

Pennsylvania Gets it Done.

Pennsylvania is committed to driving the digital transformation by supporting the growth of data infrastructure.

From site selection to full operation, we're enabling faster deployment, strengthening our economy, and creating lasting job opportunities. - That's the PA advantage.

Together, we power Pennsylvania's digital future.

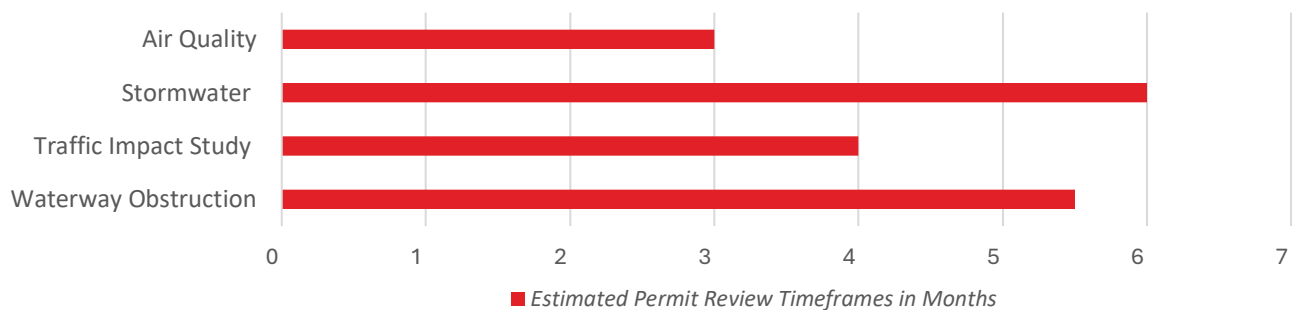

TIMELINES IN ACTION

Project	Hyper-Scale Data Center
Site Selection to Operations	2 - 3 years

In Northeastern Pennsylvania, the Commonwealth has supported the development of hyper-scale data centers that fuel the digital economy. These data centers provide critical infrastructure for cloud services, artificial intelligence, and the broader digital economy.

ANTICIPATED STATE PERMITS

WORKING TOGETHER

Successful Projects Leverage:

- ✓ Coordinated efforts with local zoning and state energy authorities.
- ✓ Expert engineering and industry-specific local development support.
- ✓ Office of Transformation & Opportunity (OTO) support.

Permit, license, and certification requirements are case by case and subject to change based on locality, regulations, and business needs. To learn more about how OTO can assist, visit oto.pa.gov or email oto@pa.gov.
