Ms. Tracie Gray
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Life, Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Dear Ms. Gray,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Individual On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2021 through 12/31/2021.

Company Name/NAIC #: UPMC Health Options, Inc./15345
Market: Individual
On or Off Exchange: On and Off
Effective Date of Coverage: 1/1/2021
Average Rate Change Requested: 1.28% (\$3.65)
Range of Rate Change Requested: -7.51% to 17.29% (-\$21.34 to \$49.17)
Products Offered: PPO, EPO
Rating Areas Where Plans are Offered: 1, 2, 3, 4, 5, 6, 7, 9 (no change from 2020)
Metal Levels Offered: Catastrophic, Bronze, Silver, Gold
Currently Enrolled Lives Affected by the Rate Change: 121,706
Currently Enrolled Policyholders Affected by the Rate Change: 87,190
Number of Plans Offered in 2021: 35 (1 fewer than 2020)
Total additional annual revenue generated from the proposed rate change: \$10,078,951
Corresponding Contract Form #: 663, 664, 667, 671, 672, 673, 675
Binder ID#: UPMC-PA21-125098716
HIOS Issuer ID #: 16322
Submission Tracking #: UPMC-132364637

If you have any questions or require additional information, please call me at 412-454-7849 or email me at lovelymt@upmc.edu.

Sincerely,

Michael Lovely, FSA, CERA, MAAA

Attachment I

Rate Change Summary

UPMC Health Options, Inc. – Individual Plans

Rate request filing ID UPMC-132364637 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	1.28% ¹
Revised requested average rate change:	N/A
Range of requested rate change:	-7.51% to 17.29%
Effective date:	1/1/2021
Mapped Members:	121,706
Available in:	Rating Areas 1, 2, 3, 4, 5, 6, 7, 9

Key information

Jan. 2019-Dec. 2019 financial experience

Premiums	\$845,528,609
Claims	\$696,948,423
Administrative expenses	\$115,840,771
Taxes & fees	\$702,797
Company made (after taxes)	\$32,036,617

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2021:

Claims:	84.19%
Administrative:	13.73%
Taxes & fees:	0.08%
Profit:	2.00%

The company expects its annual medical costs to increase **6.01%**.

Explanation of requested rate change

Increasing cost and utilization of medical trends; Elimination of the Health Insurance Providers Fee; Introduction of a state-based reinsurance program; Increase in projected administrative costs.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Ms. Tracie Gray
Commonwealth of Pennsylvania Insurance Department
Insurance Product Regulation & Market Enforcement
Actuarial Review Division
Bureau of Life, Accident & Health Insurance
1311 Strawberry Square
Harrisburg, PA 17120

Dear Ms. Gray,

UPMC Health Options, Inc. respectfully requests approval of a rate filing for Individual On and Off Exchange PPO/EPO products. The rates are proposed for effective dates of 1/1/2021 through 12/31/2021. The revised filing includes the following changes.

- 1.) In response to Department question 3, round 1, the experience period risk adjustment in Tables 2 and 2b of the PA Actuarial Memorandum Exhibits now match the suggested amounts made by PID.*
- 2.) In response to Department second question 3, round 1, each plan's benefit richness factor is now formula driven in Table 10 of the PA Actuarial Memorandum Exhibits*
- 3.) In response to Department second question 4, round 1, the cells for "Change in Morbidity - All Other" are now formula driven, which has been updated in Table 5 of the PA Actuarial Memorandum Exhibits.*
- 4.) In response to Department question 9, round 1, the 2020 average Pricing AV has been updated to include the average CSR load, which is reflected in Table 9 of the PA Actuarial Memorandum Exhibits.*
- 5.) The experience period risk adjustment in Tables 2 and 2b of the PA Actuarial Memorandum Exhibits now match figures published in the Summary Report on Permanent Risk Adjustment Transfers for the 2019 Benefit Year per CMS.*

PA Actuarial Memorandum

Basic Information and Data

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

Company Information

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Legal Name: UPMC Health Options, Inc.

NAIC #: 15345

HIOS Issuer ID: 16322

Market: Individual

Exchange: On and Off Exchange

Products: PPO, EPO

Effective Date: 1/1/2021

Company Contact Information:

Filing Information:

Rate Filing SERFF Tracking #: UPMC-132364637

Form Filing SERFF Tracking #: UPMC-132368086, UPMC-132368084, UPMC-132368063, UPMC-132368051
UPMC-132368039, UPMC-132368037, UPMC-132368008

Binder SERFF Tracking #: UPMC-PA21-125098716

Rate History and Proposed Variations in Rate Changes

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2021 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change
UPMC-131034732	2018	41.2%
UPMC-131495924	2019	2.0%
UPMC-131924266	2020	3.2%

Average Rate Change

- Average rate change in Table 10, column AC of the PA Actuarial Memorandum Exhibits: 1.3%
- Change in 21-year-old non-tobacco premium PMPM in Table 11, cell AN13 of the PA Actuarial Memorandum Exhibits: 0.6%

Membership Count

Various breakdowns of the membership count for the captioned company and market are displayed in Table 1 of the PA Actuarial Memorandum Exhibits.

Benefit Changes

A table with these changes has been included in Appendix I. All plans have metal level actuarial values in accordance with the latest HHS requirements.

Single Risk Pool

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

Experience Period Claims and Premium

Claims and premium data for all non-grandfathered policies in the single risk pool for the captioned company and market from the experience period (January 2019 - December 2019) with two months of run-out are displayed in Table 2 of the PA Actuarial Memorandum Exhibits. This section provides a discussion of each field in the table and its relation to the corresponding fields on the URRT. Please note that no data for transitional policies is included in this table.

Earned Premium:

This represents the revenue accumulated by the captioned company and market during the experience period. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium listed in Table 2 does match the total premium listed in section I, worksheet 1 of the URRT.

Paid Claims:

This field includes uncompleted paid medical, pharmacy, and pediatric vision experience period claims for the captioned company and market.

Ultimate Incurred Claims:

This field includes completed paid medical and pharmacy experience period claims for the captioned company and market. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire ACA-related Individual block of business and no unexpected factors were observed. Because two months run-out is available the impact of IBNR is minimal. The completion factors used in Table 4 are displayed in the table below. Please note that the ultimate incurred claims shown in Table 2 do not match the total incurred claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the ultimate incurred claims less total prescription drug rebates listed in Table 2 and HHS cost-sharing.

Month	Completion Factor
1/1/2019	0.9993
2/1/2019	0.9990
3/1/2019	0.9987
4/1/2019	0.9979
5/1/2019	0.9957
6/1/2019	0.9940
7/1/2019	0.9920
8/1/2019	0.9874
9/1/2019	0.9822
10/1/2019	0.9767
11/1/2019	0.9665
12/1/2019	0.9513

Member Months:

The sum of the experience period member months shown in Table 1 is also displayed in Table 2.

Estimated Cost Sharing:

This field represents the difference between allowed claims and ultimate incurred claims in Table 2.

Allowed Claims:

This field includes allowed medical and pharmacy experience period claims as well as pediatric vision claims from the experience period for the captioned company and market. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Please note that the allowed claims shown in Table 2 do not match the total allowed claims displayed in section I, worksheet 1 of the URRT because the value in the URRT equals the allowed claims less total prescription drug rebates listed in Table 2.

Non-EHB portion of Allowed Claims:

This field displayed the amount of allowed experience period claims that can be attributed to non-EHBs for the captioned market and company.

Total Prescription Drug Rebates:

This field shows the amount of prescription drug rebates received for the captioned company and market during the experience period. Pharmacy rebates have been removed from the total incurred and allowed claims displayed in section I, worksheet 1 of the URRT.

