SUBMITTED VIA SERFF

**RE: QCC Insurance Company, Inc.
Small Group PPO Rate Filing effective 1/1/2020
INAC-131927133**

Dear Ms. Gray:

Attached is the 2020 annual rate filing for PPO plans of QCC Insurance Company, Inc. (QCC) in the Small Group marketplace in the Commonwealth of Pennsylvania. Rates for new and renewing plans are being filed and satisfy market reform requirements of the Affordable Care Act (ACA).

This rate filing includes rates for these plans and specifies compliance with rating requirements of the ACA. The enclosed is for rating periods effective from January 1, 2019 through December 31, 2020.

The proposed rates represent a 11.9% increase over the previously approved 2019 rates.

Information for the Pennsylvania Bulletin:

1.	Company Name and NAIC Number:	QCC Insurance Company, Inc. 93688
2.	Market	Small Group
3.	On or Off Exchange	Off
4.	Effective Date of Coverage	January 1, 2020
5.	Average Rate Change Requested	11.9%
6.	Range of Rate Changes Requested	9.4% to 13.5%
7.	Total Annual Revenue Generated from the Proposed Rate Change	\$60,708,604
8.	Products	PPO
9.	Rating Areas and Change from 2019	Rating Area 8 No Change from 2019
10.	Metal Levels and Catastrophic Plans	Platinum, Gold, Silver, Bronze

Rate Change Summary

QCC Insurance Company, Inc. – Small Group Plans

Rate request filing ID INAC-131927133- This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	11.5% ¹
Revised requested average rate change:	N/A ¹
Range of requested rate change:	9.1% to 13.2%
Effective date:	January 1, 2020
People impacted:	71,592
Available in:	Area 8

Key information

Jan. 2018-Dec. 2018 financial experience

Premiums	\$506,462,339
Claims	\$360,479,052
Administrative expenses	\$65,129,741
Taxes & fees	\$30,623,261
Company made (after taxes)	\$50,230,285

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2020:

Claims:	76%
Administrative:	14%
Taxes & fees:	8%
Profit:	2%

The company expects its annual medical costs to increase **6.2%**.

Explanation of requested rate change

QCC Insurance Company ("QCC") is revising premium rates for the Pennsylvania Small Group ACA compliant products, effective from January 1, 2020.

About 72,000 members will be affected.

Financial Experience of the Product:

QCC is required by federal law to pay out a minimum of 80% percent of premium dollars for medical claims—this is referred to as the minimum Medical Loss Ratio (MLR). The rate action proposed in this filing is expected to achieve a Medical Loss Ratio of greater than 80%.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Changes in Taxes and Fees:

The Federal government suspended the Health Insurance Providers Fee for premiums due in 2019, but will be re-implementing it for premiums due in 2020. This increases 2020 premium rates.

Changes in Medical Service Costs:

Premium rates for health care insurance are increasing as the cost of health care service rise. Health care service costs increase as health care providers increase their fees, members use more health care services and supplies, and the types of health care services and supplies change, among other factors.

We are projecting that claims will increase by 6.2% in 2020. Nearly half of the change in health care service costs is driven by changes to health care provider fees.

Changes in Benefits:

Some plan benefits are mandated by federal and state law. Benefit changes for some plans were also made. All changes in benefits are in compliance with the uniform modifications rules stipulated by the Federal government.

Administrative Costs:

In addition, the Affordable Care Act (ACA) imposes taxes and other levies.

PENNSYLVANIA ACTUARIAL MEMORANDUM

PURPOSES

This Actuarial Memorandum is provided along with the Unified Rate Review Template (URRT) and PA Actuarial Memorandum Rate Exhibits to provide certain information to support the gross premium for the single risk pool for small group market health care insurance underwritten by QCC Insurance Co., Inc. in the Commonwealth of Pennsylvania. It is provided as a component of a state rate filing. This submission may not be appropriate for other purposes.

1. BASIC INFORMATION AND DATA

A. COMPANY INFORMATION

Company Legal Name:	QCC Insurance Co., Inc. ("QCC")
State:	Pennsylvania
NAIC #:	93688
Market:	Small Group
Marketplace:	Off Exchange
Effective Date(s):	1/1/2020 – 3/31/2020, 4/1/2020 – 6/30/2020, 7/1/2020 – 9/30/2020, 10/1/2020 – 12/31/2020
Average Rate Change:	11.9%
Range of Rate Changes:	9.4% - 13.5%
Products:	PPO
Rating Areas:	Rating Area 8
Metal Levels:	Platinum, Gold, Silver, Bronze
Current Members:	71,592
Current Policyholders:	9,525
Number of 2020 Plans:	19
HIOS Issuer ID (5-digit):	31609

Worksheet 1 of the accompanying URRT contains experience period data and development of the projected Single Risk Pool Gross Premium Average Rate PMPM for the small group market for QCC. Worksheet 2 contains experience period data and projections by product for the single risk pool for the same entities. This memorandum pertains only to plans denoted in Worksheet 2 by Plan IDs starting with the sequence 31609.

B. RATE HISTORY AND PROPOSED VARIATIONS IN RATE CHANGES

January 1, 2015	8.50%	INAC- 129626740
October 1, 2015	-0.30%	INAC- 130111048
January 1, 2016	6.51%	INAC- 129939280
January 1, 2017	5.00%	INAC- 130539936
July 1, 2017	2.00%	INAC- 130959332
January 1, 2018	9.41%	INAC- 131005785
July 1, 2018	0.05%	INAC- 131403779
January 1, 2019	-1.80%	INAC- 131478429
April 1, 2019	-0.09%	INAC- 131750255
July 1, 2019	-1.80%	INAC- 131860461

The historical rate changes varied by metallic tier based on plan benefits as illustrated via the Pricing AV.

Proposed rate changes may vary by metallic tier and plan based on plan benefit changes.

C. AVERAGE RATE CHANGE

The average proposed rate change shown in Cell AC15 of Table 10 is 11.9%. The changes to the single risk pool gross premium average rate per member per month (PMPM) from calendar year 2018 to calendar year 2020 are incorporated into the pricing and reflected in the Unified Rate Review Template.

The change in 21-year-old Non-Tobacco Premium PMPM calculated in Table 11, Cell AN13 is 5.3%.

D. MEMBERSHIP COUNT

Table 1 illustrates the Experience Period member-months, Current Period members as of February 1, 2019, and Projected Rating Period Member-months by ages.

E. BENEFIT CHANGES

Benefit changes were made to the following plans to assure compliance with Actuarial Value Requirements, including differences that resulted from changes to the AV Calculator. The basis for pricing changes was our internal pricing model.

F. EXPERIENCE PERIOD CLAIMS AND PREMIUMS

Table 2 illustrates the experience period claims and premiums using calendar year data. The data is consistent with the data reported in Section 1 of Worksheet I of the URRT.

Experience period premium, claims, and member months are obtained from the company's internal data warehouse. The claims data is collected for incurred dates from January through December 2018 and paid through February 2019. Earned premiums and member months are for January through December 2018. The data are for all direct-written Small group business of QCC in the Commonwealth of Pennsylvania, including out-of-network claims written by QCC but paid by QCC for POS plans. No private reinsurance was applicable.

