Introduction

Transit Asset Management (TAM) is a systematic process that enables public transportation agencies to reach and maintain assets in a State-of-Good-Repair (SGR). TAM accounts for the full life cycle of an asset used for public transportation service, from procurement through operations and maintenance to final disposition. Originally authorized by the Moving Ahead for Progress in the 21st Century Act (MAP-21) and furthered by the Fixing America's Surface Transportation Act (FAST ACT), the Federal Transit Administration (FTA) developed the Transit Asset Management (TAM) model to:

- Monitor and manage public transportation assets
- Improve safety
- Increase reliability and performance
- Establish asset performance measures

In July 2016, FTA issued a [final rule](#) requiring transit agencies to maintain and document minimum TAM standards, policies, and procedures. The TAM rule applies to all recipients of Chapter 53 funds that either own, operate, or manage federally funded capital assets used in providing public transportation services. The TAM rule divides transit agencies into two categories based on size and mode:

Tier I

- Operates Rail Fixed Guideway (§5337) **OR**
- Operates over 100 vehicles across all fixed route modes (peak service) **OR**
- Operates over 100 vehicles in one non-fixed route mode (peak service)

Tier II

- Urban and Rural Public Transportation (§5307, §5310, and §5311 eligible) **OR**
- Operates up to and including 100 vehicles across all fixed route modes (peak service) **OR**
- Operates up to and including 100 vehicles in one non-fixed route mode (peak service)

In Pennsylvania, the Pennsylvania Department of Transportation (PennDOT) is responsible for overseeing all public transportation programs for the Commonwealth. Through this responsibility, PennDOT manages an annual public transportation grant program of \$2.2 billion in state funds and more than \$60 million in direct federal funds. Pennsylvania is committed to ensuring that public transportation is safe, reliable, accessible, and affordable; and supports strong asset management as a key component to achieving these goals.

PennDOT updates the TAM Group Plan every four years to maintain compliance with TAM regulations. In addition, PennDOT amends the TAM Group Plan annually to address changes in group performance, goals, and accountable executives. The TAM rule requires states to participate and/or lead the development of a group plan for recipients of Section 5311 and Section 5310 funding and additionally allows other tier II providers to join a group plan at their discretion. All required agencies (Section 5311 and 5310) and remaining tier II systems have elected to participate in the PennDOT Group Plan. A listing of the agencies and their current accountable executives are identified in the next section.

Since implementing the TAM process, Pennsylvania's Group Plan participants have experienced an overall decline in the number of assets that exceed the established SGR. By the end of the second TAM Plan cycle (2022-2026), group plan participants experienced a decrease in revenue vehicles outside of SGR in all categories, apart from minivans (MV). This result is most likely from minivans being included in the overall van (VN) counts in 2022, while broken out separately in 2025.

Facility condition scores, supported by FTA Facility Condition Assessments, have also seen an overall decrease in the amount exceeding the SGR threshold 2022-2026. This decrease is related to two main factors. First, there have been several large facility construction projects that were completed over the term. This has led to the retirement of older poor-condition facilities. Second, there were several facilities, particularly passenger/parking, that were incorrectly represented as transit having capital responsibility during the first iteration of the TAM Group Plan in the statewide asset management system. In the second cycle, PennDOT implemented checks to ensure that the facilities counting towards SGR goals were in fact transit's capital responsibility. Both changes impacted the SGR facilities' goals and performance positively.

