ASA	Agricultural Security Areas
AST	Aboveground Storage Tank
AUL	Activity and Use Limitation
CCMPO	Centre County Metropolitan Planning Organization
DCNR	Department of Conservation and Natural Resources
EDR	Environmental Data Resources
EIS	Environmental Impact Statement
ESA	Environmental Site Assessment
FHWA	Federal Highway Administration
GIS	Geographic Information System
I-99	Interstate 99
LOS	Level of Service
NEPA	National Environmental Policy Act
PA	Pennsylvania or Pennsylvania Route
PA DEP	Pennsylvania Department of Environmental Protection
PEL	Planning and Environmental Linkage
PennDOT	Pennsylvania Department of Transportation
PFBC	Pennsylvania Fish and Boat Commission
PWSA	Preliminary Waste Site Assessment
SCAC	State College Area Connector
S.R.	State Route
USGS	United States Geological Survey
UST	Underground Storage Tank
U.S. EPA	United States Environmental Protection Agency

## 1.0 Introduction

### 1.1 Project History

The State College Area Connector Planning and Environmental Linkages (PEL) Study identified transportation needs within southern Centre County, Pennsylvania in a 70 square mile initial study area. The study evaluated a range of alternatives to determine how the alternatives addressed the Study's purpose and need, balanced impacts on the natural and built environment, addressed traffic concerns within the overall study area, met engineering considerations such as constructability, cost, and considered area planning goals. The PEL Study screened nine corridors to determine the best options to advance for National Environmental Policy Act (NEPA) evaluation and preliminary engineering. Based on the impact analysis, three corridors were identified (US 322-1S, US 322-1OEX and US 322-5) to be advanced as reasonable alternatives, and a specific project area was developed to initiate detailed field investigations and conduct preliminary engineering investigations to address the transportation purpose and needs as part of the NEPA process.

The final PEL Report was published in June 2023 and Federal Highway Administration (FHWA) acknowledged in a letter, dated September 14, 2023, that the PEL Study was consistent with 23 USC Section 168 and 23 CFR 450.212. As a result, the PEL findings provide a starting point for the NEPA studies and preliminary engineering efforts. Additionally, FHWA concurred that an Environmental Impact Statement (EIS) was the proper NEPA classification for the State College Area Connector project.

The PEL Study also identified other transportation projects which did not meet the full purpose and need identified in the PEL but could provide transportation benefits to the study area roadways independently. One such project was a safety study along PA 45 generally from Boal Avenue to PA 144. Subsequent to the PEL completion, additional traffic investigations and analysis and coordination with local officials for the State College Area Connector project determined that the connector road and interior interchange would provide some localized improvements to PA 45. However, it was determined that the connector road and associated interchange was not necessary to address the project's purpose and need, nor did it address corridor wide issues along PA 45. As a result, the proposed interior interchange and local road connection was removed from this State College Area Connector project and will be considered in the independent PA 45 Corridor Improvements project, as appropriate. The State College Area Connector project will advance independently but will not preclude the inclusion of a future interior interchange and local road connection should the independent safety study along PA 45 determine that it would be beneficial in connection with other proposed PA 45 Corridor Improvements project.

Following the PEL Study, the project area was reduced from 70 square miles to approximately 6 square miles to encompass the three alternatives proposed to move forward into preliminary engineering.

### 1.2 Project Location

The project area is approximately 3,963 acres, extends through the southern portion of Centre County, and traverses Potter and Harris Townships, see Figure 1 – Project Location Map. The project area is centered on US 322 which provides local access through the project area and to regional destinations and beyond. US 322, Mount Nittany Expressway at the western end of the project area provides direct access to Interstate 99 (I-99) which, in turn, provides

access to nearby I-80. US 322 at Potters Mills provides access south to the Harrisburg area and connects to I-81 and I-83.

### 1.3 Project Purpose and Need

#### **Project Purpose**

The purpose of this project is to improve roadway congestion by achieving acceptable Levels of Service (LOS) and to address safety issues by reducing the predicted crash frequency along the US 322 corridor between Potters Mills and Boalsburg. Additionally, the project will aim to provide a transportation network that meets driver expectations.

#### **Project Needs**

- High peak hour traffic volumes cause congestion and result in unacceptable LOS (LOS D [rural only], E, F) on US 322 roadway and intersections.
- Existing roadway configurations and traffic conditions contribute to safety concerns in the project area.
- The roadway network and configuration in the project area lacks continuity and does not meet driver expectations.

## 2.0 Background

A Preliminary Waste Site Assessment (PWSA) level of investigation is performed for large planning studies and uses a broad scope with a limited level of detail to identify potential areas with waste-related concerns. The information obtained during this level of study can then be incorporated into a Phase I Environmental Site Assessment (ESA) for future NEPA projects. During the initial PEL Study in December 2021, a PWSA was completed for a 70-square mile project area. Information obtained during this PWSA, which included background research efforts and a visual inspection, identified 207 potential waste sites within and adjacent to the project area.

The limits of the project area were further refined during the EIS, and three proposed alternatives were selected (North, South, and Central), and they are located on Figure 2: Potential Waste Sites. A PWSA for the EIS was started in 2023 and was completed in January 2025 for the project area after the three proposed alternatives were further refined. Fifty-five (55) potential waste sites were identified within the project area, and they are also located on Figure 2: Potential Waste Sites.

### 3.0 Methods

The PWSA was completed to identify properties of concern and included a cursory desktop review of readily available federal and state databases and online information; historical sources (topographic maps, aerial photographs, and previous highway plans); limited interviews with local agencies and some property owners; and a visual inspection of the project area. The purpose of the records review and visual inspection is to obtain information to evaluate documented environmental concerns associated with the project area. Skelly and Loy has relied on the information obtained from these sources (listing review service, government agency online records, and interviews) as being correct; however, Skelly and Loy assumes no responsibility for inaccuracies obtained from these sources. The information obtained from the background research efforts and visual inspection is summarized in Table 1: Potential Waste Sites and the identified potential waste sites are located on Figure 2: Potential Waste Sites. The information evaluated as part of this PWSA are further detailed below.

#### 3.1 Database Search

The environmental lists reviewed for the project area included available United States Environmental Protection Agency (U.S. EPA) Region III databases and Pennsylvania Department of Environmental Protection (PA DEP) databases. This information was obtained from the Environmental Data Resources, Inc. (EDR) Report dated June 2023. This search included the federal and state databases listed in Pennsylvania Department of Transportation (PennDOT) Publication 281 (May 2019), "Waste Site Evaluation Procedures Handbook, The Transportation Project Development Process", Appendix A, Recommended Phase I Site Checklist, as well as numerous other databases provided by EDR. Fifteen (15) of the fifty-five (55) total potential waste sites within the project area were identified on the EDR database. A copy of the EDR report is included in Appendix A.

#### 3.2 Agency Online Records

The PA DEP Activity and Use Limitation (AUL) Registry (<https://gis.dep.pa.gov/paaul/AulMap.html>), the PA DEP Environmental Site Assessment (ESA) Search Tool (<https://www.depgis.state.pa.us/esaSearch/>), and the PA DEP eMapPA (<https://gis.dep.pa.gov/emappa/>) websites were reviewed in June 2023 and again in January 2025. One (1) of the fifty-five (55) potential waste sites was identified on the AUL registry within the project area. Twenty-three (23) of the fifty-five (55) potential waste sites were identified on the PA DEP eMapPA website, and twenty-two (22) potential waste sites were identified on the ESA Search Tool website within the project area. Several, but not all of the ESA Search Tool sites and PA DEP eMapPA sites overlap. Copies of the online records are included in Appendix B.

#### 3.3 Historical Topographic Maps and Aerial Photographs

Historical Topographic maps were obtained from the United States Geologic Survey (USGS) website (<https://www.usgs.gov/programs/national-geospatial-program/historical-topographic-maps-preserving-past>) and historical aerial photographs were obtained from the PennPilot (<https://www.arcgis.com/apps/View/index.html?appid=10af5f75f9f94f01866359ba398cb6a9>) and Google Earth websites ([www.googleearth.com](http://www.googleearth.com)) in January 2025. No new potential waste sites were identified on these historical maps and photographs within the project area and significant land use changes are summarized below. Copies of the historical mapping and photographs are included in Appendix C.

