benefit on our plans sold Off-Exchange. The projected PMPM for this benefit is \$1.19. In calendar year 2017, 92.3% of enrollment was on-Exchange and 7.7% was Off-Exchange. The Change in Benefits adjustment on Table 5 is  $(1.19 \times .923) / 597.54 = .00184$ .

### **Changes in Demographics**

Each segment of the Projection Period is expected to have a similar demographic distribution as represented in the 2017 Base Period. There is no adjustment for demographic changes to any population segments.

### **Change in Other**

The capitation amount paid for our private reinsurance, as well as the recoveries from that program are reflected in the "Other" factor. Only slight changes are expected.

### **CSR Defunding Adjustment**

Due to the uncertainty in CSR funding in 2018, the PID instructed carriers to use a factor of  $.94 / .7 = 1.343$  on all silver plans sold on the Exchange. For 2019, we were initially instructed to use a factor of 1.28 to account for the lack of CSR payments from the Federal government. The updated PA Actuarial Memo Rate Exhibits, as of 7/13/2018 reflect updated guidance from the PID to use a factor of 1.20.

### **Trend Identification**

Experience data was trended using an annual trend of 8.2%. Table 3 shows the breakdown between service category and cost vs. utilization. Table 3 uses the PMPM by service category to weight to develop the total composite trend. Trend factors are projected for unit cost and utilization components:

- Unit cost trend factors are based on recorded anticipated increases in facility and professional fees from the Experience to Projection Period. These increases are composited across all facilities and provider groups.
- Utilization trend projections are based on least-square regression modeling, taking into account historical claims patterns, anticipated economic activity and changes in care patterns.
- Seasonality adjustments are made to the claims to account for changes in work days.
- Further adjustments have been made to the trends to reflect expected changes due to new medical management initiatives that are expected to yield savings in the projection period.

Our trends are analyzed at a higher level than these individual segments and are the same for the experience data and the credibility manual data. Due to the lack of stability in the ACA experience, we based our trends on data from our commercial large group experience. Table 4b is provided for this large group experience.

The Composite URR Trend in Table 5, Cell C12 is 1.164 and is used to project the experience period data to the rating period. The aggregate URR Trend reported in Worksheet I, Section 2 is  $337.55 / 289.98 = 1.164$  and matches the Composite Trend in Table 3 of the Department's rate exhibits.

### **Inclusion of Capitation Payments**

If a capitated benefit is not in the experience period, an adjustment was added to account for those services (e.g. Pediatric dental).

### **Historical Experience**

Table 4 includes the most recent 48 months of data with run out through February 2018. Allowed claims are directly from claim records. As mentioned above, Table 4b displays the large group data that was used to determine the trends used.

As requested by the Department, the most recent 48 months of data for our transitional (non-ACA non-GF) Individual PPO block is:

<b>Non-ACA non-GF PPO</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2107</b>
Premium	\$20,287,541	\$13,170,691	\$8,776,493	\$6,830,871
Incurred Claims	\$16,704,875	\$9,340,630	\$6,570,137	\$4,819,262
Member Months	84,053	47,727	30,765	24,729

## **2.Rate Development & Change**

### **Development of Projected Index Rate, Market-Adjusted Index Rate & Total Allowed Claims**

#### **Single Risk Pool**

The Single Risk Pool has been established in accordance with the requirements in 45 CFR 156.80(d) as was discussed previously in the Experience Period Premium and Claims section. The Experience Period includes transitional policies however the Projection Period does not include transitional policies because we do not anticipate members will transition into the ACA Compliant products.

#### **Index Rate**

The Experience Period Index Rate is based on the manual Allowed Claims PMPM and is the starting value on Table 5. The Credibility Manual Rate is a combination of our HMO and PPO experience, giving us an even more credible manual rate. No benefits were covered in addition to Essential Health benefits in the policies being offered.