Pennsylvania Transit Asset Management (TAM) Group Plan Participants

Urban and Rural Fixed Route Agencies	Accountable Executive
Altoona Metro Transit (Amtran)	Michele Barnes
Area Transportation Authority of NC PA (ATA)	Mark Head
Beaver County Transit Authority (BCTA)	Mary Jo Morandini
Borough of Mt. Carmel (LATS)	Jack Spade
Borough of Pottstown (PART)	Kourtney High
Butler Transit Authority (BTA)	Tiffany Fosnaught
Centre Area Transportation Authority (CATA)	Todd Horsley
County of Lackawanna Transit Authority (COLTS)	Michael Danchak
County of Lebanon Transit Authority (LT)	Bill McNeal
Crawford Area Transit Authority (CATA)	Tim Geibel
Endless Mountains Transportation Authority (BEST)	Tracey Eisenbury
Erie Metropolitan Transit Authority (EMTA)	Jeremy Peterson
Fayette County (FACT)	Rudy Dutko
Hazleton Public Transit (HPT)	Ralph Sharp
Indiana County Transit Authority (IndiGO)	Brenda Hill
Lehigh and Northampton Transportation Authority (LANTA)	Brendan Cotter
Luzerne County Transportation Authority (LCTA)	Robert Fiume
Mercer County Regional Council of Governments (SVSS)	Jill Boozer
Mid-County Transit Authority (TACT)	Patti Lynn Johnston
Mid-Mon Valley Transit Authority (MMVTA)	Stephanie Lee
Monroe County Transit Authority (MCTA)	Richard Schlameuss
New Castle Area Transit Authority (NCATA)	David A. Richards
River Valley Transit Authority (RVTA)	Todd Wright
Schuylkill County (STS)	Krista Ripley
Transit Authority of Warren County (TAWC)	Wendy Hollabaugh
Washington County Transportation Authority (Freedom)	Sheila Gombita
Westmoreland County Transit Authority (WCTA)	Alan Blahovec
Shared-Ride only Agencies (5310 eligible)	
Allied Coordinated Transportation Services, Inc.	Vanessa Lovlie
Blair Senior Services	Dennis Wisor
Bucks County Transport	Jim Raymond
Butler County	Cody Slater
Call A Ride Services	Cindy Sunderland
Centre County	David Lomison
Chester County	Gene Suski
Clarion County	Sandra Ion
Community Transit of Delaware County	Derek Staccone
Forest County	Brenda McCanna
Greene County	Rick Blaker
Huntingdon-Bedford-Fulton AAA	Anthony Molinari
Pike County	Robert Ruiz
Somerset County	Anne Garrison
STEP, Inc.	Daniel Merk
Suburban Transit Network	Michael Gerhart
Susquehanna County	Ronalyn Lewis
Wayne County	Pamela Wilson

Statewide Asset Management System

PennDOT has developed software to assist in the inventory and monitoring of assets, including condition assessments and schedules of expected expenditures. This software, the Pennsylvania Capital Planning Tool (CPT), was created under a cooperative agreement between PennDOT and the Virginia Division of Rail and Public Transit (DRPT) and was funded through an FTA state-of-good-repair award. It has been in use statewide since 2016.

PennDOT uses the Capital Planning Tool (CPT) to:

- Inventory all public transportation system assets;
- Collect relevant data on those assets that can be easily exported for NTD asset reporting;
- Predict asset replacement schedules based on State of Good Repair (SGR) and required annual asset condition status and mileage updates completed by participants;
- Create a four-year capital program for each public transportation system to submit to their regional planning organization for review and approval;
- Create an annual capital program for each public transportation system which becomes an agency's individual capital application in PennDOT's electronic granting system;
- Create an annual statewide public transportation capital program through communication with participants and an agency-state approval process;
- Compare statewide capital needs to available funding; and
- Prioritize statewide capital program decisions based on supporting SGR targets within available funding.

The Capital Planning Tool assists agencies in making decisions to advance group TAM goals. The CPT allows agencies to develop and compare scenarios to plan for future funding needs more efficiently. Agencies can look at multiple program options for the same timeframe, ultimately picking the plan that best fits their needs. The tool generates a twelve-year plan so agencies can account for long-term and short-term planning. Agencies select a scenario to be their submitted unconstrained capital plan to PennDOT BPT. From there, agencies collaborate with PennDOT Program Managers to apply available funding to the prioritized projects and develop capital grant applications.