- **1908-1909:** Minor roadways and a few structures were present throughout the project area. Boalsburg was located in the west and the majority of the remaining portions of the project area were undeveloped agricultural lands. No major areas of land disturbance which may indicate industrial activities were observed.
- **1943:** Mostly agricultural land with a few residential structures located centrally and in the east. A well-established roadway, identified as U.S. Route 322, was present extending east to west with smaller roadways branching off throughout the project area. U.S. Route 322 intersected with S.R. 45 in the west. The intersection of U.S. Route 322 and S.R. 53 was identified in the eastern portion of the project area. The town of Tusseyville was located in the central portion of the project area, and Potters Mills was established in the eastern portion of the project area. Spring Creek was located in the western portion of the project area and Sinking Spring was located in the eastern portion of the project area.
- **1949:** Development of present-day downtown Boalsburg was observed. Large retention ponds were located in the western and eastern portions of the project area. Disturbed agricultural lands and two tree farms (present day Kuhn Farm and Tait Farm) were identified in the central and eastern portions of the project area.
- **1950:** U.S. Route 322 was also identified as the Twenty Eighth Division Highway and Boal Avenue. S.R. Route 45, and U.S. Route 322 intersection was depicted in the west.
- **1957:** Continued development in Boalsburg, and a residential community was developed where agricultural land was previously depicted. A large structure surrounded by disturbed land was located near the previously identified retention pond. More agricultural land appeared disturbed and additional residential structures had been developed throughout the project area. Expansion of the previously identified tree farm (present day Kuhns Tree Farm), residential communities, and roadway networks was observed throughout the project area.
- **1971:** Residential community expansion was observed throughout the entire project area. Additional retention ponds, associated with a potential golf course were developed in the central portion of the project area. Major land disturbance at the western end of the project area in the vicinity of the present day S.R. 45 interchange.
- **1994:** Highway U.S. Route 322 appeared further developed from west to east with a well-established S.R. 45 interchange in the west and a further established S.R. 53 interchange in the east. A golf course (present day Mountain View Country Club) was identified on formerly identified agricultural land in the western portion of the project area. The northern expansion of the present day Kuhns Tree Farm was observed in the central portion of the project area.
- **2005:** Commercial development in the western portion of the project area (present day Arc of Centre County) and a new recreational complex (present day Potter Township Athletic Complex) was developed in the eastern portion of the study area. Continued residential and commercial development on former agricultural lands throughout the project area. Commercial sites with paved racetracks (presently identified as #1 Cycle Center, Best Line Powersports & Landpro Equipment) were identified in the east.
- **2008:** Continued expansion of residential and commercial development throughout the project area was observed as well as a large area of disturbed land in the western portion of the project area.

- **2010:** Previously identified disturbed area was developed as a residential community (Present day Traditions of America at Liberty Hill Community).
- **2015-2020:** Further commercial and residential development occurred in the western portion of the project area.

### 3.4 Previous Highway Plans

Previous highway plans, dated September 28, 1970, were provided by JMT and reviewed in January 2025. Potential waste sites were identified; however, there were no new waste sites identified that were not already captured from other resources. These drawings only included the westernmost portion of the project area. Copies of the relevant pages of the previous highway plans are included in Appendix D.

### 3.5 Interviews

During the site reconnaissance for the PWSA, interviews with officials from Harris and Potter Townships were completed. Limited property owner interviews were also completed during farmland and wetland evaluations. Attempts were made to contact PA DEP officials from the Waste Management and Storage Tank programs. The interviews were conducted to obtain information regarding any known landfills, old dumps, spills or other environmental concerns that have the potential to impact the transportation project. None of the interviews reported any such sites. A copy of the interview records are summarized in Table 1 and included in Appendix E.

### 3.6 Visual Inspection

In conjunction with the background research efforts, a visual inspection of the project area was completed on July 20, 2023, and on January 8, 2025. This visual inspection included a “windshield survey” from accessible roads throughout the project area and focused on sites with the following potential areas of concern: underground storage tanks (USTs); aboveground storage tanks (ASTs); commercial/industrial land uses that involve the storage, handling, and disposal of hazardous substances and/or petroleum products; railroad tracks; waste disposal areas; stained soils, gravel, or pavement; air emission sources; collection ponds/pits/lagoons; discolored water/seeps/discharges; and stressed vegetation. In addition to the potential waste sites identified from background research efforts, twenty (20) additional potential waste sites were identified during the field assessment and these sites are also summarized in Table 1: Potential Waste Sites and included on Figure 2: Potential Waste Sites.

## 4.0 Alternatives

The three alternatives that were recommended in the PEL Study to move forward into the NEPA phase of the project were renamed to North, Central and South. Following public and agency involvement, refinements were made to all three alternatives. Descriptions of each alternative are listed below and the alternatives can be seen on all resource figures referenced.

#### 4.1 North Alternative

The western end alignment would be the same for all three alternatives, from the SR 45 (Earlstown Road) interchange to just east of the Elks Club Golf Course. At the western end, the existing US 322 would remain in its current location and the new US 322 4-lane highway would be on the south side of the existing US 322. The western end alignment would also include a pedestrian/bicycle trail on the north side of the existing US 322. Just east of Elks Club Road, the alignment would start to move north of the existing US 322 through the Nittany Farms and around the Kuhn tree farm. It would continue through the agricultural fields on the north side of US 322, avoiding the commercial area on US 322 in Potter Township. The alignment would return to the existing US 322 alignment through Tusseyville. The eastern end would maintain the existing US 322 as the local access road in its current position and the 4-lane highway alignment would be on the south side of the existing US 322 from approximately Tusseyville to Potters Mills.

#### 4.2 Central Alternative

The western end alignment would be the same for all three alternatives, from the SR 45 interchange to just east of the Mountain View Country Club. At the western end, the existing US 322 would remain in its current location and the new US 322 4-lane highway would be on the south side of the existing US 322. The western end alignment would also include a pedestrian/bicycle trail on the north side of the existing US 322. Just east of the Mountain View Country Club, the alignment would start to move north of the existing US 322 through the Nittany Farm and around the Kuhn tree farm. It would then cross over the existing US 322 and travel through the Potter Township Athletic Complex on the south side of US 322, avoiding the commercial area in Potter Township.

It is noted that at the time of the May 8, 2025 Public Meeting, the Central Alternative was located through the baseball fields within the Potter Township Athletic Complex. As part of the public involvement and follow-up from the public meeting, Potter Township issued a letter (June 23, 2025) to PennDOT raising concern with the proposed impact to the fields and requested PennDOT consider avoidance and minimization of the property. PennDOT shifted the Central Alternative to the south to avoid the baseball fields and will only impact the undeveloped portion of the Potter Township property.

From there, the alignment crosses Sleepy Creek (stream that drains to Tussey Sink) and starts to move north towards the existing US 322. The alignment would return to the existing US 322 alignment near Tusseyville. The eastern end would maintain the existing US 322 as the local access road in its current position and the 4-lane highway alignment would be on the south side of the existing US 322 from approximately Tusseyville to Potters Mills.

#### 4.3 South Alternative

The western end alignment would be the same for all three alternatives, from the SR 45 (Earlstown Road) interchange to just east of the Elks Club Golf Course. At the western end, the existing US 322 would remain in its current location and the new US 322 4-lane highway would be on the south side of the existing US 322. The western end alignment would also include a pedestrian/bicycle trail on the north side of the existing US 322. Just east of Elks Club Road, the alignment would start to move south of the existing US 322 through the Tait Farm and along the side of the Tussey Mountain ridge behind the neighborhoods and communities along the south side of the existing US 322. It would then cross over Sleepy Creek (stream that drains to Tussey Sink) and start to move north towards the existing US 322. The alignment would return to the existing US 322 alignment near Tusseyville. The eastern end would maintain the existing

US 322 as the local access road in its current position and the 4-lane highway alignment would be on the south side of the existing US 322 from approximately Tusseyville to Potters Mills.

## 5.0 Results

Based on the information obtained during this PWSA, a total of fifty-five (55) potential waste sites were identified within the project area. These potential waste sites are summarized in Table 1: Potential Waste Sites and are also included on Figure 2: Potential Waste Sites.

## 6.0 Summary

Of the fifty-five (55) potential waste sites within the project area,

- 15 sites had documented releases to the environment;
  - 11 sites were identified as having current, previous or suspected USTs and/or ASTs;
  - 5 sites were identified as being automotive repair related businesses;
  - 6 sites were on the Facility Index System (FINDS) database;
  - 2 sites were areas of dumping;
  - 2 sites were cemeteries; and
  - 1 site was a surface mining operation.
- 
- The remaining 13 sites were identified as commercial properties/businesses that have the potential for using hazardous materials, generating hazardous wastes, unknown hazardous material and/or waste handling practices, or previous unknown business uses.

Below is a summary of the fifty-five (55) potential waste sites within the project area by Alternative.

- **NORTH:** 25 sites within the alternative; 11 sites adjacent to the alternative; and 19 sites outside the alternative.
- **CENTRAL:** 24 sites within the alternative, 9 sites adjacent to the alternative, and 22 sites outside the alternative.
- **SOUTH:** 21 sites within the alternative; 7 sites adjacent to the alternative; and 27 sites outside the alternative.

Twenty-four (24) of the fifty-five (55) waste sites within the project area will not be impacted by any of the three proposed alternatives.

The list of potential waste sites should be reevaluated once engineering is advanced to determine which sites potentially would be impacted by proposed transportation improvements. Sites impacted by the proposed alternative may be recommended for further investigation, a Phase I ESA level of study and possibly even Phase II and/or Phase III ESAs.

