BULLETIN

No. 1484
April 11, 2012

RAW MILK SAMPLE QUANTITY

Section 143.23 of the Regulations of the Milk Marketing Board requires that at least a 35 milliliter sample be taken from each lot of milk for use by the plant or laboratory in all quality and composition determinations. Thirty five milliliters is approximately 3/4 of most sample vials.

The Board has received information that some weigher/samplers have been delivering samples with insufficient volume to conduct proper tests.

Those employing weigher/samplers are asked to remind weigher/samplers of the required sample volume. If the issue persists, the Board will begin taking enforcement action.

PENNSYLVANIA MILK MARKETING BOARD

Tim Moyer, Secretary