More information on the Capital Planning Tool can be found in the [user guide](#).

Asset Inventory and Condition Assessment

An accurate and comprehensive inventory of assets and a consistent condition assessment of these assets is the most critical element of the TAM process. The following sections outline the requirements for achieving this.

Asset Inventory

All Pennsylvania public transportation systems must maintain/update asset data in the CPT system annually. CPT stores crucial information about every asset type and maintains a complete history of the asset as it ages. Transit agencies record changes in condition, usage, value, depreciation, etc. for the following asset categories:

- **Rolling Stock (Revenue Vehicles):** Transit agency-owned or leased Fixed Route & Paratransit vehicles, used to provide public transportation.
- **Equipment:** Tangible support property having a useful life of at least one year, including all non-revenue/support vehicles.
- **Facilities:** A building or structure that is used in the provision of public transportation, including administrative and maintenance, and passenger and parking facilities.

The asset inventory forms the basis of the group TAM plan and a current, complete inventory of all assets over \$50,000 in value is identified in [Appendix A](#). It is important to note that this list represents a snapshot in time, and the CPT will be continually updated as assets are added, retired, or as conditions change. For the most current asset inventory, the CPT should be used.

Condition Assessment

Each transit agency must update the age, mileage, and condition of their Rolling Stock and Equipment assets at least annually. Additionally, transit agencies must document the condition of each transit-related facility in the CPT. This annual update requirement exceeds the basic FTA requirement but is necessary for PennDOT to properly plan long-term capital funding. Each asset is rated as a whole integer using FTA's Transit Economic Requirements Model (TERM) scale:

Excellent	5.0	Brand new asset; no visible defects.
Good	4.0	Asset showing minimal signs of wear; some (slightly) defective or deteriorated component(s).
Adequate	3.0	Asset has reached its mid-life; some moderately defective or deteriorated component(s).
Marginal	2.0	Asset reaching or just past the end of its useful life; increasing number of defective or deteriorated component(s) and increasing maintenance needs.
Poor	1.0	Asset is past its useful life and needs immediate repair or replacement; may have critically damaged components(s).

Agencies may reference the [FTA Facility Condition Assessment Guidebook](#) for detailed assessment standards. A sample checklist is included as [Appendix B](#). Every four years all group plan participants are required to complete an FTA Facility Condition Assessment on all facilities for which an agency has direct capital responsibility. Per the NTD Reporting Policy Manual, an agency has direct capital responsibility for an asset if any of the following are true:

- The agency owns the asset.
- The agency jointly owns the asset with another entity.
- The agency is responsible for replacing, overhauling, refurbishing, or conducting major repairs on an asset, or the cost of those activities is itemized as a capital line item in the agency's budget.

PennDOT utilizes consultants from open-end agreements to complete the assessment reports to ensure a neutral third-party condition rating. Copies of the condition assessment reports are kept on file by the agency and by PennDOT. At the time of this report, four out of eighty-four facilities were assessed at a rating lower than 3.0, making these assets no longer in a state of good repair.

Asset Inventory and Condition Verification

PennDOT staff, in coordination with transit agency management, will conduct periodic reviews of the CPT inventory and verify condition assessments through the following activities:

- **Transit Agency Performance Reviews:** A state-required comprehensive review for all fixed route providers of agency management and operations on a five-year cycle.
- **Compliance Reviews:** PennDOT conducts regular compliance reviews of public transportation grantees, including those that receive §5310, §5311, and PennDOT Shared-Ride Lottery funding. These reviews are conducted on a periodic basis that is generally every three years. Certain circumstances may result in more frequent review.

PennDOT's goal is to actively engage with each individual transit agency on an annual basis, and complete an in-depth, on-site review at least once every three (3) years to confirm the accuracy of CPT data.