Total EHB Capitation:

Pediatric dental benefits were paid for via capitation during the experience period. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim detail.

Total Non-EHB Capitation:

No non-EHB benefits were paid for via capitation during the experience period.

Estimated Risk Adjustment:

Experience period Risk Adjustment was estimated to be a payment of \$18,174,578 per the Summary Report on Permanent Risk Adjustment Transfers for the 2019 Benefit Year published by CMS on July 17, 2020, which translates to a PMPM of \$11.64.

Estimated Reinsurance Recoveries:

No private reinsurance recoveries were made during the experience period.

Loss Ratio:

The loss ratio calculated in Table 2 is 78.33%

Credibility of Data

Based on a large member month count of 1,561,771 during the experience period, we believe this data is credible enough to use 100%, just as was concluded in prior filings for this company and market. Because of this, the manual data displayed in tables 2b, 3b, and 4b in the PA Actuarial Memorandum Exhibits match the data displayed in tables 2, 3, and 4.

Trend Identification

The overall annual trend used in rate development is 6.01%. Historical allowed claims for our Individual block of ACA-compliant business were used to develop year over year trend factors for use in the projected rates. The large enrollment count and consistent makeup of this population make it appropriate for use in trend development for this filing. Service categories were defined to be consistent with the URRT instructions. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and 3b. Changes in provider contracting were considered but were ultimately assumed to have negligible impact on trend.

Please see Exhibit 5 of the Supporting Exhibits for trend development. The raw historical data implies an annual trend of 8.05% as shown in exhibit 5. We do not believe that this value accurately represents future trends that will be observed in this market, leading to the decision to lower the trend applied in rate development. This was

done by introducing an adjustment factor that uniformly decreases the historical trends for each benefit category so that an overall annual trend of 6.01% is applied in rate development. In recent years, our underlying population in the Individual market has included a new mix in geography throughout the state. This included an eastward expansion into higher cost territories, which led to increases in observed trends as is indicated by the historical data. Now that our membership base is well-established in the eastern territories, we don't anticipate that future trends will exhibit this same upward pressure that has been observed in recent years.

Historical Experience

Historical data from the four most recent calendar years for the captioned company and market with two months of run-out are provided in Table 4. Allowed claims were developed using the same manner described above for Table 2. The historical data listed in Table 4b belongs to ACA-related Individual business under the captioned company and is identical to the data in Table 4.

Rate Development & Change

Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

Table 5 of the PA Actuarial Memorandum Exhibits shows the development of the projected index rate, Market-Adjusted Index Rate, and projected total allowed claims. Detailed discussions on the development of each quantity are provided below.

Index Rate:

For this filing, the Index Rate of the Experience Period is calculated from the captioned company's fully-credible experience period EHB claims data for the single risk pool in the state market, which is demonstrated in Table 2 of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 6.01% annual trend to the Index Rate of Experience Period.

For 2021, the Pennsylvania Insurance Department has mandated that an adjustment factor of 0.999 is applied to the index rate to reflect the morbidity impact of the state-based reinsurance program in the Individual market. It has also been mandated that the Individual Adjustment factor of 1.01 be applied to the index rate to reflect current uncertainty surrounding the market in 2021 due to the repeal of the Individual Mandate.

An additional adjustment factor of 0.994 has been applied to the index rate to account for changes in network between the experience and projection period populations. Coverage will no longer be offered in Crawford and Clearfield counties in 2021 due to changes in service areas. This adjustment factor is used to bring the experience data in line with the characteristics of the provider network included in counties that will continue to be covered under the captioned company in 2021. Please see Exhibit 6 of the Supporting Exhibits for the derivation of this factor.

No other adjustments have been applied to the index rate. The average age for our 2019 experience period Individual risk pool was 45.0 with an average premium factor of 1.88. This is comparable to our 2020 experience so far with age 45.3 and premium factor 1.89. This change in factors is small enough that the insured population is considered to be stable, and no additional adjustment for demographics was deemed necessary. Please note that the Index Rate of Projection Period of \$573.04 shown in Table 5 does not exactly match the corresponding value shown in section II, worksheet 1 of the URRT. This is due to rounding error that is introduced because of the rounding requirements in the newly re-formatted URRT. The value shown in Table 5 is representative of the actual index rate.

Market-Adjusted Index Rate:

The Projected Index Rate is adjusted by adding estimates for risk adjustment and marketplace fees (with impacts and costs spread across the whole risk pool) to obtain the Projected Market Adjusted Index Rate. Projection period Risk Adjustment PMPM has been estimated to be a payment of \$25.73, which is displayed in Table 5. The value entered in section II, worksheet 1 of the URRT was \$33.59 since the calculation of the Market Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

The member-weighted average of a 3.0% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.3%. This load is developed based on fees from on-exchange policies, but is spread over all policies uniformly. This translates to a PMPM of \$12.40, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for this adjustment is an increase in premium as additional revenue will be required to cover the anticipated payment.

The index rate was further adjusted by accounting for estimated recoveries from the state-based reinsurance program that will be implemented beginning in 2021. Estimated recoveries applied in Table 5 and section II, worksheet 1 of the URRT were \$22.80 PMPM and \$29.77 PMPM, respectively. The value entered in the URRT is different since the calculation of the Market Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original PMPM divided by the Paid to Allowed Average Factor. These values were entered as positive values in Table 5 and the URRT since the calculation subtracts these values. The effect for this adjustment is a decrease in premium as less revenue will be required to cover the anticipated recovery.

The estimated recovery of \$22.80 PMPM was derived using data entered into tabs II.a and II.b of the PA Actuarial Memorandum exhibits. Data entered into tab II.a matches the experience period data described in the sections above. Tab II.b was populated by referencing the same source of experience captured in tab II.a, but the member-level incurred claims were trended forward two years to the projection period before allocating the data to each bin within the continuance table. Annual claims trends of 6.01% were applied to estimate the projected member-level claims used to populate tab II.b.

Total Allowed Claims:

The Market-Adjusted Index Rate is further modified to develop the projected total allowed claims PMPM by adding the projected allowed non-EHB claims PMPM. Benefits that were offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is \$1.10 PMPM.

Retention Items

Retention items related to this filing are shown in Table 6 of the PA Actuarial Memorandum Exhibits. Detailed discussions on each item are provided below.

Administrative Expenses:

Administrative costs of 13.73% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

Taxes and Fees:

Taxes and Fees decreased from 2.45% in 2020 to 0.08% in 2021 to account for the elimination of the Health Insurance Providers Fee in 2021. This load also accounts for the projected Federal Income Tax in 2021. Please note that the Risk Adjustment Administration Fee of \$0.25 PMPM and the projected PCORI Fee of \$0.20 PMPM were included in the Taxes and Fees field in Table 6 and the URRT.

Profit/Contingency:

The projected profit margin for this company will remain at 2% for 2021. This value is listed in both Table 6 and the URRT. The same level of profit margin is expected for each plan included in this filing.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 83.2%, as shown in Exhibit 1 of the Supporting Exhibits.

Normalized Market-Adjusted Projected Allowed Total Claims

Normalization factors for 2020 and 2021 are provided in Table 7 of the PA Actuarial Memorandum Exhibits. 2020 factors have been taken from the prior annual rate filing of the captioned company and market. Detailed discussion on each of the 2021 factors are provided below.

Average Age Factor:

The average age factor was calculated using our projected ACA-related Individual population with the prescribed HHS Age Factors for 2021. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant Individual business, the average age factor is 1.88 and average age was 45.0 during the

experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.997, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.88. Please see Exhibit 3 in the Supporting Exhibits for the calculation of this factor.

