Living Things

A Living Thing is something that grows, changes, and needs food, air, and water to survive.

Examples of Living Things

Dandelion

Grass

American Robin

Monarch Caterpillar

White-tailed Deer

Cottontail Rabbit

Nonliving Things

A Nonliving Thing is something that does not grow and change, or needs food, air, or water to survive.

Observe A Living Thing

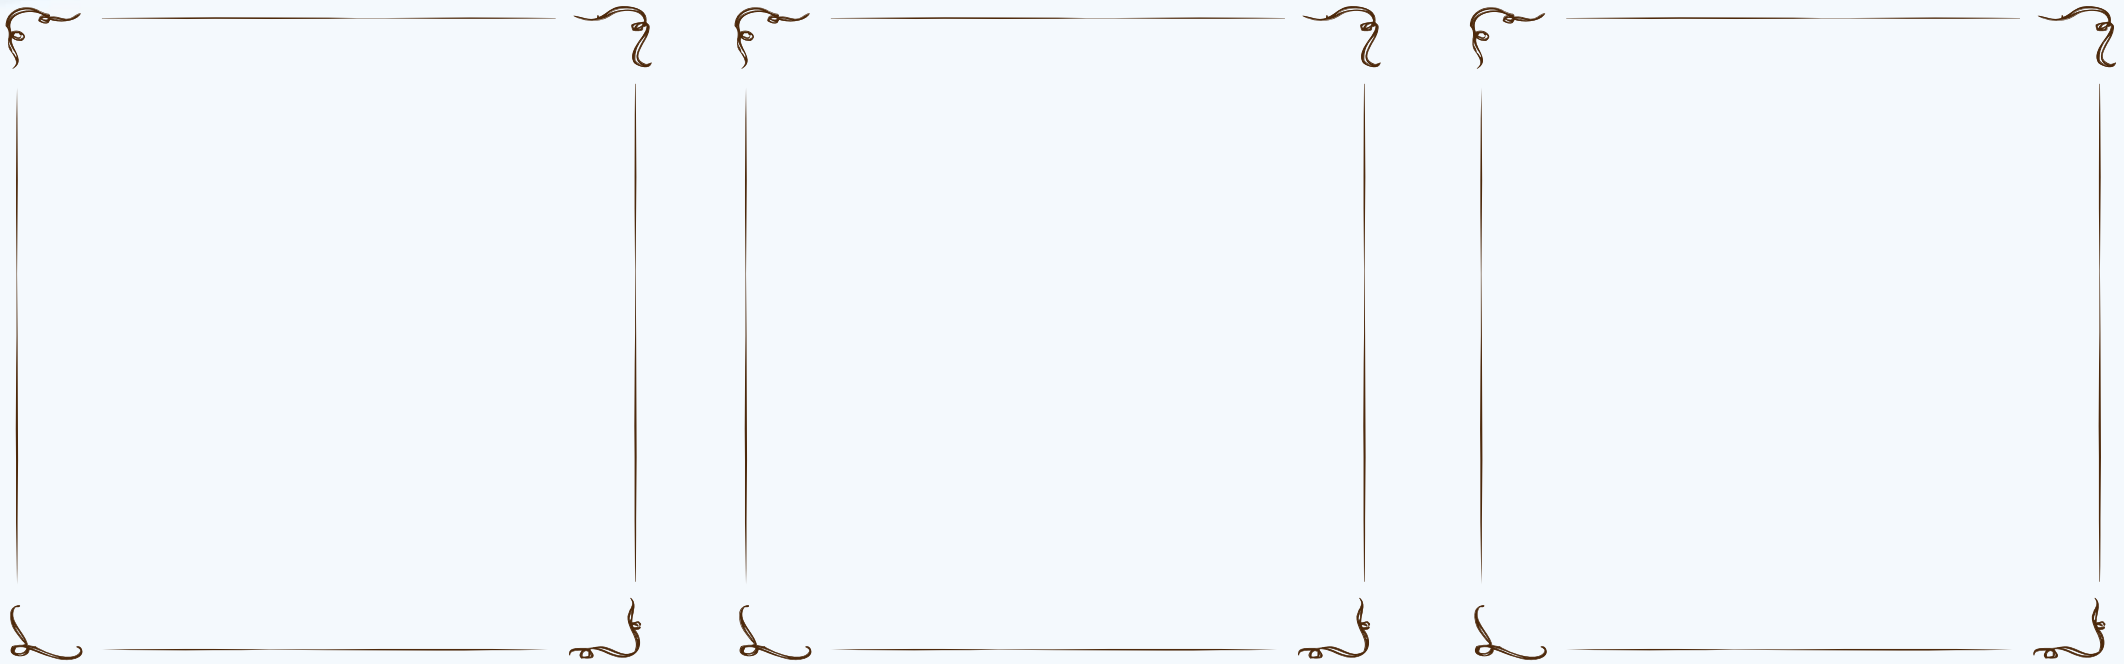

Look for a living thing in
your backyard and
watch (observe) what it
does, at a safe distance,
for 5 minutes.

Photo: Mandy Marconi

Directions: Draw 3 pictures of the living thing you observed and check the box of each action that you saw.

Observation 1

Observation 2

Observation 3

I saw the living thing eat or drink

I saw the living thing breathe in air