State of Good Repair (SGR) Policy

The estimated life cycle or the acceptable period of use in service for a capital asset is determined by PennDOT's State of Good Repair (SGR) Guidelines. The current SGR standards are identified in [Appendix C](#) and available on the PennDOT website.

Asset Inventory and Condition Summary

This section is a snapshot of the cumulative status and condition of the statewide Group TAM Plan's members' assets. These figures are updated annually along with performance and targets.

Rolling Stock (Revenue Vehicles)					
Asset Class	Number	Average Mileage	Average Age	Number met or exceeding ULB	% met or exceeding ULB
AB-Articulated Bus	10	74,268	4	0	0%
AO-Automobile	12	135,708	8	4	33%
BR-Over-the-road Bus	52	316,640	13	19	37%
BU-Bus	686	247,604	9	139	20%
CU-Cutaway	1,342	113,013	6	409	30%
MV-Minivan	241	89,604	7	92	38%
VN-Van	372	74,842	5	61	16%
SV - Sports Utility Vehicle	12	75,710	4	0	0%
Grand Total	2,727	143,271	7	724	27%

Equipment (Non-Revenue Vehicles)					
Asset Class	Number	Average Mileage	Average Age	Number met or exceeding ULB	% met or exceeding ULB
Automobiles	120	41,713	7	46	38%
Trucks and other Rubber Tire Vehicles	108	42,257	8	21	19%
Grand Total	228	41,971	7	67	29%

Facilities				
Asset Class	Number	Average Condition on TERM Scale	Number below 3.0 on TERM Scale	% below 3.0 on TERM Scale
Administrative / Maintenance Facilities	60	3	3	5%
Passenger / Parking Facilities	24	3	1	4%
Grand Total	84	3	4	5%

Annual Performance Targets and Measures

PennDOT will annually update performance targets based on two primary elements:

- Prior year's performance
- Anticipated/obligated funding levels

The identified annual targets represent **age** and **condition** in line with FTA guidelines. PennDOT will continue to follow outlined investment prioritization strategies when making investment decisions.

Performance Measure	Asset Class	FY 2025-26 Target	Current Performance	FY 2026-27 Target
Rolling Stock (Revenue Vehicles)				
Age- % of revenue vehicles within a particular asset class that have met/exceed SGR	AB- Articulated Bus	0%	0%	0%
	AO-Automobile	6%	27%	27%
	BR-Over-the-road Bus	48%	37%	37%
	BU-Bus	30%	20%	20%
	CU-Cutaway	59%	31%	31%
	MV-Minivan	68%	26%	26%
	VN-Van	54%	13%	13%
	SV - Sports Utility Vehicle	83%	0%	0%
Equipment (Non-Revenue Vehicles)				
Age - % of non-revenue/ service vehicles within a particular asset class that have met/exceed SGR	Automobiles	43%	37%	37%
	Trucks and other Rubber Tire Vehicles	16%	20%	20%
Facilities				
Condition - % of facilities with a condition rating below 3.0 on the FTA TERM scale	Administrative / Maintenance Facilities	4%	4%	4%
	Passenger / Parking Facilities	6%	6%	6%

Decision Support Tools

The PennDOT BPT, in coordination with the PennDOT Planning and Program Center, the Pennsylvania Public Transportation Association, and local transit agencies will work to provide and enhance decision support tools that aid in the implementation of the TAM Plan. There are several primary decision support tools currently in place that are foundational for the execution of TAM. They are:

- PennDOT Capital Planning Tool (CPT) – As documented above, the CPT allows PennDOT and transit agencies to view current inventory, assess current and future needs, and plan for capital replacement and investment based on current and forecasted funding. The CPT includes the ability to develop annual capital plans that can be directly imported into PennDOT’s online grants management system.
- State of Good Repair (SGR) Guidelines – PennDOT maintains SGR standards for most transit assets ([Appendix C](#)).
- Agency Maintenance Plans – Agencies are required to have maintenance plans in place prior to receiving funding from PennDOT. Maintenance plans are reviewed as a requirement in the §5310 application, reviewed during §5311 compliance reviews, and are reviewed and discussed during the Transit Agency Performance reviews for all fixed route transit agencies. Beginning in 2026, PennDOT BPT implemented facility maintenance reviews that focus solely on reviewing adherence to agency established maintenance plans while offering recommendations for improvement. The intent

of these reviews is to help transit agencies extend the useful life for assets currently being operated.