Projected Risk Adjustment PMPM

The Non-EHB benefits portion of Allowed Claims is shown separately in cell H36 of Table 2. Capitation is uniform by age for the experience period. Net pharmacy rebates are illustrated in cell I36 of Table 2.

Projected Risk Adjustment is accounted for in Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated risk adjustment transfer amounts for the projection period. The amount reflects the projected morbidity for the single risk pool for IBCFOC in the projection period.

The estimated risk adjustment revenue for all of the plans in the risk pool is developed using the following methodology. We recognize that the HHS payment transfer formula implies that the projected incurred claims based solely on the experience period single risk pool claims need to be adjusted by the ratio of the current statewide market's risk relative to allowable rating factor (ARF) for age compared to the single risk pool's risk relative to ARF presented during the experience period. This adjustment, together with the assumed future changes in population risk morbidity, results in the issuer's pricing being consistent with the anticipated morbidity level of the future statewide market.

The anticipated risk adjustment transfer revenue is allocated proportionally based on plan premium. The Projected Risk Adjustment is subtracted from Projected Incurred Claims before ACA Risk Adjustment to reflect anticipated receipt of risk adjustment transfer amounts for the projection period.

When the projected risk adjustment amounts for QCC and Independence Blue Cross (QCC) are combined, the result is consistent with the projection made in our submission. We also considered preliminary 2018 risk transfer results.

In the URRT v5.0, it is necessary to divide Risk Adjustment by the Paid to Allowed factor when it is used in calculations based on Allowed Claims to produce calculations that are consistent with the Actuarial Memo Rate Exhibit.

G. CREDIBILITY OF DATA

The experience period data is considered 100% credible.

H. TREND IDENTIFICATION

Table 3 identifies the proposed annual medical and prescription drug allowed claims cost and utilization trends. These data match the data illustrated in Section 2 of Worksheet I of the URRT. Additional discussion is provided in Section I, Historical Experience.

We populated the URRT with the Total Annual Trend calculated in cell C52 of Table 3. The URRT requires that factors are rounded to four decimal places which results in some small differences.

I. HISTORICAL EXPERIENCE

Table 4 illustrates historical experience from 2015 through 2018 for the product line.

a. Annualized Cost Trend

Annual cost trend reflects changes in costs of medical treatment due to medical inflation and changes in the distribution of services across network providers. The trend value is developed by reviewing historical medical costs for the single risk pool and adjusting them for anticipated future provider contracting reimbursement levels. The data is normalized for changes in age, benefit changes during the experience period, changes to provider contracts, and prescription drug formulary, and new drugs brought to market.

b. Annualized Utilization Trend

Annual utilization trend reflects the change in the number of units per 1,000 members for a fixed level of illness burden and includes changes due to the mix and intensity of services provided and changes related to shifts in product mix. It also includes effects of selection, if any, since this cannot be reflected in the relative cost of the various products and plans offered.

J. TERMINATED PLANS

No plans are being terminated during 2020.

2. RATE DEVELOPMENT AND CHANGE

A. DEVELOPMENT OF PROJECTED INDEX RATE, MARKET-ADJUSTED INDEX RATE, & TOTAL ALLOWED CLAIMS

Table 5 illustrates the development of the Projected Index Rate and Market-Adjusted Index Rate beginning with the Experience Period Index Rate. Exhibit A provides additional information about the adjustment factors.

Changes in Population Risk Morbidity

Experience period allowed claims are adjusted to account for differences in the average morbidity of the single risk pool population underlying the experience and the anticipated population in the projection period. This adjustment reflects changes in the small group market-wide morbidity.

Changes in Other Factors

Experience period allowed claims are adjusted to account for differences in the single risk pool population underlying the experience and the anticipated population in the projection period pertaining to several factors not due to changes in morbidity or the costs and utilization of medical care. This adjustment reflects: additional benefits required to be covered as essential health benefits; recently mandated benefits required by state law that are not reflected in the experience period data; benefits in the experience that are removed for the projection period; anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period; changes in demographic characteristics of the single risk pool experience period population and the projection period population (including age, gender, region, and tobacco use); changes in the provider network (adding or removing a provider system or introducing a limited network option); and anticipated changes in pharmacy rebates.

We incorporated the quarterly trend methodology from Table 5A into the URRT Part 1 Worksheet 1 Section II so that the calculated MAIR in the URRT was consistent with the MAIR calculated in the Actuarial Memo Rate Exhibits. The factor is also applied in the URRT Worksheet 2 Section 3, Plan Adjustment Factors, to correctly calculate the first quarter 2020 rates.

Table 5 of the Actuarial Memorandum Rate Exhibit shows the components used in calculating change in other. The calculations of the components are based on the changes in values shown in Table 7.

B. RETENTION ITEMS

Table 6 illustrates the retention items, expressed as percentages of premium. Consistent with conversations with our State regulator, no Pricing load was applied for the Managed Care Assessment levied pursuant to Article VIII-I of the Pennsylvania Code, as it will be separately reimbursed. Federal Income Tax is calculated by applying the tax rate to the sum of the HIF plus Profit/Contingency.

Administrative Expenses		14.65%
General and Claims	8.45%	
Agent/Broker Fees and Commissions	5.40%	
Quality Improvement Initiatives	0.80%	
Taxes and Fees		5.84%
PA Premium Tax	2.00%	
Federal Income Tax	1.14%	
Health Insurance Providers Fee	2.70%	

Profit/Contingency	2.00%
Total Retention	22.49%

C. NORMALIZED MARKET-ADJUSTED PROJECTED ALLOWED TOTAL CLAIMS

Table 7 compares the normalization factors used in this filing to those used in the 2019 filing. The changes in the factors reflect small differences from the projected populations in 2019 and 2020.

D. COMPONENTS OF RATE CHANGE

Table 8 illustrates the components of rate change, based on inputs from other sections of the Rate Exhibits. The results in Row H are similar to the values in Row A of Table 8.

Data in Table 9 is consistent with the 2019 and 2020 URRT with the exceptions of Risk Adjustment and Reinsurance which were revised to project company-specific values.

3. PLAN RATE DEVELOPMENT

Table 10 is populated with plan information consistent with entries in the 2020 URRT. Plan mappings, where applicable, are illustrated in Column F of Table 10.

Attached to this actuarial memorandum are exhibits providing actuarial certifications for the use of alternate methods of calculating the Actuarial Value, where applicable, as well as required support for the calculations.

The factor "AV and Cost Sharing Design of Plan" in Worksheet 2 of the URRT is the product of the Pricing AV, the Benefit Richness Factors from the Actuarial Memo Rate Exhibit. We incorporated the first quarter factor from cell J35 of Table 5A of the Actuarial Memo Rate Exhibit. Again, please note that the URRT requires factors to be rounded to four decimal places, resulting in small differences.

4. PLAN PREMIUM DEVELOPMENT FOR 21-YEAR OLD NON-TOBACCO USER

Table 11 is populated from other sections of the Rate Exhibits, along with the population by age and rating area for the Projection Period.

5. PLAN FACTORS

Tables 12, 13, and 14 illustrate the factors used in pricing for age, tobacco, geographic rating area, and network. The tobacco factors match the previously approved tobacco factors from the 2019 filing.

6. ACTUARIAL CERTIFICATION

I, [REDACTED], am Director & Actuary of Commercial Markets for the Independence Blue Cross Family of Companies. I am a member of the Society of Actuaries and the American Academy of Actuaries with the education and experience necessary to perform the work necessary and meet the Qualification Standards of the American Academy of Actuaries to render the qualified actuarial opinion contained herein. The developed rates and memorandum have been prepared in conformity with appropriate Actuarial Standards of Practice and the Academy's Code of Professional Conduct.

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the premium rates and allowable rating factors. Rather, it represents information required by Federal regulation to be provided in support of the review of gross premium rate increases, for certification of qualified health plans for Federally facilitated exchanges, and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I hereby certify that, to the best of my knowledge and judgment, the following:

- The projected index rate is:
 - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.08(d)(1) and 147.106);
 - Developed in compliance with applicable Actuarial Standards of Practice;
 - Reasonable in relation to the benefits provided and the population anticipated to be covered; and
 - Neither excessive nor deficient.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.
- The AV Calculator was used to determine the AV Metal Values illustrated in Worksheet 2 of the Part I Unified Rate Review Template for all plans, unless an alternate methodology was required. If an alternate methodology was used to calculate the AV Metal Value for at least one plan offered, a copy of the actuarial certification required by 45 CFR Part 156, §156.135 will be included.
- All factor, benefit, and other changes from the prior approved filing have been disclosed in the actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.

URRT Part II – Consumer Friendly Justification

Scope and Range of the Rate Increase:

QCC Insurance Company ("QCC") is revising premium rates for the Pennsylvania Small Group ACA compliant products, effective from January 1, 2020. The proposed revisions to each plan are shown on the second page of this exhibit.

About 72,000 members will be affected.

Financial Experience of the Product:

QCC is required by federal law to pay out a minimum of 80% percent of premium dollars for medical claims—this is referred to as the minimum Medical Loss Ratio (MLR). The rate action proposed in this filing is expected to achieve a Medical Loss Ratio of greater than 80%.

Changes in Taxes and Fees:

The Federal government suspended the Health Insurance Providers Fee for premiums due in 2019, but will be re-implementing it for premiums due in 2020. This increases 2020 premium rates.

Changes in Medical Service Costs:

Premium rates for health care insurance are increasing as the cost of health care service rise. Health care service costs increase as health care providers increase their fees, members use more health care services and supplies, and the types of health care services and supplies change, among other factors.

We are projecting that claims will increase by 6.2% in 2020. Nearly half of the change in health care service costs is driven by changes to health care provider fees.

Changes in Benefits:

Some plan benefits are mandated by federal and state law. Benefit changes for some plans were also made. All changes in benefits are in compliance with the uniform modifications rules stipulated by the Federal government.

Administrative Costs:

The premium rates presented in this filing include a 2% contribution to reserves. Furthermore, the Affordable Care Act (ACA) imposes taxes and other levies.

GENERAL OVERVIEW

PURPOSES

This Actuarial Memorandum is provided along with the Unified Rate Review Template (URRT) to provide certain information to support the gross premium for the single risk pool for small group market health care insurance underwritten by QCC Insurance Company, Inc. in the Commonwealth of Pennsylvania. It is provided as a component of an application for certification as a Qualified Health Plan and a state rate filing. This submission may not be appropriate for other purposes.

GENERAL INFORMATION

COMPANY IDENTIFYING INFORMATION

Company Legal Name: QCC Insurance Company, Inc. ("QCC")

State: Pennsylvania

HIOS Issuer ID (5-digit): 31609

Market: Small Group

Effective Date(s): 1/1/2020-3/31/2020, 4/1/2020 – 6/30/2020, 7/1/2020 – 9/30/2020,
10/1/2020 – 12/31/2020

Worksheet 1 of the accompanying URRT contains experience period data and development of the projected Single Risk Pool Gross Premium Average Rate PMPM for the small group market for QCC. Worksheet 2 contains experience period data and projections by product for the single risk pool for the same entities.

COMPANY CONTACT INFORMATION

Primary Contact Telephone Number:

Primary Contact Email Address:

PROPOSED RATE INCREASE

The changes to the single risk pool gross premium average rate per member per month (PMPM) from calendar year 2018 to calendar year 2020 were incorporated into the pricing and reflected in the Unified Rate Review Template. The changes are driven by factors including: changes in market-wide population risk morbidity and covered services, increasing unit costs for medical services, increasing utilization of medical services, increasing fees and taxes imposed by the federal government, anticipated costs to administer the plan, and anticipated revenue or payments due to market-wide risk adjustment.

The weighted average increase across QCC plans based on projected membership, inclusive of the impact of benefit and cost sharing changes, is 11.9%. The minimum increase is 9.4% and the maximum increase is 13.5%.

WORKSHEET 1: MARKET EXPERIENCE

SECTION I: EXPERIENCE PERIOD DATA

SINGLE RISK POOL

The single risk pool reflects all covered lives for every small group non-grandfathered product and plan combination for KHPE in the state of Pennsylvania. It is established according to the Single Risk Pool requirements in 45 CFR § 156.80(d).

PAID THROUGH DATE

Experience period premium, claims, and member months are obtained from the company's internal data warehouse. The claims data is collected for incurred dates from January through December 2018 and paid through February 2019. Earned premiums and member months are for January through December 2018. The data are for all direct-written small group business of KHPE in the Commonwealth of Pennsylvania.

PREMIUMS IN EXPERIENCE PERIOD

Earned Premiums in the Experience Period are developed by summing the earned premium reported in the company's internal data warehouse.

ALLOWED AND INCURRED CLAIMS INCURRED DURING THE EXPERIENCE PERIOD

Paid-to-Date and Incurred Claims, and Member Months

Insurer fee-for-service claims expenses and member liabilities for dates of service in January 2018 through December 2018 and paid through February 2019 are sourced from the IBCFOC's internal data warehouse. The claims and member liabilities are completed with incurred but not reported (IBNR) adjustments to develop ultimate incurred insurer fee-for-service claims expenses and member liabilities for the January through December 2018 period. Capitation amounts are also sourced from the internal data warehouse for the January through December 2018 period but they are not adjusted for IBNR.

Allowed Claims

Allowed claims are determined by separately obtaining paid-to-date fee-for-service claims and member cost-sharing amounts, applying claim lag factors to those amounts to estimate ultimate incurred fee-for-service claims and member-sharing amounts and adding them together with capitation amounts.

Allowed claims do not include ineligible claims, payments for services other than medical care provided, recovery payments related to internal large claim pooling mechanisms, or active live reserves.

IBNR Development

Medical fee for service incurred but not reported (IBNR) claims are modeled through the use of standard claim lag methodologies. A range of results is developed, and a provision for adverse deviation is applied. The provision for adverse deviation is dependent on many factors such as stability, size, product mix, etc.

The completion factors are developed annually in the 2Q – 3Q period. We do not believe our IBNR is unusually high or unusually low for incurred 2018 paid through February 2019.

Experience Period Index Rate

The Index Rate of Experience Period is estimated by removing cost and utilization trend from the Index Rate for Projection Period.

SECTION II: PROJECTIONS

BENEFIT CATEGORIES

Experience Period Index Rate PMPM Data is provided in Section II. The data is provided by benefit category using a standardized indicator from the internal data warehouse that assigns each claim line to a category based on the type of provider and the location of the service.

PROJECTION FACTORS

The estimated incurred claims experience on an allowed basis for January 2018 through December 2018 is projected to the future rating period by several factors.

