

## Pennsylvania's 1332 Waiver Extension Application

December 30, 2024

Pennsylvania Insurance Department Michael Humphreys, Insurance Commissioner

### **Extension Request**

The Commonwealth of Pennsylvania, through its Insurance Department (Department), submits this 1332 State Innovation Waiver Extension request to the Center for Medicare and Medicaid Services (CMS), a division of the United States Department of Health and Human Services (HHS), and the Department of the Treasury. In October 2023, the Department sent a letter of intent indicating the Department's intent to file an application to extend the reinsurance program. This request is our application seeking to continue the state reinsurance program and requests an extension of the waiver granted under Section 1332 of the Affordable Care Act (ACA) for a period of up to five years beginning in the 2026 plan year; the waiver waives the single risk pool requirement in the individual market under Section 1312(c)(1) of the ACA. This extension does not impact any other provision of the ACA but will result in a lower market-wide index rate, thereby lowering gross premiums (i.e., prior to the application of federal premium tax credits) from what they would have been without the program and reducing the premium tax credits (PTCs) to which Pennsylvania residents would have been entitled absent the waiver.

### **Evidence of Authority**

Act 42 of 2019, signed into law on July 2, 2019, established a reinsurance program administered by the Pennsylvania Insurance Department. The program is funded through user fees from the Pennsylvania Health Insurance Exchange, Federal funding, and other available sources. 40 Pa. C.S. §9503(b)(2); see also 40 Pa. C.S. §9305(b)(4), (5). 40 Pa. C.S. §9502 makes the continued operation of the reinsurance program contingent on this waiver extension request. Through this waiver extension request, Pennsylvania seeks federal pass-through funds to partially offset state expenditures. The state reinsurance program through the 1332 waiver has strengthened Pennsylvania's individual health insurance market through state-based innovation. By reimbursing insurers for high-cost claims, the reinsurance program has spread risk across the broader Pennsylvania health insurance market, thereby lowering gross premiums and increasing access to affordable private coverage. The program also has encouraged insurers to maintain and expand geographic coverage areas.

### **Waiver Implementation Timeline**

There is no change to the implementation plan provided in the initial waiver application. The Pennsylvania Insurance Department is responsible for implementing and monitoring the reinsurance Program, 40 Pa. C.S. §9503(b). The Pennsylvania Insurance Department determines and adopts the reinsurance terms, establishes requirements for submission of claims, and will promulgate regulations if needed and appropriate to operate the program. The Pennsylvania Insurance Department collects data submissions and reinsurance payment requests, and distributes reinsurance payments to eligible insurers. The Pennsylvania Insurance Department coordinates with the Pennsylvania Health Insurance Exchange Authority, Pennie® (which assesses and collects Exchange user fees) to fund the reinsurance program, 40 Pa. C.S. §9503(d).

### **Compliance with 1332 Guardrails**

• Comprehensiveness of coverage: Pennsylvania's 1332 waiver does not adjust benefits or coverage amounts for Pennsylvania policyholders, rather, it provides qualified insurance carriers reinsurance for high-cost claims. Coverage remains comprehensive for Pennsylvania policyholders as it continues to cover federally required essential health benefits.

- Affordability: Consumers in Pennsylvania, on average, saved between 4%-6% in premiums from 2021-2025, as shown in Table 1, Avg Premium Savings. Throughout the five-year reinsurance program, which ends Dec. 31, 2025, the program will have saved Pennsylvania consumers approximately \$817 million dollars in aggregate premiums. The waiver does not affect required federal caps on cost sharing, so policyholders were unaffected by total out-of-pocket costs.
- Scope of Coverage: Pennsylvania did see an increase in enrollment from 2020-2025, which means more consumers benefited from the reduction in premiums due to the 1332 waiver program. Enrollment is comparable, with or without the waiver. The increase in enrollment is also attributed to enhanced subsidies, both before and after Medicaid redeterminations, where many plans could be obtained for as little as \$10 a month for Pennie® enrollees who received premium tax credits.
- Deficit Neutrality: Pass through funding dollars determined via APTC reduction. CMS directly calculates this cost savings each year along with any offsets they deem necessary. The remaining costs were funded via exchange user fees assessments. The program was deficit-neutral, see Table 1 Actual Federal Savings/Pass-through.

### Analysis of the Pennsylvania Reinsurance Program

The Department's State Relief and Empowerment Waiver ("Waiver") application under Section 1332 of the Patient Protection and Affordable Care Act ("PPACA") was approved as of August 4, 2020. Pennsylvania has a waiver of the PPACA requirement for a single risk pool, under which it implemented a reinsurance program for five years beginning with plan year 2021 and ending December 31, 2025. Implementation of this reinsurance program has moderately lowered individual market premiums in the state and the Premium Tax Credits (PTC) to which Pennsylvania residents would have been entitled absent the waiver. These PTC savings has been passed through to the state for implementation of the waiver plan. (See Table 1 below.)

Each year the reinsurance program is assessed for impact from federal or state legislation that relates to the PPACA, especially changes that could influence premium, enrollment, or subsidies. Notably, the Department has observed the beneficial impact on enrollment and out of pocket premium following the passage of the American Rescue Plan Act and the Inflation Reduction Act. As displayed in Table 1, over the past five years, the reinsurance program held the attachment point at \$60,000 and the reinsurance cap at \$100,000, while adjusting the coinsurance percent based on anticipated rate filings and enrollment. On average, premiums were reduced between 4% to 6% each year, which resulted in annual direct written premium savings between \$150 million to \$180 million in the individual market. Pennsylvania insurers participating in the individual market with qualifying claims have had reinsurance reimbursements in aggregate of \$138 million to \$155 million for plan years 2021-2023. Plan year 2024 and 2025 reimbursements will be processed in the coming year(s), generally occurring the following fall.

Calendar Year Changes	2021	2022	2023	2024	2025
Attachment Point	\$60,000	\$60,000	\$60,000	\$60,000	\$60,000
Reinsurance Cap	\$100,000	\$100,000	\$100,000	\$100,000	\$100,000
Coinsurance Percent	60%	64%	53%	50%	60%
Avg Premium Savings	4.9%	5.5%	4.3%	4.6%	4.7%
Individual Enrollment (on/off exchange)	414,000	432,000	440,900	488,200	*500,000
Change in Enrollment From Prior Year	5.3%	4.3%	2.1%	10.7%	2.4%
Avg SLCS Premium w/Reinsurance	\$374.65	\$350.69	\$379.28	\$407.68	\$415.16
Avg SLCS Premium w/o Reinsurance	\$393.83	\$372.44	\$396.50	\$424.95	\$435.19
Aggregate Premium Savings w/Reinsurance	\$159,843,978	\$181,136,010	\$151,259,724	*\$160,000,000	*\$165,000,000
Federal Savings/Pass-Through	\$120,230,471	\$124,249,933	\$115,438,184	\$121,128,941	TBD
State Funded	\$17,299,202	\$30,646,232	\$28,991,918	*\$42-44m	*\$50m
Reinsurance Payments	\$137,529,673	\$154,896,165	\$144,430,102	TBD	TBD
* = Projected					