- **Public Transportation Agency Safety Plans (PTASP)** - All urban public transit agencies in the Commonwealth have written safety plans compliant with Part 673 of the PTASP final rule as of July 20, 2021. The PTASP final rule requires recipients of §5307 FTA funding to develop and implement safety plans that support the implementation of Safety Management Systems (SMS). These safety plans must be updated annually based on agency specific execution dates and shared with PennDOT BPT and their respective planning partners, so the new targets and measures can be incorporated into regional planning practices. Rural public transit agencies in Pennsylvania do not currently have PTASPs in place. PennDOT has developed a template that rural agencies can use to develop a PTASP and have strongly encouraged rural agencies to create plans.
- **Planning and Project Delivery Division Support** – The PennDOT BPT Planning and Project Delivery Division is charged with overseeing state and federal grants and guiding grantees and subrecipients through the capital project process, from project development through design or specifications development, construction or procurement, and project close-out.

In addition to the decision support tools identified above, as of January 2025 PennDOT has implemented a statewide Fixed Route Intelligent Transportation Systems (FRITS) program. FRITS focuses on modernizing transit technology and creating a standard platform throughout the Commonwealth. One key piece of FRITS is real-time vehicle health monitoring, which will allow agencies to identify problems before they require vehicles to be out of service and prolong vehicle life, while also allowing agencies to better prioritize capital needs.

Investment Prioritization

Using established decision support tools, investment prioritization will occur annually as part of the capital budgeting process. To prioritize investments at an agency level and at a statewide level, the following basic actions take place:

- Update inventory in the CPT to include age, mileage, condition, and operational status
- Identify assets that are not in a state-of-good-repair, using the following priority process:
 - Any transit asset that poses a risk to safety
 - Vehicles that are within two years of meeting useful life benchmarks
 - Vehicles that are more than two years from meeting useful life benchmarks but are rated in poor condition
 - Facilities that have a condition rating of less than 3 on the TERM Scale, with priority given to facilities that are the lowest on the scale and represent a critical need to maintain operational capacity
 - Equipment that has met useful life benchmarks or is rated in poor condition
- Determine available funding based on federal, state, and local funding sources
- Develop projects within the CPT Planner based upon funds availability
 - Annually agencies are responsible for supplying estimates of directly awarded federal and local funding for capital projects
 - PennDOT applies for state-administered federal Section 5310 and Section 5311 funds on behalf of transit agencies with applicable projects in their unconstrained capital plan

- PennDOT works with agencies to facilitate the efficient use of dollars towards maintaining a state of good repair, filling project shortfalls with available state funding
- Import CPT Planner into the electronic granting system for the execution of capital grants

Throughout the process, PennDOT reviews projects and works with agencies to approve and move projects forward through the grant process. [Appendix D](#) contains a prioritized list of investments for the duration of the plan.

Planning Partner Coordination

Coordination between PennDOT, transit agencies, and the regional planning partner—Metropolitan Planning Organization (MPO) or Rural Planning Organization (RPO)— is a vital component of TAM. Furthermore, the final rule on metropolitan and statewide planning, published in the Federal Register on May 27, 2016, requires MPOs to practice Performance Based Planning and Programming (PBPP).