Average Geographic Factor:

The calibration factor of 1.001 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 4 of the Supporting Exhibits. Please see the Geographic Factors section below for a discussion on the development of factors applied for each rating area.

Average Tobacco Factor:

The average tobacco factor was calculated using projected membership, which is assumed to have the same split for tobacco status as current membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002. The derivation of this factor is shown below.

Tobacco Status	Feb 2020 Members	Split	Tobacco Factor	Calibration Factor
Non-User	115,180	91.5%	1.000	0.915
User	10,638	8.5%	1.025	0.087
Total	125,818	100.0%		1.002

Average Benefit Richness:

Benefit richness factors were calculated so that the average value is 1.0 when weighted with projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Average Network Factor:

Network factors were calculated so that the average value is 1.0 when weighted with projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Components of Rate Change

Data to support the calculation of the components of the rate change is presented in Tables 8 and 9 of the PA Actuarial Memorandum Exhibits. Values presented in the 2020 columns have been taken from this company's 2020 annual rate filing.

Plan Rate Development

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2021 Plan Adjusted Index Rates. Note that many rows are marked with DNM in Table 10. These entries correspond to members currently residing in Crawford and Clearfield counties, which will no longer be covered under the captioned company for 2021. These rows do not contribute to the rate change calculated in Table 10. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:

The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims. Since the same tool was used for all plans, this eliminates any impact from morbidity at the plan level, and differing rate increases by product type are purely based on differences in benefit design for all plans within a given product.

Benefit Richness (induced demand)

Benefit richness factors were calculated using the formula $(\text{Plan AV})^2 - (\text{Plan AV}) + 1.24$, where (Plan AV) is equal to the product of the Plan AV described above and the Non-Funding of CSR Adjustment described below on a plan-by-plan basis. This formula was prescribed by the Pennsylvania Insurance Department for 2021 and has been developed to produce induced demand factors that mimic those determined by HHS. The initial factors calculated using this formula were then normalized against projected membership by plan.

Benefits in addition to EHBs

Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is \$1.10 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2021 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans.

Provider Network

Please see the Network Factors section below for a discussion on the development of the provider network factors applied in Table 10.

Catastrophic Eligibility

No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible.

Non-Funding of CSR Adjustment

To account for the elimination of funding for cost-share reduction subsidies, the Pennsylvania Insurance Department has mandated the rates for all silver plans offered both on and off the Federal Marketplace be increased by a factor of 1.20 in Table 10 of the Actuarial Memorandum Rate Exhibits. Several off-exchange only silver plans have been included for 2021 to minimize disruption to non-subsidized members enrolled in silver plans.

Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. 2021 rates calculated in this tables were tested to ensure that they match those included in the PA Plan Design Summary and Rate Tables, Federal Rates Template, and the binder.

Plan Factors

Age and Tobacco Factors

As indicated in Table 12 of the PA Actuarial Memorandum Exhibits, the default federal standard age curve for 2021 is used in the development of the Consumer Adjusted Premium Rates. A tobacco load of 2.5% will be used for all 21-and-over age bands in the Individual market in 2021. This load has not changed from 2020.

Geographic Factors

The geographic rating areas used within this filing are the same as those defined by the state. To better reflect the varying costs of delivery between each geographical region in which coverage is offered, rating area factors have been updated for 2021. The table below summarizes changes in these factors:

Region	2020	2021
1	0.96	0.95
2	1.06	1.15
3	1.22	1.26
4	0.96	0.95
5	0.96	0.95
6	1.30	1.41
7	1.32	1.36
9	1.15	1.20

Network Factors

Network factors for 2021 were calculated to reflect cost differentials between networks and to ensure normalization using projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. No major changes in cost differentials between networks are expected for 2021, so the relativities between network factors have been kept the same, and the factors have simply been re-normalized. The current and proposed network factors are also shown in Table 14 of the PA Actuarial Memorandum Exhibits.

Service Area Composition

Table 13 of the PA Actuarial Memorandum Exhibits shows the areas in which plans will be offered in 2021. Service area maps for 2020 and 2021 have been uploaded in the Supporting Documentation section in SERFF.

Composite Rating

No composite rating is used with these plans.

Warning Alerts

Several warning messages appear after clicking the validate button in the URRT. These messages highlight the fact that several terminated plans have entries of zero in the current enrollment and premium PMPM fields on worksheet 2 of the URRT. These particular plans were terminated prior to 2020 but have experience in 2019 and therefore must be included in the URRT. It appears that this alert is a new addition to the 2021 version of the URRT since prior versions of the template did not generate such alerts despite similar situations arising with terminated plans in prior rate filings.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Derivation of Projection Period MLR
- Exhibit 3: Derivation of Age Calibration Factor
- Exhibit 4: Derivation of Geographical Calibration Factor
- Exhibit 5: Derivation of Annual Trend
- Exhibit 6: Derivation of Change in Network Factor
- Exhibit 7: Derivation of 3-child Cap Adjustment Factor
- Exhibit 8: Historical Financial Gains/Losses

Actuarial Certification

I, [REDACTED] am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.
- The projected Index Rate is:
 - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
 - b. Developed in compliance with the applicable Actuarial Standards of Practice
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
 - d. Neither excessive nor deficient
- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

Rating Area Data Collection

Specify the total number of Rating Areas in your State by selecting the Create Rating Areas button or Ctrl + Shift + R.

Select only the Rating Areas you are offering plans within and add a factor for each area.

To validate, select the Validate button or Ctrl + Shift + I.

To finalize, select the Finalize button or Ctrl + Shift + F.

Rating Area	Rating Factor
Rating Area 1	0.9517
Rating Area 2	1.1478
Rating Area 3	1.2610
Rating Area 4	0.9517
Rating Area 5	0.9517
Rating Area 6	1.4100
Rating Area 7	1.3649
Rating Area 9	1.1951

RFJ Part II – Consumer Friendly Justification

Individual Exchange EPO/PPO Rate Filing

The rate change for UPMC Health Options Individual plans is 1.28% for 2021. Rate change drivers include the following: Increasing cost and utilization of medical trends; Elimination of the Health Insurance Providers Fee; Introduction of a state-based reinsurance program; Increase in projected administrative costs.

Scope and Range of the Rate Increase

The number of individuals affected by this rate increase is 121,706. The proposed rate increase varies by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The range of the proposed rate change is -7.51% to 17.29%.

Financial Experience of the Product

Premiums	\$	845,528,609
Claims	\$	696,948,423
Administrative expenses	\$	115,840,771
Taxes & fees	\$	702,797
Company made (after taxes)	\$	32,036,617

Changes in Medical Service Costs

Cost and utilization increases are expected to increase by approximately 6.01% for 2021.

Changes in Benefits

No changes in benefits contributed significantly to the increase.

Administrative Costs and Anticipated Profits

An expected 3.95% increase in Administrative costs contribute to the rate increase. No major changes in profits are anticipated and thus did not affect the rate increase.

RFJ Part III: Actuarial Memorandum

General Information

The purpose of this actuarial memorandum is to provide certain information related to a rate submission for the company identified below. The relevant index rate is developed in accordance with federal regulations, and plan specific premiums are generated using the allowable modifiers in accordance with the single risk pool rule.

The following section provides information related to the identification of the company that is submitting this rate filing. Much of this information is also displayed in Table 0 of the PA Actuarial Memorandum Exhibits.

Company Identifying Information:

Company Legal Name: UPMC Health Options, Inc.