## Table 1Pennsylvania Reinsurance Program Data

### **Preliminary Evaluation of Actuarial and Economic Report**

The projections and assumptions in the Actuarial and Economic (A&E) report, included in this Section 1332 Waiver Extension application, reflect projections from January 1, 2026 through to December 31, 2030. The A&E report reflects projections assuming the laws that will be in place during that five-year period as they are currently. The enhanced subsidies enabled by the passage of the American Rescue Plan Act and the Inflation Reduction Act are set to expire on Dec. 31, 2025. The enhanced subsidies substantially reduced net premium costs for enrollees receiving premium tax credits where many plans could be obtained for as little as \$10 a month. The A&E report reflects enrollment projections from 2025 to 2026 to reduce by about 19 percent. Said differently, approximately 100,000 covered lives are expected to either elect coverage elsewhere or become uninsured if the enhanced subsidies expire. While the reinsurance program helps to reduce premiums by about four to five percent from what the premiums would be without the program, on average the enhanced subsidies reduced net premiums by about 44% across the nation<sup>1</sup>. If enhanced subsidies are continued beyond 2025, the Department anticipates these numbers to change.

<sup>&</sup>lt;sup>1</sup> Enhanced subsidies have cut premium payments by an estimated 44% (\$705 annually) for enrollees receiving premium tax credits. If the subsidies expire, most Marketplace enrollees will see premium payment increase substantially. <u>https://www.kff.org/affordable-care-act/issue-brief/inflation-reduction-act-health-insurance-subsidies-what-is-</u> their-impact-and-what-would-happen-if-they-expire/

The A&E report was modeled to show what the reinsurance pool would have to be to maintain the four to five percent reduction in premium from what the premiums would otherwise be, while accounting for the anticipated 19 percent reduction in enrollment. The amount of state funds needed to reinsure the program would have to increase year over year. The state funding comes from premium fees collected for individuals enrolled in the state-based exchange, Pennie®. A 19 percent reduction in enrollment would result in a reduction in the available state reinsurance funding: the reinsurance state funding is financed by a state user fee on policies sold on the exchange, which is assessed on insurers that sell coverage through the exchange. Those user fees fund Pennie, as well as the reinsurance program. The federal pass-through and state reinsurance funding is dependent on enrollment. The Department anticipates that the A&E report reflecting the state funding amounts would not be sustainable at its current levels if the enhanced subsidies are not continued. The Department would instead work with actuarial experts, the insurers, and Pennie, as it does today, to determine what the upcoming year's reinsurance parameters would be, aligning to the projected available reinsurance funding, which is driven by enrollment.

### **Public Comment**

Each year, the Department has hosted a public forum to provide updates and answer questions about the reinsurance program. This year, as part of that public forum, Pennsylvania sought public comment to support its extension application. To continue the program for an additional five years, Pennsylvania completed the Actuarial and Economic (A&E) report to support the extension application. The Department posted the A&E report on the website and issued a bulletin notice advising the public that they could comment on that report in the context of any public comment on the proposed extension application request.

The Department scheduled two public forum sessions, as described in its Pennsylvania Bulletin Notice 2024-16 available at this link:

https://www.pacodeandbulletin.gov/Display/pabull?file=/secure/pabulletin/data/vol54/54-41/1479.html . Public comment was invited until the close of the comment period on Thursday, November 14, 2024. When hosting the two sessions, the Department offered additional time, if requested, to submit comment. Comments were accepted via e-mail, Microsoft Teams chat, voice, or mail. The Public Forum was held virtually on November 12 and 14, 2024. There were a total of four external participants on each of the sessions. There were no comments or questions submitted during the open comment period and no questions or comments from the attendees during the public forum. The recording of the forum is formatted by Pennsylvania's Commonwealth Media Services to add closed captions and is posted to the Department's public website:

https://www.pa.gov/agencies/insurance/laws-and-regulations/act-42-reinsurance-1332-waiver.html

### **Tribal Consultation**

Not applicable. The Commonwealth of Pennsylvania does not have any Federally-recognized Indigenous People tribes within its borders.

## 1. Introduction

The Commonwealth of Pennsylvania (the Commonwealth) believes that a sustainable, affordable Individual market for health insurance is important, and Pennsylvania's Individual market has grown significantly since the initial implementation of its reinsurance program in 2021. The Commonwealth believes that an effective mechanism to help sustain an affordable Individual market is through the continuation of the state-based reinsurance program. The current Pennsylvania reinsurance program utilizes an attachment-point model of reinsurance, financed in part by a premium assessment on health insurance issuers. The program has reduced health insurance rates in the Individual Affordable Care Act (ACA) market in the Commonwealth over the period from 2021 through 2025 by approximately 4% to 5%, relative to what they would have been without the program.

In March 2021, the United States Congress passed H.R. 1319 (The American Rescue Plan Act) which significantly increased federal premium subsidies available to individuals and families purchasing coverage through the Exchange. These enhanced premium tax credits were extended through calendar year 2025 under the Inflation Reduction Act (IRA), which was signed by President Biden in August of 2022. Under current law, these enhanced PTCs are scheduled to sunset at the end of 2025, returning to levels outlined in the ACA.

In an effort to continue to address the affordability of health insurance for Pennsylvanians and avoid market disruptions, the Commonwealth is seeking to extend its current State Innovation Waiver which was authorized under Section 1332 of the Affordable Care Act (Section 1332 Waiver) for the period January 1, 2021 through December 31, 2025, and established a state-based and state-administered reinsurance program. Specifically, the Commonwealth is proposing to extend the waiver under 45 CFR 155.1332 and continue waiving §1312(c)(1)<sup>1</sup> of the Affordable Care Act from January 1, 2026 through December 31, 2030. The goal of the Section 1332 Waiver extension will be to continue to lower gross premium rates and increase access to more affordable coverage for unsubsidized and under-subsidized populations, which would be expected to incentivize individuals to join or remain enrolled in the Individual ACA market.

Oliver Wyman Actuarial Consulting, Inc. (Oliver Wyman), was retained by the Commonwealth to perform the actuarial and economic analysis related to Pennsylvania's proposed waiver extension. As directed under 45 CFR 155.1308(f)(4)(i)-(iii), the Centers for Medicare and Medicaid Services (CMS) regulations require that states include as part of a Section 1332 Waiver application actuarial and economic analyses, along with actuarial certifications and the data and assumptions used. It is Oliver Wyman's understanding that these same requirements apply to the application for a waiver extension. Oliver Wyman understands that this report will be made public and included by the Commonwealth in its application to CMS for an extension of its current 1332 Waiver. The purpose of this report is to provide the required actuarial and economic analysis, and demonstrate that the waiver extension will satisfy the following requirements:

- Scope of Coverage: Coverage under the Section 1332 Waiver extension will be provided to a comparable number of residents as would be provided absent the waiver extension
- Affordability of Coverage: The Section 1332 Waiver extension will provide coverage and cost sharing
  protections against excessive out-of-pocket spending that are at least as affordable as would be provided
  absent the waiver extension

<sup>&</sup>lt;sup>1</sup> §1312(c)(1) states that "A health insurance issuer shall consider all enrollees in all health plans (other than grandfathered health plans) offered by such issuer in the Individual market, including those enrollees who do not enroll in such plans through the Exchange, to be members of a single risk pool."