As documented in a “Dear Colleague” letter from FTA Region III dated August 17, 2018, “As part of the implementation of the PBPP requirements, States, MPOs, and providers of public transportation must jointly agree upon and develop specific written provisions for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, and the reporting of performance to be used in tracking progress toward attainment of critical outcomes for the region of the MPO. These jointly written provisions can be documented either as part of the metropolitan planning agreements required under 23 CFR 450.31 or documented in some other means outside of the metropolitan planning agreements as determined cooperatively by the MPOs, States, and providers of public transportation.”

The Pennsylvania TAM Group Plan fulfills this requirement and encourages communication between transit agencies and their respective MPOs and RPOs. Using updated CPT data, PennDOT provides annual reports on individual agency performance against established statewide targets to transit agencies to assist with capital planning and fulfilling the PBPP requirement. To do this, the following process takes place:

- PennDOT provides asset performance reports to transit agencies by August 31 of each year that measure performance against established targets for the previous fiscal year.
- Transit agencies review content for accuracy and follow up with PennDOT if any information related to transportation asset performance is inaccurate.
- New performance goals for the upcoming fiscal year are established no later than September 15 of each year and communicated to transit agencies covered under the group plan.
- Transit agencies share performance data with their respective planning partner by the end of each calendar year, or earlier as decided between the partners.
- Transit agencies continue regular coordination regarding the local Transportation Improvement Plan (TIP) and other planning initiatives of the regional planning partner.

To formalize this process, a separate acknowledgement form has been developed for each transit agency, a template is included in [Appendix E](#).

Recordkeeping and Reporting

The FTA TAM rule requires the Department to maintain accurate records of inventory and condition rating and performance and report this information to the National Transit Database (NTD) each year. Accurate recordkeeping is critical to the success of TAM and the CPT.

Transit agencies shall update all assets in the CPT during the annual update period June 1 – July 31.

PennDOT shall provide the following to NTD by the last business day of April of each calendar year per NTD requirements:

- Narrative description of any change in the condition of PennDOT's transit system or operations from the previous year
- Description of the progress made during the reporting year to meet the performance targets set in the previous reporting year
- Asset inventory data for 5310 and 5311 recipients
- Asset performance data for 5310 and 5311 recipients

All tier II agencies that receive Section 5307 funding will report inventory and performance data directly to the NTD, including both full and limited reporting agencies.

Appendix C: PennDOT State of Good Repair (SGR) Guidelines

State of Good Repair (SGR) Guidelines

June 2026

Overview

The Bureau of Public Transportation (BPT) is retiring its policy on Estimated Service Life (ESL) standards and implementing new State of Good Repair (SGR) Guidelines to better align with the National Transit Database's (NTD) Useful Life Benchmarks (ULBs), which reflect the point at which an asset reaches the end of state of good repair and should be taken out of service.

Reporting

Aligning BPT's new SGR Guidelines with NTD standards will mitigate inconsistencies between state and federal asset reporting requirements. Historically, discrepancies existed because ULBs were pre-selected in NTD and reporters would have to manually enter ESL figures, which was not always completed, causing mismatches with BPT's data and records. With this change in policy, entering new fleet information in NTD will be easier for all Pennsylvania reporters.

Methodology

In the new SGR Guidelines, the most significant changes apply to the Van and Cutaway asset classes. To align with FTA ULB standards, BPT is directing these vehicle types stay in service for longer periods. With BPT's investment in storage facilities and bus washes, most vehicles are anticipated to be housed under cover and in better condition which will improve the reliability and overall state of good repair. Additionally, funding levels are projected to remain level while vehicle costs are projected to rise making investment prioritization paramount. This policy adjustment is supported by an analysis of Capital Planning Tool disposition data, which indicates that most assets are already meeting ULBs.