NAIC #: 15345

State: PA

HIOS Issuer ID: 16322

Market: Individual

Exchange: On and Off Exchange

Products: PPO, EPO

Effective Date: 1/1/2021

Company Contact Information:

Filing Information:

Rate Filing SERFF Tracking #: UPMC-132364637

Form Filing SERFF Tracking #: UPMC-132368086, UPMC-132368084, UPMC-132368063, UPMC-132368051
UPMC-132368039, UPMC-132368037, UPMC-132368008

Binder SERFF Tracking #: UPMC-PA21-125098716

Rate History:

Historical and proposed rate changes vary by plan due to various changes made to meet AV requirements on a plan-by-plan basis. The values listed below and overall proposed rate change for 2021 are weighted averages of the increase for each plan based on projected enrollment. Please see Table 10 of the PA Actuarial Memorandum Exhibits for a breakdown of plan-by-plan rate increases.

SERFF Tracking #	Year	Rate Change
UPMC-129389350	2014	0.0%
UPMC-129640677	2015	0.0%
UPMC-130071357	2016	9.7%
UPMC-130536844	2017	26.5%

UPMC-131034732	2018	41.2%
UPMC-131495924	2019	2.0%
UPMC-131924266	2020	3.2%

Proposed Rate Increase(s)

Reasons for Rate Increase(s):

The proposed rate increase calculated for PPO products in section I, worksheet 2 of the URRT is 2.6%

The proposed rate increase calculated for EPO products in section I, worksheet 2 of the URRT is 0.1%

The major reasons for the increase include the following:

- Increasing cost and utilization trends
- Elimination of Health Insurance Providers Fee
- Introduction of state-based reinsurance program
- Increase in projected administrative costs

Market Experience

Single Risk Pool

The single risk pool consists of members that are anticipated to enroll in ACA-compliant policies offered under the captioned market.

Experience Period Premium and Claims

Paid Through Date:

The reported claims during the experience period have a paid through date of February 2020.

Current Date:

Current enrollment and premium data is reported as of February 15, 2020.

Premiums (net of MLR Rebate) in Experience Period:

Section I, worksheet 1 of the URRT contains calendar year 2019 premium for all non-grandfathered policies in the single risk pool for the captioned company and market. No adjustments were made for MLR rebates as we do not anticipate owing them. HHS cost-sharing is not included in the premium data. Please note that the earned premium is also listed in Table 2 of the PA Actuarial Memorandum Exhibits.

Allowed and Incurred Claims Incurred During the Experience Period:

Section I, worksheet 1 of the URRT contains calendar year 2019 claims experience for all non-grandfathered policies in the single risk pool for the captioned company and market, paid through February 2020. Allowed medical claims and pediatric vision claims are pulled directly from our data warehouse. Pediatric dental claims are administered and paid by Dominion Dental. We receive a separate report from Dominion with the claim

detail. We used the standard Development/Completion Factor Method to calculate IBNR. Factors were calculated using our entire block of ACA-related Individual business and no unexpected factors were observed. Because two months run-out is available the impact of IBNR is minimal.

Month	Completion Factor
1/1/2019	0.9993
2/1/2019	0.9990
3/1/2019	0.9987
4/1/2019	0.9979
5/1/2019	0.9957
6/1/2019	0.9940
7/1/2019	0.9920
8/1/2019	0.9874
9/1/2019	0.9822
10/1/2019	0.9767
11/1/2019	0.9665
12/1/2019	0.9513

Benefit Categories

Medical claims are split into nine categories in our data warehouse. They are mapped into the categories in the URRT as follows:

UPMC Benefit Category	URRT Benefit Category
Inpatient	Inpatient Hospital
Catastrophic	Inpatient Hospital
Outpatient	Outpatient Hospital
Behavioral	Outpatient Hospital
PCP	Professional
Specialist	Professional
Diagnostic	Other Medical
ER	Other Medical
Other	Other Medical
Pediatric Dental	Captitation
Pediatric Vision	Other Medical

Drug claims are in separate tables and directly mapped into the Prescription Drugs category. Note that services are the unit of measurement used for the Other Medical category.

Projection Factors

Trend Factors (cost/utilization):

The overall annual trend used in rate development is 6.01%. Historical allowed claims for our Individual block of ACA-compliant business were used to develop year over year trend factors for use in the projected rates. The large enrollment count and consistent makeup of this population make it appropriate for use in trend

development for this filing. Service categories were defined to be consistent with the URRT instructions. Please see Tables 3 and 3b of the PA Actuarial Memorandum Exhibits for trend development calculations. Please note that the minor changes made to benefit designs in order to keep plan actuarial values within the allowed ranges were not significant enough to warrant an adjustment for induced demand with regard to trend, so the induced demand column has been populated with zeroes in Tables 3 and 3b. Changes in provider contracting were considered but were ultimately assumed to have negligible impact on trend.

Please see Exhibit 5 of the Supporting Exhibits for trend development. The raw historical data implies an annual trend of 8.05% as shown in exhibit 5. We do not believe that this value accurately represents future trends that will be observed in this market, leading to the decision to lower the trend applied in rate development. This was done by introducing an adjustment factor that uniformly decreases the historical trends for each benefit category so that an overall annual trend of 6.01% is applied in rate development. In recent years, our underlying population in the Individual market has included a new mix in geography throughout the state. This included an eastward expansion into higher cost territories, which led to increases in observed trends as is indicated by the historical data. Now that our membership base is well-established in the eastern territories, we don't anticipate that future trends will exhibit this same upward pressure that has been observed in recent years.

Adjustments to Trended EHB Allowed Claims PMPM

Changes in the Morbidity of the Population Insured:

For 2021, the Pennsylvania Insurance Department has mandated that an adjustment factor of 0.999 is applied to the index rate to reflect the morbidity impact of the state-based reinsurance program in the Individual market. It has also been mandated that the Individual Adjustment factor of 1.01 be applied to the index rate to reflect current uncertainty surrounding the market in 2021 due to the repeal of the Individual Mandate.

Changes in Benefits:

No changes were made to the PA EHB Benchmark plan for 2021, so no adjustments were necessary.

Changes in Demographics:

The average age for our 2019 experience period Individual risk pool was 45.0 with an average premium factor of 1.88. This is comparable to our 2020 experience so far with age 45.3 and premium factor 1.89. This change in factors is small enough that the insured population is considered to be stable, and no additional adjustment for demographics was deemed necessary.

Other Adjustments:

An additional adjustment factor of 0.994 has been applied to the index rate to account for changes in network between the experience and projection period populations. Coverage will no longer be offered in Crawford and Clearfield counties in 2021 due to changes in service areas. This adjustment factor is used to bring the experience data in line with the characteristics of the provider network included in counties that will continue to be covered under the captioned company in 2021. Please see Exhibit 6 of the Supporting Exhibits for the derivation of this factor.

Credibility Manual Rate Development

Source and Appropriateness of Manual Rate Used:

The manual rate was not used as the experience period provided 1,561,771 member months of data, which was deemed fully credible.

Adjustments Made to the Data:

No adjustments were necessary since the rate manual was not used for this filing.

Inclusion of Capitation Payments:

Pediatric dental benefits are projected to be paid for via capitation.

Credibility of Experience

Based on the large member month count of the experience period data, we believe the experience period data is credible enough to use 100%, as was implemented in prior filings by this company.