- **Comprehensiveness of Coverage:** The Section 1332 Waiver extension will provide coverage that is at least as comprehensive as would be provided absent the waiver extension
- Deficit Neutrality: The Section 1332 Waiver extension will not increase the Federal deficit

This report provides the required actuarial and economic analyses, as well as the actuarial certifications, necessary to support that the proposed Section 1332 Waiver extension is expected to satisfy these requirements. Additionally, this report outlines the data, assumptions and methodology used to generate the actuarial and economic projections that result from our analysis. Any other use of this report may be inappropriate and is prohibited by Oliver Wyman.

## 2. Overview of State-Based Reinsurance Program

The Commonwealth is submitting an application for an extension of its previously approved Section 1332 Waiver that put in place a state-based and state-administered reinsurance program to help improve the affordability of premium rates in Pennsylvania's Individual ACA market. Under the Commonwealth's Section 1332 Waiver, a reinsurance program was established for plan years 2021 through 2025. In 2025, the funding for the reinsurance program is set to support a program that has the objective of reducing gross premium rates (i.e., premium rates prior to the application of premium tax credits) in the Individual ACA market by an average of approximately 4.7%, relative to the premium rates which would otherwise be charged if no reinsurance program were in place.

In this section, we provide the estimated cost of the reinsurance program, describe how the reinsurance program is expected to be funded, provide the preliminary reinsurance parameters anticipated to be utilized to determine payments from the Commonwealth to issuers, and provide the impact the reinsurance program is expected to have on premium rates in the Individual ACA market. As enrollment volumes, claim costs, and available funding amounts change over the time period during which the proposed Section 1332 Waiver extension will be in effect, it is expected that items such as the reinsurance parameters will be adjusted, as necessary, by the Commonwealth to ensure the reinsurance program remains fully funded (net of federal pass-through funding) and, to the extent possible, continues to target the Commonwealth's overall objective for each plan year (i.e., stability from year to year in the reduction in gross premium rates in the Individual ACA market relative to the premium rates which would otherwise be charged if no reinsurance program was in place).

## Cost and Funding of the Reinsurance Program in 2026

Based on issuers' rate filings for the 2025 plan year and Oliver Wyman's estimates, the reinsurance program had the effect of reducing premiums on average by 4.7% in 2025, and the net-cost to the Commonwealth is projected to be \$62.5 million. The Commonwealth's objective with this waiver extension is to set the parameters for the program such that it has the effect of materially reducing gross premium rates in the market while maintaining a reasonably similar net-cost to the Commonwealth in future years as in recent prior years. Overall, we estimate that a reinsurance program that has an expected net cost to the Commonwealth of \$72.6 million in 2026 will have a similar effect on premium rates for 2026 as in 2025 (i.e., reducing gross premium rates in the Individual ACA market by an average of approximately 4.7% relative to the premium rates that would otherwise be charged if no reinsurance program were in place). This estimate was developed based on projected enrollment, premium, claims, non-benefit expenses, and expected reinsurance parameters in the Individual ACA market under the American Rescue Plan Act of 2021 and extended via the IRA of 2022 will expire following the 2025 calendar year.

In developing the estimate, it was assumed that issuer claim expenses in 2026 on a per member per month (PMPM) basis will be equal to 2023 claim expenses on a PMPM basis, trended to 2026. Then, based on feedback received from each issuer offering coverage in Pennsylvania's Individual ACA market in 2024 related to fixed non-benefit expenses and the reductions in claim expenses needed to drive various levels of premium rate changes, we estimated the reduction in issuer claim expenses that would be needed to accomplish Pennsylvania's stated objective for 2026. In doing so we account for the change in morbidity expected to occur in 2026 under the proposed Section 1332 Waiver extension (i.e., as a result of increased enrollment due to

lower premium rates in 2026 with the reinsurance program in place relative to without the reinsurance program), the total projected cost of the program was calculated as follows:

**Projected 2026 Cost of Reinsurance Program** = Projected 2026 Claims Volume x Target Reduction in Issuer Claims Expense

Where Projected 2026 Claims Volume = 2023 Claims PMPM in the Individual ACA market \* 12 \* Claims Trend from 2023 to 2026 \* Morbidity Adjustment Due to the Expiration of the Enhanced PTCs \* Estimated 2026 Enrollment in Individual ACA market

Funding for the reinsurance program in 2026 is expected to come from the following sources:

- 1. Federal pass-through funds received as a result of the Section 1332 Waiver extension,
- 2. A portion of the state-based exchange user fee, to be assessed on health and dental products offered through Pennsylvania's health insurance exchange named Pennie.

Regarding the first item, through its Section 1332 Waiver extension application, the Commonwealth is requesting that the U.S. Department of Treasury (Treasury) "pass-through" to its reinsurance program the cost savings from the reduction of federal outlays for premium tax credits (PTCs) resulting from the reduction in gross premium rates in the Individual ACA market due to the reinsurance program. Section 1332(a)(3) of the ACA authorizes pass-through funding under Section 1332 Waivers.

## **Estimated 2026 Reinsurance Parameters and Payment Calculation**

Pennsylvania's reinsurance program will reimburse issuers for a portion of high dollar claim expenses occurring between a specified attachment point and reinsurance cap, while maintaining an incentive for issuers to continue applying their care management practices for high-cost claimants.

Table 1 provides preliminary reinsurance parameters for 2026 which are based on those that will be in effect in 2025:

Parameter	Value
Attachment Point	\$60,000
Reinsurance Cap	\$100,000
Coinsurance %	60.0%

#### **Table 1: Preliminary 2026 Reinsurance Parameters**

These parameters were estimated using historical issuer-provided claims data, which was adjusted to reflect projected plan year cost levels. Additionally, issuer feedback was obtained to assess the reasonability of the resulting parameters.

Utilizing the parameters outlined in Table 1, reinsurance payments would be calculated based on an issuer's annual paid claim expenses for a given member as follows<sup>2</sup>:

<sup>&</sup>lt;sup>2</sup> Paid by the issuer; includes medical and pharmacy claims

2026 Reinsurance Payment for ACA Member<sub>i</sub> = Maximum [Minimum [Member<sub>i</sub> Annual Paid Claim Expense, \$100,000] - \$60,000, \$0] x 60.0%

In Table 2 below, we provide a summary of the expected distribution of members, claims and average claim cost on per member per year (PMPY) basis by annual claim size to which the parameters outlined in Table 1 are expected to apply:

Annual Incurred Claims	% of Members	% of Claims	Average Claim Cost PMPY
\$0 to \$59,999	98.3%	55.4%	\$3,154
\$60,000 to \$99,999	0.9%	12.1%	\$77,022
\$100,000+	0.8%	32.5%	\$214,944

#### Table 2: Projected Distribution of Individual ACA Incurred Claims Expenses

In utilizing the specified parameters, it is expected that issuers will continue to have incentives to apply their care management practices even after a given member reaches the specified annual attachment point, since issuers will be reimbursed for only a portion of a given member's claim costs between the attachment point and reinsurance cap.

