

I-78 Reconstruction and Widening Project

Kecks Road Overpass Improvements

- **Replacing the existing bridge over I-78** with a new structure that meets modern safety and design standards
- **Widening the bridge** to accommodate the additional travel lanes on I-78
- **Improving safety features** by updated guide rails and roadway barriers
- **Upgrading the roadway approaches** to better align with the new bridge structure
- **Modernizing drainage and roadway elements** to reduce maintenance needs
