

Cobbs Creek Parkway Safety Phase 2: Market Street to Woodland Avenue
City of Philadelphia
SR: 3015 Section: SP2
MPMS # 104991

July 28, 2026

PROJECT DESCRIPTION

This project involves safety improvements along the corridor of 63rd Street/Cobbs Creek Parkway, from Market Street to Springfield Avenue in the City of Philadelphia, Pennsylvania. This Phase 2 project will encompass the four (4) main design elements:

- (1) Install new fiber optic cable and junction boxes at various sections of the project limits.
- (2) Replace water main along the project limits.
- (3) Replace sanitary sewer at various sections of the project limits.
- (4) Install raised concrete center median islands at various sections of the project limits.

(1) Fiber Optic Cable Installation:

The following work is proposed between Market Street and Baltimore Avenue:

- a. Install and interconnect new fiber optic cables, new conduits, and new junction boxes between Market Street to Chestnut Street.
 - All the fiber optic cable installation will occur underground. The junction boxes will be installed in the sidewalk, and conduit will be trenched in the shoulder between the boxes. The fiber optic cable will be pulled into the new conduit.
- b. Install and interconnect new fiber optic cables, new conduits, and new junction boxes between S. 61st Street to Baltimore Avenue.
 - All the fiber optic cable installation will occur underground. The junction boxes will be installed in the sidewalk, and conduit will be trenched in the shoulder between the boxes. The fiber optic cable will be pulled into the new conduit.

(2) Replace water main along the project limits from Chestnut Street to south of Springfield Avenue.

(3) Replace Sanitary Sewer:

The following work is proposed between Chestnut Street and S. Edgewood Street:

- a. New sanitary sewer from Chestnut Street to Samson Street.
- b. New sanitary sewer from Pine Street to Cedar Street.
- c. New sanitary sewer from Catharine Street to Washington Avenue.
- d. New sanitary sewer from Cobbs Creek Parkway/S. 58th Street to Thomas Avenue.
- e. New sanitary sewer from Hadfield Street to Florence Avenue.
- f. New sanitary sewer from S. 60th Street to S. Edgewood Street.

(4) Raised Concrete Center Median Islands:

The following work is proposed on Cobbs Creek Parkway between Pine Street and 60th Street:

- a. New raised concrete-curbed median between Pine Street and Webster Street

- Median openings will be provided at designated cross streets.
- b. New raised concrete-curbed medians between Christian Street and 59th Street
 - Median openings will be provided at designated cross streets.
- c. New raised concrete-curbed medians between Ashland Avenue and 60th Street
 - Median openings will be provided at designated cross streets.
- d. All concrete center medians will be tinted to avoid a bright white appearance. The final color will be coordinated with the District Architectural Historian.

The Project will take place within existing Right-of-way and within existing previously disturbed roadway and sidewalk areas. Temporary Construction Easements will not be required for this project. The Project uses a combination of Federal, State, and Local funds.