Disposition Data Summary (Capital Planning Tool)

Asset Class	Count	Avg. Years of Disposal	ESL Standard (Previous)	ULB Standard (New)
Bus < 30 FT	2,295	8	5	8
Bus 30 FT	107	14	10	14
Bus Commuter/ Suburban	51	12	12	14

Asset Class	Count	Avg. Years of Disposal	ESL Standard (Previous)	ULB Standard (New)
Bus Std 35 FT	330	14	12	14
Bus Std 40 FT	825	13	12	14
Bus Trolley Std	14	16	12	14
Sedan/ Station Wagon	143	9	4	8
Van	737	8	4	8

Planning Implications

The new SGR Guidelines will be automatically reflected in the Capital Planning Tool, requiring no user action. Beginning with the next planning cycle, the State of Good Repair analyzer will schedule projects two years prior to an asset reaching its ULB. This new lead-time feature in the Capital Planning Tool will give grantees adequate time to receive funding, place orders, receive new assets, and retire old assets in line with ULBs.

Existing NTD fleet data will need to be updated with the SGR Guidelines ULBs during the next reporting cycle, as historical data would have been entered using the previous ESLs.

Depreciation

Assets placed into service beginning on July 1, 2026, should use the new ULB standard life expectancy for all audit depreciation schedules and TAM reporting. Assets placed into service prior to July 1, 2026, should continue to use their existing depreciation schedules.

Other Changes

BPT has streamlined the asset class list by removing many unused and non-applicable categories. If needed later, an unlisted asset class may be added with evidence of established expectations and support of industry experts. This approach allows agencies to replace unique item types as needed based on condition rather than adhering to strict timelines.

Exceptions

In line with current practices, BPT remains open to funding early replacements with proper justification. BPT will review all requests based on age, miles, and condition at the time of the request. All vehicle requests utilizing federal funding will still be subject to the useful life minimums established under [FTA C 5010.1F](#). BPT will consider vehicle overhauls and rehabilitations to help assets meet the new standards.

The Bureau will work on a case-by-case basis to address any questions or concerns related to these guidelines.

State of Good Repair (SGR) Guidelines

June 2026

The useful life benchmarks shown below are the point at which an asset reaches the end of state of good repair and should be removed from service. For any unlisted asset types, the Department follows Federal Transit Administration (FTA) guidelines or industry standards where necessary. Facility asset state of good repair shall be guided primarily by condition ratings with age also being a factor.

Useful Life Benchmarks for Capital Assets		
Asset Type	Age (Years)	Capital Planning Tool (CPT) Subtype
Revenue/Non-Revenue Vehicles:		
Articulated Bus (AB)	14	Bus Articulated
Automobile (AO)	8	Sedan / Station Wagon
Over-the-Road Bus (BR)	14	Bus Commuter/Suburban, Bus Intercity
Bus (BU)	14	Bus Std 40 FT, Bus Std 35 FT, Bus 30 FT
Cutaway Bus (CU)	8	Bus < 30 FT
Minivan (MV)	8	Minivan
Sports Utility Vehicle (SV)	8	SUV (Revenue)
Trolleybus (TB)	13	Bus Trolley Std, Bus Trolley Articulated
Trucks & Other Rubber Tired Vehicles	14	Pickup Truck, SUV, Other Support Vehicles
Van (VN)	8	Van
Inclined Plane Vehicle (IP)	56	Incline Railway Car
Commuter Rail Locomotive (RL)	39	Commuter Locomotive

Useful Life Benchmarks for Capital Assets		
Asset Type	Age (Years)	Capital Planning Tool (CPT) Subtype
Equipment/Facility Components:		
Communications equipment	10	Communications Equipment (Select asset subtype)
Computer equipment	4	IT Equipment – Hardware
Computer software	4	IT Equipment – Software
Fare boxes/ticket machines	10	Communications Equipment (Fare Collection Systems)
Surveillance equipment	10	Communications Equipment – Surveillance & Security
Air conditioning/Heating/Ventilation systems	15	Facility Equipment – Mechanical Equipment (Bus or Rail)
Asphalt paving, parking lot	10	Rehabilitation Event on a Parking Lot Asset
New roof for buildings	20	Facility Equipment – Structural Equipment (Bus or Rail)
Office furniture	10	Office Equipment – Furniture
Passenger shelters	10	Passenger Shelter
Station/Building envelope	40	Stations/Stops/Terminals or Support Facilities as appropriate
Station/Building structures	40	Stations/Stops/Terminals or Support Facilities as appropriate
Automobile/Bus washing and vacuum cleaner systems	10	Maintenance Equipment – Vehicle Cleaning Systems (Bus or Rail)