Additionally, numerous structures were noted in the project area during the visual inspection and included both residential and commercial structures, bridges, and billboards. These structures, along with any buildings to be demolished in association with any future transportation projects, should be inspected for asbestos-containing materials and lead-based paints (as it pertains to bridges) prior to demolition activities. Utilities (electrical lines and transformers,

natural gas lines, sewer, and water) were not evaluated as part of this assessment, nor were residential properties with the potential for heating oil tanks.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SUBJECT PROPERTY INFORMATION

#### ADDRESS

STATE COLLEGE AREA CONNECTOR - EIS  
CENTRE HALL, PA 16828

### TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal RCRA generators***

RCRA-SQG: RCRA - Small Quantity Generators

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2 RCRA-SQG sites within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there are 2 PFAS ECHO sites within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
<b>LOCUS INC</b>	<b>1012 EAST BOAL AVENU</b>	<b>C19 / 16</b>	<b>67</b>
BLATEK INC		F26 / 16	90

### PA AIRS: Permit and Emissions Inventory Data

A review of the PA AIRS list, as provided by EDR, and dated 03/14/2023 has revealed that there is 1 PA AIRS site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
PARADISE DATACOM INC	1012 BOAL AVE	C20 / 16	69
Primary Facility Id: 495290			

### PA MANIFEST: Manifest Information

A review of the PA MANIFEST list, as provided by EDR, and dated 06/30/2018 has revealed that there is 1 PA MANIFEST site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
<b>SOUND TECHNOLOGY INC</b>	<b>171 TECHNOLOGY DR ST</b>	<b>E23 / 16</b>	<b>74</b>
Generator EPA Id: PAR000504423			

### NJ MANIFEST: Hazardous Waste Manifest Data

A review of the NJ MANIFEST list, as provided by EDR, and dated 12/31/2018 has revealed that there is 1 NJ MANIFEST site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
<b>SOUND TECHNOLOGY INC</b>	<b>171 TECHNOLOGY DR ST</b>	<b>E23 / 16</b>	<b>74</b>
EPA Id: PAR000504423			

### PA NPDES: NPDES Permit Listing

A review of the PA NPDES list, as provided by EDR, and dated 02/27/2023 has revealed that there is 1 PA NPDES site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
RON HAND SEW SYS	180 NEFF RD	4 / 12	49
Permit Number: PAG045044			

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal RCRA generators***

RCRA-SQG: RCRA - Small Quantity Generators

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the requested target property.

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
COWHERS AUTO BODY EPA ID:: PA0000008615	RD BOX 272 A	N 0 - 1/8 (0.031 mi.)	27 / 4	92

#### ***Lists of state and tribal landfills and solid waste disposal facilities***

PA SWF/LF: Operating Facilities

A review of the PA SWF/LF list, as provided by EDR, has revealed that there is 1 PA SWF/LF site within approximately 0.5 miles of the requested target property.

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
RUSSELL NEFF FARM Database: MUN WASTE OPER, Date of Government Version: 06/01/2023		N 1/8 - 1/4 (0.219 mi.)	29 / 11	95

#### ***Lists of state and tribal leaking storage tanks***

PA LUST: Storage Tank Release Sites

A review of the PA LUST list, as provided by EDR, and dated 03/07/2023 has revealed that there is 1 PA LUST site within approximately 0.5 miles of the requested target property.

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
KWIK FILL BOALSBURG Facility Id: 585414	120 BOAL AVE	WSW 1/4 - 1/2 (0.430 mi.)	30 / 15	95

#### ***Lists of state and tribal voluntary cleanup sites***

PA VCP: Voluntary Cleanup Program Listing

A review of the PA VCP list, as provided by EDR, and dated 04/03/2023 has revealed that there is 1 PA

## EXECUTIVE SUMMARY

VCP site within approximately 0.5 miles of the requested target property.