Establishing the Index Rate

For this filing, the Index Rate of the Experience Period is calculated from the captioned company's fully-credible experience period EHB claims data for the single risk pool, which is demonstrated in Table 2 of the PA Actuarial Memorandum Exhibits. The Index Rate of the Projection Period is then calculated in Table 5 by first applying two years of 6.01% annual trend to the Index Rate of Experience Period. The adjustments described in the Projection Factors section above were then applied to the trended manual rate to generate the Index Rate of the Projection Period. Please note that the Index Rate of Projection Period of \$573.04 shown in Table 5 does not exactly match the corresponding value shown in section II, worksheet 1 of the URRT. This is due to rounding error that is introduced because of the rounding requirements in the newly re-formatted URRT. The value shown in Table 5 is representative of the actual index rate. Claims for routine foot care and acupuncture were not included in the calculation of the index rates despite being covered during the experience period since they are classified as non-EHBs.

Paid to Allowed Ratio

The Paid to Allowed Average Factor was calculated by taking the weighted average of the company-determined Actuarial Values for all plans using current membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits.

Development of the Market Adjusted Index Rate

The Projected Index Rate is adjusted by adding estimates for Risk Adjustment and Marketplace Fees (with impacts and costs spread across the whole risk pool) to obtain the projected Market Adjusted Index Rate. Derivation of the PMPM values used for the Risk Adjustment, Marketplace Fees adjustments, and projected Reinsurance recoveries are described in the following sections.

Experience Period Risk Adjustment and Reinsurance Adjustments PMPM:

Experience period Risk Adjustment was estimated to be a payment of \$18,174,578 per the Summary Report on Permanent Risk Adjustment Transfers for the 2019 Benefit Year published by CMS on July 17, 2020, which translates to a PMPM of \$11.64. No data for the Transitional Reinsurance Program under PPACA has been included as this program expired at the end of 2016.

Projected Risk Adjustments PMPM:

Projection period Risk Adjustment PMPM has been estimated to be a payment of \$25.73, which is displayed in Table 5. The value entered in section II, worksheet 1 of the URRT was \$33.59 since the calculation of the Market Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original paid PMPM divided by the Paid to Allowed Average Factor. The net amount after accounting for the fee is subtracted from the Index Rate of the Projection Period as part of the calculation of the Market Adjusted Index Rate. For the URRT and Table 5 of the PA Actuarial Memorandum Rate Exhibits, it was entered as a negative number because the calculation subtracts this value. The effect is an increase in premium as additional revenue will be required to cover the anticipated payment.

Exchange User Fees:

The member-weighted average of a 3.0% Marketplace User Fee for Marketplace enrollees combined with 0% for non-Marketplace enrollees calculates to 2.3%. This load is developed based on fees from on-exchange policies, but is spread over all policies uniformly. This translates to a PMPM of \$12.40, which was entered as a positive value in Table 5 since the calculation adds this value. The effect for this adjustment is an increase in premium as additional revenue will be required to cover the anticipated payment.

Estimated Reinsurance Recoveries PMPM:

The index rate was further adjusted by accounting for estimated recoveries from the state-based reinsurance program that will be implemented beginning in 2021. Estimated recoveries applied in Table 5 and section II, worksheet 1 of the URRT were \$22.80 PMPM and \$29.77 PMPM, respectively. The value entered in the URRT is different since the calculation of the Market Adjusted Index Rate is done on an allowed claims basis in the URRT. The updated PMPM was derived by taking the original PMPM divided by the Paid to Allowed Average Factor. These values were entered as positive values in Table 5 and the URRT since the calculation subtracts these values. The effect for this adjustment is a decrease in premium as less revenue will be required to cover the anticipated recovery.

The estimated recovery of \$22.80 PMPM was derived using data entered into tabs II.a and II.b of the PA Actuarial Memorandum exhibits. Data entered into tab II.a matches the experience period data described in the sections above. Tab II.b was populated by referencing the same source of experience captured in tab II.a, but the member-level incurred claims were trended forward two years to the projection period before allocating the data to each bin within the continuance table. Annual claims trends of 6.01% were applied to estimate the projected member-level claims used to populate tab II.b.

Non-Benefit Expenses and Profit & Risk

Administrative Expense Load:

Administrative costs of 13.73% of premium have been displayed in Table 6 and the URRT. This value has been derived from projected administrative costs for the projection period. These expenses are assumed to be uniform for all plan designs.

Profit & Risk Margin:

The projected profit margin for this company will remain at 2% for 2021. This value is listed in both Table 6 and the URRT. The same level of profit margin is expected for each plan included in this filing.

Taxes and Fees:

Taxes and Fees decreased from 2.45% in 2020 to 0.08% in 2021 to account for the elimination of the Health Insurance Providers Fee in 2021. This load also accounts for the projected Federal Income Tax in 2021. Please note that the Risk Adjustment Administration Fee of \$0.25 PMPM and the projected PCORI Fee of \$0.20 PMPM were included in the Taxes and Fees field in Table 6 and the URRT.

Plan Adjusted Index Rates

Table 10 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance to develop 2021 Plan Adjusted Index Rates. Note that many rows are marked with DNM in Table 10. These entries correspond to members currently residing in Crawford and Clearfield counties, which will no longer be covered under the captioned company for 2021. These rows do not contribute to the rate change calculated in Table 10. The allowable modifiers that are used in rate development are described below.

Plan Actuarial Value:

The AV for each plan was determined by the issuer's own pricing model based on experience from UPMC's fully-insured commercial block of business. This model calculates an AV for a given plan by first trending the allowed claims forward two years to the projection period, calculating paid amounts for each benefit category based on the benefit design of a given plan and projected allowed claims data, and taking the ratio of the total projected paid claims to projected allowed claims. Since the same tool was used for all plans, this eliminates any impact from morbidity at the plan level, and differing rate increases by product type are purely based on differences in benefit design for all plans within a given product.

Benefit Richness (induced demand)

Benefit richness factors were calculated using the formula $(\text{Plan AV})^2 - (\text{Plan AV}) + 1.24$, where (Plan AV) is equal to the product of the Plan AV described above and the Non-Funding of CSR Adjustment described below on a plan-by-plan basis. This formula was prescribed by the Pennsylvania Insurance Department for 2021 and has been developed to produce induced demand factors that mimic those determined by HHS. The initial factors calculated using this formula were then normalized against projected membership by plan.

Benefits in addition to EHBs

Benefits that will be offered outside EHB include routine foot care and acupuncture. The projected allowed claims for these benefits is \$1.10 PMPM. The adjustment factor of 1.002 included in Table 10 has been derived by adding the aforementioned PMPM to the projected index rate for 2021 and dividing this total by the same index rate, causing the adjustment to be applied uniformly to all plans.

Provider Network

Network factors for 2021 were calculated to reflect cost differentials between networks and to ensure normalization using projected membership as demonstrated in Table 10 of the PA Actuarial Memorandum Exhibits. No major changes in cost differentials between networks are expected for 2021, so the relativities between network factors have been kept the same, and the factors have simply been re-normalized. The current and proposed network factors are also shown in Table 14 of the PA Actuarial Memorandum Exhibits.

Catastrophic Eligibility

No adjustments were made for catastrophic plans. Current enrollment is minimal and not credible.

Non-Funding of CSR Adjustment

To account for the elimination of funding for cost-share reduction subsidies, the Pennsylvania Insurance Department has mandated the rates for all silver plans offered both on and off the Federal Marketplace be increased by a factor of 1.20 in Table 10 of the Actuarial Memorandum Rate Exhibits. Several off-exchange only silver plans have been included for 2021 to minimize disruption to non-subsidized members enrolled in silver plans.