The Projected Index Rate for this Single Risk Pool is the Adjusted Projected Allowed EHB Claims PMPM and is the manual rate. The projected claims reflect the trend and benefits described earlier in this memorandum. There are no benefits covered in addition to Essential Health benefits in the policies being offered. Cells C15 and D15 in Table 5 are 1.20 which includes the 1.06 adjustment instructed by the PID to account for the removal of the individual mandate. As discussed above, the Manual Data is weighted 100% since it includes the Actual Experience Data as well as the experience data for our ACA compliant PPO business. If we gave any weight to the Actual Experience Data, it would be double counted since it is also in the Manual Data

### **Market Adjusted Index Rate**

The Market Adjusted Index Rate and Market Adjusted Total Allowed Claims are calculated in Table 5. The Projected Index Rate is converted to paid basis by multiplying by the Projected Paid to Allowed ratio (described below).

### **Paid to Allowed Ratio**

The Projected Paid to Allowed Average Ratio is .806 and is displayed on Table 5. It is determined for the Projection Period based on the combination of our HMO and PPO member weighted average Pricing AV for each plan and the projected member months in each plan. There are variations between the AV Pricing Values and the AV Calculator values because of different cost structures and management approaches than what is reflected in the national average data used in the AV Calculator.

### **Projected Risk Adjustments PMPM**

Our Individual Exchange population is expected to have had a healthier risk profile than the state average in 2017 resulting in potential payment transfers into the Risk Adjustment program. Premium levels for 2019 need to incorporate the expected payment into the Risk Adjustment program. The adjustment is shown on Table 5. We initially used the Department's estimated 2017 Risk Adjustment for 2019. The estimates from the PID match exactly to the final numbers published by CMS. There is no need to make any change in our projected risk adjustment to account for the Federal Risk Adjustment Report. The projected Risk Adjustment PMPM is developed by combining both HMO and PPO transfer amounts consistent with the Manual Rate development.

The Exchange user fee is 3.5% time the projected premium, times the portion of the enrollment expected to be sold On-Exchange. Due to a circular reference, the formula in cell C32 in Table 5 has a hard-coded value for the projected premium. The formula is  $.035 * 790.33 * .9475 = \$26.06$ . 94.75% of the Individual ACA enrollment is expected to be sold On-Exchange.

The allowable market-wide modifiers (risk adjustment of -\$24.19 and Exchange User Fees of \$26.06) are added to this paid basis PMPM. This PMPM is then converted back to an allowed basis, again using the projected paid to allowed ratio. Any non-EHB claims would then be added to this value if we had some but we don't so this PMPM is the Market-Adjusted Projected Total Allowed Claims PMPM, \$904.71 as shown on Table 5 in cell C42.

### **Retention Items**

#### **Administration Expense**

Administration expenses are based on activity-based allocation by product for calendar year 2018. This methodology applies for all variable costs and all fixed costs. Table 6 provides a breakdown of the administrative expenses, as well as the taxes and fees. The administrative expenses are a consistent percentage of premium and do not vary by plan. The proposed percentage of premium for 2019 is 4.87% and is shown in both Tables 6 and 10.

#### **Agent/Broker Fees and Commissions**

No commissions are paid on the Indiv ACA business. Table 5 has 0 for Agent/Broker Fees and Commissions.

#### **Quality Improvement Initiatives**

The Quality Initiatives amount is based on the latest estimate for this product. They are reported on line 6.6 of the Supplement Health Care Exhibit of the Annual Statement. The estimated % of premium is

1.43% and is displayed on the 'Quality\_Improvement' tab of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx".

### **Profit & Risk Margin**

The risk margin is set at 2% of premium.

### **Taxes, Fees, and Subsidies**

Federal Income tax is the only tax to be paid. It is calculated on the "Taxes" tab of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx". For 2019, the federal government will not collect the Health Insurer Provider Fee or PCORI Fees so they are not included in this development.

### **Projected Loss Ratio**

The anticipated loss ratio is 94.1% in aggregate as shown below using the Federally-prescribed MLR methodology:

MLR Numerator = URRT Projected Claims + Quality Initiatives = 678.67 + .0143\*790.33 = 689.97

MLR Denominator = URRT Projected Premiums – Taxes and Fees + Risk Adjustment = 790.33 - 26.06 - 7.11 + -24.19 = 732.97

Federal MLR = 689.97 / 732.97 = 94.1%

### **Normalized Market-Adjusted Projected Allowed Total Claims**

The Market-Adjusted Projected Allowed Total Claims is normalized using the projected average factors for age, geography, tobacco, benefit richness (induced demand) and network. These average factors for 2018 and 2019 are displayed on Table 7.

