

EXISTING CONDITIONS

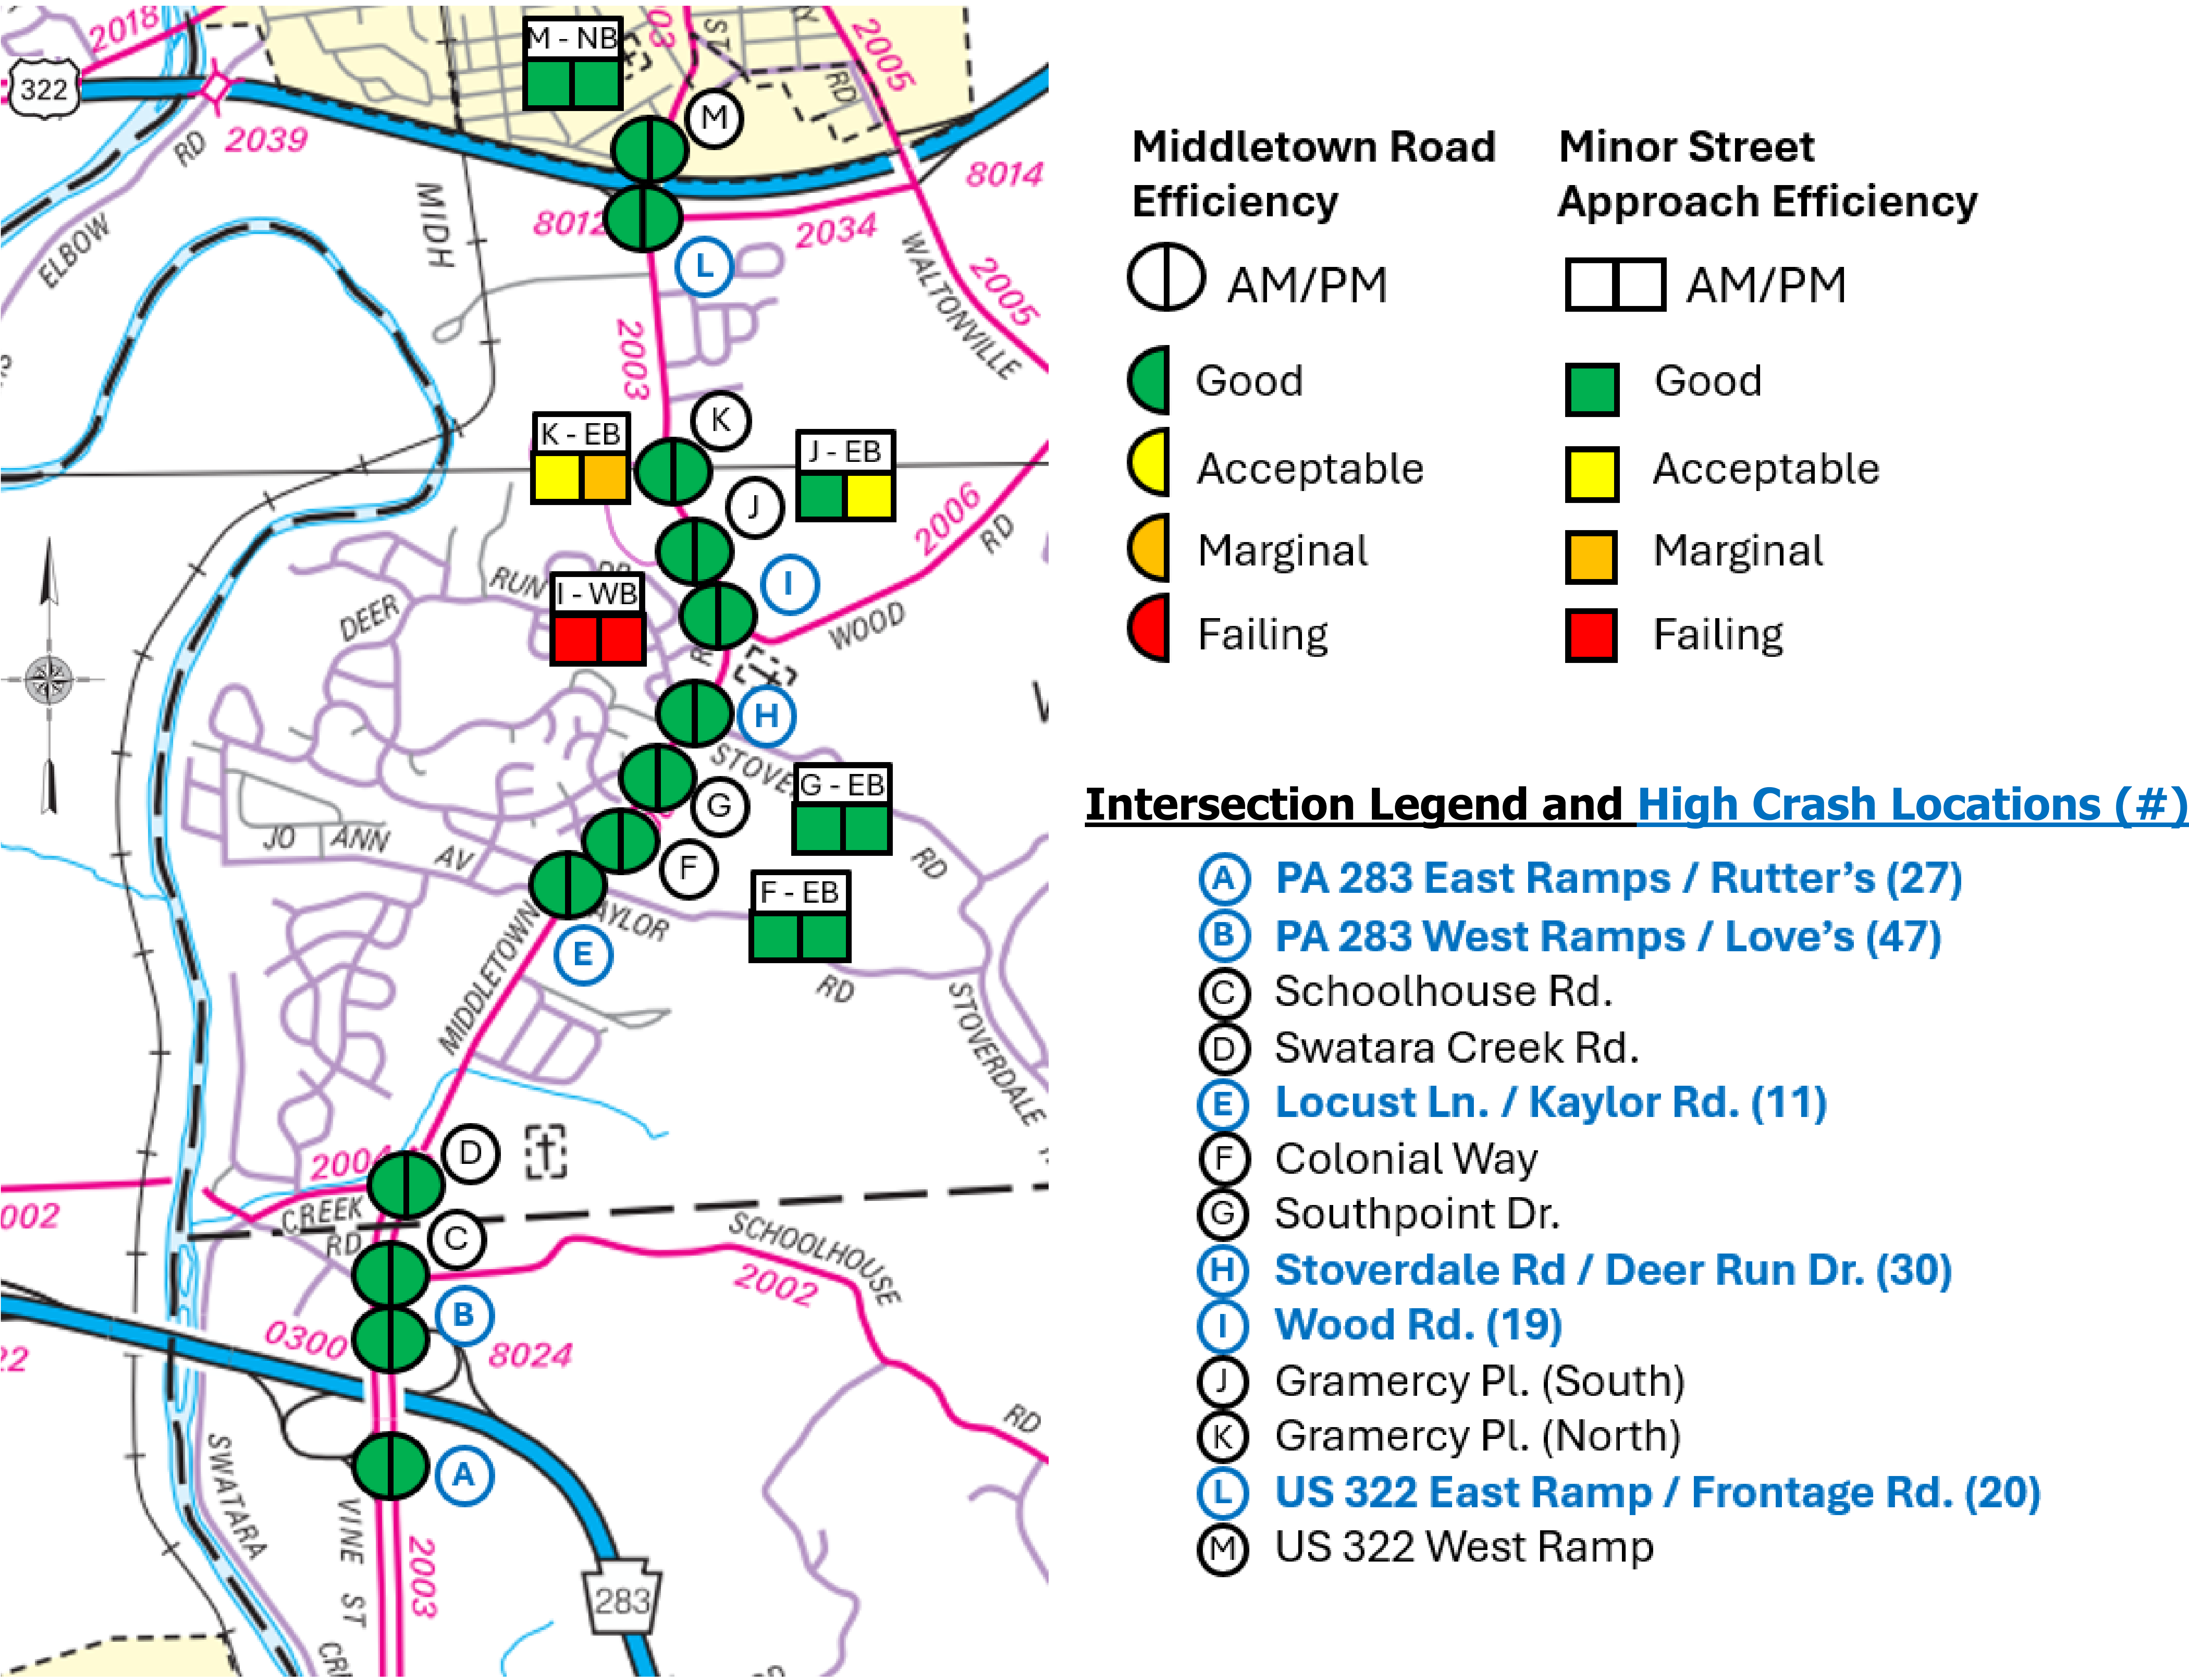

Traffic:

- ◆ Over 16,000 vehicles per day travel on Middletown Road
- ◆ About 50% of trips on Middletown Road are pass through (both origins and destinations are out side of the corridor)
- ◆ Currently traffic moves satisfactory on Middletown Road. However, the Wood Road Intersection fails from an efficiency standpoint.
