Ms. Tracie Gray, Director
Bureau of Life, Accident & Health Insurance
Commonwealth of Pennsylvania Insurance Department
1311 Strawberry Square
Harrisburg, PA 17120

Re: Highmark Inc. 2019 ACA Rate Filing (Small Group Market)
Highmark Filing # 1A-SG-HIGHMARK-2018 (SERFF Filing # HGHM-131496088)

This constitutes Notice pursuant to Section 707 of the Pennsylvania Right-to-Know Law that the attached Highmark Inc. 2019 Small Group Market Rates Filing contains Trade Secret and Confidential Proprietary Information. Therefore, Highmark Inc. must, prior to the release of any portion of this Filing, be notified of any request by a third party for access to this Filing, and the Trade Secret and/or Confidential Proprietary Information identified by Highmark Inc. should be redacted before release.

Dear Ms. Gray:

This Filing includes the Highmark Inc. (NAIC # 54771; HIOS Issuer ID # 33709) Small Group Market Off Exchange ACA rates and the supporting rate development for policies with effective dates on or after **January 1, 2019**.

In the event the Department decides to publish this Filing in the PA Bulletin, the company information requested as per the Department's 2019 ACA-Compliant Health Insurance Rate Filing Guidance, Section B, is provided below:

1. Company Name & NAIC #: **Highmark Inc., NAIC # 54771 ("Company")**
2. Market: **Small Group ("Market")**
3. On or Off Exchange: This Company's products are offered **Off Exchange only**
4. Effective date of coverage: **January 1, 2019**
5. Average rate change requested: **19.89% increase**

6. Range of rate change requested: **17.2% to 26.4%** (PA Actuarial Memorandum Exhibits); 17.42% to 26.64% (URRT Worksheet 2 Row 27 Cumulative Rate Change % (over 12 mos prior))
7. Total additional annual revenue generated from the proposed rate change: **\$10,577,000**
8. Product(s): **PPO, EPO**
9. Rating Areas and the change from 2018: **Regions 1, 2, 4, 5, 6** (Western, PA only)

There are no changes in our covered Rating Areas from the 2018 rate filing.

10. Metal Levels and Catastrophic Plans: This filing reflects that the Company anticipates selling the following Metal Levels of coverage in the indicated Market: **Platinum, Gold, Silver, and Bronze**
11. Current number of covered lives and of policyholders as of February 1, 2018: **11,271 covered lives; 5,260 policyholders**
12. Number of plans offered in 2019 and the change this represents from 2018: **41**

The Company offered 410 plans in 2018. For 2019, the Company is offering 1 new plan in the Market, and removing 0 plans from the Market.

Please note that inclusion of premium rates in this filing for a given offering should not be construed to mean that the offering will ultimately be made available for sale in the market. Final offering decisions will be made consistent with and within the timelines set forth in CMS rules and/or ACA regulations.

13. Corresponding contract form number, SERFF and Binder ID numbers: The corresponding SERFF binder number is **HGHM-PA19-125079618** affecting the following Company products and forms:

| Product Name / Type | Contract Form & SERFF # |
|----------------------------|---------------------------------------|
| Balance PPO | PPO-SM/WG-6; HGHM-131468566 |
| Health Savings HDHP PPO | HDHP-SM/WG-6; HGHM-131468603 |
| Connect Blue EPO | CONB/EPO-SM/WG-3; HGHM-131468606 |
| CB Conemaugh EPO | CONB/EPO-CM-SM/WG-1; HGHM-131468704 |
| CB Conemaugh EPO-HDHP | CONB/EPO-HDHP-SM/WG-1; HGHM-131468655 |
| Flex PPO Penn Highlands | FL/PPO-SM/WG-5; HGHM-131468612 |

14. HIOS Issuer ID # and submission tracking number: **HIOS Issuer ID # 33709, Company Filing # 1A-SG-HIGHMARK-2018 (SERFF Filing # HGHM-131496088)**

Additional Filing Disclosures

The Company has submitted all Required Documents stipulated by the Department, including the federal documents related to this filing, in its SERFF submission. In addition to the Required Documents, the Company has submitted a Supplemental Exhibits file containing additional detailed exhibits on items referenced in the PA Actuarial Memorandum. All tables, exhibits, and detail in support of this filing and the PA Actuarial Memorandum have been included in Excel format. For the Department's benefit, the Excel files have retained their formulas to the extent possible.

CMS has instructed issuers that it no longer requires any interim changes to the URRT to be submitted to HIOS. CMS is requesting that only the initial URRT and the final URRT be submitted to HIOS.

Request for Confidentiality

Please note that the rates and the supporting rate development contained in this Filing are competitively sensitive, are not in the public domain, and constitute business confidential proprietary/trade secret information that would cause harm to the competitive position of Highmark Inc. if disclosed to the public.

Public disclosure of any information contained in this Filing would allow Highmark Inc. competitors to better understand or discover its confidential and proprietary rating, pricing and/or marketing practices, would undermine competition in the Small Group market, and could have negative consequences for the operation of Highmark Inc.'s business. Therefore, Highmark Inc. asserts that this Filing, in its entirety, constitutes Trade Secret and Confidential Proprietary Information and should not be disclosed.

It is our understanding that the Department does not intend to publish the confidential and proprietary information contained in this Filing or to otherwise permit this Filing and its confidential information, other than the redacted information and final approved rates, to be disclosed or released.

Furthermore and pursuant to the Pennsylvania Right-to-Know Law ("RTKL"), Highmark Inc. must be notified prior to release of information contained in this Filing and be given the opportunity to respond to requests for such information. Should the Department receive such request or require the release of information contained in this Filing for its own purposes, Highmark Inc. asserts its right to release a redacted version of the Filing. In accordance with the RTKL, please contact the Highmark Inc. RTKL representative identified below prior to release of any information contained in this Filing:

Lisa Martinelli, Esq.
RTKL Representative
VP Chief Privacy Officer
120 Fifth Avenue, FAP Suite 2114
Pittsburgh, PA 15222

Furthermore, it should be noted that Highmark Inc. is equally concerned that even if this information is released in aggregate form, it still may be easy to identify the carrier that submitted it.

Should you have any questions regarding the attached Filing, please feel free to contact me at (717) 302-2143 or via e-mail at: jeffrey.scheib@highmark.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Scheib". The signature is fluid and cursive, with the first name "Jeffrey" and last name "Scheib" clearly distinguishable.

Jeffrey S. Scheib, ASA, MAAA
Vice President, Actuarial Services
Highmark Inc.

Highmark, Inc. – Small Group Plans

Rate request filing ID # **HGHM-131496088**- This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

| | |
|--|-----------------------|
| Initial requested average rate change: | 19.89% ¹ |
| Revised requested average rate change: | N/A ¹ |
| Range of requested rate change: | 17.2% to 26.4% |
| Effective date: | January 1, 2019 |
| People impacted: | 11,271 |
| Available in: | Regions 1, 2, 4, 5, 6 |

Key information

Jan. 2017-Dec. 2017 financial experience

| | |
|----------------------------|----------------------|
| Premiums | \$62,371,611 |
| Claims | \$60,433,021 |
| Administrative expenses | \$7,497,085 |
| Taxes & fees | \$57,084 |
| Company made (after taxes) | (\$5,615,579) |

The company expects its annual medical costs to increase **9.4%**.

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

| | |
|-----------------|--------|
| Claims: | 87.92% |
| Administrative: | 10.88% |
| Taxes & fees: | 1.20% |
| Profit: | 0.00% |

Explanation of requested rate change

The proposed increases are being driven by rising medical care costs, which are expected to continue through the remainder of 2018 and throughout 2019 as a result of both higher utilization and the increasing cost of healthcare services, and the underlying morbidity of the population within Highmark's ACA products.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Pennsylvania Actuarial Memorandum

1. Basic Information and Data

A. Company Information (Table 0)

Table 0 has been completed as per the instructions. Please refer to the Excel file “2019_SmGrp_Highmark_PAAMExhibits_052118 v2.xlsm” submitted with this filing containing the department’s required tables.

Note that for the remainder of this document, “Company” refers to Highmark Inc., “Market” refers to Small Group, and “Rating Area” refers to Pennsylvania Rating Regions 1, 2, 4, 5, and 6 (Western, PA only). No Service Area changes were made since the last approved filing.

B. Rate History and Proposed Variations in Rate Changes

The most recent three years of historical rate changes in the Pennsylvania Small Group Market for the Company are as follows:

| Year | Avg. Increase | SERFF ID# |
|------|---------------|----------------|
| 2018 | 2.2% | HGHM-131014769 |
| 2017 | 3.2% | HGHM-130535904 |
| 2016 | 9.9% | HGHM-130064391 |

Rate changes vary by plan, as plan benefits need adjusted to help maintain compliance with metal level requirements. Other base rate components (pricing actuarial factor and network discount) are also re-evaluated each year. For 2019, the Company’s proposed rate revisions vary by plan, according to the detail presented in the URRT, Worksheet 2, and the PA Rate Template Table 10.

C. Average Rate Change

The average rate change from Table 10, column AC is a 19.89% increase. The rate change presented in this table reflects the average rate change over 2018 for the entire plan year, premium weighted based on the anticipated distribution of quarterly renewals.

For comparison, the change in 21-year-old non-tobacco premium PMPM calculated in Table 11, cell AN13, is a 20.3% increase. This rate change reflects the change for first quarter 2019 rates over first quarter 2018 rates.

The Percent Increase over the Experience Period from the URRT Worksheet 1, cell V45, is 20.63%; and the Percent Increase, Annualized, from cell V46, is 9.83%.

As noted in the URR Part III Actuarial Memorandum, the average rate increase is 20.3% weighted on the projected enrollment for renewing plans in the URRT. Please note that the rate increases by plan design will differ between the department’s “PA Actuarial Memorandum Rate Exhibits_PY 2019 - Final_v2.xlsm” template and the URRT worksheet 2 row 27 since we maintained the 2018 quarterly

distribution of enrollment as filed last year when calculating the average 2018 Calibrated Plan Adjusted Index Rate PMPMs in column Z of Table 10 in the PA Rate Exhibits while the URRT utilizes a consistent enrollment distribution by quarter for both years based on the 2019 projected distribution.