### **Projected Membership**

Sales and Marketing were consulted in developing the membership projections. Since we are introducing many new PPO plans, we expect some of our current HMO membership to transition to PPO plans in 2019. For the overall Individual ACA market, membership is expected to remain approximately at the current levels. February 2018 membership is expected to best represent calendar year 2019 in total for the Individual ACA market. Projected membership is used to calculate the normalization factors discussed below.

### **Normalization Factors**

#### **Age Factor**

The federal age curve, as shown in Table 12, is used to determine a normalization factor to account for the age mix of business used in generating the Index Rate. The average age factor includes a factor of 0 for non-billable members. The average factors for 2018 and 2019 are shown on Table 7 and are developed on the 'Age\_Calibration' tab of the file

"PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx".

#### **Geographic Factor**

The geographic rating area factors used to determine premium rates are shown on Table 13. These factors are consistent with the current approved factors except the factor for region 8, as this is a new region for 2019. The normalization factor is determined using these factors weighted using projected

membership by area and are developed on the 'Area\_Calibration' tab of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx".

### **Tobacco Factor**

A standard **10%** load is applied for applicants who indicate tobacco usage by affirmatively answering the question-"Have you used tobacco at least four times a week for the past six months?" This load assumption was validated using the study "*Impact of height, weight, and smoking on medical claims costs*", a research report done by Milliman to update their Medical Underwriting Guidelines in April 2009. We utilized the 2017 ACA compliant population to determine the percentage of members that admit to the use of tobacco and pay the increased premium for their entire contract in 2016. The average tobacco factor is shown on Table 7 and developed on the 'Tobacco\_Calibration' tab of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx".

Table 12 shows the age bands, age factors and tobacco factors where it demonstrates that the tobacco factors are uniform across all age bands (for 18+).

### **Benefit Richness (Induced Demand)**

Induced Demand factors are applied to each metallic to reflect the expected utilization, not the expected health status. To ensure revenue neutrality, a normalization factor is applied. The average benefit richness factor is shown on Table 7 and the factors by plan ID are developed on the 'Induced\_Util\_Exhibit' tab of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx".

### **Network Factor**

Only one network rating factor per market is used for each network. This is shown in Table 14.

### **Components of Rate Change**

Table 8 shows the components of the Rate Change developed in this filing. The key drivers of this increase are the annual claims trend and changes in the federal risk adjustment. The amounts shown in the 2018 columns match those entered in the 2018 column in the plan year 2018 rate filing.

## **3. Plan Rate Development**

The projected market-adjusted index rate is used to develop the calibrated plan adjusted index rates in columns Z and AA of Table 10. Each plan's rate is developed as the product of the market-adjusted index rate, the allowable factor and calibration for age, geography and tobacco. Due to the division of service areas explained below there are many new plans on Table 10.

Column P of Table 10 has the CSR Defunding Adjustment of 1.20 applied to the on-Exchange silver plans, as instructed by the PID.

Since we only had 1 plan in 2018, all plans on Table 10 are identified as new, except for the one plan offered in 2018 which is identified as M. Column G lists the metallic tier. This is the value we calculated using the HHS Actuarial Value Calculator. Screen shots of this calculation are provided in the file "AV Screen Shots GQO Indiv 20180508.pdf." The Actuarial Certification, at the end of this document, includes attestation that the Federal AV calculator was used to determine the metallic value. Please also refer to the "AV\_UniquePlanDesigned\_GQO\_Indiv\_20180514.pdf" document for further details. As

directed by the Department, columns L, N and P were normalized using projected (CY2019) membership. The supporting exhibit for column L ["Benefit Richness (induced demand)"] is shown on the 'Induced\_Util\_Exhibit' tab of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xls

#### **4. Plan Premium Development for 21-Year-Old Non-Tobacco User**

The projected calibrated plan-adjusted index rate is used to develop the 21-year-old non-tobacco premium in the individual market. These rates are displayed on Table 10, column AA. Table 11 uses the 21-year-old non-tobacco premiums from Table 10, adjusted by the current approved geographic factors (from Table 13), to develop the 21-year-old non-tobacco premiums by rating area.

#### **Consumer Adjusted Premium Rate Development**

The Consumer Adjusted Premium Rates are developed by applying the following allowable rating factors to the calibrated Plan Adjusted Index Rates:

1. Age – reflecting the HHS defined age curve
2. Geographic – as discussed previously
3. Tobacco status – as discussed above.