## **Estimated Premium Impact of the Reinsurance Program**

As noted earlier, a primary objective of the reinsurance program is to materially reduce gross premium rates in the Individual ACA market and the program is projected to have an impact of approximately 4.7% in 2026, relative to the premium rates which would otherwise be charged if no reinsurance program were in place. To the extent gross premium rates are reduced, enrollment levels in the Individual ACA market are expected to increase, leading to an improvement in the overall morbidity of Pennsylvania's Individual ACA market. We estimate that the morbidity improvement as a result of the proposed Section 1332 Waiver extension will be approximately 0.1% in 2026 based on modeling and issuer feedback. This morbidity improvement is included in the estimated 4.7% premium reduction.

## 3. Actuarial and Economic Analyses

Actuarial analyses meeting the requirements under 45 CFR 155.1308(f)(4)(i) and economic analysis meeting the requirements under 45 CFR 155.1308(f)(4)(ii) are provided in this section.<sup>3</sup> Oliver Wyman's Healthcare Reform Microsimulation Model (HRM Model) was utilized to estimate the expected impact of the proposed Section 1332 Waiver extension on the health insurance markets in Pennsylvania, and in meeting each of the guardrails associated with Section 1332 Waivers as outlined in federal statute and regulation.

The HRM Model is an economic utility model that captures the flow of individuals across various markets and coverage options based on their economic purchasing decisions. It is integrated with actuarial modeling designed to assess the expected impact of various reforms on the health insurance markets. Appendix A provides additional information about the specifications and functionality underlying the HRM Model.

The projections produced by the HRM Model were analyzed to assess whether the following federal requirements are expected to be met under the proposed Section 1332 Waiver extension:

- Scope of Coverage Requirement The Section 1332 Waiver extension will provide coverage to at least a comparable number of the Commonwealth's residents as would be covered absent the waiver extension.
- Affordability Requirement The Section 1332 Waiver extension will provide coverage and costsharing protections against excessive out-of-pocket spending that results in coverage which is at least as affordable for the Commonwealth's residents as would be provided absent the waiver extension.
- **Comprehensiveness of Coverage Requirement** The Section 1332 Waiver extension will provide coverage that is at least as comprehensive for the Commonwealth's residents as would be provided absent the waiver extension.
- **Deficit Neutrality Requirement** The Section 1332 Waiver extension will not increase the federal deficit.

Table 3 summarizes at a high level the expected impact of the proposed Section 1332 Waiver extension as it relates to these requirements. Our analyses show that the proposed Section 1332 Waiver extension is expected to meet these requirements in 2026 and each year for the five-year period ending in 2030. A more detailed discussion of the results as they relate to these requirements follows.

Requirement	Impact of Proposed Section 1332 Waiver Extension
Scope of Coverage	The number of individuals covered in the Pennsylvania health insurance markets is expected to increase
Affordability of Coverage	Gross premium rates in the Individual ACA market are expected to decrease while other out-of-pocket expenses are not expected to change
Comprehensiveness of Coverage	Not impacted by the proposed Section 1332 Waiver extension
Deficit Neutrality	The federal deficit is not expected to increase

#### Table 3: Summarized Expected Impact of the Proposed Section 1332 Waiver Extension

<sup>&</sup>lt;sup>3</sup> https://www.govinfo.gov/content/pkg/FR-2021-09-27/pdf/2021-20509.pdf

## Scope of Coverage

Under the scope of coverage requirement, a comparable number of residents must be expected to have coverage under the proposed Section 1332 Waiver extension as would have coverage absent the waiver extension.<sup>4</sup> For this purpose, "coverage" refers to minimum essential coverage as defined in 26 U.S.C. 5000A(f) and 26 CFR 1.5000A-2, and health insurance coverage as defined in 45 CFR 144.103. In assessing this requirement, we estimate that the proposed Section 1332 Waiver extension will not have a material impact on the number of Pennsylvanians covered under employer-sponsored plans, Medicaid, Medicare, CHIP, and other public programs. As a result, the focus of our analysis is on the impact of the proposed Section 1332 Waiver extension to Pennsylvania's Individual ACA market.

Table 4 summarizes the projected average volume of Individual ACA market enrollees and uninsured individuals in Pennsylvania by year under the baseline and waiver scenarios, assuming gross premium rates in the Individual ACA market are reduced under the waiver scenario by an average of approximately 4.7% in 2026 through 2030 (i.e., relative to the premium rates which would otherwise be charged if no reinsurance program were in place). Both the baseline and waiver scenarios reflect expected decreases in Individual ACA enrollment in 2026 due to the scheduled termination of the enhanced PTCs.

	Indiv	idual ACA Mar	Uninsured			
Year	Baseline	Waiver	Change vs. Baseline	Baseline	Waiver	Change vs. Baseline
2026	446,900	449,000	0.5%	687,300	685,200	-0.3%
2027	446,500	448,600	0.5%	686,700	684,600	-0.3%
2028	446,100	448,200	0.5%	686,100	684,000	-0.3%
2029	445,800	447,800	0.4%	685,400	683,400	-0.3%
2030	445,400	447,400	0.4%	684,800	682,800	-0.3%

#### Table 4: Summary of Average Individual ACA Market Enrollment and Uninsured Volumes

Note: Enrollment values shown have been rounded to the nearest hundred

Under the proposed Section 1332 Waiver extension, enrollment in the Individual ACA market is expected to be approximately 0.4% to 0.5% higher than baseline enrollment levels each year over the time period of 2026 through 2030. The increase in enrollment under the proposed Section 1332 Waiver extension is driven primarily by uninsured individuals who are expected to enter the Individual ACA market as a result of lower gross premium rates with the reinsurance program in place.<sup>5</sup>

Overall, our modeling shows it is expected that the new enrollees who enter the ACA market in 2026 and later due to the presence of the proposed reinsurance program will, on average, have slightly lower health expenses on a PMPM basis when compared to the individuals who would be expected to enroll in Individual ACA plans regardless of the presence of the reinsurance program. As noted earlier, the impact of the new enrollees on the overall morbidity of Pennsylvania's Individual ACA market is expected to be approximately 0.1% in 2026 through 2030.

<sup>&</sup>lt;sup>4</sup> 45 CFR 155.1308(f)(3)(iv)(C)

<sup>&</sup>lt;sup>5</sup> While there may be some migration of enrollees from the employer market to the Individual ACA market, based on our modeling, we expect any migration from the employer market as a result of the waiver to be *de minimis*.

### Individual ACA Market Enrollment by Household Income

Table 4a presents projected enrollment levels in the Individual ACA market by household income over the waiver extension time period of 2026 through 2030 assuming gross premium rates in the Individual ACA market are reduced under the waiver scenario by an average of approximately 4.7% relative to the premium rates which would otherwise be charged if no reinsurance program were in place. For this comparison, household income is measured as a percentage of the federal poverty level (FPL).