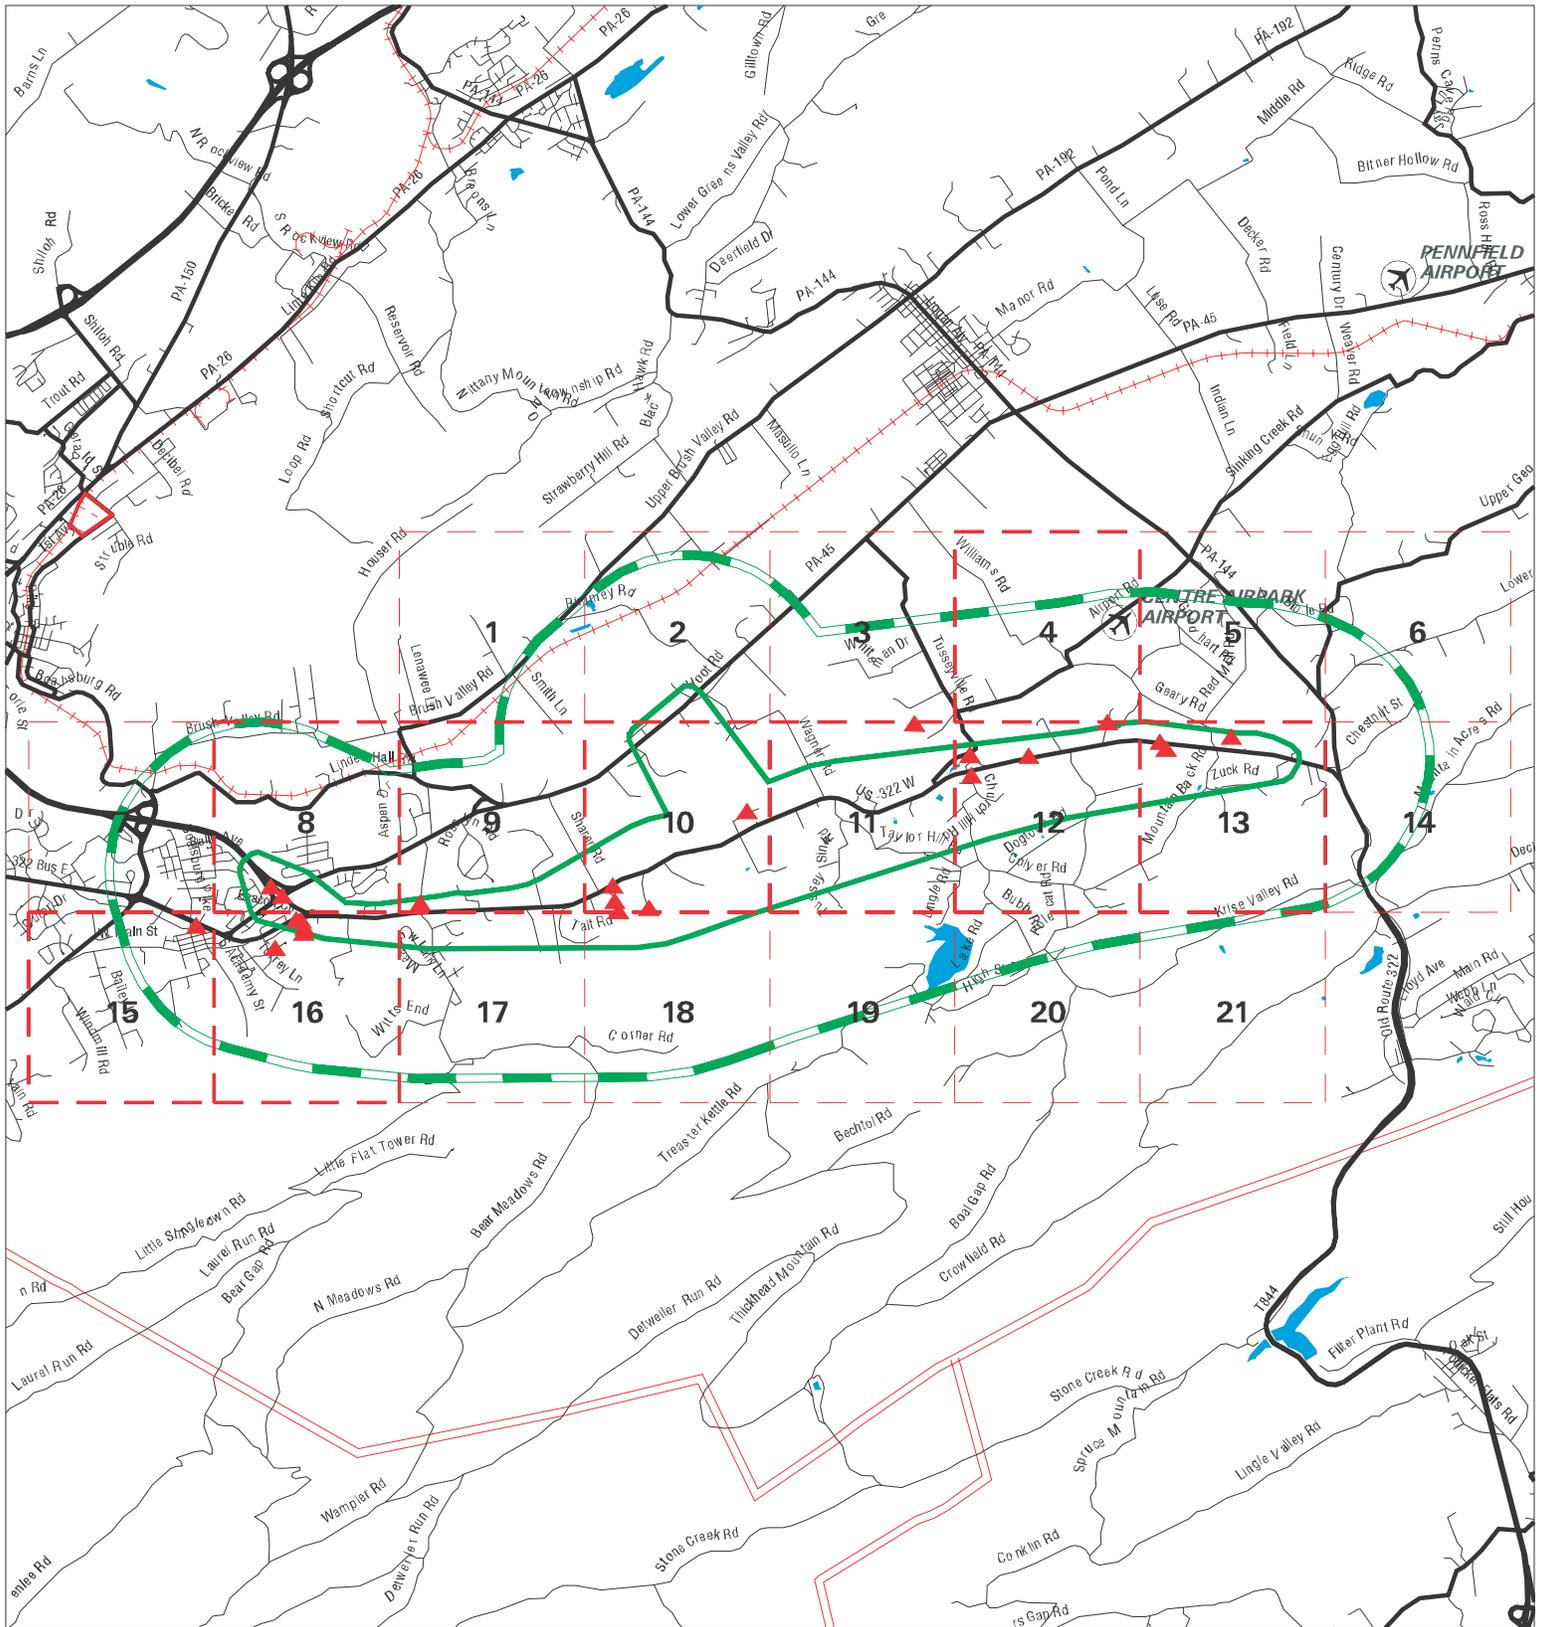

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
TERRY WILLS RESIDENC Activity ID: 713724	203 HOMESTEAD LN	SSW 1/8 - 1/4 (0.163 mi.)	28 / 16	94

**Environmental Interest/Information System:**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

**Hazardous Waste Summary:**

Waste Code: D001  
 Waste Description: Ignitable Waste

Waste Code: D008  
 Waste Description: Lead

Waste Code: D040  
 Waste Description: Trichlorethylene

Waste Code: F001  
 Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003  
 Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated

Environmental Interest/Information System:  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.  
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

**Hazardous Waste Summary:**

Waste Code: D001  
Waste Description: Ignitable Waste

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: N/A
Date Made Active in Reports: 05/17/2023	Last EDR Contact: 06/02/2023
Number of Days to Update: 15	Next Scheduled EDR Contact: 07/10/2023
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: N/A
Date Made Active in Reports: 05/17/2023	Last EDR Contact: 06/02/2023
Number of Days to Update: 15	Next Scheduled EDR Contact: 07/10/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2023

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

Next Scheduled EDR Contact: 07/10/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: 800-424-9346

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: 800-438-2474
Date Made Active in Reports: 03/20/2023	Last EDR Contact: 06/20/2023

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/08/2023	Source: Department of the Navy
Date Data Arrived at EDR: 02/09/2023	Telephone: 843-820-7326
Date Made Active in Reports: 05/02/2023	Last EDR Contact: 05/23/2023
Number of Days to Update: 82	Next Scheduled EDR Contact: 08/21/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/20/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/21/2023	Telephone: 703-603-0695
Date Made Active in Reports: 05/02/2023	Last EDR Contact: 05/23/2023
Number of Days to Update: 70	Next Scheduled EDR Contact: 09/04/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/20/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/21/2023	Telephone: 703-603-0695
Date Made Active in Reports: 05/02/2023	Last EDR Contact: 05/23/2023
Number of Days to Update: 70	Next Scheduled EDR Contact: 09/04/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

### **ERNS: Emergency Response Notification System**

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 03/20/2023

Date Data Arrived at EDR: 03/21/2023

Date Made Active in Reports: 05/30/2023

Last EDR Contact: 05/15/2023

Next Scheduled EDR Contact: 08/28/2023

Data Release Frequency: Semi-Annually

### **MUN WASTE OPER: Municipal Waste Operations Listing**

A Municipal Waste Operation is a DEP primary facility type related to the Waste Management Municipal Waste Program.

The sub-facility types related to Municipal Waste Operations that are included are: Composting: Includes facilities that use land for processing municipal waste by composting. Composting is a process that biologically decomposes organic waste under controlled anaerobic or aerobic conditions to yield a humus-like product. Land Application: Includes facilities that uses agricultural utilization or land reclamation of waste. Sewage sludge is land-applied for its nutrient value or as a soil conditioner.

Date of Government Version: 06/01/2023

Next Scheduled EDR Contact: 08/28/2023

Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RES WASTE OPER: Residual Waste Operations Listing

A Residual Waste Operation is a DEP primary facility type related to the Waste Management Residual Waste Program. Residual waste is waste generated at an industrial, mining, or wastewater treatment facility. The sub-facility types related to Residual Waste that are included are: \_\_\_\_ Generator: A generator is a person, company, institution, or municipality that produces or creates residual waste. Residual waste is waste generated at an industrial, mining, or wastewater treatment facility. Impoundment: An impoundment is a facility designed to hold an accumulation of liquid wastes. Incinerator: An incinerator is an enclosed device using controlled combustion to thermally break down residual waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## INST CONTROL: Institutional Controls Site Listing

Under the Land Recycling Act (Act 2) persons who perform a site cleanup using the site-specific standard or the special industrial area standard may use engineering or institutional controls as part of the response action. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 01/17/2023

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020	Source: Department of Health & Human Services
Date Data Arrived at EDR: 03/17/2021	Telephone: 202-741-5770

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/30/2023	Telephone: 202-272-0167

Number of Days to Update: 33	Next Scheduled EDR Contact: 07/17/2023
	Data Release Frequency: Varies

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/30/2023	Telephone: 202-272-0167

	Data Release Frequency: Varies

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

Date of Government Version: 03/30/2023	Source: Environmental Protection Agency

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## PFAS: Sites With Known PFAS Contamination

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are man-made chemicals, are resistant to heat, water and oil, and persist in the environment and the human body. PFAS are not found naturally in the environment. They have been used to make cookware, carpets, clothing, fabrics for furniture, paper packaging for food, and other materials that are resistant to water, grease, or stains. They are also used in firefighting foams and in a number of industrial processes.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

This map includes information copyrighted by Endeavor Business Media. This information is provided on a best effort basis and Endeavor Business Media does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of Endeavor Business Media.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Child Care Facility List

Source: Department of Public Welfare

Telephone: 717-783-3856

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

JAN 31 2000  
USGS AND  
HISTORICAL ARCHIVES

Produced by the United States Geological Survey  
in cooperation with Pennsylvania Department of Conservation  
and Natural Resources, Bureau of Topographic and Geologic Survey  
Topography compiled 1964. Planimetry derived from imagery taken  
1973 and other sources. Photorevised using imagery dated 1998.  
No major culture or drainage changes observed. Survey control  
corrected to NAD 83. Benchmarks: Older than 1998, revised 1999  
North American Datum of 1927 (NAD 27). Projection and  
UTM (Zone 18S). Pennsylvania coordinate system, north zone  
(latest conventional zone).  
1:250,000 Universal Transverse Mercator grid, zone 18  
North American Datum of 1983 (NAD 83) is shown in dashed  
contour lines. The values of the grid between NAD 27 and NAD 83  
for 7.5-minute quadrangles are available from National Geographic  
Survey (NADCON) software.  
There may be private landings within the boundaries of  
the National or State reservations shown on this map.  
Information shown in purple may not meet USGS content standards  
and may conflict with privately mapped contours.

