GOVERNOR

Governor Josh Shapiro

CHAIRMAN'S STATEMENT

On behalf of Governor Shapiro and as the Governor's designee as chair of the PENNVEST Board of Directors, I am pleased to report to the people of Pennsylvania on the success of the PENNVEST program during Fiscal Year 2025–2026.

In November 2021, the Infrastructure Investment and Jobs Act (IIJA) dedicated a historic $55 billion to water quality infrastructure improvements nationwide over the next several years. This additional funding allows Pennsylvania to award record-setting levels of funding for infrastructure projects across the Commonwealth. In its fourth year of implementing IIJA funds, the PENNVEST Board of Directors approved a transformational $1.6 billion ($1,614,770,952) in new funding which was again a record year for total funding awarded by PENNVEST. The funding encompassed 136 drinking water, wastewater, stormwater and non-point source construction projects during FY 2025–2026, of which $1,336,016,416 was awarded in the form of low interest loans and $278,754,536 was awarded in the form of principal forgiveness loans or grants bringing PENNVEST's total funding since its inception in 1988 to more than $14.8 billion ($14,816,023,919).

The projects funded during FY 2025–2026 delivered significant benefits for the Commonwealth and its citizens, both environmentally and economically, including 38 drinking water systems that are now in compliance with water quality and safety requirements because of PENNVEST's funding. These projects include 16 projects for the removal of lead domestic water lines and 15 projects for the removal of per- and polyfluoroalkyl substances (PFAS), commonly referred to as forever chemicals. An additional 24 wastewater projects, which are designed to improve local stream conditions through proper treatment of discharges into streams and other publicly accessible areas, were made possible through PENNVEST funding. In addition, 8 communities addressed stormwater management issues, and 114 homeowners addressed malfunctioning on-lot systems and lateral repairs to eliminate inadequately-treated discharges through PENNVEST funding. Lastly, 1 project addressed non-point source stormwater pollution through the implementation of agricultural best management practices.

The PENNVEST Board of Directors and staff have also implemented the Clean Water Procurement Program (CWPP) with 3 contract awards. The CWPP serves as a model pay for performance program in the state for the purchase of verified nutrient and sediment reductions through a competitive bidding process. The program incentivizes best management practices with the intent to reduce nutrients and sediments flowing into local waters and the Chesapeake Bay and is funded with a recurring investment of $6 million.

In addition to improving water quality throughout the Commonwealth, PENNVEST-funded projects have also assisted in improving local economies. It is estimated that PENNVEST-funded projects have supported more than 2,026 full-time jobs during the past fiscal year.

Our accomplishments reflect the extraordinary team of professionals who work closely with our Commonwealth communities every day to improve their water infrastructure. It has been a pleasure and a privilege to work with them and share this success.

Looking forward to its 39th year of serving the great citizens of the Commonwealth of Pennsylvania, PENNVEST remains committed to the Governor's twin goals of supporting Pennsylvanians' constitutional right to clean air and pure water and the creation of meaningful jobs for thousands of Pennsylvanians. The PENNVEST Board and staff are committed to ensuring the fulfillment of these visions and continuing to improve and increase the funding opportunities set by the agency over its 38–year history. These collaborative efforts promise to bring lasting benefits, both financial and environmental, to all Pennsylvanians now and for future generations.

PROGRAM HIGHLIGHTS

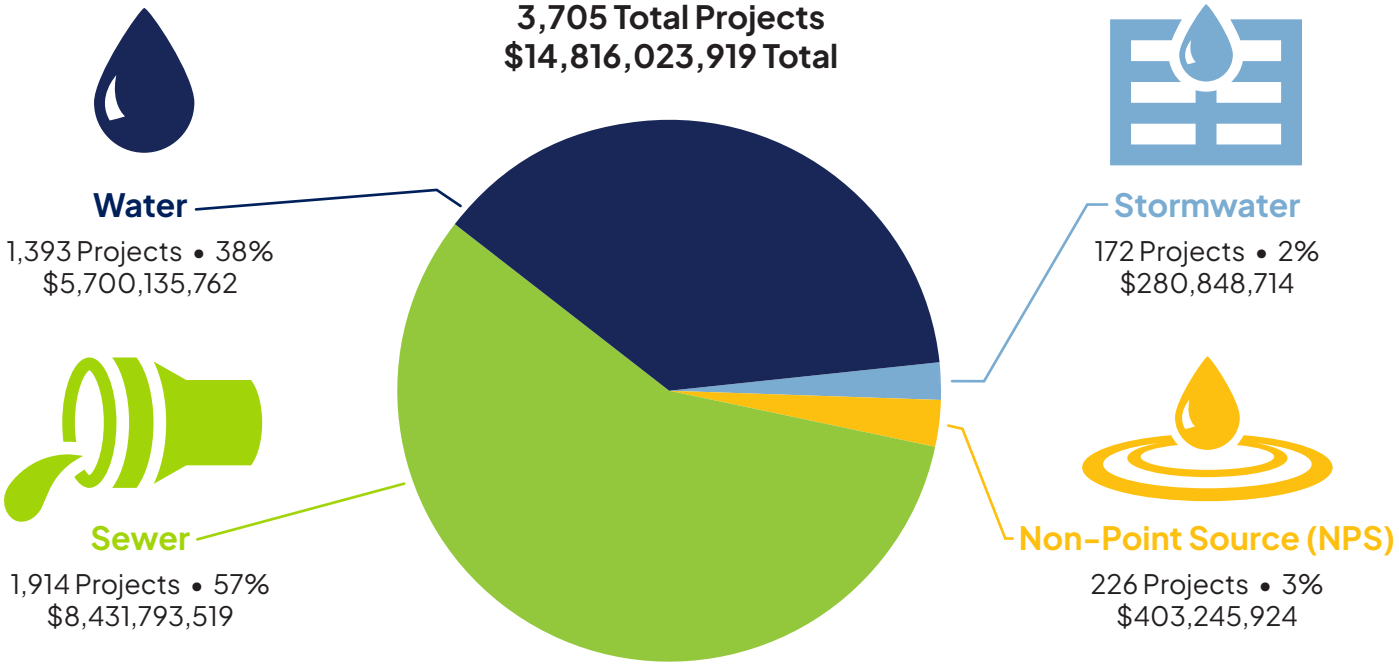

During Fiscal Year 2025–2026, PENNVEST continued more than three decades of water infrastructure investment, adding 133 new projects with a total investment of more than $1.6 billion. The bulk of that total consisted of 73 drinking water projects and 49 wastewater projects along with 7 stormwater projects. Additionally, 4 non-point source projects were funded – all targeting agricultural improvements and best management practices (BMPs).

PROGRAM HIGHLIGHTS

5-Year Project Funding Summary

The Homeowner Sewage Program, which is jointly administered by PENNVEST and the Pennsylvania Housing Finance Agency (PHFA), continues to grow. Since modifications were made to eligibility criteria in 2015, the program has seen exponential growth, accommodating residential clean water needs across the Commonwealth.

PROJECT FUNDING BY MEETING

Board Meeting Date / Project Name	County	Loan	Grant	Project Type
July 16, 2025				
Altoona Water Authority	Blair	$9,750,000	$-	Water
Aqua Pennsylvania, Inc. - Cabot/Hall Rd	Montgomery	$3,506,865	$11,728,135	Water
Borough of Indiana	Indiana	$4,829,635	$-	Sewer
Borough of Slatington	Lehigh	$993,340	$-	Water
Buckingham Township	Bucks	$615,089	$2,057,063	Water
Burrell Township Sewer Authority	Indiana	$831,890	$2,098,110	Sewer
City of Lancaster	Lancaster	$756,132	$953,206	Water
Delaware County Regional Water Quality Control Authority	Delaware	$20,000,000	$-	Sewer
East Taylor Municipal Authority	Cambria	$8,754,417	$1,165,933	Water
Erie City Water Authority - Galvanized Service Line Replacement	Erie	$3,032,351	$3,467,649	Water

Board Approved Projects Since 1988

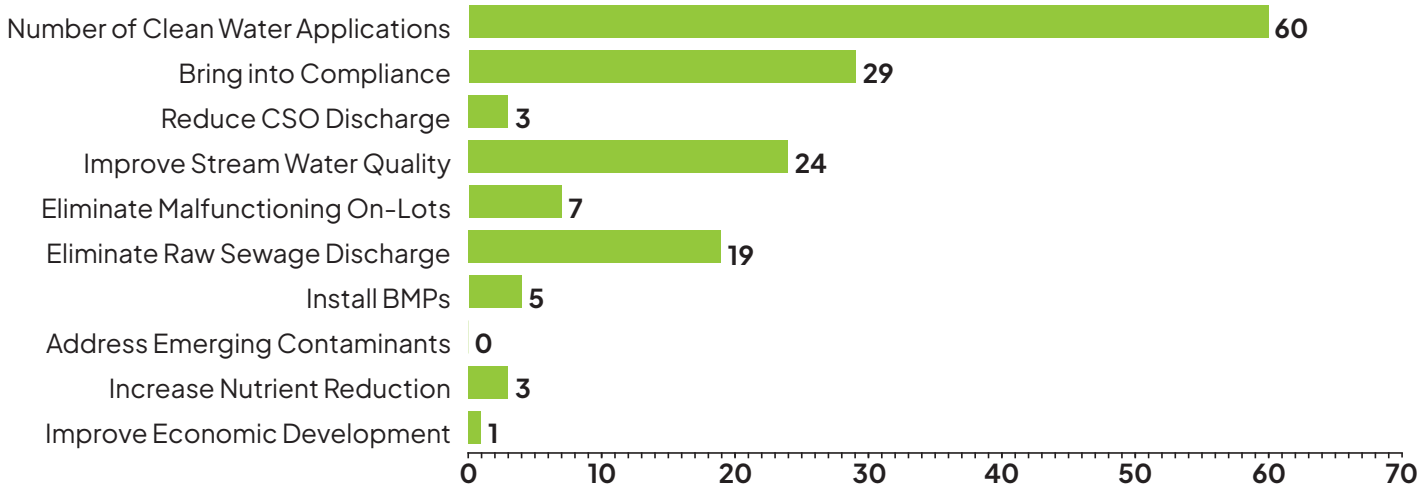

Legend

Drinking Water	Non-Point Source	Stormwater	Wastewater

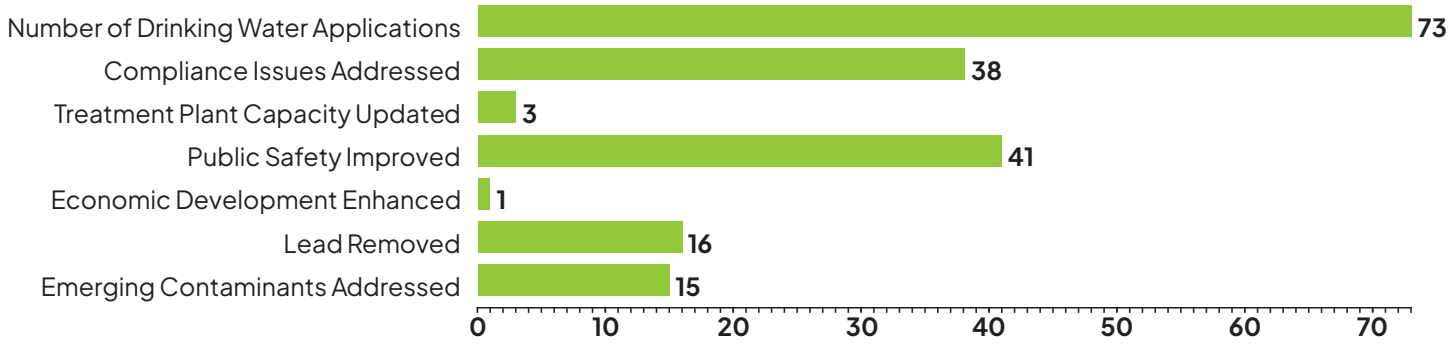

BENEFITS

At the heart of PENNVEST's mission is ensuring sustainable water quality throughout the Commonwealth. Project applications are evaluated for their ecological benefit and their demonstrated value to the environment in a variety of ways.