Calibration

Age Curve Calibration:

The average age factor was calculated using our projected ACA-related Individual population with the prescribed HHS Age Factors for 2021. It was assumed this represents the age distribution of the entire single risk-pool. The number of members under each age bracket was multiplied by the corresponding HHS Age Factor. These were then summed and divided by the total number of members to obtain the average age factor. For UPMC's entire block of ACA-compliant Individual business, the average age factor is 1.88 and average age was 45.0 during the experience period. This preliminary age factor is then multiplied by an adjustment factor of 0.997, which accounts for the regulation that prohibits charging for more than three children per family, resulting in a final age calibration factor of 1.88. Please see Exhibit 3 in the Supporting Exhibits for the calculation of this factor.

Geographic Factor Calibration:

The geographic rating areas used within this filing are the same as those defined by the state. To better reflect the varying costs of delivery between each geographical region in which coverage is offered, rating area factors have been updated for 2021. The table below summarizes changes in these factors:

Region	2020	2021
1	0.96	0.95
2	1.06	1.15
3	1.22	1.26
4	0.96	0.95
5	0.96	0.95
6	1.30	1.41
7	1.32	1.36
9	1.15	1.20

The calibration factor of 1.001 was calculated as the weighted average of the geographical factors using projected enrollment for the single risk pool, as shown in Exhibit 4 of the Supporting Exhibits.

Tobacco Use Rating Factor Calibration:

The average tobacco factor was calculated using projected membership, which is assumed to have the same split for tobacco status as current membership. The member-weighted average of a 2.5% load applied for enrollees who qualify as tobacco users combined with a 0% load for non-tobacco users yields an average tobacco factor of 1.002. The derivation of this factor is shown below.

Tobacco Status	Feb 2020 Members	Split	Tobacco Factor	Calibration Factor
Non-User	115,180	91.5%	1.000	0.915
User	10,638	8.5%	1.025	0.087
Total	125,818	100.0%		1.002

Consumer Adjusted Premium Rate Development

Table 11 of the PA Actuarial Memorandum Exhibits has been populated as described in federal and state guidance. 2021 rates calculated in this tables were tested to ensure that they match those included in the PA Plan Design Summary and Rate Tables, Federal Rates Template, and the binder. The Plan Adjusted Index Rates are divided by the age calibration factor then multiplied by the specific age, geographic, and tobacco factors shown in Tables 12, 13, and 14 of the PA Actuarial Memorandum Exhibits, respectively, to develop the Consumer Adjusted Premium Rates.

Projected Loss Ratio

The projected period loss ratio, using the federally-prescribed MLR methodology without the credibility adjustment, is 83.2%, as shown in Exhibit 1 of the Supporting Exhibits.

Plan Product Info

AV Metal Values

Metal values were determined using the final 2021 HHS AV Calculator.

Membership Projections

Membership projections were developed based on our anticipated competitive positioning in the market combined with our current enrollment distribution by plan.

Terminated Plans and Products

Please see Table 10 of the PA Actuarial Memorandum Exhibits for a mapping of all terminated SCIDs to a 2021 plan, where applicable.

Warning Alerts

Several warning messages appear after clicking the validate button in the URRT. These messages highlight the fact that several terminated plans have entries of zero in the current enrollment and premium PMPM fields on worksheet 2 of the URRT. These particular plans were terminated prior to 2020 but have experience in 2019 and therefore must be included in the URRT. It appears that this alert is a new addition to the 2021 version of the URRT since prior versions of the template did not generate such alerts despite similar situations arising with terminated plans in prior rate filings.

Effective Rate Review Information

The Pennsylvania Insurance Department is responsible for conducting effective rate review for all submitted rates.

List of Supporting Exhibits

Supporting exhibits have been included with the rate filing to assist with the review process. Below is a list summarizing the contents of each exhibit.

- Exhibit 1: Derivation of Projection Period MLR
- Exhibit 3: Derivation of Age Calibration Factor
- Exhibit 4: Derivation of Geographical Calibration Factor
- Exhibit 5: Derivation of Annual Trend
- Exhibit 6: Derivation of Change in Network Factor
- Exhibit 7: Derivation of 3-child Cap Adjustment Factor
- Exhibit 8: Historical Financial Gains/Losses

Actuarial Certification

I,  am a Member of the American Academy of Actuaries. I am currently a Manager in the Actuarial Services department for UPMC Health Plan. I certify that:

- All factor, benefit and other changes from the prior approved filing have been disclosed in this actuarial memorandum.
- New plans cannot be considered modifications of existing plans under the uniform modification standards in 45 CFR 147.106.
- The information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2020 Rate Filing Justification.
- The projected Index Rate is:
 - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
 - b. Developed in compliance with the applicable Actuarial Standards of Practice
 - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
 - d. Neither excessive nor deficient
- The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 156.80(d)(2) were used to generate plan level rates.
- The geographic rating factors reflect only differences in the costs of delivery and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I URRT for all plans except those specified in the certification.

7/20/2020

Dear Mike Lovely:

The Pennsylvania Insurance Department has received and conducted a preliminary review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 7 days of the date of this letter. If you have any questions or difficulties in providing the data within this time frame, please call me.

The following questions are from Oliver Wyman, our Actuarial Consultant:

UPMC Health Options Individual ACA Filing – UPMC-132364637

1. The Part II Rate Justification indicates that there is an expected 3.95% increase in administrative expenses. Please explain and provide support for this increase.

Since the 2020 filing, emerging information in the internal financials is showing an increase in general administrative expense. UPMC expects that to continue in 2021.

2. The exchange user fee of 2.3% of premium documented in the Part III Actuarial Memorandum differs from the 2.71% reported in Worksheet I of the URRT. Please explain this discrepancy.

Since the URRT requires the exchange user fee to be listed on an "allowed" basis, the final value included in the URRT was calculated by first taking exchange user fee PMPM of \$12.40 divided by the paid-to-allowed ratio to derive the "allowed" exchange user fee PMPM. This value was then divided by the market adjusted index rate to arrive at the final value of 2.71%

3. The estimated experience period risk adjustment included in the URRT is -\$25.73 PMPM. The independent estimates calculated by the PID suggests that the experience period risk adjustment amount is -\$7.47 PMPM. Please reconcile this difference. Additionally, please provide support for the assumption of no change in risk adjustment from the experience to projection period.

The independent estimates provided by the Department were not available at the time of the initial filing deadline. Table 2 of the PA Actuarial Memorandum Exhibits and the URRT have been updated to include the total transfer estimate. Because of this update, the experience and projection period risk adjustment PMPMs will no longer match. The projected risk adjustment

PMPM of -\$25.73 was selected based on patterns observed in the changes of UPMC-specific and state-average risk scores in the Individual market as well as accounting for circumstances unique to the reporting of 2019 data. In recent years, state-average risk scores have remained relatively constant due to stabilization of the underlying population enrolled in ACA-compliant products while UPMC-specific risk scores have exhibited small fluctuations with no discernable pattern. The estimates released by the Department revealed a notable decrease in the state-average risk score for 2019, while analysis of our own RATEE files suggested a notable increase in the UPMC-specific risk score for 2019. While risk scores are not the only factors contributing to changes in transfer payments from year to year, they appear to be the primary drivers in the extremely favorable change in our estimated transfer for 2019. We believe that the unexpected decrease in state-average risk score for 2019 is likely due to influence of the COVID-19 pandemic on insurers' ability to report data to the EDGE server and is not representative of a material change in the risk of the underlying population. We also believe that the UPMC-specific risk score for 2019 was unusually high and will return to levels similar to the average risk score over the 2017 - 19 timespan in future years. When considering each of these factors, the resulting transfer is anticipated to be on par with those we've observed in recent years prior to 2019, which is why -\$25.73 was deemed to be an appropriate risk adjustment PMPM for the projection period.