### Table 4b: Summary of Average Individual ACA Market Enrollment by Metal Level

Note: Values shown have been rounded to the nearest hundred

### Individual ACA Market Enrollment by Age

Table 4c presents projected enrollment levels in the Individual ACA market by age over the waiver extension time period of 2026 to 2030 assuming gross premium rates in the Individual ACA market are reduced under the waiver scenario by an average of approximately 4.7% relative to the premium rates which would otherwise be charged if no reinsurance program were in place. The distribution of Individual ACA enrollment by age is not expected to shift materially under the proposed Section 1332 Waiver extension, relative to the baseline.

## Affordability of Coverage

Under the affordability requirement, Pennsylvanians must retain health care coverage which is at least as affordable as would be absent the waiver extension.<sup>6</sup> For this purpose, affordability refers to the ability of state residents to pay for health care and is measured by comparing their net out-of-pocket spending for health coverage and services to their incomes. Out-of-pocket expenses are assumed to include premium contributions and any plan level cost-sharing that is the responsibility of the individual.

As with the scope of coverage requirement, in assessing this requirement, we estimate that the proposed Section 1332 Waiver extension will not have a material impact on the affordability of coverage for those individuals enrolled in employer-sponsored plans, Medicaid, Medicare, CHIP or any other public programs. As a result, the focus of our analysis is again on the impact of the proposed Section 1332 Waiver extension on outof-pocket expenses in Pennsylvania's Individual ACA market. Additionally, since the proposed Section 1332 Waiver extension does not directly impact member plan level cost-sharing (i.e., members will be able to purchase plans with comparable benefit cost sharing as those plans in which they are currently enrolled), the focus of the affordability requirement is further centered on changes in net premium rates.

<sup>&</sup>lt;sup>6</sup> 45 CFR 155.1308(f)(3)(iv)(B)

Under the proposed Section 1332 Waiver extension it is expected that gross premium rates in the Individual ACA market will decrease. Total out-of-pocket costs for enrollees who receive PTCs under both the baseline and the Section 1332 Waiver extension, including those with high expected health care costs, will not change for the subsidy benchmark plan (i.e., the second lowest cost silver plan) as their premium rate for that plan will continue to be capped at the applicable maximum percentage of household income they are required to pay under the ACA. For enrollees who do not receive PTCs or for enrollees who currently receive PTCs but who would no longer receive PTCs under the proposed Section 1332 Waiver extension (due to their gross premium rates decreasing below what their premium rate net of PTCs would otherwise be), including those with high expected health care costs, the proposed reinsurance program will result in an improvement in the overall affordability of health coverage relative to the baseline scenario.

While the overall average gross premium rates are expected to decrease by 4.7% in 2026 through 2030, based on feedback received from issuers in the market and our projections of issuer positioning, the gross premium rates for the second lowest cost silver plans in Pennsylvania's Individual ACA market are expected to decrease, on average, by approximately 4.6% in in 2026 through 2030 due to the reinsurance program under the proposed Section 1332 Waiver extension (i.e., relative to the baseline in which no reinsurance program is in place, see Table 5 for additional details). It is important to note, however, that the actual change in premium rates under the Section 1332 Waiver extension will vary by issuer, depending upon each issuer's specific claim cost distribution as well as fixed non-benefit expenses.

Table 5a presents estimates of the average second lowest cost silver plan monthly premium rates offered through the Exchange for a single, 21-year-old, non-tobacco user in Pennsylvania by rating area under both the baseline and waiver scenarios. Tables 5b and 5c present estimates of the second lowest cost silver plan monthly premium rates offered through the Exchange for a single, 21-year-old, non-tobacco user in Pennsylvania by county under the baseline and waiver scenarios, respectively. Table 5d presents estimates of the change in the second lowest cost silver plan monthly premium rates offered through the Exchange for a single, 21-year-old, non-tobacco user in Pennsylvania by county under the baseline and waiver scenarios, respectively. Table 5d presents estimates of the change in the second lowest cost silver plan monthly premium rates offered through the Exchange by county between the baseline and waiver scenarios.

Due to the application of the specified age curve for ACA rating purposes, a similar percentage premium change would be expected to occur for all other ages, although all else equal, the premium difference would generally be expected to be greater than that shown above for enrollees who are older than 24 and less than that shown above for enrollees who are younger than 21.<sup>7</sup>

## **Comprehensiveness of Coverage Requirement**

Under the comprehensiveness of coverage requirement, health care coverage under the proposed Section 1332 Waiver extension must be forecast to be at least as comprehensive overall for Pennsylvania residents as coverage absent the waiver extension.<sup>8</sup> Comprehensiveness refers to coverage requirements for ACA essential health benefits (EHBs) and, as appropriate, Medicaid and CHIP standards. The proposed Section 1332 Waiver extension does not impact the scope of services covered by issuers in the commercial markets or the scope of services covered by the Medicaid or CHIP programs. Therefore, the proposed Section 1332 Waiver extension is expected to have no impact on the comprehensiveness of coverage available to Pennsylvania residents.

## **Economic Analysis and Deficit Neutrality**

Under the deficit neutrality requirement, projected federal spending, net of federal revenues, under the proposed Section 1332 Waiver extension must be equal to or lower than projected federal spending net of federal revenues in the absence of the waiver extension.<sup>9</sup>

The proposed Section 1332 Waiver extension was analyzed to determine its expected impact on costs associated with PTCs. Table 6 summarizes the expected impact of the proposed Section 1332 Waiver extension on the federal deficit for each year from 2026 through 2030 assuming gross premium rates in the Individual ACA market are reduced under the waiver scenario relative to the premium rates which would otherwise be charged if no reinsurance program were in place. A detailed discussion of these items, as well as a discussion of other items considered in determining the impact to the federal deficit, follows.

	Α	В	С	D	A - B - C - D		
Year	Change in PTCs	Change in User Fees	Change in Shared Responsibility Payments	Change in Health Insurance Provider Fees	Change in Federal Deficit		
2026	(\$128)	\$0	\$0	\$0	(\$128)		
2027	(\$136)	\$0	\$0	\$0	(\$136)		
2028	(\$145)	\$0	\$0	\$0	(\$145)		
2029	(\$155)	\$0	\$0	\$0	(\$155)		
2030	(\$165)	\$0	\$0	\$0	(\$165)		

#### Table 6: Impact of the Proposed Section 1332 Waiver Extension on the Federal Deficit (Amounts shown in millions)

Note: PTCs are considered expenditures for the federal government whereas User Fees, Shared Responsibility Payments, and Health Insurance Providers Fees are considered revenue sources for the federal government. Therefore, a reduction in PTCs will decrease the federal deficit whereas a reduction in User Fees, Shared Responsibility Payments, or Health Insurance Provider Fees will increase the federal deficit.

A more detailed summary providing projected results over the five-year budget period under both the baseline and Section 1332 Waiver extension scenarios is shown in Appendix B.

<sup>8</sup> 45 CFR 155.1308(f)(3)(iv)(A)

<sup>&</sup>lt;sup>7</sup> https://www.cms.gov/CCIIO/Programs-and-Initiatives/Health-Insurance-Market-Reforms/Downloads/StateSpecAgeCrv053117.pdf

<sup>9 45</sup> CFR 155.1308(f)(3)(iv)(D)

### **Premium Tax Credits**

Changes in premium for the second lowest cost silver plan and changes in subsidized enrollment have a direct impact on PTCs paid by the federal government. As shown in Table 7, assuming gross premium rates in the Individual ACA market are reduced under the waiver scenario relative to the premium rates which would otherwise be charged if no reinsurance program were in place, the proposed Section 1332 Waiver extension is expected to significantly decrease the volume of PTCs paid by the federal government each year beginning in 2026.