The final Premium rates for all filed benefit plans are displayed in the QHP Rating Template.

#### **Network Factors**

Only one network rating factor per market is used for each network. This is shown in Table 14.

#### **Service Area Composition**

For 2019, Geisinger Quality Options has made several modifications to its service area designations to better support a market-based approach to product offerings. GQO will maintain the same counties of operation from 2018, with the added expansion in Rating Areas 7, 8 and 9, and one additional county in Rating Area 2. To preserve flexibility and align with unique regional and network characteristics, some counties are assigned as standalone service areas, while others have been grouped with similarly-situated geographies. All counties and service areas are defined in the QHP Service Area template. The services areas are defined on the "Service Areas" tab of the file 'PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx'.

#### **Composite Rating**

Composite rating is not used.

#### **Terminated Plans and Products**

No products or plans are being terminated.

#### **Plan Type**

All plan offerings meet the plan type definitions available in the URRT Worksheet 2, Section I.

#### **Changes to URRT**

We acknowledge that each time the URRT is changed in SERFF, it will also be updated in HIOS.

### **Reliance**

We relied on the Department's 2017 projected risk adjustment payment to develop the estimate for 2018.

### **Warning Alerts**

The following Warning Alerts are noted in Worksheet 2 as described below.

- **Total Premium row 83**: The total premium in row 83 of Worksheet 2 includes the adjustment for the CSR Defunding, while worksheet 1 does not include an adjustment for that factor. Therefore, the premium totals do not match.

### **Additional Exhibits**

The following required exhibits have been uploaded in SERFF under the tabs noted next to the exhibit:

- Department Plan Design Summary – submitted under the “Rate/Rule Schedule” tab;
- Service Area Map – submitted under the “Supporting Documentation” tab.

\*\*\*\*\*

### **Actuarial Certification**

I certify that:

1. I am a member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform this work.
2. The projected Index Rate is:
  - a. In compliance with all applicable state and Federal regulations including 45 CFR 156.80(d)(1)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice,
  - c. Is reasonable in relation to the benefits provided and the population anticipated to be covered,
  - d. Is neither excessive nor deficient based on available information.
3. The Index Rate is used to develop the plan level rates using only the allowable modifiers in accordance with 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2).
4. The essential health benefits are determined in accordance with 45 CFR Part 156 and that the percentage of total premium (in Worksheet 2, Sections III and IV of the URRT) that represents the essential health benefits is calculated in accordance with actuarial standards of practice.
5. The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
6. The Federal AV Calculator was utilized, with an acceptable alternative methodology when appropriate, to determine the AV Metal Values shown above and in Worksheet 2, Section I of the URRT, following ASOP 50. Please refer to the “AV\_UniquePlanDesigned\_GQO\_Indiv\_20180514” document for further details.
7. All factor, benefit and other changes from the prior (2018) approved filing have been disclosed in the actuarial memorandum.

8. New plans have not been considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
9. The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Rate Filing Justification.

I confirm that the rates submitted comply with the ACA rating requirements and with the Single Risk Pool per market requirement. The URRT does not demonstrate the process used to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

**RFJ Part II - Consumer Friendly Justification**  
**Geisinger Quality Options**  
**Individual**

Geisinger Quality Options has proposed a rate increase of 13.2% for Individual PPO members renewing effective January 1, 2019. The increase in premium is due to annual claims trend, changes in federal taxes and fees, changes in the federal risk adjustment program, and changes to the adjustment to premium for the Cost-Sharing Reduction program loss of funding. The total projected 2019 administrative costs are approximately the same as those used for the current 2018 rates. As required by federal regulations, the projected loss ratio exceeds 80%.

2019 Rates Table Template v8.1		All fields with an asterisk ( *) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.			
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.			
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.			
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.			
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

## 2019 Marketplace Proposed Service Areas Individual Broad HMO & PPO

Geisinger Quality Options  
Individual Filing for 2019  
Response to Questions  
SERFF Tracking Number: GSHP-131501975

Geisinger's responses to the first round of questions are contained in this file and the new supporting document, "PID\_Response\_Exhibits\_GQO\_Indiv\_20180620.xlsx". There is only one change to the original rate filing from these questions. A correction was made to the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx", worksheet named Area\_calibration in response to question 9. This file was corrected and resubmitted with the name "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180620.xlsx".

1. A demographic adjustment equal to 1.000 is being applied in the development of the Index Rate. Please provide the distribution of membership by age for those members underlying the 2017 manual rate. Please provide the distribution in a consistent manner with the February 2018 membership distribution on the 'Age\_calibration' tab of the PA additional exhibits file provided. Please refer to the "PID\_Response\_Exhibits\_GQO\_Indiv\_20180620.xlsx" attachment, worksheet named Manual Age Calibration. The average age factors changed only slightly. Given the uncertainty of the membership distribution for 2019, we decided to not adjust for this.
2. Please provide a detailed quantitative exhibit displaying the development of, and justification for, the Morbidity adjustment (i.e., 1.200) being utilized in the Index Rate Development. We look forward to working with the Department to refine our morbidity assumption. Given that Geisinger holds about 12% market share in the state, we hope the Department can assist us with this estimate.
3. It appears that the GHP and GQO projected paid-to-allowed ratios are being blended and the same projected paid-to-allowed ratio (i.e. 0.806) is being applied in developing the Market Adjusted Index Rate for each entity. Please explain why Geisinger believes this is appropriate given that each entity will offer a unique set of plan designs in 2019, and the projected average Pricing AV is different between the two entities (per Table 10 of the respective rate filings). The plan designs in 2019 are not unique between GHP and GQO. Geisinger is introducing new plans on GQO which are the same as plans on GHP. With no experience for GQO, but experience for similar plans for GHP, Geisinger feels it is appropriate to blend the experience.
4. The pharmacy trend assumption being utilized in the 2019 Index Rate development (i.e., 12.1%) is significantly higher than was used in the 2018 Index Rate Development (i.e., 9.5%). Please provide quantitative and qualitative support for the increased pharmacy trend assumption. Please refer to the "PID\_Response\_Exhibits\_GQO\_Indiv\_20180620.xlsx" attachment, worksheet named Pharmacy Trend. This exhibit shows the annual allowed PMPM trend for our large group market retail prescription drug experience. The table provided here shows the Allowed Claims included in Table 4b of the original submission as the experience used to develop trend. The table further separates medical and pharmacy claims to show the pharmacy trend. This supports a trend of over 12%, as shown in recent periods. We consulted with our pharmacy team and they believe that this recent trend will continue due to increases in unit cost and new specialty drugs entering the market.

5. Please quantitatively demonstrate that any anticipated changes in the statewide average premium (relative to calendar year 2017) were taken into account in the projected 2019 risk adjustment transfer amount, including whether the 0.860 statewide average premium adjustment as outlined in the 2019 Benefit and Payment Parameters Notice, was accounted for.

Given that Geisinger holds about 12% market share in the state, we do not know what to expect for 2019. Our best estimate is to use the full 2017 risk adjustment transfer. While it's acknowledged that the risk adjustment formula will be adjusted to remove admin expenses, the overall impact of the risk adjustment transfer is still unknown.

6. Table 1 on the 'I Data' tab of the GHP and GQO "PA\_Act\_Memo\_Rate\_Exhibits" excel files indicates Geisinger's Individual market book of business covers 62,591 members (i.e., 60,505 GHP and 2,086 GQO members). However, only 59,089 members are used in the development of the age, area, and tobacco calibration factors as shown in the PA additional exhibits file provided. Please reconcile this difference. Table 1 from the GHP Individual filing shows 60,505 members as of February 2018. Of these members we estimated that 7,095 will leave these products due to the plans we have terminated. That leaves 53,410 projected members, as shown on the Induced\_Util\_Exhibit worksheet of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GHP\_Indiv\_20180515.xlsx".

Table 1 from the GQO Individual filing shows 2,086 members as of February 2018. Of these members 1,809 are in transitional market plans that will not enter the ACA market. We estimated that 5,402 of the GHP individual ACA members will enroll in these products due to the introduction of new plans. That totals 5,679 projected members, as shown on the Induced\_Util\_Exhibit worksheet of the file "PA\_Act\_Memo\_Additional\_Exhibits\_GQO\_Indiv\_20180515.xlsx".

