- The diagram illustrates a cross-section of a bridge deck. It features two 9-foot wide travel lanes separated by a centerline, and two 2-foot wide shoulders on either side. The total width is 20 feet. The deck is supported by five vertical piers. A red-shaded area represents the bridge deck surface, which has a 2.0% slope on both sides of the centerline. A 'GRADE POINT' is marked at the centerline. A 'PA TYPE 10M BARRIER (TYP)' is shown on the right shoulder. Dimensions are provided for the shoulders (1' - 6" and 2' - 0") and travel lanes (9' - 0").