4. Please provide additional support for, including a numerical development of, the 3-child cap adjustment included in Exhibit 3.

Numerical development has been added to the supporting exhibits (Exhibit 7) to support the 3-child cap adjustment. The factor is derived from UPMC's February 2020 Individual population, inclusive of all legal entities.

5. Please provide additional support for, including a numerical development of, the proposed geographic factors included in Exhibit 4, specifically for regions where the factors increased significantly from 2020 such as Rating Areas 2, 3, 6, 7, and 9.

Geographic factors were updated to better reflect cost differences by area. Points of consideration included differences in fee schedules, anticipated shifts in utilization between providers, and less favorable contracting terms in areas with few facilities (including those without UPMC facilities), and MLRs (with and without risk adjustment).

6. Please explain how the trend adjustment factor of 0.98 (as shown in Exhibit 5) was developed.

As shown in exhibit 5, the trend adjustment factor is the ratio of the applied annual trend factor relative to the trend factor implied by the raw historical data.

7. Please provide additional support for, including a numerical development of, the network and service area factors included in Exhibit 6.

We have added three columns to this exhibit, which explain our development.

Network/Service Area Factors = Average Network Factor * Induced Demand Factor * Network Normalization Factor

Average Network Factor: Reflects cost relativity for that legal entity's products/networks

Induced Demand Factor: Table 10 Induced Demand Calibration Factor

Network Normalization Factor: Normalizes costs for networks across legal entities

The above, combined with the average geographic factor, appropriately adjusts the manual base rate to the specific legal-entity provider factors.

8. Please explain and provide support for the 1.002 adjustment factor for benefits in addition to EHB as demonstrated in Table 10 of the rate filing exhibits.

The adjustment factor is based on the Projected Allowed Non-EHB Claims PMPM proportion of the Adjusted Projected Allowed EHB Claims PMPM. Adjustment factor = Non-EHB PMPM / EHB PMPM + 1 = 1.002. These allowed claims PMPMs can be found in Table 5.

9. The sum of rate increase components shown in Table 8 Line H of the rate filing exhibits does not approximate Line A as indicated by the label. Please explain why this value varies significantly.

Please note that an error in Table 9 was corrected as part of this correspondence. The 2020 pricing AV listed in Table 9 did not account for the 2020 average Non-Funding of CSR Adjustment as requested by the Department. Implementing this correction causes the rate changes in Line A and Line H in Table 8 to match. Despite this, general disparities observed between Lines A and H in Table 8 can be attributed to the fact that the filed 2020 allowed claims PMPM is being compared against the 2020 calibration plan adjusted index rate calculated as part of this year's filing. Since the latter of these is different from the corresponding value calculated in the prior year's filing due to changes in plan-level weighting, the values calculated in Table 8 will not necessarily line up properly.

10. Please confirm that the COVID-19 factor and the Extended OEP factor, as provided in the file [ACA Extended OEP and Covid-19 Estimates.xlsx] have not actually been included in the current rate development. If they have been included, please indicate where they are included in the rate development.

We can confirm this.

The following are additional questions or comments from the PID:

1. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, the PA Plan Design Summary and Rate Tables, the Federal Rates Template, and in the binder are identical.

We can confirm that we have tested to ensure that the rates match.

2. Please provide an exhibit showing the financial gains and losses for calendar years 2014 – 2019 for the following categories: Member months, total administrative expenses, total incurred claims, total premium, total actual paid taxes and fees, profit, annual underwriting gain/loss and underwriting gain/loss pmpy.

This item has been added to the supporting exhibits file (Exhibit 8).

3. Per the Department's published guidance, the Benefit Richness factors in Table 10 Column L should be developed based upon the following formula: $(\text{Plan Pricing AV in column K} * \text{CSR Defunding Adjustment in column P})^2 - (\text{Plan Pricing AV in column K} * \text{CSR Defunding Adjustment in column P}) + 1.24$. Further, the value developed by the quadratic formula must then be multiplied by a normalization constant such that the value in Cell L15 or L16 balances back to 1.000. Please modify the cells in Column L to explicitly show the quadratic formula and normalizing constant to demonstrate compliance with our guidance.

We have updated the exhibits as requested. Because we had already calculated the Benefit Richness factors as per the filing instructions, this did not result in any change to rates.

4. The Department will contact the company shortly with information regarding the opportunity and parameters for the company to provide to support an updated Covid-19 impact assessment, if desired.

5. Cells C16 and D16 of Table 5, labeled "Change in Morbidity - All Other", require a formula input for individual filings. For example, the individual UPMC Health Options filing (UPMC-132364637) has a change in morbidity from the experience period to the rating period of 1.000 (i.e. no change). Then, Cells C16 and D16 should be filled out with an explicit formula as follows: $=(1.01)*(1.000)$. Further note that this is explained in the guidance.

We have updated the exhibits as requested. Because we had already calculated these factors as per the filing instructions, this did not result in any change to rates.

Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Upon receipt of your responses to the above requested data, the Department will continue to review your filing. Please note that there may be additional questions and/or requirements as the Department conducts a more in-depth review.

Should you have any questions regarding this correspondence, please contact me at (717) 783-2117 or e-mail at jlaverty@pa.gov.

Sincerely,

James Laverty, FSA, MAAA
Actuary
Bureau of Accident & Health Insurance

Conclusion:

Sincerely,

Jim Laverty

Dear Mike Lovely:

The Pennsylvania Insurance Department has received and conducted a preliminary review of the above captioned filing. In order to complete the review, we are requesting the following information. To facilitate a timely review, we request this information be provided within 9 days of the date of this letter. If you have any questions or difficulties in providing the data within this time frame, please call me.

The following questions are from Oliver Wyman, our Actuarial Consultant:

UPMC Health Options Individual ACA Filing – UPMC-132364637

1. The response to Question 1 of the first round of questions indicates that emerging information in the internal financials shows an increase in general administrative expenses and that this is expected to continue in 2021. Please provide additional detail regarding the components of the general administrative expenses that are increasing. In particular, please identify which specific expenses are increasing (e.g., sales/marketing, rent), how much are they increasing by, and why are they increasing?

2021 admin expenses were projected from 2019 actuals as a baseline. While general admin expenses are increasing by just under 2 percent, commissions are expected to increase more substantially (consistent with changes in our field commission schedule for 2021 vs. 2019). The following chart illustrates changes in these admin components:

	Individual ACA	
	2019 Actual	2021 Filing
General Admin	\$53.91	\$54.79
Commissions	\$1.62	\$4.39

2. We have the following additional questions regarding risk adjustment.

a. Please provide additional information regarding the source for the 2019 Total Received Risk Adjustment Estimate and 2019 ACA Individual Member Months included in Exhibit 2. In particular, please identify each of the 2019 risk score components (e.g., PLRS, ARF) which are being assumed by the company to be

different from the 2019 estimates released by the Department (e.g., the statewide-average risk score) and provide quantitative support demonstrating why the company's assumptions are appropriate.

Assumptions for risk score components represented in Exhibit 2 were originally developed and submitted with the 5/19 rate submission, prior to availability of the Department's 2019 estimates. Following release of the Department's estimates for 2019, we revised our assumptions to rely on these estimates but inadvertently failed to withdraw the current Exhibit 2 from our subsequent filing on 6/23. As a result, the values in the copy of Exhibit 2 submitted on 6/23 are outdated and do not represent our current assumptions.