Morbidity Adjustment

Experience period allowed claims are adjusted to account for differences in the average morbidity of the single risk pool population underlying the experience and the anticipated population in the projection period. This adjustment reflects changes in the small group market-wide morbidity.

Demographic Shift

This factor reflects the projected change in the average age, rating area, and tobacco utilization of the single risk pool.

Plan Design Changes

This factor reflects any changes in EHB allowed claims due to plan design changes.

Other Changes

This factor reflects changes in cost related to items other than changes in Morbidity, Demographic Shift, or Plan Design.

Trend Factors

a. Annualized Cost Trend

Annual cost trend reflects changes in costs of medical treatment due to medical inflation and changes in the distribution of services across network providers. The trend value is developed by reviewing historical medical costs for the single risk pool and adjusting them for anticipated future provider contracting reimbursement levels. The data is normalized for changes in age, benefit changes during the experience period, changes to provider contracts, and prescription drug formulary, and new drugs brought to market.

b. Annualized Utilization Trend

Annual utilization trend reflects the change in the number of units per 1,000 members for a fixed level of illness burden and includes changes due to the mix and intensity of services provided and changes related to shifts in product mix. It also includes effects of selection, if any, since this cannot be reflected in the relative cost of the various products and plans offered.

c. Quarterly Premium Trend

Rates for second, third and fourth quarters increase by 1.5% each quarter.

CREDIBILITY MANUAL RATE DEVELOPMENT

The experience period claims for the single risk pool are determined to be fully credible; therefore no credibility adjustment is required.

RISK ADJUSTMENT AND REINSURANCE

Projected Risk Adjustment PMPM

Projected Risk Adjustment is accounted for in Projected Incurred Claims before ACA Reinsurance and Risk Adjustment to reflect anticipated risk adjustment transfer amounts for the projection period. The amount reflects the projected morbidity for the single risk pool.

The estimated risk adjustment revenue for all of the plans in the risk pool is developed using the following methodology. We recognize that the HHS payment transfer formula implies that the projected incurred claims based solely on the experience period single risk pool claims need to be adjusted by the ratio of the current statewide market's risk relative to allowable rating factor (ARF) for age compared to the single risk pool's risk relative to ARF presented during the experience period. This adjustment,

together with the assumed future changes in population risk morbidity, results in the issuer's pricing being consistent with the anticipated morbidity level of the future statewide market.

The anticipated risk adjustment transfer revenue is allocated proportionally based on plan premium. The Projected Risk Adjustment is subtracted from Projected Incurred Claims before ACA Risk Adjustment to reflect anticipated receipt of risk adjustment transfer amounts for the projection period.

When the projected risk adjustment amounts for KHPE and QCC are combined, the result is consistent with the projection made in our submission. We also considered preliminary 2018 risk transfer results.

MARKET ADJUSTED INDEX RATE

The template calculates a MAIR by subtracting the amounts entered for reinsurance and risk adjustment and dividing by 1 minus the exchange user fee percentage. The MAIR calculation flows into Worksheet 2.

The Market Adjusted Index rate is calculated as the Index Rate adjusted for all allowable market-wide modifiers defined in the market rating rules: federal reinsurance program adjustment, risk adjustment and exchange user fees. The Market Adjusted Index Rate reflects the average demographic characteristics of the single risk pool.

WORKSHEET 2: PRODUCT-PLAN DATA COLLECTION

SECTION I: GENERAL PRODUCT AND PLAN INFORMATION

All products and plans included in the single risk pool are shown in Worksheet 2.

AV METAL VALUES

The AV Metal Values included in Worksheet 2 of the URRT were valued using the AV Calculator, where possible, otherwise the AV Metal Values were developed under an alternate methodology. Actuarial certifications required by 45 CFR Part 156, §156.135 are provided in a separate document.

SECTION II: EXPERIENCE PERIOD AND CURRENT PLAN LEVEL INFORMATION

Experience Period data is shown for each plan included in the single risk pool.

SECTION III: PLAN ADJUSTMENT FACTORS

The MAIR is adjusted for each plan based on its plan design, provider network, and non-EHBs. Administrative costs are added to calculate the Plan Adjusted Index Rate. The Plan Adjusted Index Rate

is multiplied by the Age Calibration Factor, Geographic Calibration Factor, and Tobacco Calibration Factor to calculate the Calibrated Plan Adjusted Index Rate.

PLAN ADJUSTED INDEX RATE

The Plan Adjusted Index Rate is calculated as the issuer Market Adjusted Index Rate adjusted for all allowable plan level modifiers defined in the market rating rule. These include actuarial value and cost sharing adjustment, provider network, delivery system and utilization management adjustment, adjustment for benefits in addition to the EHBs, impact of specific eligibility categories for the catastrophic plan and administrative costs.

NON-BENEFIT EXPENSES AND PROFIT & RISK

Administrative Expense Load

An Administrative Expense Load is applied to Projected Incurred Claims to reflect expenses related to quality improvement and fraud detection/recovery and other expenses of operating a business, broker commissions, and premium payment processing fees.

Profit & Risk Load/Contribution to Surplus

A Profit & Risk Load/Contribution to Surplus for the single risk pool is applied to Projected Incurred Claims for the projection period, if applicable.

Taxes and Fees

A Taxes & Fees load is applied to Projected Incurred Claims to pass through fees and taxes levied by the federal and state governments.

CALIBRATION

The plan adjusted index rate is projected for all products using the same anticipated age distribution and the mandated age curve. Therefore the consumer adjusted premium rate is the plan adjusted index rate divided by the average age, geographic and tobacco factors for the expected distribution. The average age of the combined small group risk pool population is 36.

The Average Age factor is the reciprocal of the weighted average age factor based on the projected membership. The Tobacco Factor is calculated as the reciprocal of the projected average factor for tobacco users multiplied by the projected tobacco use prevalence.

There is only one geographic rating area for this filing. The geographic rating area factor for this filing is 1.0.

Small differences result between the Calibrated Plan Adjusted Index rates and the Age 21 non-tobacco rates in the Rate Template due to rounding restrictions required in the URRT Part 1.

When rounded to the nearest dollar, the Calibrated Plan Adjusted Index Rates match the Age 21 non-tobacco rates in the Rate Template as required in the DIT.

MEMBERSHIP PROJECTIONS

Enrollment is projected based on current and anticipated enrollment by plan. Items impacting these projections include changes in the size of the market due to guarantee issue requirements and the individual mandate changes. The enrollment is our February 2019 enrollment.

LOSS RATIO

The loss ratio calculated in Section IV is generated within the template and is not based on the MLR formula. The projected loss ratio for the single risk pool is estimated to exceed 80% reflecting premium adjustments permitted by the federal MLR calculation.

INDEX RATE

The Index Rate is defined as the EHB portion of projected allowed claims divided by all projected single risk pool lives. The Index Rate is the same value for all non-grandfathered plans for KHPE Small Group Plans in Pennsylvania. The Index Rate reflects the twelve month projection for calendar year 2020. It has been developed following the specifications of 45 CFR § 156.80(d)(1).

TERMINATED PLANS

No plans are being terminated during 2020.

WORKSHEET 3: RATING AREAS

There are nine rating areas in Pennsylvania. These plans are offered only in Rating Area 8, which consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia counties.