The total projected members for the combined market is  $53,410 + 5,679 = 59,089$ .

7. Section 1 of the Part III Actuarial Memorandum states that GQO insures 277 lives, which is inconsistent with the 2,086 lives figure presented in the GQO "PA\_Act\_Memo\_Rate\_Exhibits" excel file. Please reconcile this difference.

Table 1 from the GQO Individual filing shows 2,086 members as of February 2018. Of these members 1,809 are in transitional market plans. Therefore, GQO insures 277 lives in the ACA individual market.

8. Please provide a detailed exhibit displaying the development of the 1.085 rating region 8 area factor applied in the rate development.

We developed the rating factor based on expected provider reimbursement levels. We continue to negotiate with the providers in that area.

9. Please explain why the rating region 8 area factor utilized in the geographic calibration exhibit of the PA additional exhibits file is 1.212. We note that the rating region 8 area factor displayed in Table 13 of the "PA\_Act\_Memo\_Rate\_Exhibits" excel file is 1.085.

The geographic calibration exhibit was created prior to our finalization of the factors. Although this factor was updated in other files, and is used in the rate development as 1.085, the geographic calibration exhibit was inadvertently missed. This mistake has been corrected with the response to these questions.

10. Please provide justification as to why it is reasonable to assume there is no provider cost differential between the two legal entities (i.e., GHP and GQO). Specifically, please justify why the Change in Network adjustment being applied in the development of the index rate is 1.000 for each of the two

legal entities even though the manual rate being used as the basis for rate development for each is the same.

All contracted rates with providers and facilities apply to both entities. There is no provider cost differential.

11. It appears that the magnitude and relativity (between metal levels) of the Benefit Richness adjustment factors included in Table 10 have changed relative to the prior 2018 filing (e.g., the GHP Bronze Benefit Richness factor increased from 0.923 in 2018 to 0.868 in 2019 and GHP Silver Benefit Richness factor increased from 0.997 to 0.986). Please explain the development of the revised Benefit Richness factors and provide quantitative justification for the changes relative to the previously approved factors.

Please refer to the "PID\_Response\_Exhibits\_GQO\_Indiv\_20180620.xlsx" attachment, worksheet named Benefit Richness. This exhibit shows the adjustment made to the 2018 Benefit Richness Factors to get to the 2019 factors. Changes were made to capture changes in the rate development.

12. Please explain and provide justification for why the proposed Pricing AV factor for Plan 4a for GHP is 0.777 while the Pricing AV factor for Plan 33 for GQO is 0.796. Similarly, the Benefit Richness factor for Plan 4a for GHP is 0.986 while it is 1.004 for GQO. We note that the Metal AV between the two plans being referenced is identical at 0.7045.

Plan 4a for GHP is an HMO plan and Plan 33 for GQO is a PPO plan. The cost sharing is the same except for the out of network benefit for the PPO plan. This accounts for the difference in pricing AV.

The Benefit Richness factor is generated by entity (HMO/PPO & Individual/Small Group), which is why the factor is different between plans.

13. Please clarify why the Pricing AV's are not consistent in all cases where the Plan Marketing Name is the same. Specifically, the Pricing AV for Plan 4 is 0.877 while for Plans 5 through 9, which all have an identical Plan Marketing Name, the Pricing AV is 0.797. Similarly, the Pricing AV for Plan 21 is 0.948 while it is 0.862 for Plans 10 through 20.

The Pricing AVs capture the unique characteristics of each plan, which cannot be reflected in the Plan Marketing Name alone. The Pricing AVs for the plan's referenced here are unique for each HIOS Plan ID and the Plan Marketing Name does not reflect the exact same plan.

14. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, Federal Rates Template and the binder are identical.

Confirmed

15. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

The professional copays on the expanded bronze plans for primary and specialty care are below 50% coinsurance. The expanded bronze plans in this market have a primary care copay of \$30 and a specialty copay of \$60. Projected average cost per visit for this population for primary care is \$94 and for specialty is \$203.