Rather than solely relying upon our original internal estimates of 2019 transfers as a starting point for the 2021 estimates, our revised assumptions incorporate trends observed in several years of historical transfer data (as discussed in the response to part 'b' below). Because our assumptions for establishing 2021 transfer estimates are no longer based upon the earlier 2019 estimates in Exhibit 2, we have removed Exhibit 2 from our submission in the current round of review. We apologize for any confusion caused by our inadvertent inclusion of this Exhibit in the 6/23 submission.

b. The response to Question 3 of the first round of questions indicates that the projected risk adjustment was selected based on patterns observed in the changes of UPMC specific and statewide-average risk scores in the individual market as well as accounting for circumstances unique to the reporting of 2019 data. Please provide numerical support for the patterns observed in the changes of UPMC specific and statewide-average risk scores in the individual market and demonstrate how those patterns were used in the development of the company's risk adjustment assumption.

Please see the "Historical Risk Adj Data" exhibit uploaded in the Supporting Documentation tab in SERFF for numerical support of the patterns observed in the changes of UPMC-specific and statewide-average risk scores. It is notable that the Department released two rounds of estimates where the updated round included greater statewide-average risk scores than the initial round. The language used in our first round of responses was based on the initial round of estimates, while the "Historical Risk Adj Data" exhibit and language used in this current round of responses are based on the updated estimates. For purposes of developing an estimate of the 2021 transfer, risk scores are assumed to be the most significant component of the transfer formula that influences the final transfer. This is because the spread between the UPMC-specific and statewide-average risk scores typically exhibits the most dynamic changes from year to year (compared to other components of the transfer formula), and this spread has an easy-to-interpret effect on the final transfer in that the greater the UPMC-specific risk score is relative to the statewide-average risk score, the more favorable our transfer will ultimately be. As can be seen in the "Historical Risk Adj Data" exhibit, for the Individual market, the 2019 UPMC-specific risk score is notably greater than in previous years, while the 2019 statewide-average risk score is notably less than in previous years. This leads to the 2019 UPMC transfer being significantly

more favorable than in previous years. However, we anticipate that the 2021 UPMC-specific risk score will be similar to the average risk score observed over the 2017 - 19 timespan (approximately 1.67), while the 2021 statewide-average risk score will rebound and likewise reach levels similar to those observed in 2017 - 18 (approximately 1.66). Assuming that the remaining components of the transfer formula do not exhibit drastic, unexpected changes, we project that the 2021 UPMC transfer will be similar to those observed in 2017 - 18.

3. The response to Question 5 of the first round of questions indicates that geographic factors were updated to better reflect cost differences by area including differences in fee schedules, anticipated shifts in utilization between providers, less favorable contracting terms in areas with few facilities, and MLRs. Please provide the numerical development of the geographic factors, quantifying any adjustments made to the 2020 factors for each of the items listed above and/or explicitly demonstrating how all of the items listed above were taken into consideration in developing the proposed geographic factors.

Rather than a numerical build-up for each contributing assumption, strategic input was collected from various implicated departments to establish estimates of expected cost and utilization differences for each area over the filing period. This input was combined to develop representative ranges for the geographic factors. We then chose final values that were within those ranges while seeking to avoid disruption for members changes by minimizing unnecessary changes from prior year factors.

4. The response to Question 6 of the first round of questions indicates that the 0.98 trend adjustment factor shown in Exhibit 5 is the ratio of the applied annual trend factor relative to the trend factor implied by the raw historical data. Therefore, please provide qualitative and quantitative support for how the specific applied annual trend factor (i.e., 6.0%) was ultimately chosen.

The applied trend factor was selected based on multiple years of historical trend. For the 2020 filing, our experience period showed an uncharacteristically high trend (12%) that was double the amount of trend observed in the experience data for the 2019 filing (6%). Based on our overall historical experience, we believe that the 2019 experience data is more representative of normal annual trend. Additionally, the 2021 filing experience data suggests that the trend is already moving toward the more typical historical levels observed in the 2019 data, and in the absence of clear evidence to the contrary we anticipate that this downward trajectory will continue through the remainder of the current calendar year and into 2021. Based on this assumption, we decided that a 6% trend was the best representation of what we expect our trend to be going forward.

The following are additional questions or comments from the PID:

1. On July 13th, the Department will communicate our guidance based upon updated survey information from the issuers on their best estimate of the Covid 19 impact on 2021 rates.

Responses to the round two questions are due on July 16th. Please be sure that all documents in SERFF after that date reflect the impact of Covid 19 and are consistent with Department's July 13 guidance.

UPMC has revised its previously adopted COVID-19 morbidity factor adjustment from 2 percent to a net zero impact for 2021. While we believe that the entire range of the Department's allowable COVID-19 morbidity factor is supportable, we believe the net zero impact will be most advantageous to consumers. As further support for adopting a net zero impact, we note that UPMC's original estimates of COVID impact relied in part on publicly available analysis provided by Milliman and Wakely. Since the time of the Round 2 submission, UPMC has had the opportunity to incorporate into our modeling additional credible analysis that has substantially expanded the range of our assumptions with respect to COVID-19 impact. Specifically, a recent Society of Actuaries (SOA) study ("Impact of COVID-19 on Deferred Medical Costs and Future Pent-Up Demand," April 2020) suggests that the 2021 impact of COVID could in fact be much lower and occur on a substantially different timeline than those incorporated in the Milliman and/or Wakely assumptions. We believe there is a reasonable likelihood that any additional morbidity due to COVID will be substantially confined to 2020 experience, which if ignored represents an increased risk of unnecessary premium increases for members in 2021. While many variables and factors are relevant to projections of COVID-19 impact, we believe it is notable that our internal hospital census data is tracking similarly to that hospital utilization described in the SOA study. Additionally, survey data from the Kaiser Family Foundation ("KFF Health Tracking Poll - May 2020," published May 27, 2020) indicates that, while a substantial number of households have deferred care during the pandemic, this has not resulted in widespread deterioration of health/condition. Again, while we recognize that this is only one of myriad possible outcomes and believe that the entire COVID morbidity range is supportable, this more conservative assessment will be in the best interests of consumers. On this basis, we have incorporated a COVID-19 morbidity factor of zero in our current submission.

2. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables and Federal Rates Template are identical.

We can confirm that we have tested to ensure that the rates match.

3. Please ensure that the 7/16/20 versions of the following items are posted in SERFF with your July 16th response to this data call:

- Cover letter identifying all changes made and the reason for the change. Also show the revised rate change.
- PA Actuarial Memorandum
- PA Actuarial Memorandum Exhibits
- Departments Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no “NA”)
- URRT
- Federal rates template
- Part III actuarial memorandum
- Updated Rate Change Request Summary (Attachment 1)
- Public filing pdf with limited redactions as previously directed in the Guidance (includes all correspondence and supporting exhibits subsequent to the initial submission, in addition to all of the above items).

Please be advised that there may be additional questions based on the responses to the above. However, it is our hope to avoid 3rd round data calls. Towards this end, please provide complete detailed and thorough responses including supporting data and narrative.

Each response to a Department data call must contain a cover letter that details the changes made to the PA Actuarial Memorandum Exhibits and the reasons why the changes were made, e.g., in response to Department question number 5.

Response to this request should be provided via SERFF in Microsoft Excel spreadsheets (version 2013 or less). Please retain all formulas.

Upon receipt of your responses to the above requested data, the Department will continue to review your filing. Please note that there may be additional questions and/or requirements as the Department conducts a more in-depth review.

Should you have any questions regarding this correspondence, please contact me at (717) 783-2117 or e-

mail at jlaverty@pa.gov.