ACTUARIAL CERTIFICATION

I, [REDACTED], am Director & Actuary of Commercial Markets for the Independence Blue Cross Family of Companies. I am a member of the Society of Actuaries and the American Academy of Actuaries in good standing with the education and experience necessary to perform the work necessary and meet the Qualification Standards of the American Academy of Actuaries to render the qualified actuarial opinion contained herein. The developed rates and memorandum have been prepared in conformity with appropriate Actuarial Standards of Practice and the Academy's Code of Professional Conduct.

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the premium rates and allowable rating factors. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Exchanges, and for certification that the Index Rate is developed in accordance with federal regulation and used consistently and only adjusted by the allowable modifiers.

I hereby certify that, to the best of my knowledge and judgment, the following:

- The projected index rate is:
 - In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102);
 - Developed in compliance with applicable Actuarial Standards of Practice;
 - Reasonable in relation to the benefits provided and the population anticipated to be covered; and
 - Neither excessive nor deficient.
- The index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.
- Geographic rating factors reflect only differences in the costs of delivery of and do not include differences for population morbidity by geographic area.
- The percent of total premium that represents EHB included in the Part I Unified Rate Review Template, Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans, unless an alternate methodology was required. When an alternate methodology was used to calculate the AV Metal Value a copy of the actuarial certification required by 45 CFR Part 156, §156.135 was included.

Unique Plan Design Supporting Documentation and Justification

ACTUARIAL MEMORANDUM

HIOS Issuer ID: 31609

HIOS Product IDs: 31609PA015

Applicable HIOS Plan IDs (Standard Component): 31609PA0150025, 31609PA0150026, 31609PA0150027, 31609PA0150028, 31609PA0150047, 31609PA0150049, 31609PA0150048, 31609PA0150029

Purpose of document:

The purpose of this document is to provide CMS with a justification of the methods used in calculating the actuarial value for unique plan designs offered in the individual or small group market for the plan year beginning 1/1/2020. As prescribed by law, the AV calculation was based on the AV calculator to the full extent possible. The AV is meant to represent the average percent of costs paid by the insurer for a standard population and may vary from actual member experience. The resulting AV was based on prescribed methodology and, therefore, may not reasonably reflect the actuary's estimate of the portion of allowed costs covered by the health insurance plan. The AV was determined based on the plan's benefits and coverage data, the standard population, and utilization and continuance tables published by HHS for purposes of the valuation of AV. This actuarial analysis is not appropriate for any other purposes.

Reasons the plan design is unique (benefits that are not compatible with the parameters of the AV calculator and the materiality of those benefits):

The cost-sharing for laboratory outpatient and professional services varies by site of service. Lab work done at the office or a free-standing facility has zero cost-sharing, while lab work done by a hospital has 50% coinsurance after deductible (if applicable). Laboratory outpatient and professional services account for roughly 3% of allowed costs in the AV calculation.

The cost-sharing for occupational and physical therapy varies by site of service. Occupational and physical therapy accounts for roughly 2% of allowed costs in the AV calculation.

The cost-sharing for x-rays and diagnostic imaging varies by site of service. X-rays and diagnostic imaging accounts for roughly 4% of allowed costs in the AV calculation.

The cost-sharing for imaging (CT/PET scans, MRIs) varies by site of service. Imaging accounts for roughly 2% of allowed costs in the AV calculation.

31609PA0150028, 31609PA0150047, 31609PA0150048, and 31609PA0150029 have cost-sharing for outpatient facility fee which varies by site of service. Outpatient facility fee accounts for roughly 12% of allowed costs in the AV calculation.

Acceptable alternate method used per 156.135(b)(2) or 156.135(b)(3):

Method 156.135(b)(2) was used for laboratory (for plans with no deductible), x-rays, imaging, and outpatient facility site of service cost-sharing.

Method 156.135(b)(3) was used for laboratory site of service cost-sharing (for plans with deductibles).

Confirmation that only in-network cost-sharing, including multitier networks, was considered:

I confirm that only in-network cost-sharing was considered.

Description of the standardized plan population data used:

For the freestanding and hospital utilization data for outpatient facility, we used our commercial PPO and HMO data incurred between July 2017 and June 2018.

For the physical therapy and radiology site-of-service utilization, we used our commercial PPO data incurred between July 2017 and June 2018.

For the freestanding and hospital utilization data for laboratory services, we used our commercial PPO data incurred between July 2017 and June 2018.

If the method described in 156.135(b)(2) was used, a description of how the benefits were modified to fit the parameters of the AV calculator:

Laboratory Site-of-service Differential for Plans with No Deductible

For the lab site of service cost-sharing, our recent data suggested that 20% of units are at a hospital setting with an average unit cost of \$52.82, while 80% of units are at a freestanding setting with an average unit cost of \$19.08. Taking a weighted average of a 50% issuer coinsurance applied to \$52.82 and a 100% issuer coinsurance applied to \$19.08 produced an average issuer paid amount of \$20.29 out of an average cost of \$24.63, giving an effective issuer coinsurance of 82.4% which was entered into the AV calculator.

Occupational and Physical Therapy Site-of-service Differential

For the physical therapy site of service cost-sharing, our recent data indicated that 88 % of utilization came from the preferred site. The cost-sharing entered into the AV calculator is a weighted average of the copays at each site.

X-rays and Diagnostic Imaging Site-of-service Copay Differential

For the x-ray site of service cost-sharing, our recent data indicated that 45% of utilization came from the preferred site. The cost-sharing entered into the AV calculator is a weighted average of copays based on utilization at each site.

X-rays and Diagnostic Imaging Site-of-service Coinsurance Differential

For the x-ray site of service cost-sharing, our recent data indicated that 20% of claims came from the preferred site. The cost-sharing entered into the AV calculator is a weighted average of coinsurance based on claims at each site.

Imaging (CT/PET scans, MRIs) Site-of-service Copay Differential

For the imaging site of service cost-sharing, our recent data indicated that 45% of utilization came from the preferred site. The cost-sharing entered into the AV calculator is a weighted average of copays based on utilization at each site.

Imaging (CT/PET scans, MRIs) Site-of-service Coinsurance Differential

For the imaging site of service cost-sharing, our recent data indicated that 25% of claims came from the preferred site. The cost-sharing entered into the AV calculator is a weighted average of coinsurance based on claims at each site.

Outpatient Facility Fee Site-of-service Differential

For the outpatient facility site of service cost-sharing, our recent data indicated that 80% of outpatient facility claims came from the hospital setting.

The cost-sharing entered into the AV calculator is a weighted average of the coinsurance at a hospital and the coinsurance at an ambulatory surgery center.

HIOS ID	Service Type	Cost-sharing		AV Input
		Preferred Site	Non-preferred Site	
31609PA0150025	Phys. Ther.	\$20	\$50	\$23.60

	Imaging	70%	50%	55%
	OP Facility	70%	50%	54%

If the method described in 156.135(b)(3) was used, a description of the data and method used to develop the adjustments:

Laboratory Site-of-service Differential for Plans with Deductible

For the lab site of service cost-sharing, our recent data indicated that 20% of lab claims came from the hospital setting.