LOCATION MAP

GENERAL NOTES

The Department of Highways reserves the right to eliminate any or all of this work. The Contractor is hereby notified not to perform any such work except that which is within the Highway Right-of-Way until so ordered in writing by the Engineer.

This project shall be constructed in accordance with the Specifications, Form 405, dated 1950 and Form 405B, dated 1947. Notations and structures marked [ ] have been or will be removed or altered by the authority responsible for the payment of property damages and such work is not a part of this contract.

Bearings are Grid Bearings based on Pennsylvania State Plane/Coordinate System (North Zone) 1927 N.A. DATUM

Vertical Control based on 1929 Mean Sea Level

Copper Welds shown on the references throughout the plan will be designated by the symbol CW

All Curve Data are computed by the Arc Definition

Temporary easement required until construction under this plan is completed

All references to Inlet Boxes are construed to mean the nomenclature for the following respective items:  
 Inlet Boxes for Type H Inlet  
 Inlet Boxes for Type H Inlet, Modified  
 Inlet Boxes for Type J Inlet  
 Inlet Boxes for Type K Inlet  
 Inlet Boxes for Type L Special Inlet  
 Inlet Boxes for Type M Inlet, Modified  
 Inlet Boxes for Type N Inlet

Right of Way fence to be placed 1'-0" inside of the Legal Right of Way Line for Limited Access, except in those cases as shown on the detail sheets.

All references on the plans to the Pennsylvania Department of Highways should be construed to mean the Pennsylvania Department of Transportation

PROJECT NUMBER: JN197202

PROJECT NAME: SCAC EIS PWSA Memo

ORIGINATOR: LDT

**NOTES TO FILE**

Subject: Background Research

Date: 1/8/2025

Location: Harris Township Office

Mr. Todd Shea (Zoning/Ordinance Officer) and Mr. Mark Boeckel (Township Manager) were interviewed in person during field reconnaissance. Both were asked about any former landfills, old dumps, spills, or emergency responses in the project area that might impact the construction project. Both men were not aware of any such events. They also stated that their records only go back about 10 years and they are not digital.

PROJECT NAME: SCAC EIS PWSA Memo

ORIGINATOR: LDT

**NOTES TO FILE**

Subject: Background Research

Date: 1/8/2025

Location: Potter Township Office

Ms. Lisa Kroner (Parks and Recreation Coordinator) was interviewed in person during field reconnaissance. She was asked about any former landfills, old dumps, spills, or emergency responses in the project area that might impact the construction project. She was not aware of any such events.

She provided information on the Tusseyville Sink (an old sink hole/disappearing spring), but it was not located in any of the three alternatives.

### Figure 6: Sample Interview Form

Project: SCAC PEL	
Interviewers: ALB, ERB	Interview Date: 4/28/2023
<b>PROPERTY INFORMATION</b>	
Property Owner Name: Scott Burk	
Tax Parcel Number:	
Parcel Address:	
Mailing Address: 1948 General Potter Highway	
Telephone Number: (814)364-2255	
How long has the property been owned by the current owner? Nursery 2007 - Operation later	
How long has the property been farmed?	
<b>FARM INFORMATION</b>	
Are you the current farm operator? No	Full or Part-time?
If you are not the farm operator, who is?	
Jeff Shugarts - Manager	
Is this the base of the farm operation? If not, where is the base of operation?	
Is your farm your only source of income? Yes ___ or <input checked="" type="checkbox"/> No	
If no, what is/are your other income source(s)?	
Scotts Landscaping and Pinnacle Erosion Control business	
Do you hire farm workers? If so, how many and when?	
About 6 full-time year round, seasonal employees during growing season	
Type of farm (crops, livestock, organic, etc.) Shade and ornamental trees	
Acres owned and location: 22 acres	
Acres rented and location: 5 acres from Kuhn's Christmas tree farm - should be out of lease by next year, haven't planted any new crops on this property	
Do you own or lease other property within or outside of the project area to use in a farming operation?	
If yes, where and how much?	
Do you lease any of your land for gas extraction purposes?	
Types of crops grown, acres in each, and typical production yield (average 6,000-7,000 trees growing on 4 year cycle; take out approximately 1,500/year, 25,000 perennials and shrubs	
Note the location of the most productive fields:	
Field closest to SR 322 is most productive for trees, other field is more wet	
Types and numbers of livestock raised:	
List farm related buildings and their purpose:	
Office, sales building, restroom, temporary shipping container for storage, pump house	
Describe access routes to farm parcels:	
Only access is off SR 322	
Do you need access for equipment to turn into fields (ex. leave a gap in the guiderail)?	
What farm products do you sell and where?	
Ship to other garden centers, landscapers, contractors, residential, Scotts Landscape and Pinnacle	
Where do you purchase your farm supplies?	
Everywhere; as far as Oregon for specialty supplies	
What is the primary source of water and where is it located? Is there more than one? What are they used for (ag, domestic,...)?	
3 wells, pond is holding area for irrigation system	

**Figure 6: Sample Interview Form (continued)**

Is the property served by an on-site sewage disposal unit? If yes, more than one? (locate on map) Septic system by restroom building
Are any field drainage structures located on your property? (locate on map) Drainage ditch from adjacent property follows fence row (on map)
Does the property participate in any of the following? If yes, describe. <i>Agricultural Easements:</i>
ASA:
<i>Deed Restrictions:</i>
Clean and Green
What are the future plans for the property? Keep selling trees
How does the product get to market? Box truck; truck and trailer; tractor trailers - share with Scotts Landscaping
Are equipment and/or produce stored on property? If so, where is it stored?
What is the largest piece of machinery? What is the size (height, weight) of your largest piece of farming equipment? Box truck
Is more room for access required for the use of four-horse teams?
Are you currently required to travel on public roadways to move farm equipment? If yes, please name roadways?
Do you have your own waterway crossing to use if a detour is implemented? If not, can you share a crossing with another farmer?
By what route and at what time of day do you receive pickups and drop offs? (perishables?) 7am-4pm
Do you pasture your livestock or use a feed lot/building?
Are temporary means needed to keep cattle or other livestock out of construction area?
Do cattle currently cross under a bridge or through a stream?
Do you have a Nutrient Management Plan in accordance with PA DEP requirements?
In your opinion, how will this project affect your operations? Potential to affect sales by bypassing business - concern of sales decreasing due to construction
Will access to farm parcels, to markets, be a problem?
Would dividing the parcels hinder access of livestock to pasture, food and water, supplies, barns, outbuildings, etc.? Access issues would result from bisecting property
If your land were to be bisected, is there a possibility that you would be unable to access certain parcels? If yes, explain. Access issues would result from bisecting property, it would cut off south field

**Figure 6: Sample Interview Form**

Project: <u>SCAC</u>

Parcel Address: <u>242 Wagner Rd</u>	
Mailing Address: <u>242 Wagner Rd</u>	
Telephone Number: <u>814-321-4307</u>	
How long has the property been owned by the current owner? <u>1958</u>	
How long has the property been farmed? <u>1958</u>	
<b>FARM INFORMATION</b>	
Are you the current farm operator? <u>Claude</u>	Full or Part-time? <u>Part-time</u> <u>Neal Thompson</u>
If you are not the farm operator, who is?	
Is this the base of the farm operation? If not, where is the base of operation?	
Is your farm your only source of income? Yes <input checked="" type="checkbox"/> or <input type="checkbox"/> No If no, what is/are your other income source(s)?	
Do you hire farm workers? If so, how many and when? <u>NO</u>	
Type of farm (crops, livestock, organic, etc.) <u>Hay, Corn, Wheat, Soybean</u>	
Acres owned and location: <u>147</u>	
Acres rented and location: <u>0</u>	
Do you own or lease other property within or outside of the project area to use in a farming operation? If yes, where and how much?	
Do you lease any of your land for gas extraction purposes?	
Types of crops grown, acres in each, and typical production yield (average year): <u>Doesn't keep track</u>	
Note the location of the most productive fields: <u>Entire</u>	
Types and numbers of livestock raised: <u>25 Holsteins</u> <u>Not milking for 4-5 years</u> <u>Sale</u>	
List farm related buildings and their purpose: <u>1</u> <u>See</u>	
Describe access routes to farm parcels:	
Do you need access for equipment to turn into fields (ex. leave a gap in the guiderail)?	
What farm products do you sell and where? <u>- Feed m.</u>	
Where do you purchase your farm supplies? <u>Alena, Seven stars</u>	
What is the primary source of water and where is it located? Is there more than one? What are they used for (ag, domestic,...)?	

**Figure 6: Sample Interview Form (continued)**

Is the property served by an on-site sewage disposal unit? If yes, more than one? (locate on map)

Are any field drainage structures located on your property? (locate on map)

Does the property participate in any of the following? If yes, describe.

