PURPOSE AND NEED

Project Purpose:

- To maintain safe and reliable travel on this portion of PA-65, and local streets. (4 Total Bridges)

Project Need:

- The bridges are in poor condition. Leaking expansion joints are allowing water onto bridge components and accelerating deterioration. The bridge decks have significant potholes and pavement deterioration.

NATIONAL ENVIRONMENTAL POLICY ACT

Public outreach begins with PennDOT Connects and extends into the **NEPA** (National Environmental Policy Act) process:

- PennDOT Connects is a project planning and development approach that engages local and planning partners by collaborating with stakeholders before project scopes are developed.
- NEPA requires agencies to integrate environmental values into their decision-making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions
- NEPA also includes public involvement activities and gathering feedback from the public
- This PowerPoint presentation is part of District 11-0's coordination with the public to obtain feedback on the project and to meet NEPA requirements.