Using the AV calculation resulting from method 156.135(b)(2), two separate AVs were calculated; the first AV was calculated with zero lab cost-sharing to reflect lab work done by at an office or free-standing facility, and the second AV was calculated with 50% coinsurance after deductible to reflect lab work done by a hospital. The final AV for the plan was then calculated by taking a weighted average of the two AVs using the utilizations by lab site. The following exhibit details this calculation.

HIOS ID	AV		
	Free-standing	Hospital	Average
31609PA0150028	79.87%	78.53%	79.60%
31609PA0150047	80.73%	79.05%	80.39%
31609PA0150049	72.29%	70.47%	71.93%
31609PA0150048	71.94%	70.02%	71.56%
31609PA0150029	72.25%	70.57%	71.91%

Utilization	80%	20%
-------------	-----	-----

Certification Language:

The development of the actuarial value is based on one of the acceptable alternative methods outlined in 156.135(b)(2) or 156.135(b)(3) for those benefits that deviate substantially from the parameters of the AV Calculator and have a material impact on the AV.

The analysis was

(i) conducted by a member of the American Academy of Actuaries; and

(ii) performed in accordance with generally accepted actuarial principles and methodologies.

I am an employee of the issuer, I meet the *Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States* promulgated by the American Academy of Actuaries, and I have the education and experience necessary to perform this work. All AVs herein were determined in accordance with the ASOPs established by the Actuarial Standards Board and comply with applicable laws and regulations; furthermore, all metal levels herein were appropriately assigned based on applicable law.

Actuary signature: _____

Actuary Printed Name: _____

Date: _____ 5/21/2019

AV screenshots redacted.

No change was assumed.

The change in demographics was calculated considering changes to age, geography, and tobacco use.

The change in the average age was measured by comparing the average age factor calculated in this filing, based on February 2019 enrollments, to the average age factor calculated for the prior annual filing.

	2019 Filing	2020 Filing	Change
Age Factor	1.494	1.512	1.013
Change from geography: No change			1.000
Change from tobacco use: No change			1.000
Total change			1.013

No changes were assumed for this filing.

The network factors used in Table 10 are based on the network differentials from the prior filing.

The network factor used for PPO was 1.000.

The network factor used for EPO was 0.950.

The factors used in Table 10 recalibrate the values so that the differentials between the factors remains constant, and the composite factor equals 1.000.

Table 10 factors:	PPO	1.000
	EPO	0.950

1. **The updated URR instructions requires the quantitative impact of rate increase drivers. Please estimate the impact to the rate increase of each of the drivers described on page 1 of the Part III memorandum.**

The information is shown in Tab #1 of the attached worksheet.

2. **The updated URR instructions require an explanation of how morbidity was removed from impacting the variations in rate increases. Please provide this explanation and provide a quantitative demonstration of the variation in rate increase by plan.**

We have held our rate increases constant by plan design across the single risk pool except for differences in changes in cost sharing between plan design. In this way the morbidity impact by plan was removed from the rate increases because if the plans had the same benefit changes, they would have received the same rate increase regardless of what their plan specific experience was. Please note that the benefit changes made resulted in reductions to the Pricing AVs.

Please also see our response to question 33 for more details of these calculations.

3. **Was transitional business included in the experience period?**

QCC has no transitional business in the Small Group market.

4. **Please correct several sections of the part III memorandum that refer to individual instead of small group.**

We have made these corrections.

5. **Please confirm that the experience period premiums on the URRT do not reflect any MLR rebates.**

Confirmed, there are no MLR rebates reflected in the experience period premiums.

6. **For both the allowed and incurred claims in the experience period, please provide the three components referenced in the Part III memo:**
 - a. **The amount of claims that were processed through the claims system;**
 - b. **The amount of claims processed outside of the company's claims system; and**
 - c. **The best estimate of claims incurred but not paid as of the paid through date.**

This information is shown in Tab #6 of the attached worksheet. It is also found in Table 2 of the AM Exhibit.

7. **As required by the URR instructions, the Part III memorandum must state any scheduled small group quarterly trend adjustments to the index rate.**

We have added this information to the Part III memorandum.

8. **Are trends adjusted due to fluctuation in large claim amounts? If so, please explain how.**

Since we consider this block to be fully credible on its own, no adjustments were made for large claims.

9. If adjustments are made for large claim pooling, was the federal risk adjustment program considered?

No, because no adjustments were made for Large claims there was no need to adjust risk adjustment

10. The URR instructions specify the projected index rate should reflect the 1Q2019 index rate, not the member weighted index rate as in the past. Please correct.

We followed the URR instructions as well as the PA instructions and believe our methodology is appropriate.

11. Please provide quantitative support for the 1.023 “Other” adjustment shown in the URRT, worksheet 1, cell F35. Please explain why it differs from the combined effect of the 1.006 network factor and the 1.000 “Change in Other” factor in the PAAM Exhibits.

This is shown in Tab #11 of the attached spreadsheet. It incorporates the quarterly adjustment from Table 5a in the PAAM Exhibits to calculate the MAIR consistent with the PAAM Exhibits.

12. Please provide substantial quantitative support for the development of the projected risk adjustment, and identify how the relative risk compared to the market was determined.

Information is shown in Tab #12 of the attached worksheet.

13. Please explain the discrepancy in the Adjusted Projected Allowed EHB Claims between Table 5 Cell C42 and URRT Worksheet 1 Cell F36.

The URRT restricts the number of decimal places that can be used in calculations which resulted in a rounding difference.

14. Regarding the Risk Adjustment Data Validation process (RADV):

- a. Please describe any considerations and provide quantitative support for any adjustments made due to the Risk Adjustment Data Validation process (RADV), or confirm that no such adjustments were made.**

Confirmed that no adjustment was made for RADV in this filing.

- b. As you know, CMS is performing a risk adjustment validation starting with 2017 risk adjustment data. We are considering allowing an estimate of the impact of risk adjustment modifications in rate filings as an adjustment to the projected risk adjustment. Before implementation, we are soliciting feedback from our issuers on the pros and cons of the inclusion of this adjustment. If allowed, all issuers would be required to submit an estimate. The estimate may be \$0. Please provide any feedback that you would like us to consider.**

Independence is open to submitting an estimate of the impact of RADV on projected risk adjustments, but we have several concerns:

- Commercial RADV is still a fairly new and evolving process. Carriers do not have sufficient information to accurately estimate the RADV impact.

- Without releasing carriers' proprietary information, it will be difficult to determine if RADV impact is due to a systemic risk score reporting issue or due to one-time bad audit. In the case of latter, carriers should not expect this experience to be reflective of the future.

Our preference remains to not include an adjustment.

15. The Pricing AV's shown in Table 10 of the PAAM exhibits, which do not include the CSR load or induced demand, are larger than the Metal AV in the URRT for all plans. What is driving these differences?

Please note that the metal AV is to determine compliance with Actuarial Value and is not a Pricing AV. The metal AV is based on the AV calculator which is calibrated to national average costs. The Philadelphia market is significantly more expensive than the national average from a cost of services standpoint. This means that the same deductible or copay is worth significantly less as a percentage of total allowed cost in the Philadelphia market compared to the national average. This leads to higher Pricing AVs for the same metal level. Please also refer to our response for question 19.

16. Please provide quantitative support for the Pricing AV's as shown in Table 10 of the PAAM exhibits, explain how they were developed, and explain how you ensure that the factors do not reflect morbidity differences between the enrolled populations.