Agricultural Easements: *Preserved*

ASA: *Yes*

Deed Restrictions:

What are the future plans for the property? *C&G, 2nd Agrmt  
Grants to take on*

How does the product get to market?

Are equipment and/or produce stored on property? If so, where is it stored?

What is the largest piece of machinery? What is the size (height, weight) of your largest piece of farming equipment?

*1066 In Farmative 1*

Is more room for access required for the use of four-horse teams?

Are you currently required to travel on public roadways to move farm equipment? If yes, please name roadways?

Do you have your own waterway crossing to use if a detour is implemented?  
If not, can you share a crossing with another farmer?

By what route and at what time of day do you receive pickups and drop offs? (perishables?)

Do you pasture your livestock or use a feed lot/building?

Are temporary means needed to keep cattle or other livestock out of construction area?

Do cattle currently cross under a bridge or through a stream?

Do you have a Nutrient Management Plan in accordance with PA DEP requirements?

In your opinion, how will this project affect your operations?

Will access to farm parcels, to markets, be a problem?

Would dividing the parcels hinder access of livestock to pasture, food and water, supplies, barns, outbuildings, etc.?

If your land were to be bisected, is there a possibility that you would be unable to access certain parcels?

If yes, explain. *Yes, dividing some parcels*

**Figure 6: Sample Interview Form**

Project: SCAC, 297, 297A, 297B, 297C, 297D	
Interviewers: ERB, ARL	Interview Date: 3/16/2023
<b>PROPERTY INFORMATION</b>	
Property Owner Name: Larry J and Marianne W. Joint Trust (Kuhis)	
Tax Parcel Number:	
Parcel Address:	
Mailing Address: 601 Ridge Ave 16803	
Telephone Number: (814)404-5382	
How long has the property been owned by the current owner? 1975	
How long has the property been farmed? 1975	
<b>FARM INFORMATION</b>	
Are you the current farm operator? Yes	Full or Part-time? Full
If you are not the farm operator, who is?	
Doug Banker (814)441-3964	
Is this the base of the farm operation? If not, where is the base of operation?	
2101 Boal Ave	
Is your farm your only source of income? Yes <input checked="" type="checkbox"/> or <input type="checkbox"/> No	
If no, what is/are your other income source(s)?	
Do you hire farm workers? If so, how many and when?	
Part-time 10-12 (1 weekend), 2-4 (spring)	
Type of farm (crops, livestock, organic, etc.) Frasier fur, White Fur	
Acres owned and location: 30 ac 4000-8000 trees	
Acres rented and location: 4,325 for 2023	
Do you own or lease other property within or outside of the project area to use in a farming operation?	
If yes, where and how much?	
own and lease	
Do you lease any of your land for gas extraction purposes?	
Types of crops grown, acres in each, and typical production yield (average year):	
4000-5000	
Note the location of the most productive fields:	
All planted field after 30 years of tests	
Types and numbers of livestock raised:	
chickens	
List farm related buildings and their purpose:	
3-sided shed, bar, wreath making shed	
Describe access routes to farm parcels:	
See map	
Do you need access for equipment to turn into fields (ex. leave a gap in the guiderail)?	
Yes	
What farm products do you sell and where?	
2101 Boal Ave	
Where do you purchase your farm supplies?	
Fertilizer - Atlanta Chemical and Growmark, Bekey's Nursery - Spartanville	
What is the primary source of water and where is it located? Is there more than one? What are they used for (ag, domestic,...)?	
See map	

**Figure 6: Sample Interview Form (continued)**

<p>Is the property served by an on-site sewage disposal unit? If yes, more than one? (locate on map)  <b>Yes, one septic</b></p>
<p>Are any field drainage structures located on your property? (locate on map)  <b>Used to have pot in poit, stopped after 10 years</b></p>
<p>Does the property participate in any of the following? If yes, describe.  <i>Agricultural Easements:</i></p>
<p><b>ASA: Portion</b></p>
<p><b>Deed Restrictions: Clean and Green, Clean water Conservation Plan</b></p>
<p>What are the future plans for the property?  <b>Keep farming, retail 90%, wholesale 10%</b></p>
<p>How does the product get to market?  <b>sold on site</b></p>
<p>Are equipment and/or produce stored on property? If so, where is it stored?  <b>Yes, in barn</b></p>
<p>What is the largest piece of machinery? What is the size (height, weight) of your largest piece of farming equipment?  <b>tree elevator, 4 feet</b></p>
<p>Is more room for access required for the use of four-horse teams?</p>
<p>Are you currently required to travel on public roadways to move farm equipment? If yes, please name roadways?  <b>April 1</b></p>
<p>Do you have your own waterway crossing to use if a detour is implemented?          If not, can you share a crossing with another farmer?</p>
<p>By what route and at what time of day do you receive pickups and drop offs? (perishables?)  <b>Mineral - monthly (salinium)</b></p>
<p>Do you pasture your livestock or use a feed lot/building?  <b>Both</b></p>
<p>Are temporary means needed to keep cattle or other livestock out of construction area?  <b>Yes</b></p>
<p>Do cattle currently cross under a bridge or through a stream?  <b>No</b></p>
<p>Do you have a Nutrient Management Plan in accordance with PA DEP requirements?  <b>No</b></p>
<p>In your opinion, how will this project affect your operations?  <b>Increase safety, met with Tom Zillow (Planned)</b></p>
<p>Will access to farm parcels, to markets, be a problem?  <b>No</b></p>
<p>Would dividing the parcels hinder access of livestock to pasture, food and water, supplies, barns, outbuildings, etc.?  <b>Yes - productive fields</b></p>
<p>If your land were to be bisected, is there a possibility that you would be unable to access certain parcels?          If yes, explain.  <b>Yes</b></p>

**Figure 6: Sample Interview Form**

Project: State College Area Connector	
Interviewers: Dean Ball	Interview Date: 12-17-2021
<b>PROPERTY INFORMATION</b>	
Property Owner Name: John Tait	
Tax Parcel Number:	
Parcel Address: 121 Tait Road, Centre Hall	
Mailing Address:	
Telephone Number: 814-574-4474	
How long has the property been owned by the current owner? 1990 - Family 1950	
How long has the property been farmed? 1950	
<b>FARM INFORMATION</b>	
Are you the current farm operator? Me and Sister	Full or Part-time? Full Time, two business
If you are not the farm operator, who is? Three operation, Tait tree Farm and Tait Farm Foods, Basset Hound Breeding.	
Is this the base of the farm operation? If not, where is the base of operation? Yes, there is a second location for Tait Farm Foods that prepares the crops for market	
Is your farm your only source of income? Yes <u>Yes</u> or <u>    </u> No If no, what is/are your other income source(s)?	
Do you hire farm workers? If so, how many and when? Tree Farm - 3 full time; 10 Seasonal, Tait Farm foods up to 25 staff during peak season.	
Type of farm (crops, livestock, organic, etc.) Trees, Vegetables, Farm Crafts, Basset Hounds	
Acres owned and location: 131 Total, 2 Deeds for Brother and Sister	
Acres rented and location: Building for food processing	
Do you own or lease other property within or outside of the project area to use in a farming operation? If yes, where and how much? Yes food processing building	
Do you lease any of your land for gas extraction purposes?	
Types of crops grown, acres in each, and typical production yield (average year): Trees - 30 Acres Vegetables - 15 acres	
Note the location of the most productive fields:	
Types and numbers of livestock raised: Basset Hounds	
List farm related buildings and their purpose: Barn - built 1830; 3 out buildings; 1 retail shop; 2 homes original home is original log cabin; 6 Vegetable High Tunnels	
Describe access routes to farm parcels: State Highway	
Do you need access for equipment to turn into fields (ex. leave a gap in the guiderail)?	
What farm products do you sell and where? Trees on site; Vegetables on site and ship to market; Basset Hounds	
Where do you purchase your farm supplies? Local	
What is the primary source of water and where is it located? Is there more than one? What are they used for (ag, domestic,...)? 3 wells; 1 by house 12 gpm; 2 in back of farm 1 well 45 gpm other 75 gpm; the back wells feed the farm operation and second home	