D. Membership Count (Table 1)

Table 1 has been completed according to the instructions with the average age, age breakdown and total number of members or member months, as indicated in the table. For the 2/1/2018 data, this table reflects all Small Group enrollment, including enrollment from 2017 and 2018 plan year plans.

E. Benefit Changes

Most plans required benefit changes because of the new Actuarial Value (AV) calculator released for 2019 effective dates. The plan changes were mostly required so that the plans remained within the defined metal level AV requirements, and were enacted by adjusting member cost sharing and the maximum out of pocket levels.

For the 2019 plan year, there were no benefit changes necessary to the Company's plans to cover the benefits contained in the state's Essential Health Benefit (EHB) benchmark plan.

F. Experience Period Claims and Premium (Table 2)

Please see Table 2 for the experience period data for the most recent calendar year, for the Company and Market. The experience period paid claims data represents the 2017 calendar year results for all non-grandfathered policies (including transitional policies) in the single risk pool, with run out through February 2018. This data is consistent with the data reported in Section I of Worksheet I of the URRT (see below commentary). The Company has offered only ACA-compliant policies in the Market in the experience period. As such, there is no transitional policy experience to report.

The components of this exhibit were developed as follows:

- The Earned Premium represents actual revenues earned in the experience period.
- The Allowed Claims represent our best estimate of the total claims prior to member cost sharing incurred during the experience period. The Allowed Claims include:
 - Two months of run out from the end of the experience period,
 - Claims processed outside of the Company's claims system (e.g., claim settlement costs), and
 - Our best estimate of claims incurred but not paid as of the end of the run out period.

Note that the Incurred Claims and Allowed Claims presented in the URRT are net of the Prescription Drug Rebates, while Table 2 has the Prescription Drug Rebates separately identified. As per the URR instructions, Allowed Claims do not include reinsurance recoveries or pooling charges, nor do they include quality incentive payments.

- There are no non-EHB benefits or costs in the experience period.
- The EHB coverage for pediatric vision benefits are provided by our vision coverage vendor under a capitation arrangement. These costs are \$0.62 PMPM uniform across each member in the experience period and are reflected in Table 2 under the Total EHB Capitation section.

- Prescription Drug Rebates are used to reduce the level of Incurred Claims in the experience period.
- The Estimated Risk Adjustment represents our best estimate of the year end risk adjustment transfer payment that the Company will incur based on the results in the experience period. This amount is developed based on an analysis of Company data (risk scores as defined in the HHS Notice of Benefit and Payment Parameters, as well as other risk transfer formula components), and an estimate as to the Market-wide risk transfer component profile. This Market-wide profile is developed from available Market data, including the Interim Summary Report for 2017 risk adjustment published by CMS, the PA Insurance Department's calculation of 2017 risk adjustment transfer amounts using the 5/1/2018 RATEE files, prior years' risk adjustment transfer results, publicly available data (such as MLR reports), and outside expertise from actuarial consultants.
- The calculated loss ratio is 96.89%.

G. Credibility of Data (Tables 2b, 3b, 4b)

The experience period data for this Company is large enough to be fully credible. The results are based 100% on the experience period data, adjusted as described herein. Given the Company's fully credible rate development, Tables 2b, 3b, and 4b have not been populated.

H. Trend Identification (Table 3)

Table 3 identifies the annual medical and prescription drug allowed claims cost and utilization trends, as requested by the Pennsylvania Insurance Department. The definitions of service categories, cost, and utilization in Table 3 are consistent with the URRT instructions. The numbers entered in the Cost and Utilization columns are consistent with those entered in Worksheet I, Section 2 of the URRT, except as noted below.

To arrive at our trend assumption, the experience period cost and utilization data were pulled from Highmark's claims systems by the defined benefit categories. For the trend component development, the Company uses results from the combined experience of the following companies within the Highmark corporate family: Highmark Inc., Highmark Choice Company, Highmark Health Insurance Company, and Highmark Coverage Advantage. The combined experience used is limited to the Company's Rating Area and Market, and provides a more credible base to analyze the trend components impacting the business in the Company's Market. The trend development uses a projection of allowed claim PMPMs by service category that takes into account many factors, including the Company's expectations of changes in in-network provider contracting levels, changes in out-of-network costs, changes in utilization from medical management programs, and changes in drug costs from impacts such as generic drug development and new drug treatments. To reflect the impact of provider contracting on trend, changes in in-network provider contracting levels, either known or anticipated, are factored into the cost component of trend using detailed analysis of the impact on claim levels from each material provider arrangement.

These projected costs measure and normalize for benefit leveraging, population aging, and historical changes in fee schedules, as well as company-wide utilization management programs, and external

trend drivers. Based upon the coverage and demographics of our membership, our historical claim levels, adjusted for these factors and projected forward, represent the best estimates of trend for this block of business. Please note that since these historical claim levels are normalized throughout to account for these forces impacting claim utilization and costs, the claim levels presented will not reflect actual experience claim levels.

For the rate development, the Company uses the aggregate claim trend for all types of service, applied to the experience period. This is done so that the combined trend is reasonable in consideration of the various pricing trend components and the overall anticipated trend level. Based on a review of the projected normalized annual trends for 2018 and 2019, an overall claim trend of 9.0% (5.1% cost; 3.7% utilization) was selected for the 2019 rate development. Please refer to the “Trend Support” exhibit in the “2019 Supplemental Exhibits - HMK.xlsx” file showing the historical and projected normalized claim values for the Company’s trend determination, along with our proposed rate trend.

Note that the URRT instructions require that anticipated changes in the average utilization of services due to differences in average cost sharing requirements from the experience period to the projection period be reflected in the Utilization trend component shown in Worksheet I, Section 2. This component of the trend is separately identified in Table 3, as the Induced Utilization trend. Please refer to the “PA to URRT Trend” exhibit in the “2019 Supplemental Exhibits - HMK.xlsx” file, which reconciles the trend assumptions between the URRT and Table 3.

For this Small Group Market filing, quarterly rates are proposed, with rates adjusted each quarter based on the Total Annual Trend presented in Table 3, excluding the Induced Utilization trend. The quarterly trend is based on the cost and utilization trend from Table 3. Note that we zeroed out the impact of the Capitation trend in the Composite URRT Trend. The change in the Capitation charge is reflected in the Change in Benefits adjustment discussed below.

I. Historical Experience (Table 4)

Table 4 presents the most recent 48 months (4 calendar years) of Company data with run-out through February 2018. The Company has offered only ACA-compliant policies in the Market in the experience period. As such, there is no transitional policy experience to report.

As mentioned above in Section I.G, Credibility of Data, the Company utilizes the combined experience from several companies within its corporate family to develop the experience used in the trend development. Combined Historical Experience data from the above referenced companies is presented in Table 4b.

2. Rate Development & Change

A. Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims (Table 5)

The development of the Projected Index Rate, Projected Market-Adjusted Index Rate, and Projected Total Allowed Claims, shown in Table 5, closely follows that utilized in the development presented in

Worksheet 1 of the URRT, a discussion of which can be found in the Part III Actuarial Memorandum submitted in the Rate Filing Justification. Some of the items separately identified in Table 5 include:

- The Change in Morbidity represents an adjustment from the experience period claims to the projection period. See below for additional commentary related to the projection period assumptions.
- The Change in Demographics adjustment reflects the change in age and geography factors we expect from the experience period to the projection period.
- The Change in Network adjustment reflects the change in the allowed claims we anticipate due to changes in in-network discount levels between the experience period and the projection period.
- The Change in Benefits adjustment reflects the change in the EHB benefits (pediatric benefits) we anticipate between the experience period and the projection period, as well as the change in expected pharmacy rebates. See below for additional commentary related to these cost changes.

Please see the worksheet named “Table 5 Support” in the “2019 Supplemental Exhibits - HMK.xlsx” file for the calculation of these factors from our experience period data and projected rate results.

Our initial step in developing the index rates is to determine the expected covered membership for 2019. We estimate the covered member base by adjusting for those groups known to have lapsed during 2017, and those that we expect will lapse in 2018. Then we add in expected new business from groups with current transitional coverage moving to ACA plans, and groups currently with another carrier.

As we have seen through 2017, many of the Small Group market customers have retained their pre-ACA coverage through the transitional coverage provisions, and have yet to join the ACA risk pool. With the transitional coverage provisions extension through the end of 2019 for groups that renew on or prior to October 1, 2019, we continue to believe that many groups, especially lower-risk groups, will continue to retain their current transitional coverage until required to transfer coverage. We are expecting that enrollment drops slightly and that we lose some of the better risk groups. Also, with the continued availability of transitional coverage, we expect any new groups moving into ACA products from transitional coverage will be of higher morbidity. Thus we expect our morbidity to worsen slightly from the experience period and reflect this with a Change in Morbidity adjustment of 1.032.

The Change in Benefits adjustment reflects our estimate of the additional costs associated with the addition of EHBs from the experience period to the coverage period, as well as a change in expected Pharmacy rebates. The rating impacts and descriptions associated with each of these items are as follows:

- Pediatric Dental (\$0.21) – The estimated cost to add the pediatric dental EHB services is \$0.21 PMPM. Pediatric dental costs from the EHB package are included in our experience period claims for ACA business, but not for transitional business. Thus we need to add a charge for those transitional policies that we expect will move to ACA coverage by 2019. This \$0.21 PMPM

cost is determined from an estimated dental cost of \$25.99 PMPM for members aged 0-18 (provided by our dental vendor and developed based on dental experience for members 0-18 priced at 2019 benefit levels for this Market and Rating Area). It was projected that approximately 19.2% of the Small Group members will be between the ages of 0-18, based upon the 2017 membership distribution, and that approximately 4.2% of the 2019 ACA business was in transitional coverage in the 2017 experience period. Therefore, the estimated cost of pediatric dental was calculated as follows: $\$25.99 \times 19.22\% \times 4.2\% = \0.21 .