The information is shown in Tab #16 of the attached worksheet. The morbidity impact by plan has been removed from the rate increases. Without the benefit changes, the plans would have received the same rate increase regardless of what their plan specific experience was.

17. In support of the figures shown in Table 10, Column L, please complete the worksheet shown on page 15 of the Department's guidance as well as providing the following information related to the worksheet:

- Please confirm that the ratio in Column (9) represents the pure induced utilization for each plan.**
- Please show quantitatively, including an Excel spreadsheet with formulas, the derivation of the AV and cost sharing factors for each plan. Please note that it is assumed that the AV and cost sharing factor includes the average tobacco factor.**
- Please provide any additional justification for induced utilization assumptions in the Company's pricing.**
- Please confirm that each plan's induced utilization factor was normalized by an aggregate factor, and that the resulting sum product (against 2/1/2019 membership or the projected membership distribution) produces**
- Please quantitatively demonstrate the calculation of the induced calibration factor.**
- Please quantitatively show and provide a detailed description of how the induced demand factor shown in Table 7 relates to the induced utilization factors calculated in this exhibit.**

Information is shown in Tab #17.

We confirm that the value represents the factor for each plan. They are equal to the values shown in Table 10 for each plan.

Table 10 demonstrates that when weighted by 2/1/2019 membership that the induced utilization factors composite to 1.000.

It is unclear what is being requested about an induced calibration factor. However, as noted above, the induced utilizations composite to 1.000.

The induced demand factor shown in Table 7 is the composite of the induced demand factors in Table 10 of 1.000. We do not anticipate a change to our single risk pool costs from induced demand in 2020.

18. Please explain why some gold and silver plans have lower induced demand factors than some bronze plans.

Consistent with prior years, our 2020 induced demand factors do not differ from our approved 2019 induced demand factors in order to preserve the rate relationship we currently have in the market. We maintained the same relationship used in the 2019 annual filing, and re-normalized them so that the composite factor would be 1.000.

19. Given the 1.01 factor shown for “Benefits in addition to EHB” in cell M15 of Table 10, please explain what non-EHB benefits were included and how the adjustments in the PAAM Table 10 were developed. I note that no non-EHB claims are shown in Cell H36 of Table 2.

This information is shown in Tab #19.

20. Regarding Table 6:

- a. We have repurposed row 54 to capture RA User Fees. Please provide the RA User Fee percentage and pmpm amount in cells C54 and D54, and identify where the risk adjustment user fees are currently included in the URRT and in the PAAM. Note the URR instructions specify that these fees are to be included in Taxes & Fees and not with the risk adjustment transfers on the URRT.**

At the direction of the state’s reviewer, we revised these cells to produce an RA User Fee of \$0.18 and removed that amount from the Risk Adjustment, resulting in no change to the proposed rates.

- b. Using financial data based on nationwide market share, please provide the quantitative development of the HIT percent and pmpm.**

Insufficient time was provided to produce an answer for this question, so we were unable to respond.

- c. Provide the actual paid HIT fees on a pmpm and percent of premium basis for calendar years 2018 and 2016.**

Insufficient time was provided to produce an answer for this question, so we were unable to respond.

21. Please provide the quantitative development of the 2.7% for health insurer fee.

The health insurer fee was expected to be in the range of 2-3%. We used our estimate of 2.7% in setting the rates.

- 22. Please show the quantitative development of the Age Calibration Factor of 1.512 which appears in Table 10, Cell T4.**

The information is shown in Tab #22 of the attached worksheet.

- 23. Please show the quantitative development of the Tobacco Calibration Factor of 1.013 which appears in Table 10, Cell T6.**

The information is shown in Tab #23 of the attached worksheet.

- 24. Please provide the estimated 2020 federal MLR calculation showing all adjustments.**

The information is shown in Tab #24 of the attached worksheet.

- 25. The Actuarial certification in the Part III Actuarial Memorandum appears to be based on last year's URRT and instructions. For example, it refers to "the percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV," which is not part of the current URRT. Please revise the certification consistent with this year's URR instructions.**

We have updated the actuarial certification.

- 26. Please provide the requested data in Table 4, Columns J and K of the PAAM exhibits, or explain why this data is not available.**

We did not provide this in our 2019 filing.

- 27. Please support the weights shown in Table 3, Column J, and provide the actual weights by service category generated by the 2018 experience.**

These weights are consistent with the weights used by benefit type in the URRT and they were obtained from our internal data warehouse." Tab #27 converts these to \$ by multiplying the PMPMs in the URRT by MMOS.

- 28. Please show the quantitative development of the Federal Income Tax figure shown in Table 6.**

The information is shown in Tab #28 of the attached worksheet.

- 29. In Table 10, please provide the DOH Approval Date for each network.**

We have added this information to Table 14.

- 30. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to the 50% coinsurance for that category.**

There are two Bronze plans. One has 50% coinsurance after deductible and the other has 0% coinsurance after the deductible.

- 31. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost pmpms for calendar years 2015-2018, as applicable.**

Insufficient time was provided to produce an answer for this question, so we were unable to respond.

- 32. Please provide an exhibit showing the actual experience for calendar years 2014 – 2018 and the projections for 2019 and 202 for the following categories: Member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy. Also show how the financial gains and losses reconcile with the Annual Financial Statements for those periods.**

Insufficient time was provided to produce an answer for this question, so we were unable to respond.

- 33. Please provide an exhibit that shows, by HIOS Plan ID, a summary of benefit and cost sharing changes for 2020 relative to the 2019 design for all plans to be offered in 2020. Include Pricing AV columns for 2019 and 2020. Please show the approved 2019 Pricing AVs for all plans in the 2019 column and the proposed 2020 Pricing AVs in the 2020 column. Also, provide a supporting worksheet that shows the quantitative development of the proposed factors in Table 10, in support of the overall change in benefits factor shown in Table 5.**

This information is shown in Tab #33.

- 34. Please confirm that you have tested to ensure that the PID rate exhibits and the Federal rates template included in this filing and in the binder are all the same.**

We confirmed that this is correct.

QCC Small Group	2020	2019	Change
Change in Morbidity	1.00	1.00	0.00%
Taxes and Fees	5.84%	2.52%	3.32%

1. Please clarify how the Actual vs. Expected Experience was calculated in Table #1 submitted with your response, and indicate how this change percentage relates to the Projected Allowed Claims and other components of the rate change shown.

In the previous response we were using the Actual to expected to include all items of the rate increase not included in the prior portions of the exhibits. We have re-labeled that section as the “residual difference” and we have also updated the rate increase to match our re-filing due to risk adjustment results released on June 28, 2019. This residual difference is now quite small (Only 1.30% in this filing).

2. Your response to item 6 of our previous objections shows no incurred but not paid claims for allowed claims. Please explain or correct.

We did not include completion in the allowed claims, only in the incurred claims. We have adjusted all exhibits to include the value of completion in the allowed claims.

Please note that in the rate build up, the utilization trend was adjusting for this, so we have lowered the utilization trend so that the rates match what was previously filed.

We have updated our response for item 2 of this objection to clarify the components.

3. The total allowed and incurred claims shown in your response to item 6 of our previous objections are \$444,965,274 and \$376,438,276 respectively. These amounts are greater than the \$434,762,544.21 and \$360,479,052.22 shown in the URRT. Please explain or correct.