Useful Life Benchmarks for Capital Assets		
Asset Type	Age (Years)	Capital Planning Tool (CPT) Subtype
Equipment/Facility Components:		
Bus lift	15	Maintenance Equipment – Tools and Shop Equipment
Bus shelter cleaner	10	Maintenance Equipment – Vehicle Cleaning Systems (Bus or Rail)
Tools and shop equipment	10	Maintenance Equipment – Tools and Shop Equipment
Bus stop signs	10	Signals/Signs – Route Signage

Appendix D: Prioritized List of Investments (State of Good Repair)

Prioritized List of Investments FY2026-2030

	2026-27	2027-28	2028-29	2029-30
Bus: Revenue Rolling Stock Replacements	\$ 56,550,000	\$ 43,300,000	\$ 33,750,000	\$ 53,350,000
Equipment: Non-Revenue Rolling Stock Replacements	\$ 750,000	\$ 700,000	\$ 700,000	\$ 750,000
Equipment: Other Support Equipment	\$ 16,965,000	\$ 21,600,000	\$ 18,875,000	\$ 28,675,000
Facilities: Upgrades, Renovations, Replacements	\$ 60,000,000	\$ 55,000,000	\$ 55,000,000	\$ 45,000,000
	\$ 134,265,000	\$ 120,600,000	\$ 108,325,000	\$ 127,775,000

Appendix E: Sample Performance Based Planning Approach Acknowledgement Form

**Acknowledgement of Cooperative Development and Sharing of
Public Transportation Performance Data
Between Transit Agency and MPO
DATE**

On May 27, 2016, the United States Department of Transportation (USDOT) published in the Federal Register a final rule on metropolitan and statewide planning. This final rule requires Metropolitan Planning Organizations (MPOs) to practice Performance Based Planning and Programming (PBPP).

As part of the PBPP requirements, States, MPOs, and public transportation agencies must agree upon and develop specific written provisions for cooperatively developing and sharing information related to transportation performance data, including the selection of performance targets and reporting on progress related to these performance targets. These targets must be identified in a Transit Asset Management (TAM) Plan completed no later than October 1, 2018 in adherence with Federal Transit Administration (FTA) regulations. The TAM Plan must be rewritten with major updates on a four-year cycle.

The Pennsylvania Department of Transportation (PennDOT) has developed a TAM Group Plan for all sub recipients operating public transportation receiving funding through FTA §5310 and/or §5311. In addition, FTA permits recipients of §5307 funding to elect to participating in a group plan if they are a Tier II TAM organization.

The Pennsylvania TAM Group Plan fulfills the PBPP requirement and encourages communication between transit agencies and their respective MPOs and RPOs. In accordance with the plan, the following actions take place that fulfill the PBPP requirement:

- PennDOT will provide asset performance reports to transit agencies by August 31 of each year that measure performance against established targets for the previous fiscal year.
- Transit agencies will review content for accuracy and confirm with PennDOT that information related to transportation asset performance has been received and is accurate.
- Transit agencies will share performance data with their respective planning partner by the end of each calendar year, or earlier as decided between the partners.
- New performance goals for the upcoming fiscal year will be established no later than September 15 of each year and communicated to transit agencies covered under the group plan.
- Transit agencies will continue regular coordination regarding the local Transportation Improvement Plan (TIP) and other planning initiatives of the local planning partner.

The above process is hereby acknowledged by:
