OPPORTUNITY TO COMMENT ON PARK IMPACTS

BONDSDVILLE RD RETAINING WALL

Comments Due by December 10, 2025

To address erosion and slope failure along Bondsville Road, PennDOT is proposing to build a 140-foot-long retaining wall between Beaver Creek and Bondsville Road (see location on map). Section 4(f) of the Department of Transportation Act of 1966 protects historic resources, parks, and other resources from conversion to transportation use. While property and easements will be acquired, PennDOT feels that the project will not adversely impact the features, attributes and qualities of Bondsville Mill Park that make it eligible for protection under Section 4(f).

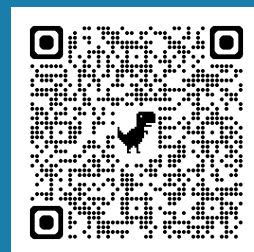

Pennsylvania
Department of Transportation

The construction area will be fenced. The start of construction is anticipated to begin in spring 2026.

No anticipated impacts to the dam ruins, trails or recreation features.

Virtual Public Meeting is scheduled for December 3, 2025, 7-8PM.