The claims in the URRT include Pharmacy rebate amounts. The response to item 5 of our previous objection did not include Pharmacy rebate amount. The difference between the two is the value of the pharmacy rebate, which can be found on Table 2 of the AM exhibits. We have updated our response for item 2 of this objection to clarify the components.

4. Please clarify your response to item 10 of our previous objections. Your response to item 11 of our previous objections makes clear that the projected index rate in the URRT is adjusted by the weighted average of the quarterly trend factors and therefore is not the 1Q2019 index rate. Please explain how this is consistent with the URR instructions, which state, “For annual filings, this should be the Index Rate that applies for the first quarter” or remove the trend adjustment from the “Other” adjustment.”

The projected index rate in the URRT is on a first quarter basis. Please compare the PAAM exhibits table 5 versus the URRT Worksheet 1. You will notice that the index rate in C37 of table 5 from the state exhibits match the Index rate in the URRT. Therefore, we have set the URRT to a first quarter basis otherwise those numbers would not match. Please also note that the rates in the URRT on Worksheet 2 match the 1Q rates in the PAAM on Table 11 column AC.

5. Regarding your response to item 17 of our previous objections, please revise or provide substantial support for the induced utilization factors. The differences in the factors between metal levels is substantially greater than the induced utilization factors used in the risk adjustment model.

Please see the attached exhibits.

6. Regarding your response to item 18 of our previous objections, the fact that it is the same as was used last year is not adequate justification for some gold and silver plans having lower induced demand factors than some bronze plans. Please provide further justification.

Thank you for clarifying this question. It appears that the concern is more specifically why does Personal Choice PPO Bronze HSA-0 \$6,750/100% have a higher induced demand factor than some of the Silver and Gold plans. We have found that plans with 100% coinsurance tend to have higher induced demand than plans that have some coinsurance attached. For example, the Personal Choice PPO Bronze HSA-0 \$5,200/50% has a lower induced demand factor even though the out of pocket max for the two plans are the same.

The existence of the 100% coinsurance also makes the induced demand of that plan higher than the Personal Choice PPO Silver Secure \$4,500/\$35/\$70/\$600, the Personal Choice PPO Gold HSA-25 \$2,600/80% and the Personal Choice PPO Silver Classic \$4,750/\$50/\$100/90%. It should be noted that all of those plans are richer than the Personal Choice PPO Bronze HSA-0 \$6,750/100% from a benefit standpoint, and that is why they have higher premiums than the Personal Choice PPO Bronze HSA-0 \$6,750/100%, because they have a higher pricing AV, but they have a lower induced demand expectation.

7. Regarding your response to item 19 of our previous objections, were the same non-EHB benefits in your plans during the experience period? If so, please explain why 1.01 is a reasonable estimate of the impact of non-EHB benefits given that there were no non-EHB claims during the experience period according to Table 2. Also you did not respond to the part of item 19 that asked how the adjustments in the PAAM Table 10 were developed. Please include this in your response.

We have updated Table 2 to show the non-EHB in the experience period.

8. Please provide responses to items 20.b,20.c, 31, and 32 of our previous objections.

Please see the response to question 8 for the response to 20 b., 20 c.

Regarding questions 31 and 32, We do not have this data readily available at the level that is being requested, therefore we are unable to provide a response to these two questions. We also view this data as proprietary, and since the filing responses are made public, we think it would be inappropriate to provide this information if it were readily available.

9. Your response to item 21 of our previous objections did not provide a quantitative development or any explanation of how the 2.7% estimate for the health insurer fee was determined. Please provide support for this estimate.

Please see the attached exhibits.

10. Regarding your response to item 22 of our previous objections, please explain how the Age Calibration Factor reflects members with \$0 premium due to the requirement to charge premium for no more than three children.

The impact of members with \$0 premium due to requirement to charge premium to no more than three children is not included in the age calibration factor. We do not anticipate the percentage of children with \$0 premium increasing or decreasing, so there was no need to make an adjustment for this item.

The impact of \$0 premium is about 0.9% we would have collected 0.9% more premium if children in families with more than three children were required to pay premium. (Christa has confirmed that the 0.9% is still valid based on 2019 enrollment)

11. Where is the RA User Fee reflected in your response to item 24 of our previous objections?

We have updated this exhibit after we moved the RA user fee into taxes.

12. Table 6 of “2020_SmGrp_QCC_PAAMExhibits_061819.xlsm” shows taxes and fees totaling 5.87% including .03% for the RA User Fee. Cell E54 of Worksheet 2 of the URRT shows 5.84%. Table 5 of “2020_SmGrp_KHPE_PAAMExhibits_061819.xlsm” shows Projected Risk Adjustment PMPM of -\$14.22, while cell D81 of Worksheet 2 of the URRT shows \$0.18 less (i.e. -\$14.40). This suggests that the RA User Fee was included in risk adjustment in the URRT rather than in taxes and fees. If so, please provide a corrected URRT.

We have updated the URRT.

13. Regarding your response to item 25 of our previous objections, please address the following:

a. The revised Actuarial Certification does not include a certification that the percent of total premium that represents EHB included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.

We have updated the actuarial certification.

b. The last sentence of the revised Actuarial Certification begins, “If an alternate methodology was used to calculate the AV Metal Value for at least one plan offered” Either alternate methodology was used or it was not. Also, it states, “a copy of the actuarial certification required by 45 CFR Part 156, §156.135 will be included” when in fact it has already been included in the initial filing. Please clarify the certification.

That statement is saying that some plans used an alternate methodology and some plans did not. For the plans that used an alternate methodology we provided the required certification.

We have reworded that statement to say, “...when an alternate methodology was used to calculate the AV metal value then a copy of the actuarial certification required by 45 CFR Part 156, §156.135 was included.”

14. Your response to item 26 of our previous objections states that the requested data in Table 4, Columns J and K of the PAAM exhibits was not provided last year but did not explain why it was not provided this year. Please provide it or explain why this data is not available.

We do not have this data readily available at the level of detail requested, therefore we have not provided it. Since the data at this level of detail is not used in the rate calculation it did not impact our MAIR. We did provide the aggregate value of the pharmacy rebates in the experience period in table 2 as required, and the value from table 2 is the value that impacts the MAIR.

15. As requested, you have added the RA User Fees in Table 6. Please confirm that there were no offsetting adjustments made elsewhere, as this fee was not included in the initial submission.

We removed RA User Fee of \$0.18 from the Projected Risk Adjustment PMPM in Table 5 as noted in our response to question 20a of the June 18th objection letter.

16. In response to the Department's RADV survey, issuers indicated that they did not include an adjustment in the initial submission, as there was no supportable reason for a RADV adjustment in the 2020 rate submission. Therefore, the Department has determined that there should be no RADV adjustments in the 2020 rate filings; please modify the filing accordingly, if necessary.

As noted in the response to the last objection letter, we did not include any RADV adjustment in our submission, therefore no change is required for this item.

17. If the risk adjustment results released on June 28, 2019 are inconsistent with your projected assumptions, you may modify the risk adjustment transfer amount in Table 5. Supporting documentation must be provided for all modifications. If such a modification is made, revise all the documents and exhibits impacted and the PA Actuarial Memorandum to discuss this change. This change must be made with your responses due by July 12, 2019.

We did not modify the risk adjustment transfer amount in Table 5 for QCC Small Group.