16. In the 2019 Guidance published on the Department's website, the Department required that all issuers file uniform factors for the Individual Adjustment of 1.06 and the CSR Defunding Adjustment of 1.28. In addition, the Department indicated that as the rate review process moves forward and federal healthcare reform efforts are clarified, the Department would consider issuer specific requests. We can now advise that the aforementioned factors of 1.06 for the Individual Adjustment and 1.28 for CSR Defunding Adjustment constitute ceilings. If your company desires lower adjustments than those stated in the Department's 2019 Guidance, you may provide updated materials (PA Actuarial Memorandum and Exhibits, Part III Actuarial Memorandum, Part I URRT and corresponding rate tables – State and Federal) and justification for the lower Adjustment factor(s) with your first round response due June 21, 2018. The Department will not consider adjustment factors greater than those stated in the 2019 Guidance.

Individual Filing for 2019  
Response to 2<sup>nd</sup> Round of Questions  
SERFF Tracking Number: GSHP-131501975

Geisinger's responses to the second round of questions are contained in this file. The following files have also been updated to reflect changes due to question 4 below:

1. Act\_Memo\_2019\_GQO\_Indiv\_20180713.pdf
2. PA\_Act\_Memo\_Rate\_Exhibits\_GQO\_Indiv\_20180713.xlsm
3. SERFF\_Exhibits\_GQO\_Indiv\_20180713.xlsm

1. The response to question 1 indicates that Geisinger could support a minimum of a 1.8% downward demographic adjustment (i.e.,  $1.850/1.883-1$ ) to the Index Rate to account for a shift in underlying demographic mix from 2017 to 2018. Please clarify why Geisinger believes it is not necessary to adjust the Index Rate to reflect the underlying demographic shift, but has developed the age calibration factor such that it does reflect the change.

The projected Index Rate is Geisinger's best estimate for the entire single risk pool. Since Geisinger has about 12% market share, we do not believe that an adjustment to reflect our change in demographic mix is appropriate to make to the entire market. All calibration factors are based on the best estimate for 2019 enrollment.

2. The response to question 5 states that Geisinger did not adjust the projected 2019 risk adjustment transfer amount to reflect any anticipated changes in the statewide average premium.

a. Please provide best estimate assumptions for the projected change in statewide average premium from 2017 to 2018 and, separately, from 2018 to 2019.

b. Please provide an estimate for what the projected risk adjustment transfer amount would be if the assumptions developed in 2(a) were applied to the 2017 statewide average premium PMPM amount along with the 0.860 adjustment.

Given that Geisinger holds about 12% market share in the state, we do not know what to expect for 2019. Our best estimate is to use the full 2017 risk adjustment transfer. Geisinger does not project assumptions for risk adjustment at any level of detail and cannot provide an analysis for statewide average premium growth.

3. Regarding the response to question 11, please explain why Geisinger believes it is appropriate to revise the Benefit Richness factors relative to the approved 2018 factors and provide a quantitative exhibit demonstrating the development of the adjustment(s) being applied to the 2018 factors.

Geisinger believes the Benefit Richness factors need to be adjusted to maintain the relative position of metallic level premium. Other changes in the rate development process required adjustment here to keep premiums at fair and competitive levels.

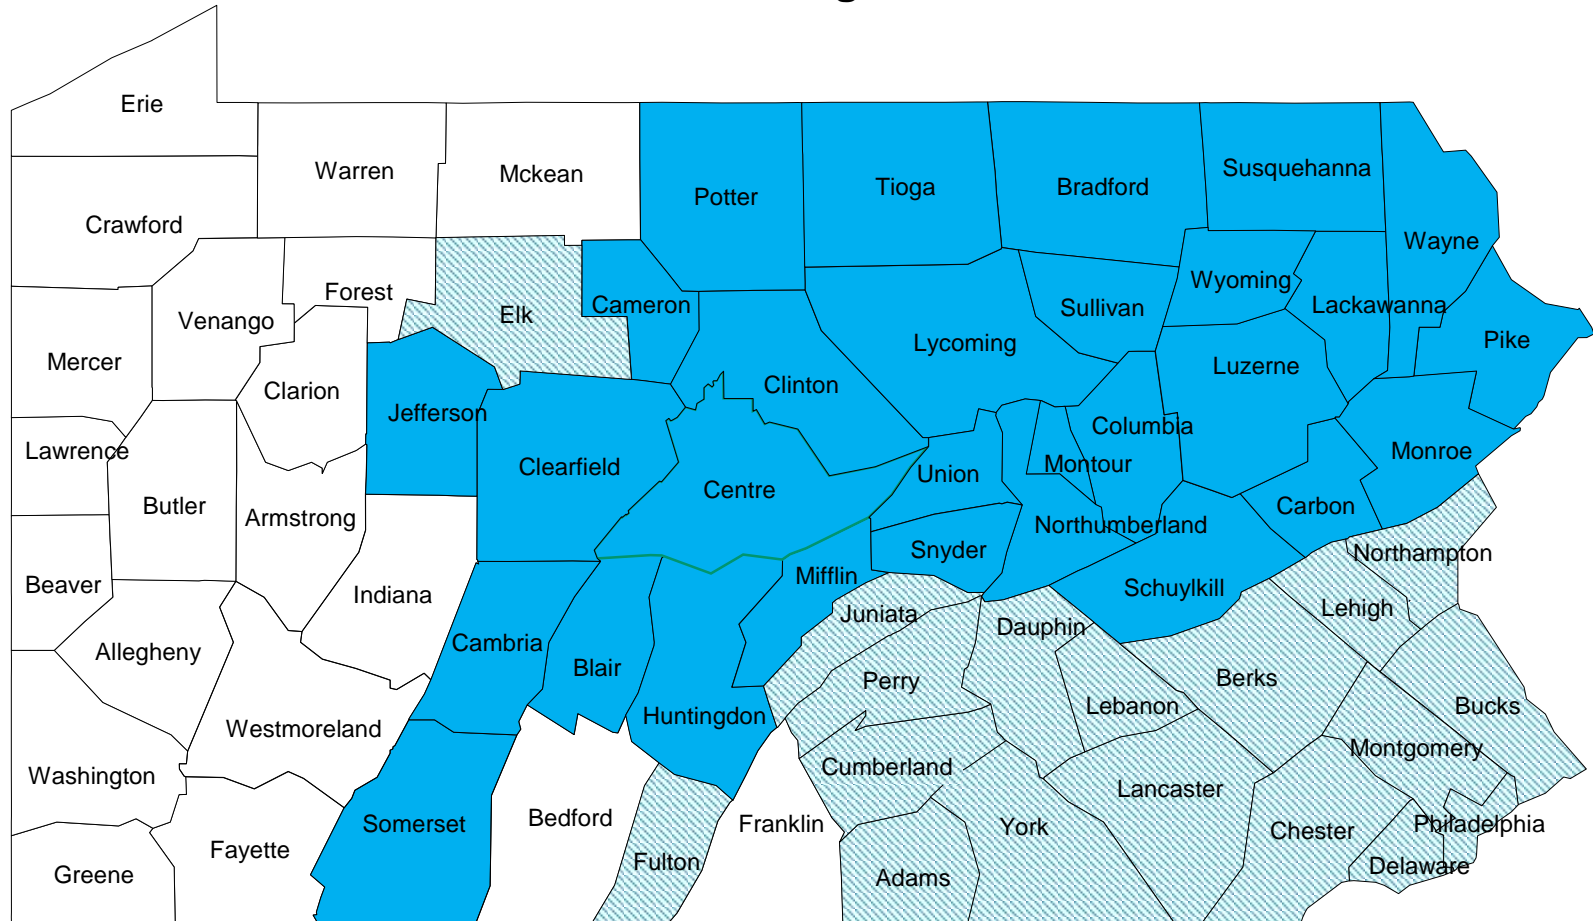

4. As was communicated in my email of July 3, 2018 the Department has determined that an Individual Adjustment Factor of 1.06 and a CSR Defunding Adjustment Factor of 1.20 will be used in the 2019 rate development for the Individual Market. Issuers overwhelmingly recommended standardization of these factors. As such, issuers may not deviate from these factors. Updated materials (PA Actuarial Memorandum and Exhibits and the Plan Design Summary worksheets, including the State rate tables) reflecting these factors, Risk Adjustment updates (based on the June 30th release of the Federal Risk Adjustment Report) and other Department requested changes must be provided with your second-round response due July 13, 2018. Other than these three preceding changes, no other modifications will be accepted.

[Geisinger has revised the PA Actuarial Memorandum and Exhibits and the Plan Design Summary worksheets to reflect the CSR Defunding Adjustment Factor of 1.20.](#)