- ◆ A high percentage of left turning traffic from Wood Road uses the shortcut behind Stoverdale Commons to avoid the Middletown/Wood Road intersection

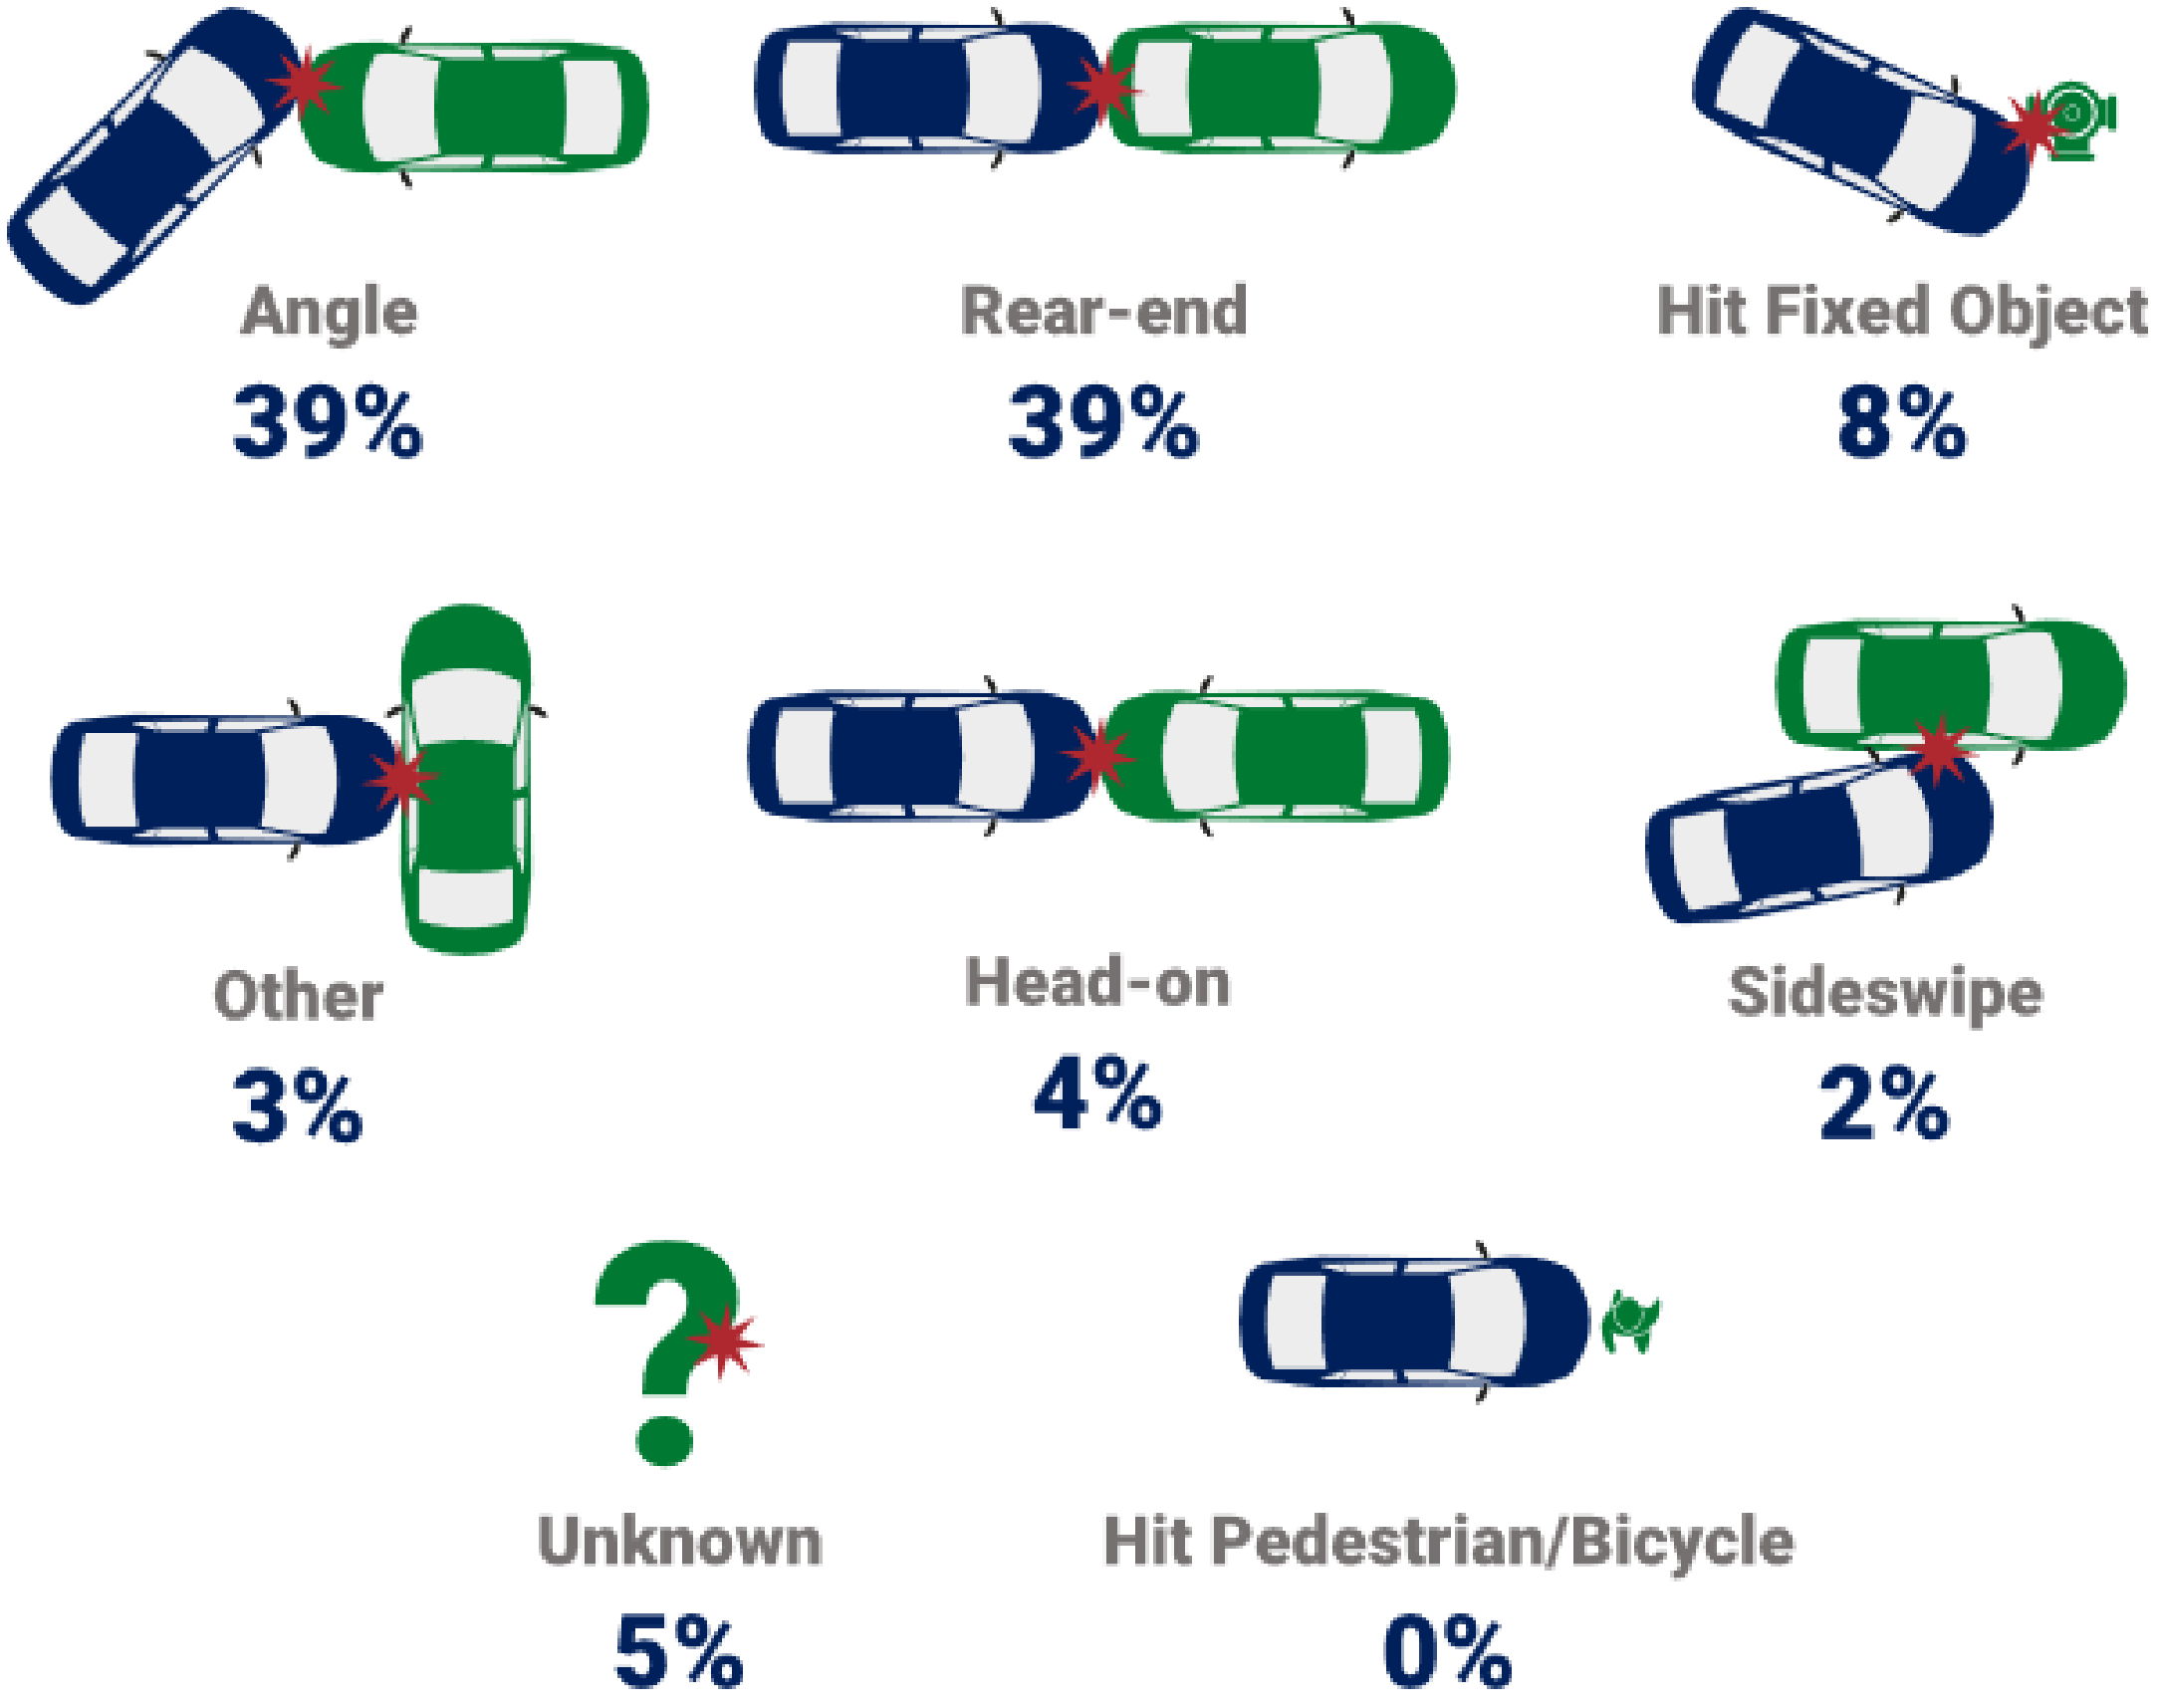

Safety:

- ◆ 65% of collisions occur at intersections
- ◆ Six streets and one residential driveway do not meet current criteria with regard to sight distance
- ◆ A total of 280 reportable crashes were documented over the past 10-years
- ◆ The total crash rate, suspected serious injury rate, and injury rate exceed the statewide average