**Figure 6: Sample Interview Form (continued)**

<p>Is the property served by an on-site sewage disposal unit? If yes, more than one? (locate on map)                  2 - Septic Sand mounds for homes and out buildings</p>
<p>Are any field drainage structures located on your property? (locate on map)                  Swales directing water flows during rain</p>
<p>Does the property participate in any of the following? If yes, describe.  <i>Agricultural Easements:</i></p>
<p>ASA:</p>
<p><i>Deed Restrictions:</i></p>
<p>What are the future plans for the property?                  Continue to farm</p>
<p>How does the product get to market?                  Trees sold on site ; vegetables sold on site and shipped by truck</p>
<p>Are equipment and/or produce stored on property? If so, where is it stored?                  Yes out building and store</p>
<p>What is the largest piece of machinery? What is the size (height, weight) of your largest piece of farming equipment?                  Tractor John Deere 1020</p>
<p>Is more room for access required for the use of four-horse teams?</p>
<p>Are you currently required to travel on public roadways to move farm equipment? If yes, please name roadways?</p>
<p>Do you have your own waterway crossing to use if a detour is implemented?                  If not, can you share a crossing with another farmer?</p>
<p>By what route and at what time of day do you receive pickups and drop offs? (perishables?)</p>
<p>Do you pasture your livestock or use a feed lot/building?</p>
<p>Are temporary means needed to keep cattle or other livestock out of construction area?</p>
<p>Do cattle currently cross under a bridge or through a stream?</p>
<p>Do you have a Nutrient Management Plan in accordance with PA DEP requirements?</p>
<p>In your opinion, how will this project affect your operations?                  Both options will put me out of business, option 5 takes the front of the farm retail area and option 4 takes a home and cuts off water supply</p>
<p>Will access to farm parcels, to markets, be a problem?</p>
<p>Would dividing the parcels hinder access of livestock to pasture, food and water, supplies, barns, outbuildings, etc.? Water supply comes from the top of the property to the front</p>
<p>If your land were to be bisected, is there a possibility that you would be unable to access certain parcels? Yes                  If yes, explain. All fields would not be accessible and water supply cut off</p>

Farm set up to produce 4000 trees for years to come Township composite site will be gone, Sink hole back of property near second home, community value of farm bringing in people, Bird sanctuary area near edge of property

12-17-2021

Visit to Tait Farm with John Tait

Dean Ball

Eric Murnyrack

### **POINTS FOR DISCUSSION**

#### **322-4**

Barn and House and Farm at least 190 years old.

322-5 Would Crush:

Tait Farm Tree business - Sold 2000 trees in 2021 \$200,000,  
will grow to 4000 trees in 2023 (\$400,000)

6 High tunnels and acres of raised vegetables within the footprint of 322-5.

These produce beautiful vegetables for a 150 subscription CSA (Community Supported Agriculture) and vegetables for sales at the Harvest Shop and Farmers markets.

Also, in the footprint of 322-5 is the composting operation for vegetable growing. This is then the composting facility for all of Harris' Township leaves. They would then need to replace the facility.

#### **322-5**

Part of bird paradise loss. (See attached list of birds that visit this area.)

There are two wells (75gpm and 45gpm) that could easily be effected by this alternative.

These are used for the operations of both enterprises. Tait Farm Foods and Tait Farm Trees.

There are 6 sinks in the 322-4 footprint. These are important to feeding the ground water.

An access road would have to be built to service the house of John Tait and Dorothy Habecker if the house was not taken.

Would remove a field from Christmas tree production.

Would remove Dorothy's beloved garden.

NEED FOR LEFT TURN SOLUTION FOR west bound CARS TURNING INTO TAIT ROAD.

2 serious rear end collisions in the week of 12-8-2021 to 12-14-2021 and another one last year.

We will be doubling the sales of trees from 2021 to 2023 with more sales from the south.

10-03-2021

John Tait

Concerning ALTERNATE 322-5

This alternative would cut diagonally across the center of Tait Farm, cutting the center area of the farm with the Barns, Shops, and 2 Homes from the rest of the farm. It would obliterate Christmas Tree production and sales areas, and green house and high-tunnel production areas.

It would effectively crush and kill the two Agribusinesses on the farm - TAIT FARM FOODS and TAIT FARM CHRISTMAS TREES AND BASSETS. These two enterprises together employ about 30 people and gross collectively about \$1,000,000. So, this would be a great loss to the business health of Harris Township.

TAIT FARM is beloved by much of the Centre Region and is an important community asset. For large numbers of families, cutting their Christmas tree at TAIT FARM is a memorable family tradition (some for 3 generations as we started in 1950.)

TAIT FARM would be missed by many.

12-14-2021

A Christmas tree customer told me on the last day we were open for tree sales, " We really appreciate all you do for our community." Frankly, it made my eyes water.

From John Tait

CONCERNING ALTERNATE 322-4

10-03-2021

**Alternate 322-4 crosses an area rich with natural resources that should be protected.**

It is a habitat rich with elements that birds, mammals and butterflies love. It is part of the **Rothrock State Forest (part) and Stone Mountain Important Bird Area**. (A designation supported by the Audubon Important Bird Area Program.)

**Below is a listing (incomplete) of wildlife we have seen in this area:**

BIRDS - Occurring and nesting: (not a complete list)

Blue birds, Redtail Hawks, Cooper's Hawk, Sharp Shinned Hawk, Broad Winged Hawk, Great Horned Owl, Screech Owl, Hermit Thrush, Veery, Red Breasted Grosbeak, Evening Grosbeak, Ruby Throated Hummingbird, Bald Eagles, King Fisher, Gold Finch, Chickadee, Baltimore Orioles, Nuthatch, Ravens, Blue Jay, Song Sparrow, Pileated Woodpecker, Hairy Woodpecker, Red Breasted Woodpecker, Flicker, Mallard Duck, Great Blue Heron, Little Green Heron, Red Winged Blackbird, Killdeer, Robin, Rufous Sided Towhee, Canada Geese, Turkey Vultures, Tufted Titmouse

MAMMALS: (not a complete list)

Flying Squirrels (**Designated as Endangered**), Gray Squirrels, Red Squirrels, Fox Squirrels, White Tailed Deer, Black Bear, Weasel, Chipmunks, Raccoons,

BUTTERFLIES:

Monarch and many other Butterflies.

BATS:

There are bats that visit our fields in the 322-4 path and our ponds every evening.

SNAKES:

Black Rat Snakes and many others.

**The area that Alternate 322-4 crosses is also rich with WATER RESOURCES**

Many small but significant wetlands.

Many water seeps.

Two very productive wells on Tait Farm in the Alternative 322-4 Area (75 gpm and 45 gpm.)

Another potential very productive well site (designated by a hydro-geologist.)

Six sink holes in the Tait Farm part of the designated path of 322-4. One is very large. (There are more along the path.)

There are designated streams that feed to Spring Creek (A high Quality Fishing Waterway.)

**RUINING THIS IMPORTANT NATURAL AREA WOULD BE VERY POOR ENVIROMENTAL PLANNING.**

CONCERNING TAIT FARM AND 322-4 and 322-5 Alternates

When I served on the Harris Township Planning Commission and the Board Of Supervisors, there was a concept of valuing properties by what is the "Highest and best use." As I remember this, it meant what use would bring the greatest monetary return.

Using this construct Tait Farm might have it's highest good as a site for another hotel or maybe a high end housing development or maybe a light industrial park.

But it's current use as a family farm with various enterprises that attract the community to visit the farm is it's "Highest and best use."

The Harvest Shop with well selected vegetable and flower plants that are well taken care of and products that Tait Farm Foods has envisioned and created.

The CSA (Community Supported Agriculture) that consistently offers high quality organic vegetables grown here on the farm.

Tait Farm Christmas Trees that bring thousands of families for a joyful tradition of selecting and cutting their Tree.

And, Tait Farm Bassets which for over 60 years has brought joy to families with their puppies.

It isn't just the enterprises that people from our community enjoy. It is a beautiful farm with tall trees and productive fields that are beautiful with spring and summer greens and fall colors and winter snow-scapes.

A customer once told me that he loves driving by the field of Christmas trees and he wanted them to be there forever.

My point is that Tait Farm in total increases the attractiveness and desirability of our whole community much more than the potential of a site for another hotel or maybe a high-end housing development or maybe a light industrial park.

That might result from the being dissected

It brings value to the whole community as an attractive enjoyable place to live.

