

SR 0156 BRIDGE PROJECT OVER LONG RUN

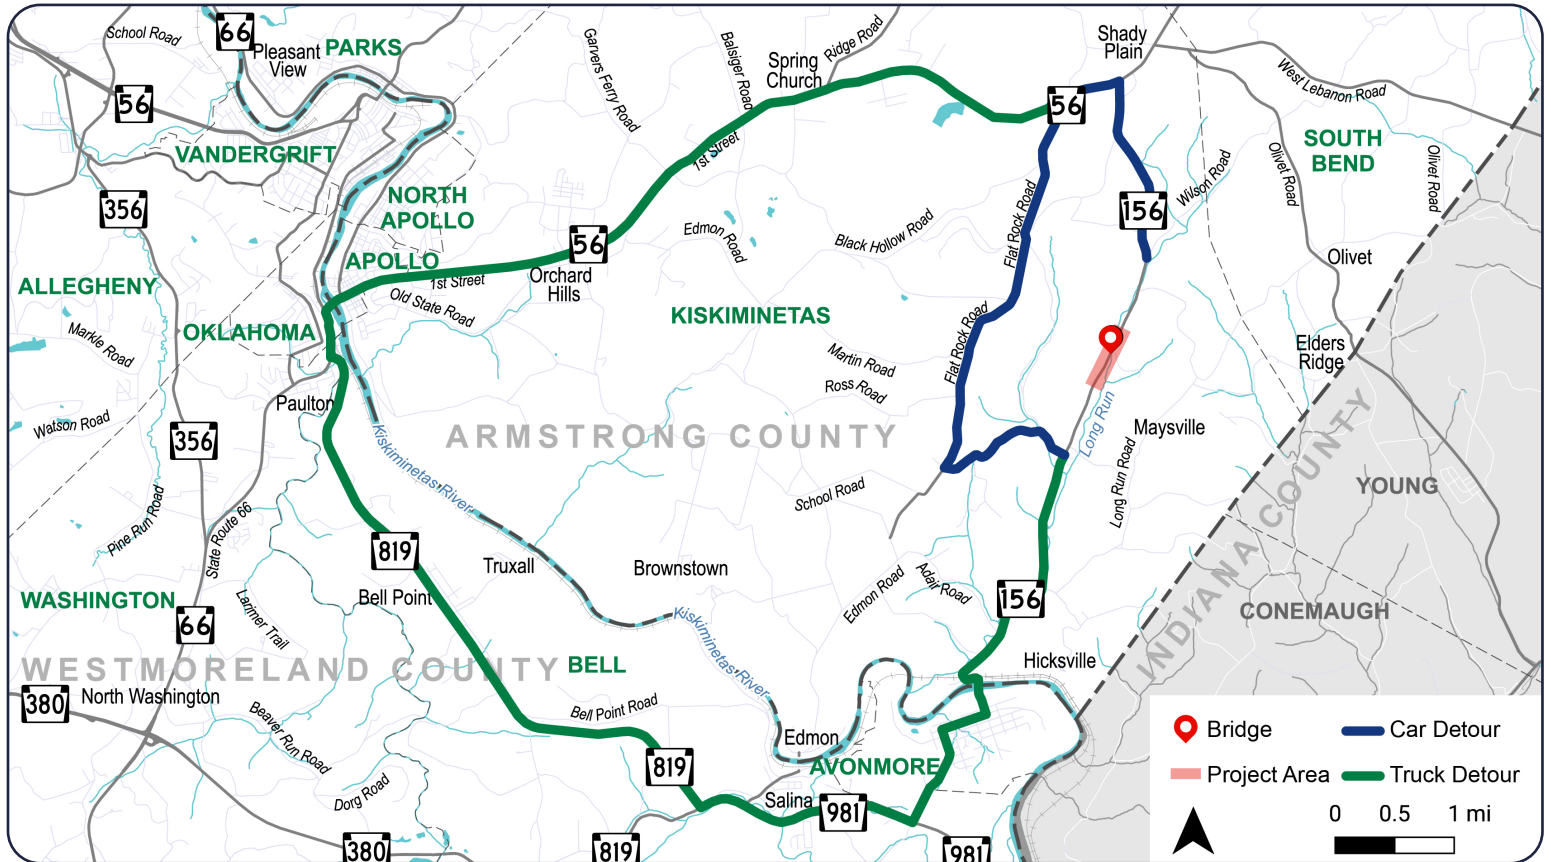

PROJECT PURPOSE AND NEED

The purpose of this project is to replace the existing bridge carrying SR 156 over Long Run and relocate portion of the existing stream. This work will also include raising the existing roadway profile and all associated approach roadway reconstruction in Kiskiminetas Township, Armstrong County. The existing bridge structure is deteriorated and significant erosion is present at the current structure due to the skew.

PROJECT DETAILS

- Provide new Precast Reinforcement Concrete Box Culvert on SR 156
 - Remove bridge weight posting
 - Utilize accelerated bridge construction methods to construct new culvert in 3 weeks under detour
 - Realign existing stream (Long Run)
 - Upgrade guide rail safety
 - Avoid environmental impacts
 - Minimize property and utility impacts
-