- Pediatric Vision (\$0.62, increase of \$0.00) – The pediatric vision benefits from the EHB package are covered under a capitated service agreement with our vision vendor, Davis Vision. These costs are a flat \$3.23 PMPM charge determined for those pediatric members with covered benefits. For rate development, the anticipated costs for this arrangement are spread across the book as a flat PMPM charge. As above, we are assuming that 19.2% of Small Group members will be between the ages of 0-18 in the rating period, as so the appropriate charge for the book is \$0.62 PMPM ($\$3.23 \times 19.2\%$). Since the Capitation trend is removed from the Table 3 Trend Identification (discussed in section 1.H above), the change in the cost for these benefits is included in the Change in Benefits adjustment.
- Pharmacy Rebates (-\$(5.76)) – The Company is expecting an increase in its Pharmacy rebates from the 2017 experience period to the 2019 rating period. This change in Pharmacy Rebates is due to new levels of negotiated rebates with our pharmaceutical vendor. For the Company, rebate savings are expected to increase from \$16.77 PMPM in the experience period to \$22.53 PMPM in the rating period. This increase in rebates reduces the 2019 projected costs by \$5.76 PMPM.

The development of the Projected Paid to Allowed Ratio shown in Table 5 is presented in the “2019 Supplemental Exhibits - HMK.xlsx” file in the “Table 5 Paid-to-Allowed” worksheet. As shown in this exhibit, the projected paid to allowed ratio from the membership projections by plan included in Worksheet 2 is consistent with the value shown in Worksheet 1, Section III.

Table 5 reflects that we are assuming a Projected Risk Adjustment receipt in the projection period of \$22.68 PMPM. This amount reflects an anticipated risk transfer receipt of \$22.09, along with a monthly charge of \$0.15 for the CMS stipulated Risk Adjustment User Fee in 2019 of \$1.80 for the year. This value of \$21.96 is trended by the average 2019 pricing trend to arrive at the value of \$22.68 reflected in Table 5.

To arrive at the anticipated risk transfer for 2019, we bring in the risk adjustment calculation components for the projected 2019 Company portfolio (as discussed above), and use our current knowledge of the Pennsylvania Small Group market profile to estimate the risk adjustment components for the entire state Market. This Market-wide profile is developed from available Market data, including the Interim Summary Report on Risk Adjustment for the 2017 Benefit Year published by CMS, the PA Insurance Department’s calculation of 2017 risk adjustment transfer amounts using the 5/1/2018 RATEE files, prior years’ risk adjustment transfer results, publicly available data (such as MLR reports and rate filings), and outside expertise from actuarial consultants.

In analyzing the risk transfer components from Highmark's corporate family of businesses, we have noticed a significant difference in results between the various regions (Western, Central, and Northeastern Pennsylvania). Thus when projecting the risk transfer components to 2019, we determine each region's risk transfer results separately to arrive at the estimated risk transfer results for each company, as appropriate for each company's region.

The Company considered the impact of the high-cost risk pooling payment for the Small Group market, first implemented in 2018, in its development of its anticipated risk transfer for 2019, and is assuming that the net cost (payments less recoveries) will be negligible for the 2019 projection period.

The Projected Paid Exchange User Fees are developed from the Exchange user fees to be charged by CMS in 2019, multiplied by the percentage of business we expect to purchase Market coverage through the Exchange for this Company. For this Company, all business will be offered Off Exchange in 2019, so there are no Exchange User Fees charged in the rate development.

For this Small Group Market filing, Table 5A has been completed, showing the number of member months renewing by quarter, and the quarterly Single Risk Pool Projected Allowed Claims. Note that the Annual Trend shown in cells J32:M32 reflect the quarterly impact of the Health Insurer Provider Fee. Please refer to Section 2.B Retention Items (Table 6) below for a discussion of the quarterly Health Insurance Provider Fee impact.

B. Retention Items (Table 6)

Table 6 has been completed with the requested retention elements for the proposed rates for the rating period. The amounts presented separately sum to the total administrative expenses and taxes and fees presented in the rate development in Table 10. Administrative costs reflect internal costs that the Company is projected to incur in the projected experience period, and are developed from standard expense allocation methods. Agent/broker fees and commissions reflect our anticipated costs for these items in the experience period.

The development of internal administrative costs utilizes an allocation of Company costs back to lines of business. The allocation method uses measureable stats such as claims worked, inquiries worked, contracts, and members to allocate the majority of expenses. When possible, expenses are direct charged if they can be identified by product instead of going through an allocation method. For corporate allocations, a TCI (total costs incurred) methodology is generally used to allocate by product.

The following Taxes and Fees were included in the rate development:

- \$1.92 per member per annum for the Patient Centered Outcomes Research Fee (0.03% of premium); and
- A prorated quarterly amount for the Health Insurer Provider Fee (discussed below, but reflected in Table 5A).

The Health Insurer Provider Fee is being applied quarterly, at a prorated level appropriate to the 2019 renewal quarter. Although the Health Insurance Provider Fee will not be collected in 2019, the fee will

be collected in 2020. As such, for any groups with renewal dates other than January 1, 2019, the group's renewal period will extend into 2020, where the premiums will need to include a charge for this fee. For the 2019 rate development, the quarterly rates have been adjusted so that the appropriate pro rata portion of this fee is collected based on a group's renewal quarter as follows:

| Renewal Quarter | Health Insurance Provider Fee |
|-----------------|-------------------------------|
| 1Q | 0.00% |
| 2Q | 0.75% |
| 3Q | 1.50% |
| 4Q | 2.25% |

As mentioned above, the impact of the Health Insurance Provider Fee is being reflected in the quarterly trend in Table 5A. The Annual Trend shown in Table 5A is determined so that the resulting rate calculation appropriately reflects the impact of the Health Insurance Provider Fee.

Note the following regarding plan level retention items:

- The rate development reflects a 0% risk/contribution to surplus margin for all products and plans.
- The administrative expenses do not vary by plan.
- Expenses for Quality Improvement Initiatives are estimated to be 7% of internal Company expenses, based upon historical analysis of these costs.

Please note that for the Small Group Market the Projected Required Revenue PMPM shown in Table 6 will not match the URRT Worksheet 1 Single Risk Pool Gross Premium Average Rate PMPM since the value in the URRT is based on a January 1 effective date without reflecting the impact of quarterly rates in the Small Group market.

C. Normalized Market-Adjusted Projected Allowed Total Claims (Table 7)

The normalization factors presented in Table 7 are each determined from the underlying membership demographics expected in the projected rating period. The 2018 values are pulled from the prior year's filing, while the 2019 values represent our projection for 2019 assumed in the 2019 rate development.

The Age Factor is the weighted average of the Average Age Factors for the Current ACA Book of Business as of the End of Year 2017 and for the Membership Moving to the ACA Book (from Transitional and New Business).

The Geographic Calibration Factor is the weighted average of the Area Factors by County. This average is weighted by membership.

The Tobacco Surcharge is not applicable since we do not use one.

D. Components of Rate Change (Tables 8 and 9)

Table 8 presents the components of change in the proposed 2019 Calibrated Plan Adjusted Index Rate (PMPM). The 2018 base period allowed claims as developed from the 2018 rate filing. Row H of Table 8 may differ from Row A due to the detailed breakdown of all the components of the increases in rows B through G not calculating exactly to the change in the calibrated plan adjusted index rate in Row A, which is the more accurate percentage change based on the rate development.

Table 9 presents the data elements supporting the calculations in Table 8. The amounts shown in the 2018 Column match those entered in the 2018 Column in the plan year 2018 rate filing.

3. Plan Rate Development (Table 10)

Table 10 showing the plan rate development has been completed following the instructions in the 2018 ACA-Compliant Health Insurance Rate Filing Guidance. This table shows the plans that the Company intends to offer in 2019, as well as plans discontinued from the 2018 portfolio for 2019. Since many Small Group market enrollees as of 2/1/18 are still in plan year 2017 plans, the enrollees in plan year 2017 plans were mapped to the plan year 2018 plan that the we anticipate they will renew into in 2018. The calibrated plan adjusted index rates for 2019 and 2018, and all of the supporting factors, are calculated according to the instructions.

Each plan takes the Market Adjusted Index Rate and multiplies by the Pricing AV, Benefit Richness Factor, Benefits in Addition to EHB Factor, Provider Network Factor, Catastrophic Eligibility Factor, and Non-Funding of CSR Adjustment Factor (not applicable to Small Group) in order to calculate the Pure Premium. The Pure Premium is then grossed up to account for expenses (Admin Costs, Taxes & Fees, and Profit or Contingency) in order to calculate the Calibrated Plan Adjusted Index Rate. Since each component of the Calibrated Plan Adjusted Index Rate is applied multiplicatively (including the Plan AV Pricing Value), plan premiums are in proportion to the Plan AV Pricing Values.

The rate change percentages calculated in Table 10 column AC by plan design will slightly differ between URRT Worksheet 2 row 27 since the PID spreadsheet maintains the 2018 quarterly distribution of enrollment as filed last year while the URRT calculation utilizes a consistent enrollment distribution by quarter for both years based on the anticipated distribution for 2019.

Note that the HHS Actuarial Value Calculator was able to accommodate all of the Company's benefit designs, and that no adjustments were needed from the values produced by the calculator.

The requested Induced Utilization Exhibit was completed and it presented within the "2019 Supplemental Exhibits - HMK.xlsx" file submitted with this filing (worksheet named "Induced Utilization"). Note that the calculated Induced Utilization factor in Column (8) is a component of the Actuarial Value Allowable Modifier. As such, it is adjusted by the Average Benefit Richness normalization factor of 1.0913. In multiplying the Induced Utilization column (8) result by the Average Benefit Richness normalization factor, the result is the Induced Utilization factor appropriate for the plan's metal level (before normalization), which are the CMS-prescribed assumptions used in the risk

adjustment transfer calculation. These factors have been unchanged since they were originally developed for the 2014 rating period.

The member-weighted average of the pure plan-level Induced Utilization factors in the last column of the induced utilization exhibit against the projected membership does match the 1.000 expectation of the Department. This calculation can be seen at the bottom of the Induced Utilization Exhibit, where the formulas used in the calculation have been retained.

The Child Capping Adjustment is applied to the Age Calibration Factor in Table 10 to reflect the limitation on the number of children allowed in rating. This factor is determined by estimating the amount of lost revenue due to this restriction, and applying the resulting factor to the normalized age factor in the base rate development. Support for the calibration factors is shown in the “2019 Supplemental Exhibits - HMK.xlsx” file on the worksheet named “Table 10 Calibration Factors”.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User (Table 11)

Table 11 presents the Company’s 21-year-old non-tobacco premium in the Market for each rating quarter in 2019 (see note below). As mentioned in Section 1.C above, the change in 21-year-old non-tobacco premium PMPM calculated in this table is a 20.3% increase, while the “percent rate change requested” from the SERFF Rate Review Detail Screen (and Table 10) is 19.89%. This difference in increases between the tables is due to the change in the annual trend assumption, which reduces the average quarterly increase later in the year, offset by the application of the prorated Health Insurance Providers Fee that was applied quarterly to the 2019 rates. This causes the rate increases reflected in Table 10 to decrease in subsequent quarters, and the average rate increase for the entire plan year to be lower than the first quarter only increase that is shown in Table 11.

5. Plan Factors

A. Age and Tobacco Factors (Table 12)

Please see Table 12 for the Company’s age and tobacco factors.

B. Geographic Factors (Table 13)

Please see Table 13 for the Company’s geographic factors. The Company’s factors for the rating period are unchanged from the currently approved factors.

As mentioned in the Cover Letter, the Company is not changing its product offerings by Rating Area.

C. Network Factors (Table 14)

Please see Table 14 for the Company’s network rating factors.

D. Service Area Composition

The Company follows the Rating Area designations created by the state. All counties within a Rating Area are serviced by the Company, according to the Rating Areas specified in Table 14. The Company has submitted its current 2018 service area and its proposed 2019 service area in the file "Pennsylvania Counties Map - 2019 Filings - Highmark.pdf" submitted with this filing. There are no proposed changes to the Company's service area from 2018 to 2019.

E. Composite Rating

The Company is currently not planning to use CMS's composite rating method for any of its off-SHOP plans offered during the rating period; however, the Company is interested in the state adopting a methodology for the PA Marketplace that is more consumer friendly than the CMS method by utilizing composite rating tiers similar to transitional small group policies currently in the market (i.e. rates by contract types of Individual, Parent/Child(ren), Two Person (Adults), and Family).

6. Actuarial Certifications

I am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of the Company to accompany its rate filing (for calendar year 2019) for the small group combined Market on and off the Pennsylvania Exchange.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102)
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The allowable modifiers used to generate plan-level rates were:

- The actuarial value and cost-sharing design of the plan.
- The plan's provider network, delivery system characteristics, and utilization management practices.
- The benefits provided under the plan that are in addition to the essential health benefits. These estimated benefits were pooled with similar benefits within the single risk pool and the claims experience from those benefits was utilized to determine rate variations.
- Administrative costs, excluding Exchange user fees.

I certify that all factor, benefit and other changes from the prior approved filing have been disclosed in the 2019 PA Actuarial Memorandum Rate Exhibits.

I certify that the percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

I certify that the benefits included in the Company's plans are substantially equivalent to the Essential Health Benefits (EHBs) in the State of Pennsylvania's benchmark plans. I certify that any benefit substitutions are:

- Actuarially equivalent to the benefits being replaced,
- Are made within only the same essential health benefit category,
- Are based on a standardized plan population,
- Are determined regardless of cost-sharing,
- Are not prescription drug benefits, and
- Are based on an analysis performed in accordance with generally accepted actuarial principles and methodologies.

I certify that new plans are not considered modifications of existing plans (per the uniform modification standards in 45 CFR 147.106).

I certify that the AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based entirely on the Federal AV Calculator.

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

The Part I Unified Rate Review Template does not demonstrate the process used by the Company to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I certify that the information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2018 Rate Filing Justification.

Part II of the Preliminary Justification

Highmark Inc. – Small Group Market

Scope and Range:

Highmark Inc. is requesting a weighted average rate increase of 20.27% weighted on the projected enrollment for renewing plans shown in the Unified Rate Review Template for its 2019 ACA qualifying small group products with effective dates from January 1, 2019 to December 31, 2019. This will impact 11,271 individuals.

Due to changes in benefits, metal levels and plan design pricing relativities, average increases at the plan level differ and range from 17.4% to 26.6% as shown in the Unified Rate Review Template.

The proposed increases are being driven by rising medical care costs, which are expected to continue through the remainder of 2018 and throughout 2019 as a result of both higher utilization and the increasing cost of healthcare services, and the underlying morbidity of the population within Highmark's ACA products.

Lower cost small groups are expected to remain outside the ACA single-risk pool for most of 2019 due to more favorable premium rates afforded to them in the pre ACA rating formula. The remaining population expected to enroll in the ACA qualifying products represents a small portion of the pool, and those groups generally have unfavorable demographics and higher than average claim costs.

Historical Financial Experience:

Highmark Inc.'s Small Group Market reported a financial loss in 2017.

Change in Medical Service Costs:

The projected average cost of medical care for the projected population is expected to increase. The increase will emerge in utilization and average cost per service, and is spread across all types of services.

Change in Benefits:

Some cost sharing parameters were changed in order to maintain compliance with Federal AV requirements. Additionally, some out of pocket maximum parameters were changed to keep up with the rising cost of health care. These out of pocket maximum changes also aided in mitigating the rate increase.

Administrative Costs, Anticipated Operating Results, and Medical Loss Ratio:

Relative to the 2018 rate filing, taxes and fees are lower since the Health Insurance Provider Fee was waived for 2019. The anticipated operating results are not excessive or unreasonable. In accordance with regulations, the projected medical loss ratio is over 80%.

Part III Actuarial Memorandum

I. General Information

Document Overview

This document contains the Part III Actuarial Memorandum for Highmark Inc.'s ("Highmark") Small Group block of business rate filing ("Filing"), for products with effective dates in calendar year 2019. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I Unified Rate Review Template, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the State of Pennsylvania Department of Insurance, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of Highmark's Filing. However, we recognize that this certification may become a public document. Highmark makes no representations or warranties regarding the contents of this letter to third parties. Likewise, third parties are instructed that they are to place no reliance upon this actuarial memorandum prepared by Highmark that would result in the creation of any duty or liability under any theory of law by Highmark or its employees to third parties.

The results are actuarial projections. Actual experience is likely to differ for a number of reasons, including population changes, claims experience, and random deviations from assumptions.

I.1 Company Identifying Information:

- Company Legal Name: Highmark Inc.
- State: The State of Pennsylvania has regulatory authority over these policies.
- HIOS Issuer ID: 33709
- Market: Small Group
- Effective Date: January 1, 2019

II. Proposed Rate Increase(s)

For all rate increases by plan please see the ‘Cum'tive Rate Change % (over 12 mos prior)’ found in Worksheet 2 Row 27 of the URRT. Rate changes vary by plan, as plan benefits need adjusted to help maintain compliance with metal level requirements. Other base rate components (pricing actuarial factor and network discount) are also re-evaluated each year. For 2019, the Company’s proposed rate revisions vary by plan, according to the detail presented in the URRT, Worksheet 2.

The primary drivers of the 19.89% rate increase (weighted on the projected enrollment for renewing plans in the URRT) are anticipated cost and utilization increases impacting claims (such as changes in provider reimbursement levels and the availability of new pharmaceutical treatments), and the underlying morbidity of the population within Highmark’s ACA products. As transitional coverage has been extended through the end of 2019, Highmark has attracted higher morbidity groups, while the more favorable groups continue to remain outside of the ACA market. We expect that Highmark will continue to attract higher morbidity groups in 2019 from groups moving from transitional coverage to ACA coverage.

These increases are being partially offset by a projected increase in receipts from the risk adjustment program, and an increase in claim savings due to negotiated terms with our pharmaceutical benefit manager.

III. Experience Period Premium and Claims

III.1 Paid through Date:

Experience period claims were based on incurred calendar year 2017, paid through February 2018. We only include the non-grandfathered, insured members in Highmark’s 2017 book-of-business.

III.2 Premiums (net of MLR Rebate) in Experience Period:

The premiums shown for the experience period were based on calendar year 2017 actual revenues, in accordance with the Unified Rate Review Instructions.

Based on preliminary information for calendar year 2017, no MLR rebates are anticipated to be refunded to enrollees. Therefore, we did not include an adjustment for MLR rebates in the 2017 premium amounts.

III.3 Allowed and Incurred Claims Incurred During the Experience Period:

- **Historical Experience:** To complete the URRT historical experience section we chose Highmark’s current experience for the small group block of business for the period January 1, 2017 through December 31, 2017, with claims paid through February, 2018.

- Claims Incurred During the 12-month experience period: Worksheet 1, Section I shows our best estimate of the amount of claims that were incurred during the 12-month experience period for Highmark’s book-of-business. This section includes:
 - The amount of claims which were processed through our claims system,
 - Claims processed outside of our claims system (Rx rebates, provider settlements, capitated benefits), and
 - Our best estimate of claims incurred but not paid as of the Paid through Date stated above.
- Method for Determining Allowed Claims: For non-capitated claims, the allowed charges are summarized from Highmark’s detailed claim-level historical data. We only include the non-grandfathered, insured members from Highmark’s 2017 book-of-business.
- Paid Claims: We also summarized the paid claims from detailed member records. The paid-to-allowed ratio for the experience period reflects the 2017 plan designs chosen by each member.
- Incurred but Not Paid (IBNR) Claims Estimate: Highmark’s estimate of the remaining incurred but not recorded (IBNR) claims reflects the anticipated IBNR as of the end of the paid claim run out period. The IBNR completion factor of 0.983 was developed for Highmark’s total small group business through analysis of historical claim completion factors. The completion factor was applied equally to both paid and allowed total claims (as a change in utilization) to complete the experience.

IV. Benefit Categories

Historical cost and utilization data were pulled from Highmark’s claims systems by the defined benefit categories included in Worksheet 1, Section II of the URRT. This data was used to allocate Highmark’s total claims into its components on the URRT.