Clean Water Project Benefit Summary 2025–2026

Drinking Water Project Benefit Summary 2025–2026

APPLICATIONS

Since 2015, PENNVEST has had the capacity to extend funding offers to all applicants who satisfy three criteria prior to consideration:

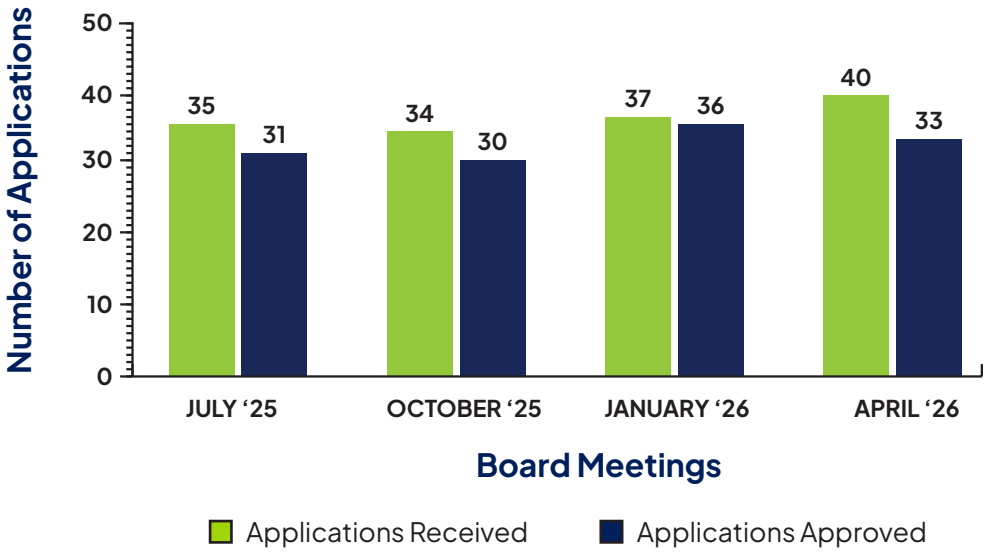

1. A complete application package was submitted for an eligible project prior to the consideration cut-off date.

2. Those applications were recommended by the Department of Environmental Protection (DEP) as being technically complete.

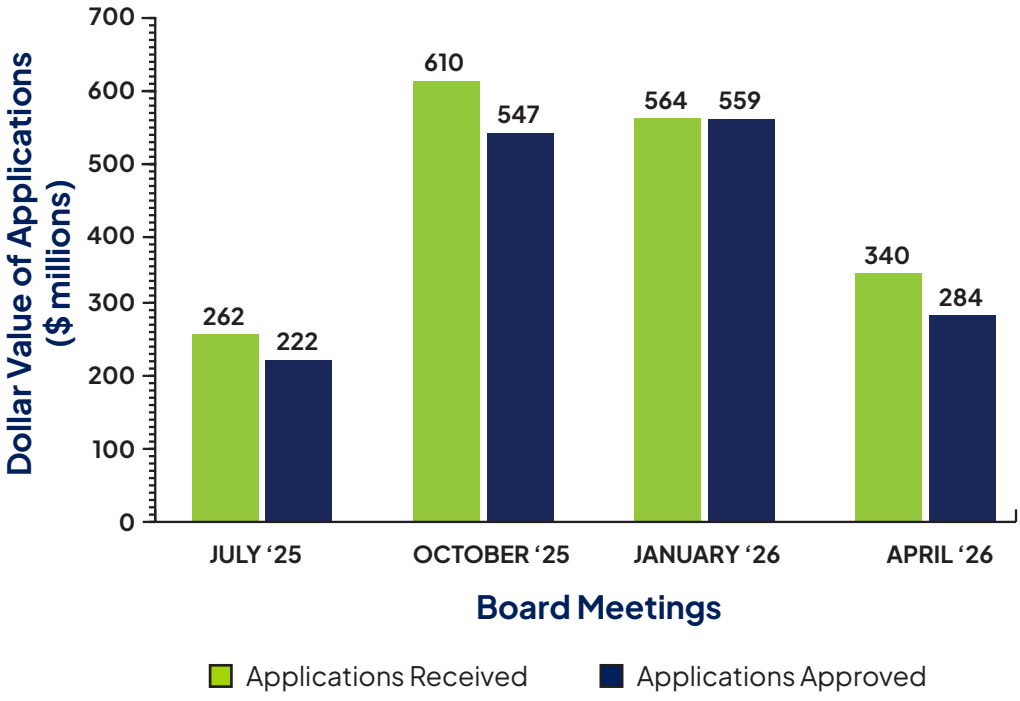

3. The projects were ready to undergo construction in a timely fashion.

The graphs highlight both the number of applications and the dollar value of those applications for each board meeting in FY 2025–2026.

Applications Received vs. Approved (#)

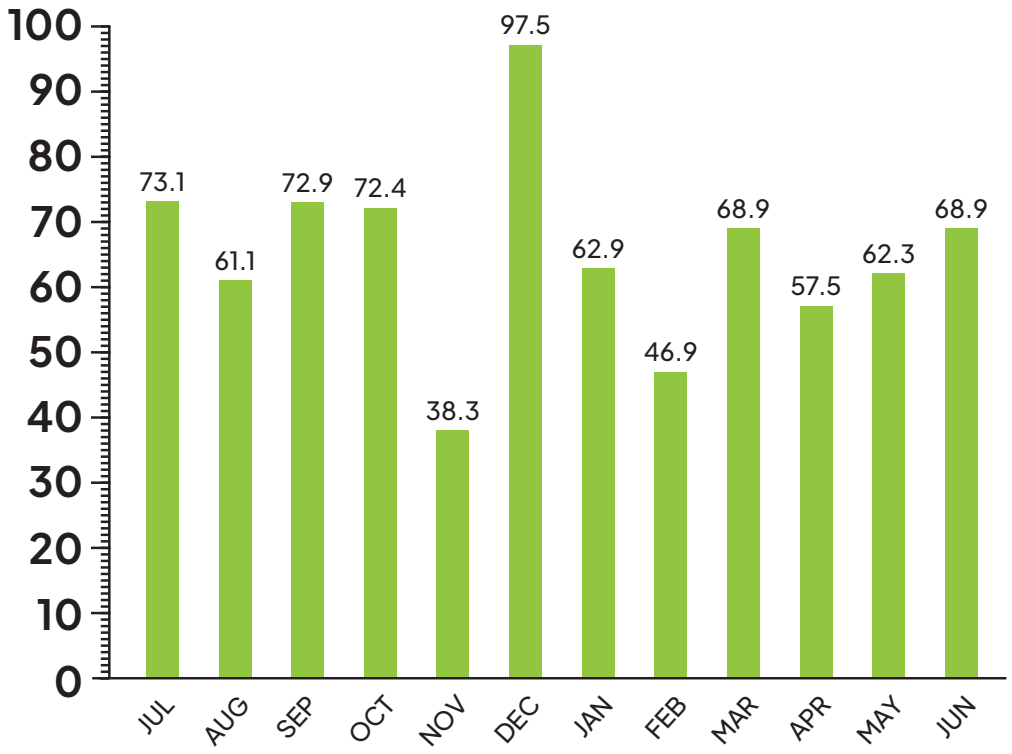

Applications Received vs. Approved ($)

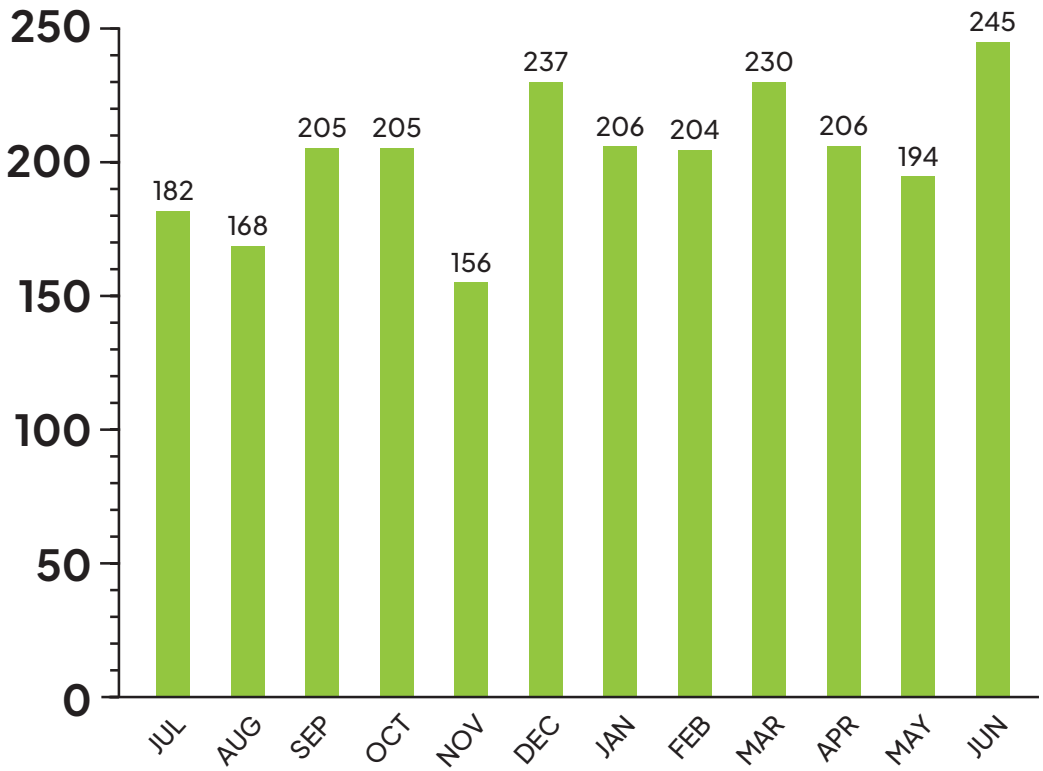

DISBURSEMENTS

Disbursement Amounts ($ millions) FY 2025–2026

Number of Disbursements FY 2025–2026

FUNDING SOURCES

FY 2025–26

PENNVEST utilizes a variety of funding sources to provide financial support for the drinking water, wastewater, stormwater, and non-point source projects that are approved by the Board every year.

