## **PennDOT Cameron County Maintenance Work Schedule for the Week of September 30**

**Clearfield, PA** – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Cameron County the week of September 30. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Cameron County for the coming week is as follows:

### **Mechanized Patching**

- Route 4004 (Rich Valley Road/Straight Creek Road) between the intersections of Hippy's Valley and Bobby's Run roads in Shippen Township. Wednesday, October 2, through Friday, October 4. Flaggers in the roadway will provide traffic control during daylight hours.

Mechanized patching is used to patch limited roadway areas that have extensive potholes, large areas of cracked pavement, and depressions. If mechanized patching was not performed, the damaged road surface would further deteriorate, resulting in PennDOT needing to completely rebuild the road or perform more costly corrective measures.

### **Side Dozing**

- Route 155 between the intersection of Route 120 in Shippen Township and the Cameron-Potter County line in Portage Township. Monday, September 30, and Tuesday, October 1. Flaggers in the roadway will provide traffic control during daylight hours.

Side dozing removes excess material from beneath guide rail areas, which improves drainage and allows water to sheet flow off the roadway. Side dozing is a crucial highway maintenance operation because when drainage systems do not function properly, water collects on the road, weakens pavement, accelerates the formation of potholes, and creates the potential for icing conditions in the winter months.

### **Vegetation Management**

- Route 155 between the intersection of Route 120 in Shippen Township and the Cameron-Potter County line in Portage Township. Monday, September 30, and

Tuesday, October 1. Flaggers in the roadway will provide traffic control during daylight hours.

Mowing, herbicide spraying, and selected tree thinning help maintain a safe roadway free of obstructing vegetation, improving visibility to spot signage, traffic control devices, and other motorists, bicyclists, pedestrians, and animals approaching the road. Additionally, a well-maintained roadside can improve drainage and prolong the life of the roadway.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