The data provided in this section closely adheres to the preferred definitions of the Benefit Categories included in the URRT instructions, including the “Other Medical” category. The “Other Medical” category units reflect visits for PDN/home health, trips for ambulance and procedures for DME/prosthetics. The “Capitation” category represents the monthly charge paid to our Vision benefit provider for covering pediatric vision benefits. Prescription drug utilization is converted to a 30-day script count.

V. Projection Factors

V.1 Changes in the Morbidity of the Population Insured

The morbidity adjustment reflects the anticipated changes in the average morbidity of the covered population (beyond allowable rating factors) from the experience period to the rating period. As we have seen through 2017, many of the Small Group market customers have retained their pre-ACA coverage through the transitional coverage provisions, and have yet to join the ACA risk pool. With the transitional coverage provisions extension through the end of 2019 for groups that renew on or prior to October 1, 2019, we continue to believe that many groups, especially lower-risk groups, will continue to retain their current transitional coverage until required to transfer coverage. We are expecting that enrollment drops slightly and that we lose some of the better risk groups. Also, with the continued availability of transitional coverage, we expect any new groups moving into ACA products from transitional coverage will be of higher morbidity. Thus we expect our morbidity to worsen slightly from the experience period and reflect this with a Change in Morbidity adjustment of 3.2%.

V.2 Changes in Benefits

We made the following adjustments to reflect the expected differences in benefits between the experience period and projection period:

- We reflected the additional cost of the following benefits that must now be covered under the essential health benefit package for members moving into ACA compliant policies from the transitional pre-ACA policies which do not cover these benefits:
 - Pediatric dental benefits: +\$0.21
- We reflected the following newly mandated benefits required under state law, which are not reflected in the experience period claims: None.
- We reflected the following new benefits that are not part of the essential health benefit package or required under state law that did not exist in the experience period claims: None
- We made an adjustment to reflect the removal of benefits covered in the experience period claims that will not be covered in the projection period: None.

V.3 Changes in Demographics

We are projecting a slight decrease in the average age from the experience period to the projection period. There is no change assumed in the projected area factor.

V.4 Other Adjustments

We are expecting an increase in savings associated with prescription drug rebates from the experience period to the projection period of \$(5.76) PMPM. This increase in rebates is due to new levels of negotiated rebates with our pharmaceutical vendor.

V.5 Trend Factors (cost/utilization)

This development of the CY 2019 rates reflects an annual trend rate of 9.0% (5.1% cost, 3.7% utilization). These trends reflect Highmark's expectations regarding increases in in-network contractual reimbursement. The annual trend estimates include the impact of provider contracting and anticipated utilization changes to both projected in-network and out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The trend represents a blended average for all types of service and is applied to the aggregate experience for pricing. These trends represent assumed community-wide expectations. Claim variations due to the specific projected enrolled population in this single risk pool are reflected in the morbidity adjustment.

We reflected anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period: + 0.6%.

We reflected the additional capitation costs for the pediatric vision benefits: +\$0.00 (no change).

VI. Credibility Manual Rate Development

Highmark's small group experience is fully credible; no manual rate is developed or used in this projection.

VII. Credibility of Experience

The experience is for Highmark's non-grandfathered plans in 2017. It is large enough to be fully credible. Our results are based 100% on the experience rate, adjusted as described herein.

VIII. Paid to Allowed Ratio

For 2019, an average paid-to-allowed ratio of 83.2% is projected based on the 2019 product portfolio and the projected membership for each plan design.

IX. Risk Adjustment and Reinsurance

IX.1 Projected Risk Adjustments PMPM:

To determine our estimated risk transfer for 2019, we examined historical risk scores calculated from the factors in the HHS Notice of Benefit and Payment Parameters, and other risk adjustment transfer formula components, for those members anticipated to be covered by Highmark in 2019. We then estimate the statewide average risk scores and other transfer formula components by analyzing the available risk adjustment transfer component information: the Interim Summary Report on Risk Adjustment for the 2017 Benefit Year published by CMS, the PA Insurance Department's calculation of 2017 risk adjustment transfer amounts using the 5/1/2018 RATEE files, prior years' risk adjustment transfer results, publicly available data (such as MLR reports and rate filings), and outside expertise from actuarial consultants. We do not anticipate significant migration into the small group risk pool from external populations (such as the uninsured).

In analyzing the risk transfer components from Highmark's corporate family of businesses, we have noticed a significant difference in results between the various regions (Western, Central, and Northeastern Pennsylvania). Thus when projecting the risk transfer components to 2019, we determine the each region's risk transfer results separately to arrive at the estimated risk transfer results for each company, as appropriate for each company's covered region.

Highmark considered the impact of the high-cost risk pooling payment for the Small Group market, first implemented in 2018, in its development of its anticipated risk transfer for 2019, and is assuming that the net cost (payments less recoveries) will be negligible for the 2019 rating period.

Given the anticipated profile of the membership within Highmark in 2019, and the estimated market-wide profile, we are assuming that Highmark members will have a risk profile higher than the market-wide averages, and that Highmark will receive a contribution from the risk adjustment program in 2019, decreasing premiums in the rate development by \$22.09 PMPM.

IX.2 Projected ACA Reinsurance Recoveries Net of Reinsurance:

The Individual ACA Reinsurance program terminated at the end of 2016. For the 2019 rating period, there is no Reinsurance Premium amount to include in the rate development.

X. Non-Benefit Expenses and Profit & Risk

X.1 Administrative Expense Load:

The proposed rates reflect internal administrative costs, including commissions and quality improvement admin. This cost was developed based on its standard expense allocation methods.

X.2 Profit (or Contribution to Surplus) & Risk Margin:

The proposed rates reflect 0% of premium as a risk/contribution to surplus margin. This load was applied to all products and plans.

X.3 Taxes and Fees:

The Health Insurance Provider Fee was suspended for 2019, with the fee currently slated to be in effect in 2020. As such, for any groups with renewal dates other than January 1, 2019, the group's renewal period will extend into 2020, where the premiums need to include a charge for this fee. For the 2019 rate development, the quarterly rates have been adjusted so that the appropriate pro rata portion of this fee is collected based on a group's renewal quarter as follows:

| Renewal Quarter | Health Insurance Provider Fee |
|-----------------|-------------------------------|
| 1Q | 0.00% |
| 2Q | 0.75% |
| 3Q | 1.50% |
| 4Q | 2.25% |

The following taxes and fees were included in the 2019 rate development:

- \$1.92 Per Member Per Annum for the Patient Centered Outcomes Research Fee
- Percent indicated as above based on renewal quarter for the Health Insurance Provider Fee; the average of the above table is 1.1%, which is used in the URRT, Worksheet 2, in determining the projected period Plan Adjusted Index Rate

XI. Projected Loss Ratio

The anticipated medical loss ratio is about 89.1% relative to total premium less taxes and fees. This loss ratio is calculated consistent with the federally prescribed MLR methodology.

XII. Single Risk Pool

As described above the base experience used includes all of Highmark's small group non-grandfathered members in accordance with the Single Risk Pool regulations. The projected membership and their corresponding premiums and claims only include those members who will be enrolled in a fully ACA-compliant plan in 2019 under Highmark.

XIII. Index Rate

The index rates as shown on Worksheet 1 of the URRT are simply the average allowed claims for the Essential Health benefits for the experience and projected populations, respectively, for Highmark. It is not adjusted for the risk adjustment program or any other

fee. For the projection period, it is the member-weighted average of the quarterly rate indices (Jan 1, Apr 1, Jul 1, and Oct 1) based on the assumed membership distribution effective in each quarter, as shown in the table below.

| 2019 | % of Members | Projected Quarterly Index Rate PMPM |
|-------------|---------------------|--|
| 1Q | 34.8% | \$580.57 |
| 2Q | 13.3% | \$593.21 |
| 3Q | 17.7% | \$606.13 |
| 4Q | 34.2% | \$619.33 |
| Composite | 100.0% | \$600.03 |

See the sections below for a description of how the projected index rate is adjusted to arrive at each plan adjusted index rate.

XIV. Market Adjusted Index Rate

Please see Exhibit I for a numerical demonstration of the Market Adjusted Index Rate development. The Market Adjusted Index Rate is the Index Rate further adjusted for risk adjustment and the exchange fee (all grossed up from paid to imputed allowed values). The Risk Adjustment factor is developed by taking one minus the grossed up expected risk transfer (net of the fee) and dividing by the projected incurred claims before risk adjustment. The Exchange User Fee factor is developed by adding the expected average exchange fee PMPM to the projected incurred claims after risk adjustment, then dividing by the projected incurred claims after risk adjuster. These adjustments were developed as factors in accordance with the Part III instructions.

XV. Plan Adjusted Index Rates

Plan Adjusted Index Rates are developed by taking the Market Adjusted Index Rate and adjusting for each plan's actuarial value, relative benefit richness, relative network, and remaining administrative expenses (including profit and risk, and taxes and fees). Please see Exhibit II for the development of the Plan Adjusted Index Rate for each plan. The administrative expenses do not vary by plan.

XVI. Calibration

XVI.1 Age Curve Calibration (to age 46, non-smoker, area with 1.0 geographic factor, January 1 effective date):

The projected weighted average age factor is 1.530. Each Plan Adjusted Index Rate represents the rate for an average member (i.e., a member with an age factor is 1.530). Please note that no member will pay these rates because the age factor of 1.530 is not found on the HHS Age Curve. It only represents the average age factor of the projected population.

The closest age factor (1.500) is the factor for a person age 46. Please see Exhibit I for the development of the calibration factor.

XVI.2 Geographic Factor Calibration:

The projected weighted average geographic factor is 0.9703. Each Plan Adjusted Index Rate represents the rate for an average member with a geographic factor of 0.9703. Please note that no member will pay these rates because Highmark is not using a geographic factor of 0.9703 for any of the Pennsylvania rating areas. It only represents the average geographic factor of the projected population. Please see Exhibit I for the development of the calibration factor.

XVI.3 Quarterly Trend Factor Calibration:

The Plan Adjusted Index Rate represents the average rate renewing over the four quarters of 2019. Exhibit I also shows the factors to de-trend to calibrate to the rate for a 1/1/2019 renewal.

XVII. Consumer Adjusted Premium Rate Development

The Plan Adjusted Index Rate represents the rate for a non-smoker average age and average geographic member for an average quarterly renewal. Highmark is filing quarterly Index Rate trends of 2.18% per quarter. The Plan Adjusted Index Rates in Worksheet 2 Row 81 reflect an average combined trend of 4.7% for the four quarter renewal rating period.

The appropriate value to calibrate the Plan Adjusted Index Rate by is located at the bottom of Exhibit I. By applying the 'Combined Calibration Factor' found in Exhibit I to the plan adjusted index rates the resulting value will represent the plan premium for a 46 year old in a 1.0 area on 1/1/2019. The standard HHS Age Curve and area factors of 0.97 for regions 1, 2, 4, and 5; and 1.04 for region 6 can be used to calculate any rate found in the QHP rate template.

For quarterly rates beyond the first quarter, there is an additional quarterly trend adjustment related to the Health Insurer Provider Fee (discussed above in Section X.3) that would need to be applied to arrive at the appropriate quarterly plan premium.

XVIII. AV Metal Values

The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based entirely on the Federal AV Calculator. No adjustments were needed for any benefits from those values produced by the AV calculator.

XIX. AV Pricing Values

The "URRT AV Pricing Value" shows the adjustment from the Market Average Index Rate to the Plan Adjusted Index Rates on Exhibit II. Please see Exhibit II for the portion of each AV pricing value that is attributable to each of the allowable modifiers.

XX. Membership Projections

Since transitional policy relief was extended through 2019 for groups that renew on or prior to October 1, 2019, we project that the bulk of the members in the small group market will remain outside of the ACA-compliant products, and remain outside the ACA single-risk pool. Highmark is expecting a slight drop in enrollment from 2017 experience period levels, as we expect that most groups will remain in transitional policies. See row 48 of Worksheet 2 to the URRT to see projected membership by plan.

XXI. Terminated Plans and Products

Highmark is terminating 9 QHP plans that were active in the 2017 experience period. These plans are being terminated due to changes in the CMS Actuarial Value calculator, which would have valued these plans outside of the regulated metal level bands. These plans will be mapped to a corresponding QHP of similar metal level and plan design, and the experience period members and allowed charges will be moved to the mapped plans in the URRT.

Exhibit III lists all terminating plans, as well as plan mappings for the terminated QHP plans.

XXII. Plan Type

The Plan types listed in Worksheet 2, Section I of the Part I Unified Rate Review Template describe Highmark's plans adequately.

XXIII. Warning Alerts

There are no Warning Alerts generated by Worksheet 2. All results from plan level projections on Worksheet 2 are within tolerable bounds of the Worksheet 1 projected amounts.

XXIV. Actuarial Certification

I am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of Highmark to accompany its rate filing (for calendar year 2019) for the small group combined market on and off the Pennsylvania Exchange.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered

- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The allowable modifiers used to generate plan-level rates were:

- The actuarial value and cost-sharing design of the plan.
- The plan's provider network, delivery system characteristics, and utilization management practices.
- The benefits provided under the plan that are in addition to the essential health benefits. These estimated benefits were pooled with similar benefits within the single risk pool and the claims experience from those benefits was utilized to determine rate variations.
- Administrative costs, excluding Exchange user fees.

I certify that the percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

I certify that the benefits included in Highmark's plans are substantially equivalent to the Essential Health Benefits (EHBs) in the State of Pennsylvania's benchmark plans. I certify that any benefit substitutions are:

- Actuarially equivalent to the benefits being replaced,
- Are made within only the same essential health benefit category,
- Are based on a standardized plan population,
- Are determined regardless of cost-sharing,
- Are not prescription drug benefits, and
- Are based on an analysis performed in accordance with generally accepted actuarial principles and methodologies.

I certify that the AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based entirely on the Federal AV Calculator.

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

The Part I Unified Rate Review Template does not demonstrate the process used by Highmark to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

^[1] Permitted Plan-Level Adjustments to the Index Rate as prescribed in 45 CFR Part 156, §156.80(d)(2):

- (i) The actuarial value and cost-sharing design of the plan.
- (ii) The plan's provider network, delivery system characteristics, and utilization management practices.
- (iii) The benefits provided under the plan that are in addition to the essential health benefits.
- (iv) Administrative costs, excluding Exchange user fees.
- (v) With respect to catastrophic plans, the expected impact of the specific eligibility categories for those plans.

^[1] Permitted Plan-Level Adjustments to the Index Rate as prescribed in 45 CFR Part 156, §156.80(d)(2):

- (i) The actuarial value and cost-sharing design of the plan.
- (ii) The plan's provider network, delivery system characteristics, and utilization management practices.
- (iii) The benefits provided under the plan that are in addition to the essential health benefits.
- (iv) Administrative costs, excluding Exchange user fees.
- (v) With respect to catastrophic plans, the expected impact of the specific eligibility categories for those plans.

| 2019 Rates Table Template v8.1 | All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F. | | | |
| | If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns. | | | |
| | If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band. | | | |
| | If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use. | | | |
| | To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet. | | | |

| 2019 Rates Table Template v8.1 | All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F. | | | |
| | If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns. | | | |
| | If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band. | | | |
| | If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use. | | | |
| | To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet. | | | |
| HIOS Issuer ID* | 33709 | | | |
| Federal TIN* | 23-1294723 | | | |
| Rate Effective Date* | 7/1/2019 | | | |

| 2019 Rates Table Template v8.1 | All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F. | | | |
| | If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns. | | | |
| | If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band. | | | |
| | If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use. | | | |
| | To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet. | | | |
| HIOS Issuer ID* | 33709 | | | |

Highmark's Response to Objection Letter Dated 06/15/2018

Product Name: HIGHMARK Small Group 2019 ACA Rate Filing

RE: Highmark – 2019 Small Group ACA Compliant Plans (1A-SG- HIGHMARK -2018);
Pennsylvania Insurance Department ID #: HGHM-131496088

Objection Letter Status: Additional Information Required

Objection Letter Date: 06/15/2018

Respond By Date: 06/22/2018

Response Date: 06/22/2018

Below please find our responses to the Highmark ("Company") Small Group 2019 ACA Rate Filing Objection Letter dated 06/15/2018. For convenience, the questions have been reproduced below, with our responses immediately following each question.

A supplemental exhibits file has been submitted along with this response. Please see the file named "PID Response HMK 2018-06-22.xlsx," which contains additional exhibits and supplemental detail, as referenced in the below responses.

In response to the questions posed in this Objection Letter, the following changes have been made to the PA Actuarial Memorandum Exhibits:

- Tables 3b and 4b have been removed in response to Question 3.
- Table 6 now includes formulas for *General & Claims Expense* and *Quality Improvement Expense*.
- The average HIT fee was removed from Table 6 and Table 10 and the impact of the insurer fee on quarterly trend is now reflected in Table 5A. These changes impacted Table 11 such that the rates produced now match the Federal Rates Template. This was done in response to Question 13.

1. The Part III AM indicates that base rate components (pricing actuarial factor and network discounts) are reevaluated each year. Please list the plans where the rate components have changed from last year and the reasons for the changes. Quantitative developments of the changes must be provided.

Response:

Please refer to the “Question #1 - Changes” tab of the submitted response file “PID Response HMK 2018-06-22.xlsx” for a quantification of the changes in pricing factors. The change in pricing AV is discussed further in the response to Question #12.

2. Starting from the un-normalized data in Table 4, quantitatively show the development of the normalized allowed pmpms in the supporting trend exhibit. Show all normalization factors and their development.

Response:

Please see the exhibit tabs named “Question #2 – Medical” and “Question #2 – Drug” in the submitted response file “PID Response HMK 2018-06-22.xlsx.” These exhibits demonstrate the development of the average medical and drug adjustment factors for 2019. Adjustment factors are used in the development of trend assumptions to adjust the projection of trend to a pricing trend basis, removing or adding some of the components of trend as appropriate. Since the development of trend involves the build-up of claim assumptions over time, the adjustment factors are similarly built up over time to adjust the trend, and the change in the adjustment factor over a given period becomes the necessary change in the trend to a pricing basis. Thus, any individual adjustment factor is determined from the prior month’s adjustment factor, multiplied by a factor to change the trend to the appropriate level for rate development.

As an example of the adjustment factor development, please refer to “Question #2 – Medical” exhibit. As shown in the exhibit, our estimate of medical trend for 2019 is 8.0%. However, some of the factors impacting trend do not have an impact on the rate development. So it is necessary to adjust this trend to something more appropriate for rate development. Thus we remove the following items impacting our trend during 2019 to get to our pricing trend:

- Demographic changes – utilization (1.002)
- Demographic changes – unit costs (1.002)

- Step changes (0.984)
- Other adjustments (0.996)

In addition to these factors, we need to account for the aging of the population in the underlying experience period, and apply a factor of 1.010 to the adjustment factor in the pricing trend development.

By making these adjustments to the claims trend projection, we get a trend more appropriate for pricing (8.0% average trend for 2019, as shown in the exhibit). (Note that the pricing trend used in the filing represents an average trend from the 2017 experience period to the 2019 rate projection period. We are using an average rate trend of 9.0%, representing the two year average trend for Medical and Rx combined.) The “Question #2 – Medical” exhibit demonstrates this determination for the average medical adjustment factor for 2019, using the 2018 average adjustment factor as the starting point.

Note that although this demonstration is shown on an annual basis, in practice the adjustment factors are developed monthly, with each successive adjustment factor determined from the prior one. In this way, any significant item that impacts the trend at a specific point in time can be accounted for appropriately in the trend development, and may spread its impact across successive experience or projection periods.

3. Table 4b is populated but is not used in developing the projected index rate. Why is this table populated?

Response:

Table 4b has been removed because Highmark does not use the manual rate in the rate development.

4. What is the basis for the projected member distribution used in developing the Paid to Allowed factor of .832 in the Table 5 supporting exhibit? Please provide the current member distribution.

Response:

The Paid to Allowed factor of 0.832 uses 2019 projected membership in its calculation. This 2019 projected membership is sourced from our current membership on a plan level basis. It is projected by assuming membership in plans that have zero membership

currently. Please see the exhibit tab named “Question #4” in the submitted response file “PID Response HMK 2018-06-22.xlsx.”

5. Quantitatively support the 1.019 change in network factor in Table 5.

Response:

The change in network factor references the change between the 2017 network factor and the assumed (or average) 2019 network factor. The 2017 network factor can be seen in Table 5 and is calculated based on the data available for that calendar year. The assumed 2019 network factor is calculated by weighting the network factors, benefit richness factors, and projected enrollment percentages on a plan level basis. Since the 2017 network factor is 0.9321 and the assumed 2019 network factor is 0.9501, the change in network factor is $0.9501/0.9321 = 1.019$.

6. Quantitatively support the .992 change in benefit factor in Table 5.

a. Quantitatively show the development of the projected pharmacy rebates used in developing the change in benefits factor.

Response:

The change in benefit factor referred to in Table 5 is calculated by removing 2019 projected allowed per member per month (PMPM) capitations excluded, morbidity factor, pricing factor change, change in benefit richness, and change in network from the 2019 projected allowed PMPM. The projected pharmacy rebates uses current membership broken down into ACA and Non-ACA segments and the corresponding pharmacy rebates PMPM. The total 2017 pharmacy rebate is \$16.77 PMPM and the 2019 project pharmacy rebate is \$22.53 PMPM. The change in pharmacy rebates is therefore $\$16.77 \text{ PMPM} - \$22.53 \text{ PMPM} = (\$5.76) \text{ PMPM}$, which is used in developing the change in benefits factor.

7. The underlying annual trend supporting the filing is 9.0%, which is further adjusted by an induced utilization adjustment of 0.32% per year, to develop the overall trend assumption of 9.35% per year.

a. Please provide quantitative support for the “Normalized Allowed PMPM” values provided in the supplemental file “2019 Supplemental Exhibits - HMK.xlsx” “Trend Support” tab which are driving the 9.0% trend assumption (e.g. show the initial monthly allowed PMPM values, the

normalization adjustments, and the calculations driving the monthly PMPMs after the experience period).

Response:

Please see the "Question #7a" tab in the included supplemental exhibits file, "PID Response HMK 2018-06-22.xlsx" which shows the development of the normalized and adjusted allowed claims for the prior three experience years, and projected out through 2019. As discussed in the Actuarial Memorandum, to get to the adjusted allowed claims used for the development of the trend, the experience allowed claims for all Small Group business within Highmark's corporate family are aggregated by Pennsylvania region (Western, Central, and Northeastern), and adjusted for changes in in-network provider contracting levels, changes in out-of-network costs, changes in utilization from medical management programs, and changes in drug costs from impacts such as generic drug development and new drug treatments. In addition, the trend estimates normalize for benefit leveraging, population aging, changes in fee schedules, and external trend drivers. The projection of claim costs into the rating period utilizes the same categories of adjustment factors, adjusts for seasonality, and uses a statistical regression of historical trend levels to project monthly claim levels. This normalized and adjusted claim progression, as appropriate for the Company's service area, is then used to provide the basis from which to base the Company's rating trend upon.

b. Please provide quantitative support for the annual induced utilization adjustment of 0.32%.

Response:

Please see the "Question #7b Summary" tab in the included supplemental exhibits file, "PID Response HMK 2018-06-22.xlsx" which shows the quantitative support for the annual induced utilization adjustment. The induced utilization adjustment is determined from the plan level utilization factors using the actual membership distribution by plan from 2017 and projected membership by plan in 2019. These utilization factors are presented in the "Question 7b 2017 Induced Demand" and "Question 7b 2019 Induced Demand" tabs of the supplemental exhibits file. As mentioned in the Actuarial Memorandum, the plan level utilization factors are the CMS-prescribed Induced Utilization factors used in the risk adjustment transfer calculation, and have been unchanged since they were originally developed for the 2014 rating period.

8. The actuarial memorandum states that the \$22.68 PMPM projected risk adjustment assumption is comprised of an expected risk transfer receivable of \$22.09 PMPM, less the \$0.15 PMPM risk adjustment user fee, trended by the average 2019 pricing trend.

a. Please demonstrate how the proposed demographic and morbidity adjustments (i.e., 0.9926 and 1.032, respectively) were taken into account in calculating the projected 2019 risk adjustment receipt based on the 2017 results.

Response:

The demographic and morbidity adjustments in the development of the Highmark rates reflect the adjustments from the single risk pool to the projected experience for the rating period. As the Highmark experience consists entirely of ACA membership (no transitional policies), the demographic and morbidity profile of the ACA membership is not projected to change significantly from the experience period to the rating period, resulting in relatively small demographic and mortality adjustments. These adjustments would have an immaterial effect on the risk adjustment transfer results, and so the risk adjustment transfer was not adjusted for the projected changes in demographics and morbidity.

9. With respect to the demographic adjustment equal to 0.993, please provide the distribution of membership by age and gender for the following:

- i. Projected for 2019
- ii. Currently inforce in 2018
- iii. Underlying the 2017 base experience.

Response:

Please see the "Question #9" tab in the supplemental exhibits file, "PID Response HMK 2018-06-22.xlsx" which shows the calculation of the demographic adjustment factor. The "Calendar Year 2017 Factors" section provides a distribution by age of our underlying 2017 experience, which is used to calculate the average age factor for the experience period. The "2019 Factors for ACA Members Expected to be Effective in 2019" section provides a distribution by age of the population that is expected to be active in 2019, which was used to calculate the age factor in this section. This 2019 age factor is then weighted with age factors for the projected "Non-ACA in 2017 to ACA in 2019" and the "New ACA Business in 2018 & 2019" business cohorts. These groupings weighted by their expected 2019 member months calculate the total 2019 age factor for

the region. The area factors are provided in each section, and the overall demographic adjustment factor calculation is then shown on the bottom of the exhibit.

10. In developing the morbidity adjustment equal to 1.032, please provide the quantitative development of, and justification for, the \$509.12 value for “2017 Allowed Claims for those Members Expected to be Effective in 2019 [(Western region)]” which was used to calculate the change in morbidity adjustment from the file “2019 Supplemental Exhibits - HMK.xlsx,” “Table 5 Support” tab.

Response:

Please see the exhibit tab named “Question #10” in the submitted response file “PID Response HMK 2018-06-22.xlsx” showing the quantitative development of the \$509.12 value for “2017 Allowed Claims for those Members Expected to be Effective in 2019 [(Western region)]”. As shown in the exhibit, the development of the 2017 allowed claims assumption comes from a blend of 2017 allowed claims for current Company membership, along with the allowed claims level for assumed new business.

11. Please describe and demonstrate quantitatively how the factors in Column 5 “Network Factor” used to calculate the 2019 network adjustment in the file “2019 Supplemental Exhibits - HMK.xlsx,” “Table 5 Support” tab were developed.

Response:

The network discount factors shown in Column 5 of the Supplemental Exhibits included in the initial submission of this filing apply to specific plan designs offered in the various service zones, which are also listed in Table 14 of the PID Actuarial Memorandum next to the current factors. These factors are evaluated each year to reflect the impact of anticipated network cost and utilization changes between the experience period and the projection period. The proposed factors will better align premium with the expected costs in the projection period. Note the network discount factors shown in Column 5 of the Supplemental Exhibits included in the initial submission of this filing are before normalization is applied. The network discount factors shown in Column 6 of the Supplemental Exhibits included in the initial submission of this filing are normalized to account for the average network discount factor.

12. It appears that the Pricing AVs for a number of plans increased relative to last year. For example, for plan 33709PA0560007, the Pricing AV increased from 0.909 in the 2018 rate development to 0.923 in the 2019 rate development. Similarly, for plan 33709PA0630007, the Pricing AV increased from 0.715 in the 2018 rate development to 0.779 in the 2019 rate development. Please describe how the revised Pricing AVs for 2019 were developed, specifically addressing and providing justification for the changes to the Pricing AVs for the two plans referenced above.

Response:

For filing year 2019, pricing AV development methodology was changed from using all small group experience to ACA only experience. Since ACA members utilize at a higher rate, the pricing AVs increased relative to prior years.

13. The following questions are related to the Health Insurer Provider Fee:

a. In the development of quarterly index rates in Table 5A, the company is not reflecting the cost of the Health Insurer Provider Fee. Your Pennsylvania actuarial memorandum appropriately points out that the method used in this proposed filing does not generate rates in, Table 11, that are consistent with the Federal Rates Template. Given this, please revise the filing to remove the average HIT from Table 6 and incorporate the HIT in Table 5A. Please ensure that the actuarial memorandum is also modified to discuss the development of the revised trend in this Table.

Response:

The Pennsylvania actuarial memorandum and the Excel workbook “2019_SmGrp_HMK_PAAMExhibits” have been updated to reflect revised trend which incorporates the HIT. Within the Excel workbook, several adjustments needed to be made to facilitate this change. Although it does not affect the rates, the average HIT was removed from Table 6. To ensure that the rates produced in Table 11 are consistent with those supplied in the Federal Rates Template, the HIT was also removed from Table 10’s Taxes & Fees and instead added to the trend impact in Table 5a. By making these changes, the rates for a 21 year old member are consistent between the Federal Rates Template and Table 11.

14. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

Response:

In order to demonstrate that the copay is less than or equal to 50% coinsurance for the impacted category, we ran the expanded Bronze plans that had a copay cost sharing element through the AV Calculator under both scenarios. Namely, we ran the following plans through the AV Calculator using the proposed copay (as filed) for the PCP benefit category, as well as 50% coinsurance for the PCP benefit category:

- Conemaugh Region Connect Blue EPO Embedded \$5000

The AV Calculator results of these scenarios are summarized below. Please see the attached exhibit, Question Response - HMK.xlsx, which includes screenshots from the AV Calculator.

| Plan Name | HIOS | Government AV (Filed Copay) | Member AV (Filed Copay) | Government AV (50% Coinsurance) | Member AV (50% Coinsurance) |
|--|----------------|--------------------------------|----------------------------|------------------------------------|--------------------------------|
| Conemaugh Region Connect Blue EPO Embedded \$5000 | 33709PA0900001 | 63.15% | 36.85% | 62.19% | 37.81% |

As can be seen in the table, the Member AV, which is the complement of the Government AV, is less for the scenario with the filed copay as compared to the scenario with 50% coinsurance. This result demonstrates that the copay is less than or equal to 50% coinsurance for the impacted category.

15. Please show the development of the average commission as shown in Table 6. Additionally, the current and 2019 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.

Response:

Response redacted.

16. Please note that carriers should not be pricing for the PCORI fee in the 2019 calendar year rate development as the fee ends for plan years ending September 30, 2019 (i.e., policies issued before October 1, 2018). Please remove this non-benefit expense assumption, reprice, and resubmit revised filing materials.

Response:

Based on Highmark's current method of calculating the PCORI fee (Member Months method), we would have to pay about three fourths of the estimated \$2.52 per member per year fee for calendar year 2019 on Fully Insured business. Therefore, Highmark built into the rates the expected amount of our PCORI liability assuming the Member Months counting method.

CONFIDENTIAL

Highmark's Response to Objection Letter Dated 07/06/2018

Product Name: HIGHMARK Small Group 2019 ACA Rate Filing

RE: Highmark – 2019 Small Group ACA Compliant Plans (1A-SG- HIGHMARK -2018);

Pennsylvania Insurance Department ID #: HGHM-131496088

Objection Letter Status: Additional Information Required

Objection Letter Date: 07/06/2018

Respond By Date: 07/13/2018

Response Date: 07/13/2018

Below please find our responses to the Highmark ("Company") Small Group 2019 ACA Rate Filing Objection Letter dated 07/06/2018. For convenience, the questions have been reproduced below, with our responses immediately following each question.

A supplemental exhibits file has been submitted along with this response. Please see the file named "PID Response HMK 2018-07-13.xlsx," which contains additional exhibits and supplemental detail, as referenced in the below responses.

No changes to the PA Actuarial Memorandum Exhibits or the URRT were necessary in response to the questions posed in this Objection Letter.

In accordance with the filing instructions specified by the Pennsylvania Insurance Department, the rate development in this filing is based on certain assumptions we have had to make at this point in time. We have assumed that risk adjustment payments will take place for 2019. Additional assumptions include that there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and all Pennsylvania QHP issuers currently participating on the Marketplace will continue to do so throughout 2019. In addition, there are other uncertainties that may directly or indirectly affect an already unstable insurance market and ultimately, rates. If any of these assumptions are ultimately incorrect or additional developments occur that similarly have a detrimental impact to the market, modifications to the rate development may be necessary. As a result, Highmark reserves the right to submit a revised filing.

1. Regarding the response to question 2:

a) Please clarify what specifically is reflected by the “Step Changes” and “Other Adjustments” factors, and provide the quantitative development of the factors shown in the “Question #2 – Medical” tab of the response (i.e., 0.984 and 0.996, respectively).

Response:

Please see the worksheet labeled “Question #1a” in the included supplemental exhibits file, “PID Response HMK 2018-07-13.xlsx”, which shows the component breakdown of the “Step Changes” and “Other Adjustments” factors.

For “Step Changes”, the following impacts are separately identified:

Utilization Management: removes the effect of the impact to claims from utilization management initiatives intended to mitigate overutilization and medically unnecessary procedures

Cancelled Clients: removes the historical impact of changes in the covered client mix due to reasons beyond demographic changes

For “Other Adjustment”, the following impacts are separately identified:

Seasonality: adjustment related to observed variances due to seasonal timing or to the availability of services (such as work days in a given period)

Covariance/Other: adjustments to account for compounding effects of certain conditions, and other appropriate actuarial adjustments to experience claims

b) Please provide additional qualitative and quantitative justification for the application of an Aging factor equal to 1.01 in the development of the trend rate. It is not clear why it is appropriate to assume that the underlying ACA population will increase in age, on average, every year. Instead, please clarify why it is not more appropriate to assume that any aging which occurs to the experience period membership will be offset by newly born individuals who enter the ACA as well as older individuals (who had coverage during the experience period) moving into Medicare such that, overall, the age distribution of individuals enrolled in the ACA remains similar year over year.

Response:

Since age is removed from the normalized trend levels, a component for the impact of claim levels to increase by age over time (above the allowable rating factors) needs to be included in anticipated claim levels. This does not represent changes to the average age of the population, as that would be accounted for in the rating factors.

c) Please demonstrate quantitatively how the 9.0% combined trend was developed from the calculated Medical trend rate equal to 8.0% and Drug trend rate equal to 9.6%.

Response:

As mentioned in the response to Question 1 submitted on 6/22/2018, the trend used in the rate filing is developed from the annualized trend from the experience period (2017) to the rating period (2019). The Medical trend rate of 8.0% and Drug trend rate of 9.6% referred to in the question were the 2018 trend rates only and were presented in the prior response to address the question related to normalization factors. These trend rates would be a component of the combined 2017 to 2019 trend.

As shown in worksheet "Question #1c", which uses the prior response data shown in the "Question #1 (Data)" worksheet, our 2-year average projection of trend from 2017 to 2019 is 8.3%. However, this is a point estimate around a range of possible trend estimates, and will vary with actual experience. An adjustment of 0.7% is applied to the initial point estimate to produce a final estimate of trend of 9.0%, which would be within the reasonable range of anticipated trend levels.

2. It is stated in the response to question 8 that the morbidity and demographic adjustments "would have an immaterial effect on the risk adjustment transfer results, and so the risk adjustment transfer was not adjusted for the projected changes in demographics and morbidity."

a) Per the 'Table 5 Risk Adjustment' tab of the Supplemental Exhibits file, it is shown that the projected relative risk of Highmark in 2019 is expected to be equal to the relative risk of Highmark in 2017 (i.e. 1.0453). Given that the morbidity level of the Highmark 2017 single risk pool is being projected to increase by approximately 3.2% (i.e., the morbidity adjustment factor being applied is equal to 1.032), please explain why it is not more appropriate to assume that Highmark's relative risk in 2019 will be 1.0787 (1.0453×1.032).

Response:

There are several known shortcomings in the CMS risk adjustment transfer formula that would make it inappropriate to assume that population morbidity and relative risk should be adjusted by the same magnitude. These shortcomings include:

- The CMS risk adjustment methodology scores only a subset of identifiable conditions that can lead to increased morbidity. Only about 22% of adults trigger conditions that will impact the risk adjustment transfer (source: propriety analysis provided by an actuarial consultant), while the CDC estimates that 50% of adults have one or more chronic health conditions that are a large majority of the health care spend in the US (source: <https://www.cdc.gov/chronicdisease/overview/index.htm>).
- The risk adjustment transfer formula does not consider morbidity factors such as smoking, wellness programs, health savings accounts, injury-related claims or disease management programs (source: <https://www.gpo.gov/fdsys/pkg/FR-2012-12-07/pdf/2012-29184.pdf>).
- The base age gender risk score factors utilize five-year age bands, while the rating factors utilize single year age bands, causing morbidity fluctuations within the age bands.
- After the initial two years of the program, there have been annual changes to the risk scoring algorithm that have made the company and statewide market parameters difficult to predict. These changes have included the following:
 - Implementation of partial year enrollment factors
 - Usage of prescription drug data for determining severity for a limited number of conditions
 - Adjustments to the relative risk scalar for administrative costs
 - A change in data sources for risk score factors (proposed for 2019)
 - Adjustments for high dollar claimants

Such modifications and refinements are expected to continue into the 2019 risk adjustment transfer calculations, with the ultimate impact yet to be assessed (sources: <https://www.cms.gov/CCIIO/Resources/Fact-Sheets-and-FAQs/Downloads/CMS-9934-F-Fact-Sheet-12-16-16.pdf> and

<https://www.cms.gov/CCIIO/Resources/Forms-Reports-and-Other-Resources/Downloads/RA-March-31-White-Paper-032416.pdf>).

- Drug data has yet to be fully implemented in the risk adjustment transfer calculation, with 2018 being the initial year that will utilize drug data, and only for severity indicators. With drug trends being a significant contributor to overall medical trend (source: <http://www.actuary.org/files/publications/PrescriptionDrugs.030718.pdf>), the lack of drug condition scoring in the CMS algorithm is another shortfall of the program in relating morbidity levels to relative risk.
- There continue to be disruptions in the underlying population that continue to make the program components difficult to project. These disruptions include:
 - Changes to the insured population, which will impact both marketwide factors and the underlying experience that will be used to generate risk score factors
 - Movement into the ACA risk pool from grandmothers business
 - Likely movement out of the ACA risk pool from such programs as association health plans and short term limited duration coverage

Given these known shortcomings and ongoing modifications to the CMS risk adjustment methodology, it would be an oversimplification and inappropriate use of actuarial judgment to assume a direct relationship between the relative risk in the risk adjustment transfer formula and the covered population morbidity. At best the change in morbidity may justify a directional change in the relative risk, but that change would likely be a fraction of the total assumed morbidity change. Absent any analysis that would quantify the relationship between morbidity and relative risk, and given the relatively moderate change in morbidity assumed in the rate filing, we believe that the more appropriate assumption is to use the unadjusted relative risk from the 2017 risk adjustment transfer results as the basis for the risk adjustment transfer expected in 2019.

b) If the relative risk of Highmark were assumed to be 1.0787 in 2019 rather than 1.0453, please provide what the projected risk adjustment transfer amount would be.

Response:

Although the response to question #2a above should establish that it would be inappropriate to adjust the relative risk by that magnitude, performing the requested calculation would result in a risk adjustment transfer receivable of \$38.40 PMPM.

c) If the response to (a) above is that the morbidity of the overall small group market is expected to increase by approximately 3.2%, please provide quantitative justification for that assumption.

Response:

Does not apply.

3. Regarding the response to question 10:

a) Please describe and demonstrate quantitatively how the allowed charge PMPM for the “Groups entering the Highmark ACA risk pool after 2017” was developed. For example, what is the source data for the projected experience for these groups and what specific quantitative adjustments were applied to the source data to develop the result provided in the response?

Response:

Please see the derivation of the “Groups entering the Highmark ACA risk pool after 2017” claim PMPM in the “Question #3” tab of the “PID Response HMK 2018-07-13.xlsx” file.