These sources include Commonwealth general obligation bond proceeds, which are approved by a number of referenda, and normal capitalization grant proceeds that PENNVEST receives annually from the U.S. Environmental Protection Agency (EPA). The chart below displays the sources of PENNVEST's funding since the program's inception in 1988.

- **Interest Earned** $541.3* • 7%

CLEAN WATER PROCUREMENT PROGRAM

Within Pennsylvania's Fiscal Year 2025-2026 budget, Act 54 of 2024 allocated $6 million of non-lapsing funds to PENNVEST for the purchase of verified nutrient and sediment reductions, through a competitive bidding process, under the Clean Water Procurement Program (CWPP).

The goal of the Clean Water Procurement Program is to incentivize best management practices (BMPs) to reduce nutrients flowing into the Chesapeake Bay using a 'pay for performance' financing strategy. The reductions realized through the investments under the CWPP will address pollution issues in the Chesapeake Bay that lead to harmful algal blooms and impaired water quality. PENNVEST, through the CWPP, is committed to taking action to restore the Bay's health and support aquatic life by minimizing the pollutants that flow into the Chesapeake Bay via Pennsylvania waterways.

In Fiscal Year 2025-2026, PENNVEST issued a solicitation for project proposals during Round 4, via a Request for Proposals (RFP). Three successful applications were ranked and reviewed, and all three received a funding award but will not receive payment until the project is completed and the reduction amounts have been verified. The Best Management Practices (BMPs) that generated the verified reductions included planting of cover crops and alternative crops, construction of waste management systems and barnyard runoff controls, installation of forest buffers and associated land conversion, and restoration of a riparian buffer. Round 4 included installation of BMPs across 10 small farms.

Additionally, three projects from Round 1, one project from Round 2, and one project from Round 3 have completed the implementation of BMPs and have received final payment this fiscal year.

ROUND 4

RFP Submission Window

January 6, 2026 – April 22, 2026

Contracts under Round 4 will be executed in Fiscal Year 2026-2027.

Total Verified Nitrogen Purchased
112,474.06 pounds

Total Verified Phosphorus Purchased
9,732.60 pounds

Total Sediment Reductions Purchased
4,965,626.28 pounds

62,398.75 pounds

Total Verified Phosphorus Purchased
10,994.69 pounds

Total Sediment Reductions Purchased
3,924,942.04 pounds

PENNVEST ADVANCEMENTS

Pennsylvania's communities thrive when their foundations are strong, and few foundations matter more than clean water, reliable wastewater systems, and resilient stormwater infrastructure. This fiscal year, PENNVEST's low-cost financial assistance continued to turn long-planned projects into real progress — helping towns modernize aging systems, protect public health, and invest confidently in their future.

These investments do more than strengthen pipes and plants. They strengthen communities — lowering long-term costs for ratepayers, supporting local jobs, and ensuring that Pennsylvania's natural resources remain protected for generations.

PENNVEST's impact continues to accelerate across the Commonwealth. After 38 years since the program's inception the organization surpassed $**14.8 billion** invested in water quality improvement projects statewide.

This fiscal year, the Board of Directors continued with a high standard. PENNVEST provided **more than $1.6 billion** in financial assistance to support **136 drinking water, wastewater, stormwater, and non-point source construction projects**, reflecting both the scale of community need and the program's growing capacity to meet it. PENNVEST also reached a new milestone by investing **over $1.1 billion** across just **two consecutive application rounds**, delivering funding to **37 of Pennsylvania's 67 counties**. To underscore the magnitude of this accomplishment, the investment made during these two rounds alone exceeded the **$100 million** allocated to PENNVEST under the American Recovery and Reinvestment Act (ARRA) during the 2009-2010 fiscal year.

Demand for PENNVEST financing continues to rise sharply. Since FY 2020-2021, the program has experienced a **73.8 percent increase** in requests for water infrastructure funding—a clear indicator of the urgent and widespread need for reliable, modern systems across Pennsylvania. The strength of PENNVEST's revolving loan model remains central to meeting this demand. As loans are repaid, interest earnings expand the program's ability to reinvest in future projects, creating a sustainable cycle of support. Thanks to this structure, PENNVEST has been able to fully fund **every eligible, ready-to-proceed application since 2015**, ensuring that communities with critical infrastructure needs can move forward without delay.

As the application volume and award levels continue to rise, PENNVEST staff remain focused on modernizing and streamlining the program's processes to deliver funding to communities more quickly while safeguarding the security of program resources and information. This fiscal year, the PENNVEST Legal Office advanced a major objective: accelerating the pace of the financing program by improving the settlement process, enabling state and federal funds to reach Pennsylvania communities more efficiently. These efforts are now producing measurable results.

The Settlement team completed **171 settlements**, the highest number in program history and a **62 percent increase** over the previous fiscal year. At the same time, the average number of days required to complete settlement after Board approval decreased by **77.65 days**, a **26.43 percent reduction** within a single year. With settlement activity increasing, the Legal Office and other agency staff are maintaining a sharp focus on refining procedures to ensure funding recipients can access their awards and begin construction without delay.

This year also marked the launch of a significant collaboration between the PENNVEST Legal and Information Technology (IT) teams through the **System Modernization Initiative**. This multi-year effort will upgrade the agency's proprietary online settlement tab application and custom document-builder systems—tools originally developed in 2007-2008 that no longer fully support the program's current scale or operational needs. Development of the upgraded system is underway, with implementation anticipated in **2027**.

In parallel, the IT team strengthened the agency's security posture by implementing enhanced Docusign functionality for staff. Previously, employees with access to a resource account completed Docusign tasks under that shared account. The new process allows individual users to log in with their own credentials and perform tasks "on behalf of" the resource account. This improvement provides tighter security controls and more precise tracking for internal audits, ensuring each action is clearly attributed to the responsible staff person.

PENNVEST ADVANCEMENTS

PENNVEST welcomed several new team members this fiscal year and celebrated the careers of valued colleagues who retired from Commonwealth service or advanced into new professional opportunities.

The Information Technology (IT) team expanded significantly with the addition of new staff members. In December 2025, **Ankita Bunde** joined the team as an *Applications Developer 2*, bringing extensive experience in .NET development. In her role at PENNVEST, she will continue to develop and maintain .NET applications, as well as design and enhance application features, database queries, and stored procedures.

In March 2026, **Daniel Murphy** began employment with PENNVEST as an *Applications Developer 2*. Dan brings more than five years of IT experience, including roles as a Software Engineer in the educational and healthcare sectors, as well as several years of service in the United States Navy as an Aviation Electronics Technician.

In June 2026, **Asa Scheffel** accepted the role of *Information Technology Generalist.* Asa brings valuable private-sector networking experience and will support network security, Docusign administration, Power BI assistance, and troubleshooting for staff across the Commonwealth.

The Project Management team also had staffing changes this year. In June 2026, **Jessica Negley** joined PENNVEST as a *Project Management Technician*. A 13-year veteran of the Commonwealth, Jessica previously served with the Pennsylvania Department of the Auditor General. In her new role, she supports application processing, Board preparation, Legal Entity and Contacts data management, coordination with DEP and funding recipients on Continuing Education, and assists with project control audits and Letters of No Prejudice.

Early in 2026, PENNVEST congratulated **Rodney Glass** and **Kathy Klinger** on their retirements. Rod dedicated 22 years of service to the Commonwealth, most recently as an Information Technology Generalist on the IT team. Kathy, formerly PENNVEST's Project Management Technician, concluded her distinguished Commonwealth career after serving for 12 years. Their contributions and commitment will be deeply missed, and the PENNVEST team wishes them the very best in their next chapter.

The agency also bid farewell to **Brad Gorter**, former Assistant Counsel on the Legal team. After nearly seven years with PENNVEST, Brad departed in February 2026 to join the Pennsylvania Gaming Control Board as Senior Counsel. His legal expertise and thoughtful guidance were invaluable to the program, and PENNVEST is proud to see him continue to grow professionally in this new role.

PENNVEST's commitment to progress is reflected not only in its programs, but in the strength of its team. The agency continues to recruit and retain highly skilled, mission-driven professionals whose expertise and dedication enhance the awareness, accessibility, and effectiveness of PENNVEST's services. Throughout FY 2025-2026, staff members served in critical roles that were instrumental in advancing the agency's mission, including:

Organization Role

- Member, Chesapeake Bay Program Watershed Implementation Plan III Finance Work Group
- Member, DEP Technical Assistance Committee
- Member, Drought Task Force
- Member, Environmental Advisory Councils
- Member, Leadership Development Institute Alumni Association
- Member, National Association of Bond Lawyers
- Member, Office of General Counsel Legislation and Regulations Practice Group
- Member, Office of General Counsel Transactions Practice Group
- Chair, Office of General Counsel Transparency Law Practice Group
- Leader, PA Recovery Resource Team - Infrastructure Recovery Workgroup
- Chair, Penn State Extension Master Watershed Steward Program
- Member, Pennsylvania Association of Bond Lawyers
- Member, Pennsylvania Chapter of Women in Public Finance
- Member, Pennsylvania Organization for Watersheds and Rivers
- Chair, Pennsylvania State Employees Credit Union
- Member, Perkiomen Watershed Conservancy
- Member, Riparian Forest Buffer Advisory Committee
- Member, Schuylkill Action Network
- Member, Silver Jackets
- Treasurer, Tobyhanna Creek/Tunkhannock Creek Watershed Association
- President, Water Coalition of the Lehigh Valley

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS ON THE AUDIT OF THE FINANCIAL STATEMENTS

Board of Directors
Pennsylvania Infrastructure Investment Authority
Harrisburg, Pennsylvania

Opinions

We have audited the financial statements of the Pennsylvania Infrastructure Investment Authority (PENNVEST), a component unit of the Commonwealth of Pennsylvania, as of and for the years ended June 30, 2026 and 2025, and the related notes to the financial statements, which collectively comprise PENNVEST's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of PENNVEST as of June 30, 2026 and 2025, and the changes in its financial position and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of PENNVEST and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

PENNVEST's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about PENNVEST's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of PENNVEST's internal controls. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about PENNVEST's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal controls-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the schedules of PENNVEST's proportionate share of the net pension and OPEB liabilities and the schedules of PENNVEST's contributions for the net pension and OPEB liabilities be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial

statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audits were conducted for the purpose of forming opinions on the financial statements that collectively comprise PENNVEST's basic financial statements. The schedules and notes for the Federal Clean Water State Revolving Loan Fund and the Federal Drinking Water State Revolving Loan Fund as listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedules and notes for the Federal Clean Water State Revolving Loan Fund and the Federal Drinking Water State Revolving Loan Fund are the responsibility of management and were derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedules and notes for the Federal Clean Water State Revolving Loan Fund and the Federal Drinking Water State Revolving Loan Fund are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the Schedules of Delinquent Loans but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated.