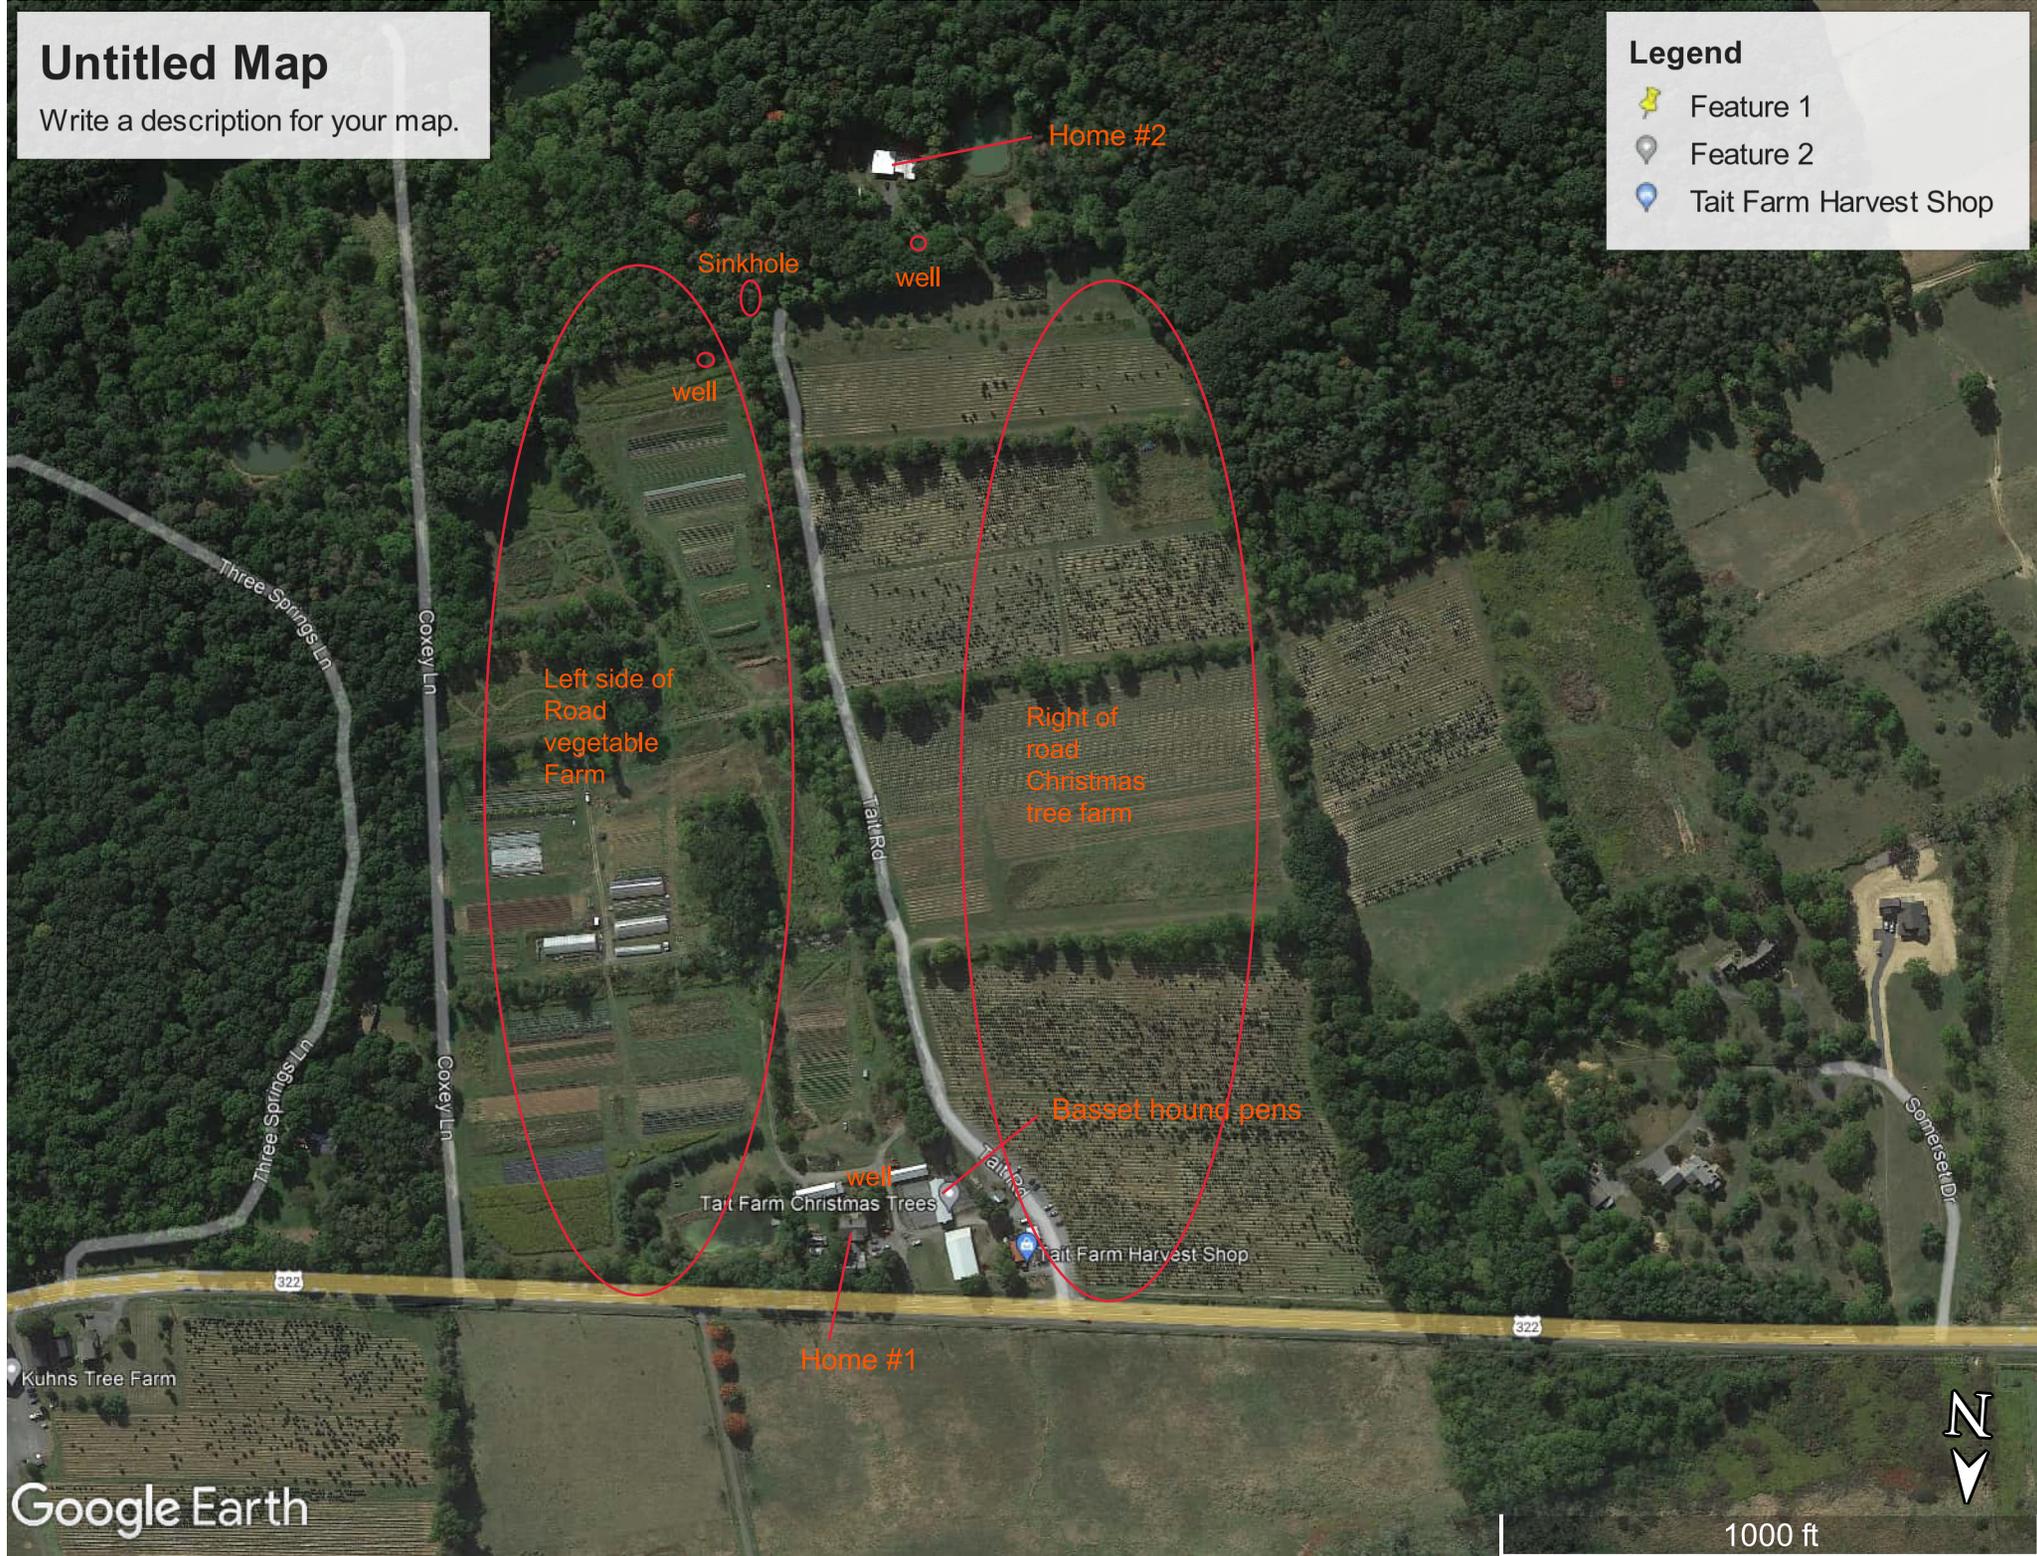

Therefore, it should be protected from being cut in half by either Alternates 322-4 or 322-5.