	Baseline			Waiver			
Year	PTC Enrollment	Avg PTC PMPM	Total PTCs (millions)	PTC Enrollment	Avg PTC PMPM	Total PTCs (millions)	
2026	290,600	\$612	\$2,135	290,600	\$576	\$2,008	
2027	290,400	\$656	\$2,286	290,400	\$617	\$2,150	
2028	290,100	\$703	\$2,447	290,100	\$661	\$2,301	
2029	289,900	\$753	\$2,619	289,900	\$708	\$2,464	
2030	289,600	\$807	\$2,804	289,600	\$759	\$2,638	

## Table 7: Summary of PTC Enrollment and PTC PaymentsBaseline and Waiver Scenarios

Notes:

1. Enrollment volumes have been rounded to the nearest hundred and reflect average monthly enrollment levels

2. PMPM values have been rounded to the nearest dollar

3. Total PTCs are in millions and includes an estimated PTC/APTC Ratio to be applied by the Treasury

The overall impact of the proposed Section 1332 Waiver extension on the volume of enrollees receiving PTCs is expected to be minimal. Therefore, the decrease in PTC payments shown is driven entirely by the expected decrease in gross premium rates for the benchmark plan as a result of the reinsurance program which reduces gross premium rates relative to the premium rates which would otherwise be charged if no reinsurance program were in place.

### **Other Considerations Related to the Federal Deficit**

Other items considered in estimating the impact of the Section 1332 Wavier on the federal deficit include the following:

- **Exchange User Fees** Pennsylvania utilizes a State-based Marketplace, through which issuers sell ACA insurance plans to individuals and families. Given that no Exchange User Fees are anticipated to be paid to the federal government in 2026 and later under either the baseline or waiver scenarios, there is no impact on the federal deficit as a result of Pennsylvania's 1332 Waiver.
- **Federal Individual Mandate Penalty** Under the ACA, most individuals are required to maintain a minimum level of health insurance coverage. However, under the Tax Cut and Jobs Act of 2017, the federal individual mandate penalty was reduced to \$0 starting in 2019. As a result, the proposed Section 1332 Waiver extension will have no impact on shared responsibility payments under current law.
- **Cost-Sharing Reduction Payments** Given that federal cost-sharing reduction (CSR) payments are not currently being funded and have been assumed to remain unfunded in the future, there is no expected change assumed in the volume of CSR payments between the baseline and waiver scenarios.

Health Insurance Providers Fee – With respect to the Health Insurer Providers (HIP) Fee, given that this fee
was repealed starting in 2021, the proposed Section 1332 Waiver extension will have no impact on HIP Fee
revenues.

## **Sensitivity of Results**

Significant uncertainty exists with respect to future enrollment and premiums in the Individual ACA market, particularly in light of the unwinding of the Medicaid continuous enrollment provisions. As a result, actual experience will likely differ from what is assumed in this analysis. We note that some of the key assumptions related to health insurance markets that we made in the development of our projections include the following: CSR subsidies will continue to be unfunded by the federal government and issuers will continue to load premiums for their on-Exchange silver plans by an amount estimated to be equal to the lost CSR payments, issuer plan and network offerings will be similar to those available to consumers in 2025, issuer pricing assumptions will be similar to those used in 2025 (except where explicitly stated), the enhanced PTCs made available under IRA will end after 2025, there will be no significant issuer entries or exits, and there will be no additional significant legislative changes at either the state or federal level that would be expected to impact enrollment in the Individual ACA market. To the extent these assumptions do not hold true in future years, we would expect that actual results would vary, potentially significantly, from those assumed in this analysis. Further, given that federal pass-through funding will ultimately be based on actual premium rates filed by issuers offering coverage in Pennsylvania's Individual ACA market and actual enrollment volumes, final funding amounts are likely to differ from the estimates provided in this report.

Given the level of uncertainty, we performed significant sensitivity testing of key assumptions and shared those results with the Commonwealth. Some of the key assumptions that were sensitivity tested include the following:

- Overall membership volumes
- PTC membership volumes
- Non-PTC membership volumes
- The change in the second lowest cost silver premium PMPM due to the reinsurance program
- The ratio of PTCs to APTCs
- The level of claims cost within the specified reinsurance parameters

We note that in each of scenarios tested, while the changes made to the specified assumptions impacted the cost estimates of the reinsurance program and projected federal pass-through funding amounts, there were no cases in which any of the four federal requirements associated with Section 1332 Waiver extension was not expected to be met.

## 4. Data Sources and Methodology

The projections underlying our analysis are based on results from Oliver Wyman's HRM Model, which was utilized to examine the impact that the proposed Section 1332 Waiver extension is expected to have on the health insurance markets in Pennsylvania, and in meeting the requirements associated with Section 1332 Waivers extension as outlined in federal statute and regulation. The HRM Model is an economic utility model that captures the flow of individuals across various markets and coverage options based on their economic purchasing decisions. It is integrated with actuarial modeling designed to assess the impact that various reforms are expected to have on the health insurance markets.

We estimate that the proposed Section 1332 Waiver extension will not have a material impact on the number of Pennsylvanians covered under employer-sponsored plans, Medicaid, Medicare, CHIP, or other public programs. As a result, we did not present detailed modeling results for those markets.

The primary basis for the population underlying the HRM Model is data from the 2019 American Community Survey (ACS). The ACS data provides detailed information for each individual in a surveyed household unit, including demographic, socioeconomic, geographic, and employment information. The data also provides information regarding health insurance coverage type. The ACS data was supplemented and synthesized with several other data sources, including information from an issuer data call, in order to develop a complete and comprehensive view of the current health insurance market in Pennsylvania.

The Pennsylvania Insurance Department (PID) issued a data call to the health insurance issuers that offered coverage in Pennsylvania's Individual ACA market to collect detailed information for that market to aid in calibrating the HRM Model. The data included premium and enrollment information from January 2022 through June 2024 and claims information from January 2022 through December 2023 and paid through June 2024. The issuer provided data was further augmented with information from a number of other sources, including but not limited to:

- 2019, 2020, 2021, 2022, and 2023 statutory financial statements submitted by issuers in Pennsylvania's health insurance markets
- 2019, 2020,2021, and 2022 medical loss ratio (MLR) rebate data
- 2019-2024 Marketplace enrollment public use files
- 2019-2024 effectuated enrollment reports
- U.S. Census Bureau data
- 2019-2022 summary reports on risk adjustment transfers
- National CPI and CMS Personal Health Care Price Index projections
- 2019-2024 Individual and Small Group ACA market premium rates
- Filed 2025 Individual ACA market premium rates

These additional data sources were utilized to determine the overall average annual enrollment volumes in the health insurance market for each of 2019, 2020, 2021, 2022, 2023, and 2024, to validate the issuer data that was provided (e.g., average premiums PMPM), and to gather additional information utilized in our modeling but not captured through the issuer data call.

Health status was assigned to various sub-populations within the HRM Model based on a statistical analysis of self-reported health status data obtained from the Current Population Survey (CPS). The CPS data provides the starting assumptions for the population morbidity, because the data includes a self-reported health status indicator as well as fields classifying income, age, gender, geography, coverage type, and other categories.

Respondents to the survey classify their health into one of five categories: excellent, very good, good, fair and poor. The model reflects these classifications numerically by assigning a morbidity load to each category.

Information from the Agency for Health Care Research and Quality's MEPS data was used to simulate the Pennsylvania employer-based market. MEPS identifies key statistics for the employer-based market for every state by group size, including employer offer rates, employee take-up rates, and self-funding rates among employers. Individuals in the ACS data identified as working for private employers were categorized into employer group size segments (e.g., small employer groups) based on the distribution of employees by group size according to MEPS. The MEPS data was also used to determine the number of individuals enrolled in self-funded plans to estimate the total size of the employer-based market. MEPS data was further used to inform our estimates of employer offer rates and self-funding rates.

The utility functions underlying the HRM Model were then calibrated to replicate the number of individuals in each of the Individual, employer-based, and uninsured markets in Pennsylvania for 2019, 2020, 2021, 2022, 2023, and 2024. The various parameters of HRM Model's utility functions were then further adjusted until the model also projected Individual ACA market enrollment in each of 2019, 2020, 2021, 2022, 2023, and 2024 that was consistent with key characteristics of the actual Individual ACA market enrollment for each year (e.g., by age range, income range, geography, etc.).

The HRM Model assumes a "steady" state population. This means the overall distribution by income, health status, employer size, and family composition of the entire population being modeled is not expected to change significantly. Additional adjustments were applied to the modeled results to reflect anticipated population growth within Pennsylvania. The population growth adjustments were developed based on most recent historical population change which are publicly available on the United States Census Bureau website.

Average claim costs were calibrated and adjusted on an overall basis using information provided in the issuer data call, statutory financial statements, and from other public data sources previously noted. Beyond 2023, claim costs within the HRM Model were trended forward assuming an average annual claims trend rate in the Individual ACA market equal to approximately 6.5%. This assumption was developed based on a review of publicly available information and Oliver Wyman's Carrier Trend Report.

Member cost-sharing and incurred claims were calculated by the HRM Model, with the assumed annual limitation on cost-sharing indexed for inflation each year according to federal regulations using the most recent National Health Expenditure (NHE) data.

Actual lowest-cost bronze, silver, and gold premium rates and second-lowest cost silver premium rates for Pennsylvania's Individual ACA market in 2019, 2020, 2021, 2022, 2023, and 2024, and filed 2025 rates were utilized in the HRM Model.

Premium rates after 2025 were assumed to increase annually by 6.5%.

Federal PTCs for eligible Individual ACA market enrollees were assumed to change each year based on premium changes associated with the second lowest cost silver plan available changes in the Applicable Percentage Tables. The Applicable Percentage Tables, while known for 2019 through 2025, were adjusted for each year beyond 2025 according to the methodology outlined by the 2025 Final Benefit and Payment Parameter Notice.<sup>10</sup> Premium and income growth rates utilized in developing the Adjustment Ratio that was

<sup>&</sup>lt;sup>10</sup> https://www.federalregister.gov/documents/2024/04/15/2024-07274/patient-protection-and-affordable-care-act-hhs-notice-of-benefit-and-payment-parameters-for-2025

applied to the projected Applicable Percentage Tables were based on the most recent NHE projections published by CMS.

As noted earlier, additional key assumptions which were incorporated into the HRM Model include the following: CSR subsidies will continue to be unfunded by the federal government and issuers will continue to load premiums for their silver plans by an amount estimated to be equal to the lost CSR payments, issuer plan and network offerings will be similar to those available to consumers in 2025, issuer pricing assumptions will be similar to those used in 2025, the enhanced PTCs made available under IRA will end after 2025, there will be no significant issuer entries or exits, and there will be no additional significant legislative changes at either the state or federal level.

## 5. Distribution and Use

Oliver Wyman prepared this report for the sole use of the Commonwealth of Pennsylvania. This report is not intended for general circulation or publication, nor is it to be used or distributed to others for any purposes other than those that may be set forth herein or in the definitive documentation pursuant to which this report was issued. Oliver Wyman understands that the report will be made public and used to support the Commonwealth's Section 1332 Waiver extension application. This report includes important considerations, assumptions, and limitations and, as a result, is intended to be read and used only as a whole. This report may not be separated into, or distributed, in parts. All decisions in connection with the implementation or use of advice or recommendations contained in this report are the sole responsibility of the Commonwealth.

Oliver Wyman's consent to any distribution of this report to parties other than the Commonwealth does not constitute advice by Oliver Wyman to any such third parties and shall be solely for informational purposes and not for purposes of reliance by any such third parties. Oliver Wyman assumes no liability related to third party use of this report or any actions taken or decisions made as a consequence of the results, advice or recommendations set forth herein. This report should not replace the due diligence on behalf of any such third party.

## 6. Disclosure and Limitations

Oliver Wyman Actuarial Consulting, Inc., was engaged by the Commonwealth of Pennsylvania to assist in performing actuarial and economic analyses as part of its State Innovation Waiver extension application under Section 1332 of the Patient Protection and Affordable Care Act. The actuarial services provided consisted of analyses and forecasting to determine whether the proposed Section 1332 Waiver extension will satisfy the Section 1332 Waiver guardrail requirements.

Ryan Schultz and Tammy Tomczyk, both Members of the American Academy of Actuaries, are responsible for this actuarial communication and meet the requirements to issue this report.

For our analysis, we relied on a wide range of data and information as described throughout this report. This includes information received from the issuers currently offering coverage in the Individual ACA market in Pennsylvania. Though we have reviewed the data for reasonableness and consistency, we have not independently audited or otherwise verified this data. Our review of the data may not reveal errors or imperfections. We have assumed the data provided is both accurate and complete. The results of our analysis are dependent on this assumption. If this data or information are inaccurate or incomplete, our findings and conclusions may need to be revised. All projections are based on data and information available as of September 10, 2024, and the projections are not a guarantee of results which might be achieved.

The estimates included within are based on federal law, regulations issued by the United States Department of Health and Human Services and the Internal Revenue Service, and applicable laws and regulations of the Pennsylvania as of September 10, 2024. Further, our estimates assume that current law as it relates to the Affordable Care Act, and other statutes and regulations that impact the health insurance markets, will continue in the future years without material change that would impact the results included in this report.

In addition, the projections we show in this report are dependent upon a number of assumptions regarding the future economic environment, medical trend rates, issuer behavior, the behavior of individuals and employers in light of incentives and penalties, and a number of other factors. These assumptions are disclosed within the report and have been discussed with representatives from the Commonwealth of Pennsylvania.

While this analysis complies with the applicable Actuarial Standards of Practice, in particular ASOP No. 23, Data Quality and ASOP No 41, Actuarial Communication, users of this analysis should recognize that our projections involve estimates of future events, and are subject to economic, statistical and other unforeseen variations from projected values. We have not anticipated any extraordinary changes to the legal, social, or economic environment that might affect our projections. For these reasons, no assurance can be given that the emerging experience will correspond to the projections in this analysis. To the extent future conditions are at variance with the assumptions we have made in developing these projections, actual results will vary from our projections, and the variance may be substantial.

Oliver Wyman is not engaged in the practice of law and this report, which may include commentary on legal issues and regulations, does not constitute, nor is it a substitute for, legal advice. Accordingly, Oliver Wyman recommends that the Commonwealth of Pennsylvania secure the advice of competent legal counsel with respect to any legal matters related to this report or otherwise.

This report is intended to be read and used as a whole and not in parts. Separation or alteration of any section or page from the main body of this report is expressly forbidden and invalidates this report.

## 7. Actuarial Certification

I, Ryan Schultz, am a Principal with Oliver Wyman Actuarial Consulting, Inc. I am a Fellow in the Society of Actuaries, a Member of the American Academy of Actuaries, and am qualified to provide the following certification.

This actuarial certification applies to the Commonwealth of Pennsylvania's application for an extension of its State Innovation Waiver under Section 1332 of the Patient Protection and Affordable Care Act. The Commonwealth is seeking to waive 1312(c)(1) of the Affordable Care Act, which requires that all enrollees in all health plans offered by an issuer in the Individual market be members of a single risk pool.

#### Reliance

In performing the analyses outlined in this report and arriving at my opinion, I used and relied on information provided by various agencies of the Commonwealth of Pennsylvania, information obtained from issuers currently offering coverage in the Individual ACA market in Pennsylvania, financial statement information, and additional information published by various agencies of the federal government.

I used and relied on this information without independent investigation or audit. If this information is inaccurate, incomplete, or out of date, my findings and conclusions may need to be revised. While I have relied on the data provided without independent investigation or audit, I have reviewed the data for consistency and reasonableness. Where I found the data inconsistent or unreasonable, I requested clarification.

#### **Actuarial Certification**

In my opinion, the Commonwealth of Pennsylvania's proposed Section 1332 Waiver extension application complies with the following requirements:

- Scope of Coverage Requirement: The Section 1332 Waiver extension will provide coverage to at least a comparable number of the Commonwealth's residents as would be covered absent the waiver extension.
- Affordability Requirement: The Section 1332 Waiver extension will provide coverage and cost-sharing protections against excessive out-of-pocket spending that results in coverage which is at least as affordable for the Commonwealth's residents as would be provided absent the waiver extension.
- **Comprehensiveness of Coverage Requirement:** The Section 1332 Waiver extension will provide coverage that is at least as comprehensive for the Commonwealth's residents as would be provided absent the waiver extension.
- **Deficit Neutrality Requirement:** The Section 1332 Waiver extension will not increase the federal deficit.

This certification conforms to the applicable Actuarial Standards of Practice promulgated by the Actuarial Standards Board.

R

October 4, 2024

## Appendix A. Overview of Oliver Wyman's Healthcare Reform Microsimulation Model

We utilized Oliver Wyman's HRM Model to assess the impact that the proposed Section 1332 Waiver extension is expected to have on the Individual health insurance market and correspondingly the uninsured population in the Commonwealth of Pennsylvania. The HRM Model is an economic utility model that captures the flow of individuals across various markets and coverage options based on their economic purchasing decisions and is integrated with actuarial modeling designed to assess the impact various reforms are expected to have on the health insurance markets. This model is a leading-edge tool for analyzing the impact of various healthcare reforms or proposed legislation.

The HRM Model projects the number of individuals expected to seek coverage under each health insurance coverage type using economic utility functions. The decision-making process for determining which health insurance coverage type is selected is made at the health insurance unit (HIU) level, where an HIU is defined as any grouping of family members where each person within the HIU might be eligible for coverage under the same policy. One exception to this is that individuals who are identified as being eligible for Medicare, Medicaid, CHIP, and other government sponsored coverage (e.g., government workers) are assumed to retain their government sponsored coverage, and the economic utility associated with employer-based coverage, Individual market coverage, or being uninsured is only evaluated by the HRM Model for the remaining individuals within an HIU.

HIUs are generally assumed to make economically rational decisions in selecting the health insurance option that maximizes the economic utility for the HIU. The HRM Model allows for some irrational behavior, including the principle of "inertia" in HIU decision making (i.e., people are unlikely to make significant changes in their situation for relatively small changes in utility) and the assumption that not all uninsured individuals will actually shop for health insurance coverage each year.

An HIU's decision to enroll in ACA coverage is based on the lowest cost bronze, silver, or gold plan available in each rating area (RA) which provides the greatest economic value. Both on-Exchange and off-Exchange plans are made available to each HIU, with PTCs applied to eligible HIUs. The economic utilities for all members of the HIU are aggregated to develop the corresponding utility for the HIU under each health insurance option.

Individuals identified as working for private employers are randomly categorized into synthetic employer groups of varying group sizes based on the distribution of group size from the Medical Expenditure Panel Survey (MEPS). An employer-based economic utility function, which takes into account items such as the expected costs which would be incurred as a result of not offering coverage (e.g., the penalty for not offering coverage) and the benefits that would be available to an employer's employees if they were to purchase coverage in the Individual market (e.g., PTCs), determines whether a given employer will offer health insurance coverage to its employees and their dependents. If an employer offers coverage, all eligible employees and their dependents within each HIU (i.e., individuals who are not eligible for health insurance coverage through a government sponsored program) are assumed to evaluate the health insurance coverage options offered by the employer.

The decision as to whether an HIU will take up coverage in either the employer-based market, the Individual market, or choose to be uninsured is based on the result from comparing two economic utility functions. The first economic utility function calculates the utility associated with taking up coverage in either the employerbased market or the Individual market (depending on whether the employer of the primary or spouse within an HIU is modeled to offer coverage) and is a function of the premium the HIU would be expected to pay (net of employer subsidies or federal premium subsidies, respectively), any cost-sharing the HIU would be expected to pay out-of-pocket (net of any CSRs for applicable Individual market coverage), and the risk aversion of the HIU. If multiple coverage options are available (e.g., employer coverage, Individual market bronze-level coverage, Individual market silver-level coverage), the utility of each coverage option is evaluated, and the best option is selected. The second economic utility function calculates the utility associated with not taking coverage and remaining uninsured and is a function of any tax penalty the HIU would be assessed, total allowed claim costs for the HIU (assuming a reduced level of utilization due to the lack of insurance coverage), and the risk aversion of the HIU. If the utility of being uninsured is greater than the utility associated with taking up health insurance coverage, the HIU is assumed to be uninsured. Otherwise, the HIU is assumed to take up coverage in either the employer-based market or the Individual market for the coverage option that provides the maximum utility for the HIU.

## **Appendix B. Five Year Budget Period Projections**

Detailed Summary of Individual ACA Market Projections - Baseline and Waiver Scenarios

Baseline	0000	0007	0000	0000	0000
	2026	2027	2028	2029	2030
Total Individual ACA Enrollment	446,900	446,500	446,100	445,800	445,40