SB & Company
CPAs and Business Advisors

If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated October 21, 2026, on our consideration of PENNVEST's internal controls over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal controls over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal controls over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* considering PENNVEST's internal controls over financial reporting and compliance.

Management's Discussion and Analysis

This section of Pennsylvania Infrastructure Investment Authority's ("PENNVEST" or "Program") annual financial report presents the Management's Discussion and Analysis ("MD&A") of PENNVEST's financial performance during the fiscal years that ended June 30, 2026 and 2025, with fiscal year 2024 for comparative purposes. It is intended to be read in conjunction with the PENNVEST financial statements and accompanying notes, which follow this section.

This financial report is designed to provide bondholders, investors, creditors, and federal and state agencies with a general overview of PENNVEST's finances and to demonstrate PENNVEST's accountability as a governmental agency. If you have any questions about this report or need additional financial information, contact Steven Anspach, Executive Director of Financial Management, PENNVEST, 333 Market Street, 18th Floor, Harrisburg, PA 17101.

OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts: management's discussion and analysis, financial statements, and supplemental information. The financial statements also include notes that explain in more detail some of the information in the financial statements. The MD&A serves as an introduction to the basic financial statements and supplementary information and presents management's examination and analysis of PENNVEST's financial condition and performance.

The financial statements of PENNVEST report information about PENNVEST using accounting methods similar to those used by private sector companies. These statements offer short-term and long-term financial information about its activities.

The Statements of Net Position include all PENNVEST's assets, deferred outflows of resources, liabilities and deferred inflows of resources and provides information about investments, revenue bonds, and amounts due from federal government. All the current year's revenues are accounted for in the Statements of Revenues, Expenses and Changes in Net Position. These statements measure the fiscal condition of PENNVEST's operations over the past year and can be used to determine whether PENNVEST has remained creditworthy and in a sound financial condition. The final required financial statements are the Statements of Cash Flows.

The primary purpose of these statements is to provide information about PENNVEST's cash receipts and cash disbursements, net changes in cash resulting from operations, investing, and financing activities and provides answers to such questions as where did the cash come from, what was the cash used for, and what was the change in cash balance during the report period.

Types of Information in the Financial Statements

All of the Program's financial statements, use the economic resources measurement focus and accrual basis of accounting. In other words, they comprehensively report all types of financial statement elements:

- Assets—resources the Program controls, from short-term assets like cash to long-term assets like loan receivables
- Liabilities—amounts the Program owes, from short-term liabilities such as salaries payable to long term liabilities such as outstanding debt and net amounts owed to employees for pensions
- Deferred outflows of resources and deferred inflows of resources—flows that occurred during the year, or in prior years, that will not be reported as expenses and revenues until the future year to which they are related
- Revenues and expenses—inflows and outflows of economic resources, respectively, related to the current year.

FINANCIAL SUMMARY

The following tables present condensed financial information derived from PENNVEST's financial statements. The issued report provides comparative statements for a three-year period. This presentation enables a reader to determine, by category, the basic analysis of a year's activity. This information supports the analysis presented in the Detailed Analysis section that follows.

Condensed Statement of Net Position

The following table (Table 1) summarizes the net position for fiscal years ended June 30, 2026, 2025 and 2024.

Table 1 (in thousands)
Condensed Statements of Net Position

	2026	2025	2024
Current Assets	**$ 2,088,839**	$ 2,031,291	$ 2,073,231
Noncurrent Assets	**3,240,267**	2,901,948	2,684,282
Total Assets	**5,329,106**	4,933,239	4,757,513
Deferred Outflows	**1,977**	2,327	3,552
Total Assets and Deferred Outflows	**5,331,083**	4,935,566	4,761,065
Current Liabilities	**189,497**	46,286	71,167
Noncurrent Liabilities	**55,323**	81,317	106,543
Total Liabilities	**244,820**	127,603	177,710
Deferred Inflows	**3,087**	2,340	2,512
Total Liabililities and Deferred Inflows	**247,907**	129,943	180,222
Total Net Position	**$ 5,083,176**	$ 4,805,623	$ 4,580,843

Condensed Statements of Revenue, Expenses and Changes in Net Position

The following table (Table 2) summarizes the revenues, expenses, and overall results of operations for the Program's operations for fiscal years ended June 30, 2026, 2025 and 2024.

Table 2 (in thousands)

Condensed Statements of Operating Revenues and Expenses

	2026	2025	2024
Operating Revenues:			
Interest on Loan Receivables	**$ 41,187**	$ 37,663	$ 35,651
Other Federal and State	**274,019**	192,005	108,342
Total Operating Revenues	**315,206**	229,668	143,993
Provision for Loan Losses	**147**	17,224	381
Net Operating Revenues	**315,059**	212,444	143,612
Operating Expenses:			
Administration	**(53,263)**	(28,777)	(21,249)
Grants/"Principal Forgiveness" to Program Participants	**(191,812)**	(133,098)	(116,487)
Total Operating Expenses	**(245,075)**	(161,875)	(137,736)
Nonoperating Revenues, Net	**207,569**	174,211	109,887
Capital Contributions	**-**	-	51,135
Increase in Net Position	**$ 277,553**	$ 224,780	$ 166,898

In 2026, PENNVEST's Total Net Position increased by $277.5 million. The increase was primarily a result of Total Assets and Deferred Outflows increasing by $395.5 million. The Net Position for the Federal Clean Water Revolving Loan Program Fund increased by $176.6 million, and the Net Position for the Federal Drinking Water Revolving Loan Program Fund increased by $118.4 million in 2026.

DETAILED ANALYSIS

The above tables provide several financial indicators that depict the fiscal health of PENNVEST. Total Net Position continued its trend of yearly increases in 2026. The Federal Clean Water State Revolving Fund ("CWSRF") has a significant impact on the Total Net Position line, as it represents 57.1% of the Total Net Position. This reflects the strength of the Federal Clean Water program.

Current Assets increased by $57.5 million in 2026. The increase in Current Assets was largely due to increases in funds awarded to PENNVEST through the Infrastructure Investment and Jobs Act (IIJA). Noncurrent Assets increased by $338.3 million in 2026. The increase in Noncurrent Assets was largely due to an increase in approved loans added to the loan portfolio and this increase, again, is largely due to the increase in funds available through the IIJA program.

The ability to encumber against future year revenues is critical for a revolving program. Noncurrent Loans Receivable, Gross, are those future loans that are due in more than one year. The Noncurrent Asset total is reduced by the Allowance for Loan Losses which is $41.1 million for the year ended June 30, 2026.

Total Liabilities increased in 2026 by $117.2 million. Noncurrent Liabilities decreased by $26.0 million due to debt service payments on outstanding General Obligation bonds and due to Commonwealth of Pennsylvania (the Commonwealth). The Current Liabilities increased by $143.2 million due to the increase in project payables and securities lending.

Total Liabilities increased in 2026 by $117.2 million. Noncurrent Liabilities decreased by $25.99 million due debt service payments on outstanding General Obligation bonds and due to Commonwealth of Pennsylvania. The Current Liabilities increased by $143.2 million due to the increase in project payables.

The Program has not received Commonwealth appropriations for operations since 1996. The cost of the Program has been funded from investment earnings, the repayment of loans, other federal and state funding (included in this line item are Marcellus Legacy Fund and Environmental Stewardship Fund monies), capital contributions from federal capitalization grants provided by the Environmental Protection Agency (“EPA”) and reimbursement of allowable federal administrative expenses. Between 2022 and 2026, PENNVEST also will receive federal appropriated funds through the Infrastructure Investment and Jobs Act (IIJA). This increase in funding has led to extensive growth in the PENNVEST loan portfolio and as a result, increases across many line items in the financial statements.

The Operating Revenues (as shown in Table 2), in 2026 were driven by the Other Federal and State Operating Grants of $274.0 million, and interest repayments on loans of $41.2 million. These increases are a result of an increasing loan portfolio and increasing principal, interest and investment incomes.

The Total Operating Expenses (as shown in Table 2) increased by $83.2 million in 2026. Increases in the amount disbursed as grants to program participants primarily accounted for this increase. The Total Operating Expense increase was offset by a $102.6 million increase in Nonoperating Revenues (primarily comprised of investment income/(loss)) as a primary driver for the Program increase in Total Net Position.

Table 3 examines the loan loss allowance for each of the loan portfolios of PENNVEST. The loan loss is an allowance in the Statements of Net Position, which reflects the amount which, in management’s judgment, establishes an adequate allowance to report possible losses on loans.

Table 3 (in thousands)
Loan Loss Allowance

	2026	2025	2024
CWSRF	**$ 22,309**	$ 22,486	$ 12,575
DWSRF	**3,966**	3,674	2,042
State and Revenue Bonds	**14,863**	14,831	9,150
Total Program	**$ 41,138**	$ 40,991	$ 23,767

Table 4 depicts the PENNVEST loan portfolios, excluding On-Lot Loans, by risk code classification. Overall, the risk assessment of the loan portfolio remains good. The largest dollar changes year over year occurred in the Non-Speculative project rating and the Speculative rating. In 2026, the risk code for Non-Speculative increased by $63.1 million and the risk code for Speculative increased by $279.5 million. The total for the Non-Speculative risk code represented $2.34 billion or 66.3% of the portfolio. This indicates less overall credit risk in the PENNVEST loan portfolio.

Table 4 (in thousands)
Loan Portfolio by Risk

Risk Codes	2026	2025	2024
Speculative	**$ 1,119,392**	$ 839,872	$ 710,820
Concern High Rate Impact	**65,256**	66,320	46,771
Concern Service User	**2,739**	1,158	690
Non-Speculative	**2,327,454**	2,264,360	2,149,351
Total Loan Portfolio	**$ 3,514,841**	$ 3,171,710	$ 2,907,632

As PENNVEST is a Revolving Loan Program, it is essential that loan repayments be made in a timely manner. Over 99.759% of all loans in the PENNVEST portfolio are submitting repayments electronically, with the electronic funds transfer program offered, under the Automatic Clearing House (ACH) system; however, funds must be available for payment in the borrowers' accounts. By all accounts, the PENNVEST ACH system is working and funds are available for repayment. Table 5 illustrates the loan receipts by the different loan portfolios of PENNVEST.

As can be observed from Table 5, loan receipts vary for each of the PENNVEST portfolios. These receipts are categorized as deposits that do not include any transfers. The CWSRF Program had the largest dollar collection of $118.2 million or 54% of the total collected in 2026. The CWSRF is a major portfolio in the PENNVEST program.

Table 5 (in thousands)
Loan Principal Receipts from Customers

Loan Principal Receipts	2026	2025	2024
CWSRF Federal Loans	**$ 118,224**	$ 107,408	$ 99,789
DWSRF Federal Loans	**55,877**	49,529	45,424
State and Revenue Bond Loans	**46,782**	47,951	42,877
Total	**$ 220,883**	$ 204,888	$ 188,090

Table 6 is an illustration of the PENNVEST disbursements to customers. The total disbursement of $606.1 million reflects an increase of $131.1 million from 2025. The CWSRF Federal disbursements accounted for the largest category of disbursements, making up 41% of the Total Disbursements in 2026.

Table 6 (in thousands)
Loan Principal Disbursements to Customers

	2026	2025	2024
CWSRF Federal Loans	**$ 250,947**	$ 212,195	$ 180,507
DWSRF Federal Loans	**242,282**	198,428	123,195
State and Revenue Bond Loans	**112,839**	64,314	43,578
Total	**$ 606,068**	$ 474,937	$ 347,280

SIGNIFICANT LONG-TERM FINANCING ACTIVITY

Net Pension Liability	**7,710**	8,473	9,420
Net OPEB Liability	**2,258**	2,889	3,149
Total	**$ 55,323**	$ 81,317	$ 106,543

As of June 30, 2026, PENNVEST had $53.8 million of revenue bond debt. Revenue Bonds Payable decreased in 2026 by $10.1 million from the previous year due to debt service payments. The following is a summary of Revenue Bond activity for the 2025-2026 fiscal year.

As of June 30, 2025, PENNVEST had $63.9 million of revenue bond debt. Revenue Bonds Payable decreased in 2025 by $9.7 million from the previous year due to debt service payments.

Outstanding Debt, End of Year	**$ 53,815**	$ 63,979

See Notes 6 and 7 to the financial statements for detailed descriptions of the outstanding debt and the current year activity.

CURRENTLY KNOWN FACTS, DECISIONS, OR CONDITIONS

Infrastructure Investment and Jobs Act (IIJA)

The Infrastructure Investment and Jobs Act (IIJA) is a federal program that provides investment into the nation's infrastructure. A portion of this funding is directed towards drinking water and wastewater projects through the nation's SRF funds. As the administrator of the SRF funds for the Commonwealth, PENNVEST received over $1.5 billion in funding to be distributed into designated projects. While about half of this funding is disbursed as non-repayment funds, the other half is distributed as loan funds and repayments from these loans will be put back into the PENNVEST SRF funds. The IIJA funds were awarded between September 2022 and September 2026. These loan repayments have increased capacity in the CWSRF and the Federal Drinking Water State Revolving Loan Fund (DWSRF) funds. This allowed PENNVEST to continue to support future projects as principal and interest payments on these loans are received.

Sublevel Revolving Loan Program

PENNVEST Board of Directors approved PENNVEST Board Resolution 2023-3, authorizing PENNVEST to establish a PENNVEST Sublevel Revolving Loan Program (SLRLP). The Resolution made $50 million available to PENNVEST as an investment in the program. Under the SLRLP, counties, municipal authorities, council of governments, or other regional entities, can apply for 'seed' funding to establish a revolving loan program to fund eligible clean water projects at the sub-state level. This program continues to grow and has funded $11.2 million in projects through June 30, 2026.

Trust Indenture

PENNVEST entered into a Federal SRF Trust Indenture and First Supplemental Trust agreements and issued $50 million in SRF Revenue Bonds in January 2018. These indentures allow for the issuance of revenue bonds, commercial paper, and implementation of a loan/bond guarantee program. It is cross-collateralized with both the CWSRF and DWSRF. Zions Bank was selected as the Trustee. While PENNVEST hasn't issued any new Revenue Bonds since 2018, the program is still utilized and the capacity is available, if additional funding is needed in the future.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Pennsylvania Infrastructure Investment Authority (PENNVEST) is an instrumentality of the Commonwealth of Pennsylvania (Commonwealth) created by Act 16 of the General Assembly in March of 1988 (the PENNVEST Act). The purpose of PENNVEST is to finance long-term, low-interest loans for corporations, partnerships, sole proprietorships, non-profit organizations, authorities, and municipalities for repair, construction, reconstruction, rehabilitation, extension, and improvement of drinking water, storm water, and wastewater systems. PENNVEST's On-Lot Program provides funding for the improvement of septic systems. PENNVEST is funded through revenue bonds, federal grants, Commonwealth appropriations, Commonwealth general obligation bonds, and the use of recycled loan repayments.

A governing body of thirteen members, administers the operations of PENNVEST. The Chairman of the governing body is the Governor or the Governor's designee. Other members include cabinet secretaries, legislators, and local government leaders, as well as representatives of the engineering community and the drinking water and wastewater industries.

PENNVEST, which is a component unit of the Commonwealth reporting entity, is presented as an Enterprise Fund on the accrual basis of accounting. Criteria considered in making this determination include the Commonwealth's appointment of PENNVEST's Board and the Commonwealth's ability to impose its will on PENNVEST.

Measurement Focus and Basis of Accounting

PENNVEST's activities are accounted for on a cost of services or "capital maintenance" approach under the economic resources measurement focus. This means that all assets and all liabilities (whether current or noncurrent) associated with its activities are included on its statement of net position. The operating statements present increases (revenues) and decreases (expenses) in total net position.

PENNVEST utilizes the accrual basis of accounting wherein revenues are recognized in the period earned and expenses are recognized when they are incurred.

Operating revenues and expenses consist of those revenues and expenses that result from the ongoing principal operations of PENNVEST. Operating revenues consist primarily of interest on loans receivable, and federal and state grants received for the purpose of providing grants or "principal forgiveness" to program participants. Nonoperating revenues and expenses consist of those revenues and expenses that are related to financing and investing types of activities, such as investment income/loss.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Measurement Focus and Basis of Accounting (continued)

When an expense is incurred for purposes for which there are both restricted and unrestricted resources available, it is PENNVEST's policy to apply those expenses to restricted resources to the extent that they are available and then to unrestricted resources.

The accounting and reporting policies of PENNVEST conform to the accounting rules prescribed by the Governmental Accounting Standards Board ("GASB").

Cash and Cash Equivalents

For purposes of the Statements of Cash Flows, PENNVEST considers all highly liquid investments with an initial maturity of three months or less at the time of purchase to be cash equivalents.

Investments

Investments are stated at fair value based on quoted market values.

Capital Contributions

Capital contributions represent contributions from the Commonwealth of Pennsylvania and the federal government for the loan programs.

Allowance for Loan Losses

The allowance for loan losses is used to report possible future losses on loans outstanding. Loan losses and recoveries of previously charged-off loans are charged or credited directly to the allowance for loan losses. The provision for loan losses, which is charged to current operations, reflects the amount, which in management's judgment establishes an adequate allowance to report possible losses on loans. Management's judgment is based upon a continuing review of the loan portfolio, past collection experience, and current economic conditions. While management uses available information to recognize losses on loans, future adjustments to the allowance may be necessary based on changes in economic conditions.

Investment/Interest Income

Interest income on investment securities is recorded when earned. Interest income on loans is accrued based on methods that result in a constant yield when related to the principal amounts outstanding.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Restricted Net Position

Restricted net position represents net position that is restricted for revolving loans in the Federal Revolving Clean Water and Drinking Water Programs.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Deferred Outflows/Inflows of Resources

The Statements of Net Position report a separate section for deferred outflows and inflows of resources. These separate financial statement elements represent consumption/acquisition of net position that applies to future periods, and so will not be recognized as an outflow/inflow of resources until then. PENNVEST has two items that qualifies for reporting in this category: deferred outflows/inflows related to pension and other post-employment benefits.

Postemployment Benefits Other Than Pensions ("OPEB")

For purposes of measuring the PENNVEST's OPEB liability, deferred outflows and inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Commonwealth's Retired Employees Health Plan (REHP) and additions to/deductions from the REHP's fiduciary net position have been determined on the same basis as they are reported in the Commonwealth's Annual Comprehensive Financial Report (ACFR). For this purpose, the REHP recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value.

New Governmental Accounting Standards Board (GASB) Pronouncements

PENNVEST has adopted the following GASB Statements noting the impact was not material to the financial statements. The required changes are reflected in the financial statements and notes to those statements.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

New Governmental Accounting Standards Board (GASB) Pronouncements (continued)

Statement No. 103, *Financial Reporting Model Improvements* The primary objective of this Statement is to improve key components of the financial reporting model to enhance its effectiveness in providing information that is essential for decision making and assessing a government's accountability. This Statement also addresses certain application issues of the reporting model such as: Management's Discussion and Analysis; Unusual or Infrequent Items; Presentation of the Proprietary Fund Statement of Revenues, Expenses, and Changes in Fund Net Position, Major Component Unit Information, and Budgetary Comparison Information. The requirements of this Statement IS effective for fiscal years beginning after June 15, 2025 (FY2026). This Statement has been implemented. The implementation of this Statement did not have a material effect on the PENNVEST's net position, statement of changes, or cash flows.

2. DEPOSIT AND INVESTMENT RISK

The trust indenture and the Commonwealth fiscal code, as amended, authorizes PENNVEST to invest in obligations of the U.S. government and government-sponsored agencies and instrumentalities; certificates of deposit, fully insured or collateralized; certain commercial paper and repurchase agreements; highly rated bank promissory notes or investment funds or trusts; and "prudent man" investments as determined by PENNVEST's depository (i.e. Commonwealth Treasury Department).

The majority of PENNVEST's investments are invested in the Common Investment Pool of the Commonwealth which is managed by the Commonwealth's Treasury Department (the "Treasury Department").

The deposit and investment policies of the Treasury Department are governed by Sections 301, 301.1, 301.2 and 505 of the Pennsylvania Fiscal Code (Act of 1929 P.L. 343).

Treasury deposits must be held in insured depositories approved by the Board of Finance and Revenue and must be fully collateralized. The Pennsylvania Fiscal Code grants the Treasury Department the authority to invest in any deposits and investments. This authority is subject, however, to the exercise of full judgment and care under the prevailing circumstances. Persons of prudence, discretion, and intelligence familiar with such matters in regard to the permanent disposition of the funds need to consider the probable income to be derived therefrom, as well as the probable safety of the capital.

2. DEPOSIT AND INVESTMENT RISK (continued)

The Treasury Department manages the Commonwealth Investment Program (CIP). The Treasury Department is required to exercise careful judgment in determining those investments that are appropriate for each Commonwealth fund based upon distinct investment criteria such as income needs, cash flow requirements, investment time horizons, and risk tolerance. All investments are made in accordance with the statutory authority described in the preceding paragraph. The CIP investment pool structure invests in both equity securities and fixed income securities to achieve the investment objectives of the funds of the CIP. Asset allocation targets among cash, equity securities, fixed income securities and alternatives are established in order to meet these overall objectives.

The Treasury Department has created two separate pools within the CIP, each with its own distinct investment strategies, goals, and holdings that reflect the differing needs of Commonwealth funds for income, cash flows, and investment risk tolerance. A highly liquid vehicle, Pool 99, consists of short-term fixed income and cash and provides a high degree of liquidity and security but only modest returns. A less liquid vehicle, Pool 198, allows for investment in assets that offer potentially higher returns with commensurate risk.

As of June 30, 2026 and 2025, PENNVEST's investments, excluding securities lending balances (see below), held in the Commonwealth investment pools, were $1,934,050 and $1,406,894, respectively.

As of June 30, 2026 and 2025, PENNVEST also had bank balances of cash and cash equivalents in the amount of $497,210 and $358,286, respectively. These balances were collateralized with securities held by the pledging financial institution's trust department or agent but not in the PENNVEST's name.

Securities Lending Program

The Treasury Department provides a securities lending program in which the various investments under custody of the Treasury Department participate. A contract between the Treasury Department and its custodian, acting as a lending agent, provides that the custodian lends securities owned by the participants to independent brokers, dealers and banks, acting as borrowers in exchange for collateral.

2. DEPOSIT AND INVESTMENT RISK (continued)

Securities Lending Program (continued)

Lending agreements between the custodian and the borrowers require that the custodian receive collateral from the borrowers in exchange for the securities lent. Securities lent consist of both domestic and foreign equity securities and United States Treasury and foreign debt obligations. For securities lent which are not denominated in United States dollars or whose primary trading market is located outside the United States, the fair value of the collateral received must be at least 105 percent of the fair value of the securities lent. For all other securities lent, the fair value of the collateral received must be at least 102 percent. Practically all collateral received consists of cash. A small portion of collateral received consists of letters of credit, United States Treasury, and corporate and/or foreign debt obligations. Collateral is marked to market daily. Additional collateral from borrowers is required if the fair value of the collateral received declines below lending agreement requirements. The lending agent cannot pledge or sell collateral securities received unless the borrower defaults.

To the extent collateral received consists of cash, the lending agent may use or invest the cash in accordance with reinvestment guidelines approved by the Treasury Department. Either the participant or the borrower may terminate lending agreements on demand. Lending agreements are typically of very short duration – usually overnight. Therefore, the duration of lending agreements do not generally match the maturities of the investments made with cash collateral.

The resulting rate risk is mitigated by the lending agent's ability to reallocate lending agreements among program participants.

The program requires that the lending agent indemnify the Treasury Department for all claims, liabilities, and costs resulting from the lending agent's negligence or intentional misconduct.

During the fiscal years ended June 30, 2026 and 2025, there were no failures by any borrower to return securities lent or pay distributions thereon. Also, there were no losses resulting from a lending agent or borrower default and there were no Treasury Department restrictions on the amounts of the loans that could be made.

As of June 30, 2026 and 2025, there was no Treasury Department or participant credit risk because the fair value of collateral received was not less than the fair value of the securities lent. As of June 30, 2026 and 2025, PENNVEST's portion of securities lending collateral within the Commonwealth Investment Pool was $160,653 and $19,739, respectively.

3. FAIR VALUE MEASUREMENTS

PENNVEST categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; and Level 3 inputs are significant unobservable inputs. There were no Level 1 or Level 3 investments as of June 30, 2026 and 2025.

PENNVEST has the following recurring fair value measurements:

- Level 2 – Commonwealth Investment Program Pool 99 (Pool 99) of $96,102 and $243,624, as of June 30, 2026 and 2025, respectively, were valued using a share-based valuation structure (net asset value). Pool 99 seeks to maintain a stable net asset value per share of $1. Pool 99 performance is benchmarked against the yield on Merrill Lynch three-month United States Treasury Bill Index.

- Level 2 – Commonwealth Investment Program Pool 198 (Pool 198) of $847,263 and $1,163,270, as of June 30, 2026 and 2025, respectively, were valued using a share-based valuation structure (net asset value). Pool 198 is benchmarked to a blend of Standards and Poor's 500, Morgan Stanley Capital International All Country World Index Ex-U.S., Barclays Capital U.S. Aggregate Bond, and Merrill Lynch 6-month U.S. Treasury Bill Indices.

4. LOANS RECEIVABLE

PENNVEST has loans outstanding throughout the Commonwealth. The eleven largest loans amount to 18% and 17%, of gross loans receivable as of June 30, 2026 and 2025, respectively. The majority of loans are disbursed to municipal governments of the Commonwealth and are collateralized by a pledge of the general taxing powers of the municipal governments or revenue streams generated by the municipal governments.

PENNVEST currently provides loans for projects which are expected to lead to an effective solution to problems experienced with drinking water, wastewater treatment, or storm water systems. The term of loans is normally between 20 and 30 years. The minimum interest rate on a loan is 1.00%. Detailed guidelines are established in the PENNVEST Act for the maximum interest rate. The actual interest rates ranged from 1.00% to 2.179% as of June 30, 2026 and 2025.

As of June 30, 2026 and 2025, PENNVEST had approved approximately $2,426,370 and $1,770,619, respectively, of loan funds that had not yet been disbursed. The monies needed to fund these loans will be generated from contributions by the federal government or the Commonwealth revenue bonds and principal repayments on existing loans.

4. LOANS RECEIVABLE (continued)

Loans receivable, gross, as of June 30, 2026 and 2025, are as follows:

	2026	2025
Current portion	**$ 233,436**	$ 228,771
Noncurrent portion	**3,281,405**	2,942,939
Total Loans Receivable, Gross	**$ 3,514,841**	$ 3,171,710

5. ALLOWANCE FOR LOAN LOSSES

Changes in allowance for loan losses during years ended June 30, 2026 and 2025, are as follows:

	2026	2025
Balance, beginning of year	**$ 40,991**	$ 23,767
Provision of loan losses	**147**	17,224
Balance, End of Year	**$ 41,138**	$ 40,991

6. REVENUE BONDS PAYABLE

In June 2015, PENNVEST issued Revenue Bonds Series 2015A in the amount of $65,000. The Bonds were issued at a premium of $8,257. The proceeds of the bonds were used to pay at maturity on July 1, 2015 the aggregate principal amount of PENNVEST's Tax-Exempt Commercial Paper Revenue Notes, Series 2010A, plus accrued interest, and pay the costs of issuing the 2015 Bonds.

In January 2018, PENNVEST issued State Revolving Funds (SRF) Bond Series 2018A in the amount of $50,000. The Bonds were issued at a premium of $8,387. The proceeds of the 2018 RF bonds, together with other available funds, was applied (i) to finance costs of certain wastewater and drinking water projects for governmental entities and other eligible borrowers pursuant to the PENNVEST Leveraged State Water Pollution Control Revolving Fund Program (Clean Water SRF Program) and the PENNVEST Leveraged State Drinking Water Revolving Fund Program (Drinking Water SRF Program), and (ii) to pay the costs of issuing the 2018 SRF Bonds.

6. REVENUE BONDS PAYABLE (continued)

Changes in revenue bonds payable for the fiscal years ended June 30, 2026 and 2025, are as follows:

Series	Balance as of July 1, 2025	Additions	Reductions	Balance as of June 30, 2026	Amounts Due within One Year
2015A Revenue Bonds	$ 39,704	$ -	$ 3,310	$ 36,394	$ 3,440
2018A SRF Bonds	17,655	-	5,600	12,055	5,880
Bond Premium	6,620	-	1,254	5,366	-
Total	$ 63,979	$ -	$ 10,164	$ 53,815	$ 9,320

Series	Balance as of July 1, 2024	Additions	Reductions	Balance as of June 30, 2025	Amounts Due within One Year
2015A Revenue Bonds	$ 42,854	$ -	$ 3,150	$ 39,704	$ 3,310
2018A SRF Bonds	22,990	-	5,335	17,655	5,600
Bond Premium	7,874	-	1,254	6,620	-
Total	$ 73,718	$ -	$ 9,739	$ 63,979	$ 8,910

Information regarding revenue bonds issued is presented below:

Year of Issue	Amount of Original Issue	Maturity	Interest Rate	Purpose
2015	$ 65,000	2035	3.38% to 5.00%	To pay at maturity as of July 1, 2015, the Series 2010A Commercial Paper Revenue Notes, and to pay debt issuance costs.
2018	50,000	2028	5.00%	To finance costs of certain wastewater and drinking water projects.

A summary of debt service requirements (payable semi-annually) as of June 30, 2026 are as follows:

Years Ending June 30,	Principal	Interest	Total
2027	$ 9,320	$ 2,182	$ 11,502
2028	9,750	1,716	11,466
2029	3,720	1,228	4,948
2030	3,870	1,042	4,912
2031	4,025	912	4,937
2032-2035	17,764	2,535	20,299
Total	$ 48,449	$ 9,615	$ 58,064

Under the terms of the debt issue described above, PENNVEST is required to maintain certain balances in restricted trust accounts, make timely payments to the trustee accounts, and pledge loans that provide cash flow necessary to service debt (short-term obligations and revenue bonds payable). The SRF trust indentures contain a provision that in an event of default of debt, outstanding amounts become immediately due if PENNVEST is unable to make payments.

8. CAPITAL CONTRIBUTIONS

The Commonwealth of Pennsylvania has authorized the issuance of a total of $1,430,256 of general obligation bonds and appropriated the proceeds to PENNVEST for the improvement of water and sewer systems in the Commonwealth. Proceeds include $230,256 approved by the electorate in 1981, $300,000 approved by the electorate in 1988, $350,000 approved by the electorate in 1992, $150,000 under the provisions of P.L. 343 No. 176 as authorized by the PENNVEST Act of 1988, and $400,000 approved by the electorate in 2008. PENNVEST is authorized to utilize the proceeds for loans to borrowers. All but $300,000 of the proceeds are considered to be revolving, as such, the principal and interest received on the loans are not required to be repaid to the Commonwealth. The balance of the proceeds, also used for loans to borrowers, ultimately received from the bond issues will require repayment as described in Note 8.

PENNVEST has also received approval for $2,325,448 and $1,832,570, in federal loan funds for water pollution control and drinking water, respectively, as of June 30, 2026. Of the $2,325,448 and $1,832,570, approved $2,074,933 and $1,175,654, respectively, have been received as of June 30, 2026. For the period July 1, 2025 through June 30, 2026, $120,353 and $211,990 of federal funds were received for water pollution control and drinking water, respectively. The state match for water pollution control and drinking water programs for the period July 1, 2025 through June 30, 2026 was $32,085 and $23,654, respectively. These funds have or will be utilized to make loans and the proceeds from repayments can be utilized to make new loans in the future.

The required cumulative state match for the disbursed federal loan funds for water pollution control and drinking water as of June 30, 2026 was $443,632 and $208,374, respectively. As of June 30, 2026, $443,632 and $208,374, was the cumulative state match disbursed to loans for water pollution control and drinking water, respectively. All of the state match must be funded by the end of the award period.

The required cumulative state match for the disbursed federal loan funds for water pollution control and drinking water as of June 30, 2025 was $411,547 and $184,721, respectively. As of June 30, 2025, $411,547 and $184,721 was the cumulative state match disbursed to loans for water pollution control and drinking water, respectively. All of the state match must be funded by the end of the award period.

PENNVEST has been authorized by the PENNVEST Act to make grants to participants in the loan programs, if deemed necessary, to financially assist the community. As of June 30, 2026 and 2025, PENNVEST has authorized unfulfilled grant commitments of $29,161 and $55,330, respectively, remaining.

For the years ended June 30, 2026 and 2025, state capital contributions were $32,365 and $27,944, respectively. State funded grants disbursed to program participants of $35,765 and $15,780, were reported for the years ended June 30, 2026 and 2025, respectively.

8. CAPITAL CONTRIBUTIONS

The Commonwealth of Pennsylvania has authorized the issuance of a total of $1,430,256 of general obligation bonds and appropriated the proceeds to PENNVEST for the improvement of water and sewer systems in the Commonwealth. As of June 30, 2025, $411,547 and $184,721 was the cumulative state match disbursed to loans for water pollution control and drinking water, respectively. All of the state match must be funded by the end of the award period.

PENNVEST has been authorized by the PENNVEST Act to make grants to participants in the loan programs, if deemed necessary, to financially assist the community. As of June 30, 2026 and 2025, PENNVEST has authorized unfulfilled grant commitments of $29,161 and $55,330, respectively, remaining.

For the years ended June 30, 2026 and 2025, state capital contributions were $32,365 and $27,944, respectively. State funded grants disbursed to program participants of $35,765 and $15,780, were reported for the years ended June 30, 2026 and 2025, respectively.

9. RELATED-PARTY TRANSACTIONS

PENNVEST contracts for services necessary to carry out its operations from various Commonwealth departments and agencies. PENNVEST paid the following departments and agencies for accounting services and loan project technical assistance during the fiscal years ended June 30, 2026 and 2025:

	2026	2025
Office of Comptroller Operations	**$ 433**	$ 497
Department of Environmental Protection	**2,522**	2,818

10. LITIGATION

PENNVEST is involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on PENNVEST's financial position.

11. RETIREMENT BENEFITS

General Information about the Pension Plan

Plan Description

Substantially all employees of PENNVEST participate in the Pennsylvania State Employees' Retirement System (SERS), a cost-sharing multiple-employer defined benefit pension plan established by the Commonwealth to provide pension benefits for employees of the state government and certain independent agencies. Membership in SERS is mandatory for most PENNVEST (and other state) employees. Article II of the Commonwealth's constitution assigns the authority to establish and amend the benefit provision of the plan to the General Assembly. SERS issues a publicly available financial report that can be obtained at www.sers.pa.gov.

Benefits Provided

SERS provides retirement, death, and disability benefits. Member retirement benefits are determined by taking years of credited service, multiplied by final average salary, multiplied by 2%, and multiplied by class of service multiplier. PENNVEST employees participate in one of the following classes of service categories: Class A, Class AA, Class A-3 or Class A-4. According to the State Employees' Retirement Code (SERC), all obligations of SERS will be assumed by the Commonwealth should SERS terminate.

11. RETIREMENT BENEFITS (continued)

Contributions

Section 5507 of the SERC (71 Pa. C.S. §5507) requires the Commonwealth and other employers whose employees are SERS members to make contributions to the fund on behalf of all active members and annuitants necessary to fund the liabilities and provide the annuity reserves required to pay benefits. SERS funding policy, as set by the board, provides for periodic active member contributions at statutory rates. The SERS funding policy also provides for periodic employer contributions at actuarially determined rates based on SERS funding valuation, expressed as a percentage of annual retirement covered payroll, such that they, along with employee contributions and an actuarially determined rate of investment return, are adequate to accumulate assets to pay benefits when due. In fiscal year 2017 and 2018, the Commonwealth paid the full actuarially required rate after being collared in previous years due to Act 2010-20.

Contributions to the pension plan from PENNVEST were $1,079 and $1,060, for the fiscal years ended June 30, 2026 and 2025, respectively.

Pension Liabilities, Pension Expense, and Deferred Outflows and Inflows of Resources Related to Pensions

As of June 30, 2026 and 2025, PENNVEST reported a liability of $7,710 and $8,473, respectively, for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2025 and 2024, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. PENNVEST's proportion of the net pension liability was based on a projection of PENNVEST's long-term share of contributions to the pension plan relative to the projected contributions of all participating agencies, actuarially determined.

As of December 31, 2025 and 2024, PENNVEST's proportion was 0.045 and 0.042 percent, respectively.

For the fiscal years ended June 30, 2026 and 2025, PENNVEST recognized pension expense of $947 and $1,161, respectively.

11. RETIREMENT BENEFITS (continued)

As of June 30, 2026 and 2025, PENNVEST reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
	2026	2025	2026	2025
Differences between expected and actual experience	**$ 302**	$ 384	**$ 1**	$ 9
Net difference between projected and actual investment earnings on pension plan investments	**-**	249	**849**	-
Changes in proportion	**508**	229	**432**	591
Changes in assumptions	**145**	149	**-**	-
Differences between PENNVEST contributions and proportionate share of contribution	**23**	36	**24**	7
PENNVEST contributions subsequent to measurement date	**551**	541	**-**	-
Total	**$ 1,529**	$ 1,588	**$ 1,306**	$ 607

The $551 and $541, reported as deferred outflows of resources related to pension resulting from PENNVEST contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the years ended June 30, 2026 and 2025, respectively. Other amounts reported as deferred outflows/inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending June 30	Amount
2027	**$ 444**
2028	**(354)**
2029	**(232)**
2030	**(186)**
Total	**$ (328)**

Actuarial Assumptions

The following methods and assumptions were used in the December 31, 2025 and 2024, actuarial valuations. These methods and assumptions had changes within the projected salary increases as well as the Mortality Rate Used:

	2026	2025
Actuarial method	Entry age	Entry age
Investment rate of return	6.875%, net of manager fees including inflation	6.875%, net of manager fees including inflation
Projected salary increases	Average of 5.43% with range of 3.70% -7.55% including inflation	Average of 4.58% with range of 3.30%-6.95% including inflation
Asset valuation method	Fair value	Fair value
Inflation	2.50%	2.50%
Mortality rate	Projected PubG-2016 Mortality Tables adjusted for actual plan experience and future improvement for retirees, beneficiaries, and survivors and rates determined by SERS' actuaries using actual SERS experience for pre-retirement active members	Projected PubG-2010 and PubNS-2010 Mortality Tables adjusted for actual plan experience and future improvement for retirees, beneficiaries, and survivors and rates determined by SERS' actuaries using actual SERS experience for pre-retirement active members
Cost of living adjustments	Ad hoc	Ad hoc

11. RETIREMENT BENEFITS (continued)

Some of the methods and assumptions mentioned above are based on the *20th Investigation of Actuarial Experience* covering the period of 2020-2024 which was released and approved by the SERS Board in July 2025. The Commonwealth's actuary made recommendations with respect to the actuarial assumptions and methods based on their analysis.

The long-term expected real rate of return on pension plan investments is determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of December 31, 2025 and 2024, are summarized in the following table:

	December 31, 2025		December 31, 2024	
Asset Class	Target Allocation	Long-term Expected Rate of Return	Target Allocation	Long-term Expected Rate of Return
Private equity	16%	5.11%	16%	6.00%
Private credit	0%	0.00%	0%	0.00%
Real estate	7%	3.84%	7%	4.80%
U.S. equity	37%	2.34%	37%	4.85%
International developed markets equity	14%	5.04%	14%	4.75%
Emerging markets equity	2%	5.53%	2%	4.95%
Fixed income - core	19%	1.98%	19%	1.75%
Inflation protection (TIPS)	3%	1.35%	3%	1.50%
Cash	2%	0.23%	2%	0.25%
Total	100%		100%	

Discount Rate

The discount rate used to measure the total pension liability was 6.875% for the 2025 and 2024 actuarial valuations. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the rates applicable for each member and that employer contributions will be made based on rates determined by the actuary. Based on the assumptions, SERS fiduciary net position was projected to be available to make all projected future benefit payments of current active and non-active SERS members. Therefore, the long-term expected rate of return on SERS investments was applied to all periods of projected benefit payments to determine the total pension liability.

11. RETIREMENT BENEFITS (continued)

Sensitivity of PENNVEST's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following schedule presents PENNVEST's proportionate share of the 2025 and 2024 net pension liability calculated using the discount rate of 6.875% for 2025 and 2024. It also shows what PENNVEST's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate:

	1% Decrease 5.875%	**Current 6.875%**	**1% Increase 7.875%**
Net Pension Liability as of December 31, 2025 (Measurement Date)	**$ 9,828**	**$ 7,710**	**$ 4,539**

	1% Decrease 5.875%	**Current 6.875%**	**1% Increase 7.875%**
Net Pension Liability as of December 31, 2024 (Measurement Date)	$ 10,397	$ 8,473	$ 5,571

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in the separately issued SERS financial report.

12. POST EMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB)

PENNVEST, through the Commonwealth's Retired Employees Health Plan (REHP), provides healthcare as a post-employment benefit to its employees that qualify for this benefit when they retire. The REHP has been established under pertinent statutory authority.

General Information About the REHP

Plan Description and Administration

The REHP is a single employer defined benefit OPEB plan that includes Commonwealth agencies and some component units. The REHP is established as a trust equivalent arrangement for some Commonwealth agencies and component units. The REHP is administered by the Pennsylvania Employee Benefits Trust Fund (PEBTF), which acts as a third-party administrator under an administrative agreement with the Commonwealth. All policy decision types and levels of benefits for the REHP fall under the purview of the Commonwealth's Executive Board, and the Secretary of Administration. The REHP does not have a governing board.

12. POST EMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (continued)

General Information About the REHP (continued)

Plan Description and Administration (continued)

The REHP is reported in the Commonwealth's ACFR as a Pension (and Other Employee Benefit) Trust. The REHP is reported using the economic resources measurement focus and the accrual basis of accounting. The ACFR is an audited financial statement and is available at www.budget.pa.us.

Contributions

REHP employer contribution requirements are established by the Commonwealth Office of Administration and the Office of the Budget. PENNVEST contributed $300 (not in thousands) per biweekly pay period for each REHP eligible active employee to REHP per the actuarial valuation report as of June 30, 2026 and 2025. Total contributions to the REHP were $179 and $186, for the years ended June 30, 2026 and 2025, respectively.

Benefits and Eligibility

The REHP covers retirees and their eligible dependents with medical and prescription drug plans. PENNVEST pays the insurance premiums for retirees with the exception of the following amounts received from the retiree:

Retirement Date:	**Retiree share of cost of benefits:**
Before July 1, 2005	Zero – PENNVEST pays full cost
July 1, 2005 to June 30, 2007	1% of final annual salary
July 1, 2005 to June 30, 2011	3% for non-Medicare and 1.5% for Medicare eligible retirees of either final gross annual base salary or final average salary, whichever is less
After June 30, 2011	3% for non-Medicare and 1.5% for Medicare eligible retirees final average salary

Employees who retire from PENNVEST at any age with 25 or more years of service are eligible to receive REHP benefits. In addition, employees who retire at or over age 60 with a minimum of 20 years of service are eligible for coverage under the REHP. Coverage under disability retirement requires five years of service. Spouses and dependents are eligible for subsidized postemployment medical coverage while the retiree is alive. Surviving spouses of deceased retirees may continue to participate in the plan if they pay the full cost of the coverage.

12. POST EMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (continued)

OPEB Liabilities, OPEB Expense, and Deferred Outflows and Deferred Inflows of Resources Related to OPEB

As of June 30, 2026 and 2025, PENNVEST reported a liability of $2,258 and $2,889, respectively, for its proportionate share of the collective net OPEB liability. The collective net OPEB liability was measured by an actuarial valuation as of June 30, 2025 and 2024, with the exception that the census data information which was as of December 31, 2024 and 2023, respectively. PENNVEST's proportion of the collective net OPEB liability was based on PENNVEST's contractually required contributions to the REHP relative to the contractually required contributions of all employers participating in the REHP. As of both June 30, 2025 and 2024, the measurement date, PENNVEST's proportionate share was 0.041 percent.

For the years ended June 30, 2026 and 2025, PENNVEST recognized OPEB expense of $(388) and $508, respectively.

As of June 30, 2026 and 2025, PENNVEST reported deferred outflows and deferred inflows of resources related to OPEB from the following:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
	2026	2025	2026	2025
Differences between expected and actual earnings on plan investments	$ -	$ -	$ 30	$ 16
Differences between expected and actual experience	57	90	1,014	695
Changes in proportion	162	377	259	277
Changes in assumptions	50	86	478	745
PENNVEST contributions subsequent to measurement date	179	186	-	-
Total	$ 448	$ 739	$ 1,781	$ 1,733

Deferred outflows of resources related to OPEB resulting from PENNVEST's contributions subsequent to the measurement dates of June 30, 2025 and 2024 but prior to the reporting dates of June 30, 2026 and 2025, of $179 and $186, respectively, will be recognized as a reduction of the OPEB liability at reporting dates June 30, 2026 and 2025, respectively.

Other amounts reported as deferred inflows of resources related to OPEB will be recognized in the PENNVEST's OPEB expense as follows:

Years Ending June 30	Amount
2027	$ (21)
2028	(19)
2029	(18)
2030	(17)
2031	(13)
Total	$ (88)

12. POST EMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (continued)

Actuarial Methods and Assumptions

The following methods and assumptions were used in the June 30, 2025 and 2024, actuarial valuation.

Actuarial cost method	Entry age normal
Discount rate	6.68% as of June 30, 2025; 6.09% as of June 30, 2024 Based on the long-term expected rate of return on assets held in the OPEB investment pool (6.75%) and a municipal bond rate of 5.20% (based on the 20-year Bond Buyer GO Index as of the end of June 2025)
Investment rate of return	6.75%
Initial medical trend rate	8.2% (non-Medicare)/8.2% (Medicare) as of June 30, 2025; 8.9% (non-Medicare)/9.0% (Medicare) as of June 30, 2024
Ultimate medical trend rate	3.90% and 3.90% as of June 30, 2025 and 2024, respectively
Inflation	2.50% and 2.50% as June 30, 2024 and 2023, respectively
Payroll growth	2.80%
Year ultimate trend rate reached	2075
Mortality rate	PUB-2010 Mortality Tables

The above actuarial assumptions were determined, in-part, based on the SERS experience studies performed periodically to determine reasonable and appropriate economic and demographic assumptions for purposes of valuing the defined benefit pension plan. The most recent SERS experience study covered the years 2015 through 2019 and was presented to the State Employees' Retirement Board in July 2020. The approved recommendations from that study were used to determine the assumptions for the REHP valuation, where applicable.

One significant assumption where the recommendation of the experience study is not applicable to the retiree health benefit valuation is the discount rate. Since REHP has insufficient assets to meet next year's projected benefit payments, as prescribed by GASB Nos. 74 and 75, the discount rate is based on the index rate for 20-year tax exempt general obligation municipal bond index rate with an average rating of AA/Aa or higher as of the measurement date. The Commonwealth elected to determine the discount rate using the Bond Buyer 20-Bond General Obligation Index. The discount rate was 6.68% and 6.09% as of June 30, 2025 and 2024, respectively.

Long-term Expected Return on Plan Assets

The long-term expected rate of return on REHP plan investments is determined using a risk premium review. This review compares the current relationship between fixed income and equity and their relationship over long periods of time to come up with an expected rate of return. Other variables considered in the expected rates of return are a reversion to the mean for each asset class. Best estimates of arithmetic real rates of return for each major assets class included in the target asset allocation are summarized in the following table:

12. POST EMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (continued)

Long-term Expected Return on Plan Assets (continued)

	June 30, 2026		June 30, 2025	
Asset Class	**Target Allocation**	**Long-term Expected Rate of Return**	**Target Allocation**	**Long-term Expected Rate of Return**
U.S Equity	42%	4.9%	42%	5.1%
International Equity	22%	10.6%	22%	5.5%
Real Estate	5%	3.8%	4%	4.7%
Public REITS	3%	0.0%	4%	0.0%
Infrastructure	4%	4.3%	4%	0.0%
Private Equity	1%	8.7%	1.0%	8.3%
U.S. Fixed Income	22%	2.5%	22%	1.6%
Cash Equivalent	1%	0.9%	1.0%	0.0%
Total	100%		100%	

Sensitivity of PENNVEST's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate

The following presents PENNVEST's 2025 and 2024, OPEB liability calculated using the discount rate of 6.68% and 6.09%, respectively, as well as what PENNVEST's OPEB liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate:

	1% Decrease 5.68%	**Current Discount Rate 6.68%**	**1% Increase 7.68%**
Total OPEB Liability as of June 30, 2026	**$ 28**	**$ 2,258**	**$ 22**

	1% Decrease 5.09%	**Current Discount Rate 6.09%**	**1% Increase 7.09%**
Total OPEB Liability as of June 30, 2025	$ 3,239	$ 2,889	$ 2,588

Sensitivity of PENNVEST's Proportionate Share of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate

The following presents PENNVEST's 2026 OPEB liability calculated using the assumed trend rates of 8.6% / -8.5%, grading down to 3.9%, as well as what PENNVEST's OPEB liability would be if it were calculated using a trend rate that is one percentage point lower or one percentage point higher than the current rate:

12. POST EMPLOYMENT BENEFITS OTHER THAN PENSIONS ("OPEB") (continued)

Sensitivity of PENNVEST's Proportionate Share of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate (continued)

	1% Decrease 7.6%/-9.5% Down to 2.9%	Current Trend 8.6%/-8/5% Down to 3.9%	1% Increase 9.6%/-7.5% Down to 4.9%
Plan's fiduciary net position as a percentage of the total			
Total OPEB Liability as of June 30, 2026	**$ 22**	**$ 2,258**	**$ 29**

The following presents PENNVEST's 2025 OPEB liability calculated using the assumed trend rates of 8.2% / 8.2% grading down to 3.9%, as well as what PENNVEST's OPEB liability would be if it were calculated using a trend rate that is one percentage point lower or one percentage point higher than the current rate:

	1% Decrease 7.2%/7.2% Down to 2.9%	Current Trend 8.2%/8.2% Down to 3.9%	1% Increase 9.2%/9.2% Down to 4.9%
Total OPEB Liability as of June 30, 2025	$ 2,519	$ 2,889	$ 3,333

PENNSYLVANIA INFRASTRUCTURE INVESTMENT AUTHORITY
NOTES TO FUND SCHEDULES
FOR THE YEARS ENDED JUNE 30, 2026 AND 2025
(In Thousands)

1. GENERAL

The accompanying schedules present the activity for two of the five funds maintained by PENNVEST: the Federal Clean Water State Revolving Loan Fund, which accounts for the financial activity resulting from capitalization grants received from the federal government under the State Revolving Loan Funds Program; and the Federal Drinking Water State Revolving Loan Fund, which accounts for the financial activity resulting from grants received from the federal government under the State Revolving Loan Funds Program. The activity resulting from the Commonwealth of Pennsylvania capital contributed to PENNVEST, and the 2010 and 1990 trust funds have not been presented in the schedules except for the transactions with these two funds. The schedules have been presented to comply with contractual arrangements with the funding sources.

2. BASIS OF ACCOUNTING

The accompanying schedules are presented using the accrual basis of accounting, which is described in Note 1 of PENNVEST's financial statements.

3. TRANSFER OF LOANS BETWEEN FUNDS

When PENNVEST transfers a loan receivable between the funds identified above, the loan transfer is recorded in contributed capital and the provision for loan losses related to the transferred loans is reflected as an adjustment to net position.

4. ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses was $22,309 and $3,966, for the Federal Clean Water State Revolving Loan Fund, and the Federal Drinking Water State Loan Fund, respectively, as of June 30, 2026, and $22,486 and $3,674, respectively, as of June 30, 2025.

5. COMMITMENTS & CONTINGENT LIABILITIES

As of June 30, 2026, PENNVEST had approved approximately $1,247,126 and $1,496,533 of Federal Clean Water and Federal Drinking Water loans, respectively, that had not yet been disbursed. The monies needed to fund these loans will be generated from contributions by the federal government or the Commonwealth of Pennsylvania, revenue bonds, and principal repayments on existing loans.

Amounts received or receivable from grant agencies are subject to audit and adjustments by grantor agencies, principally the federal governments. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenses that may be disallowed by the grantor cannot be determined at this time, although PENNVEST expects such amounts, if any, to be immaterial.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS' ON INTERNAL CONTROLS OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

The Board of Directors
Pennsylvania Infrastructure Investment Authority

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Pennsylvania Infrastructure Investment Authority (PENNVEST), a component unit of the Commonwealth of Pennsylvania, as of and for the years ended June 30, 2026 and 2025, and the related notes to the financial statements, and have issued our report thereon dated October 21, 2026.

Report on Internal Controls over Financial Reporting

In planning and performing our audit of the financial statements, we considered PENNVEST's internal controls over financial reporting (internal controls) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of PENNVEST's internal controls. Accordingly, we do not express an opinion on the effectiveness of PENNVEST's internal controls.

A *deficiency in internal controls* exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal controls, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal controls was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal controls that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal controls that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether PENNVEST's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal controls and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal controls or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal controls and compliance. Accordingly, this communication is not suitable for any other purpose.
